the diuretic that entirely obviates the need for potassium supplements

'Moduretic' is a completely new diuretic from Merck Sharp & Dohme that induces a highly effective diuresis as well as helping the body to *conserve* its natural balance of potassium.
'Moduretic' offers the physician the means of treating patients with a diuretic while avoiding the limitations imposed by potassium supplements. Indeed, 'Moduretic' conserves body potassium so effectively that potassium supplements are contra-indicated.

'Moduretic' is available as peach-coloured, diamond-shaped tablets containing 5 mg amiloride hydrochloride/MSD and 50 mg hydrochlorothiazide/MSD.

Detailed information is available to physicians on request.

Single or return? The problem of the relapsing schizophrenic has become more acute in these days of early discharge from hospital. It is probably aggravated by failure of the unsupervised patient to take the prescribed antipsychotic medication. This default may be triggered by distressing side-effects and/or by a wearisome dosage schedule. ORAP (pimozide) is a new antipsychotic drug unrelated to phenothiazine or butyrophenone. It offers a degree of activity comparable with fluphenazine but virtually no Parkinsonian effects or sedation at recommended dosages. Further, ORAP is inherently long acting and a once-a-day dosage regime has been found most satisfactory. ORAP tablets contain 2 mg. pimozide. Full information on request.

QUIET..

RIGHT THROUGH THE NIGHT

Sefton Automatic Peritoneal Dialysis equipment means complete cycling of treatment —

WITHOUT DISTURBING THE PATIENT

WITHOUT DEMANDING ALL THE ATTENTION OF NIGHT STAFF

WITHOUT INTERFERING WITH THE PEACE OF A SLEEPING WARD

Patients prefer Sefton treatment

It dispenses treatment with greater patient comfort; the fluid is warmed to blood heat before it flows into the patient. The machine never forgets or ever alarms the patient, if he knows that 'fail-safe' mechanisms protect him at all times.

Doctors prefer the Sefton machine efficiency

Infection risk is reduced to the minimum by using only one sterile fluid circuit; eliminating the many connections and reconnections of the manual system. The cycling of treatment is completely automatic and the fluid intake is accurately measured by weight. Inflow to the patient is by gravity. The retention period and the drainage period are under positive control.

Matrons prefer Sefton time saving

The Sefton Equipment allows the nurse to get on with nursing without the routine mechanical dispensing of manual P.D.

Pharmacists prefer Sefton cost saving

With the Sefton-WLN Special Autoclave there are no bulky bags of fluid to store. Great cost savings are achieved by the manufacture of fluid in the hospital.

The Uncanny Scot

Thomsons hand-build T-Line Caravans in Scotland. And being canny Scots we build them very carefully, so that when you go touring in your T-Line you won't have a care in the world.

The end products of our meticulous approach are the uncanny attributes of the T-Line. The handling, for instance. Scientific weight distribution, independent suspension, automatic over-run brakes, and a rigid steel chassis make for impeccable road manners.

Just think how therapeutic getting away from the stress and strain of your practice would be. With a T-Line you could do just that at any time, with the minimum of prearrangement and a maximum of enjoyment—be it for weekends, holidays or just the occasional day away from it all!

So see your local dealer. He'll show you what value for money is. And you'll get real service from him, and from us.

Wherever you go, T-Line is right behind you.

The New General Practice 2

What important developments are there in General Practice? Does the General Practice Team work successfully? What is the Family Doctor's future role in the Hospital Service? These and other questions are answered in *The New General Practice 2* which, published two years after the first volume in this series, also deals with topics such as the use of computers, plans for the new towns, and Scandinavian developments in general practice. This second volume contains 27 articles published in the *B.M.J.* in the last two years. The introduction has been written by Professor J. D. E. Knox, Professor of General Practice at Dundee University.

PRICE **£1·25** (U.S.A. $3·50), *including postage*

Diseases of the Joints

Arthritis and rheumatism are common complaints, even if patients are often vague about the exact meaning of the terms they use. In the last few years the diagnosis of joint disorders has become more exact, while the introduction of local and systemic steroid therapy and the powerful non-steroidal anti-inflammatory drugs has revolutionized treatment. In an attempt to bring doctors up to date in this field, the *B.M.J.* published in 1969 a series of short articles giving practical advice on the common disorders of the joints. The articles have now been revised by their authors and collected together to form this handbook on the management of arthritis.

PRICE **75p.** (U.S.A. $2·00), *including postage*

Road Accidents and the Family Doctor

Road accidents are now acknowledged to be one of the major epidemics of our time. It has been estimated that many accident deaths could be saved by skilled treatment at the site of the accident, and recently doctors in Britain and abroad have been playing an increasingly active part in this. This booklet, which reprints a series of articles which appeared in the *B.M.J.*, contains contributions on organization and medical equipment, the management of soft-tissue injuries, resuscitation, fractures of the spine, and extrication of persons trapped in a vehicle. The introduction is written by Mr. Norman Capener, Chairman of the Medical Commission on Accident Prevention.

PRICE **50p.** (U.S.A. $1·75) *including postage*

How to win over the young protest movement.

This is the portrait of a beautiful lady at medicine time. She's certainly all scene and very much heard.

The doctor's problem of economically prescribing a broad spectrum antibiotic is easily solved with 'Imperacin'.

But mother has to administer it.

ICI has made 'Imperacin' especially palatable in its syrup form.

'Imperacin' is economical, too.

It is available in 60 ml. bottles as well as 100 ml. to avoid wasteful prescribing.

And it's a product of quality. ICI quality, British made, backed not only by years of research but years of production.

That's why 'Imperacin' is now the most widely prescribed of all the tetracyclines.

'Keflex' is the oral antibiotic that could resolve these problems – combining bactericidal action, broad-spectrum activity, *and very high urine levels.* With care, 'Keflex' may be used even in patients with renal damage.

Its rapid action together with almost complete absorption, plus a very low incidence of gastro-intestinal side effects are the reasons why so many patients with urinary infections recover so quickly with so few problems following 'Keflex' therapy.

BRUFEN
makes life easier for the arthritic patient

In the treatment of arthritis, Brufen relieves pain, stiffness and swelling. By extending the range of pain-free movement, Brufen provides the improved joint flexion essential for progressive improvement in functional capacity.

Because Brufen is so well tolerated, dosage can be adjusted in the individual patient to achieve the best response. There is little likelihood of having to reduce dosage or withdraw treatment because of side-effects.

These are the facts about Brufen – it is highly effective, dosage is simple and flexible and it has a singularly low incidence of side-effects. These are the very real benefits for your arthritic patients when you prescribe Brufen. Brufen is available as tablets, each containing 200 mg of ibuprofen. Full information is available from Medical Products Marketing, Boots Pure Drug Co. Ltd., Nottingham, England.

What is the word for emotional distress?
The presenting symptoms? "Can't sleep . . . irritable . . . no appetite . . . tired . . . aches and pains"—consultation after consultation.
The task? To penetrate behind the facade to the underlying condition.
The aim? To make the patient feel better quickly and reveal the problem, without unnecessary consultations.
Tranquillizers or hypnotics may deal with part of this aim, but only part.
Prothiaden can meet all the requirements. It is rapidly effective in both anxiety and depression.
One ingredient, a single-strength capsule means straightforward dosage.
Prothiaden is well tolerated even by the elderly.
Prothiaden can mean trouble-free treatment of anxiety, depression, in fact any manifestation of emotional distress.

from asthmatic attack

The unique mode of action of disodium cromoglycate offers the asthmatic patient outstanding benefits. A prophylactic treatment, it prevents the onset of asthmatic episodes - thus minimising long-term damage to lung tissue. Freedom from asthma attacks permits a happier, more normal life for the asthmatic patient.

Published clinical reports[1-22] confirm that with INTAL COMPOUND, the incidence and severity of acute attacks is considerably reduced - even in patients on conventional therapy such as bronchodilators, antihistamines and corticosteroids. Less time is lost from work or school, exercise tolerance is improved and a consistent clinical comment on disodium cromoglycate has been the total absence of serious side effects.

INTAL COMPOUND - supplied in SPINCAPS (each containing 20 mg disodium cromoglycate, and 0·1 mg Isoprenaline Sulphate BP in powder form, together with an inert carrier). For use in a special insufflator - SPINHALER.

Before 'Eraldin', he'd have thought twice about going

In angina, 'Eraldin' makes the going easier for patient and doctor

Easier for the Patient. His confidence is restored because his heart is protected against the effects of stress. Emotional situations no longer herald anginal attacks. Although he still knows his physical limits, these have been extended – by 'Eraldin'.

Easier for the Doctor. 'Eraldin', the latest, most advanced long-term protection against angina, shields the heart – and the heart alone – against excessive sympathetic stimulation. This cardioselectivity permits protection in a broader group of anginal patients. Management is straightforward and dosage is on a simple twice or thrice daily basis.

How many of the drugs you prescribe are as well documented as Alka-Seltzer?

TRADE MARK

In the booklet 'A Scientific Assessment of Alka-Seltzer' no less than forty-three sources of reference are quoted – and that represents only part of the documentation available on the product. Based on these references the facts about Alka-Seltzer are presented in explicit detail:

Physico-chemical studies–on pH, solubility, ionisation and fat-solubility, antacid and buffering action *in vitro*.

Pharmacological studies–on antacid and buffering action *in vivo*, effect on gastric emptying, absorption, salicylate blood levels, excretion.

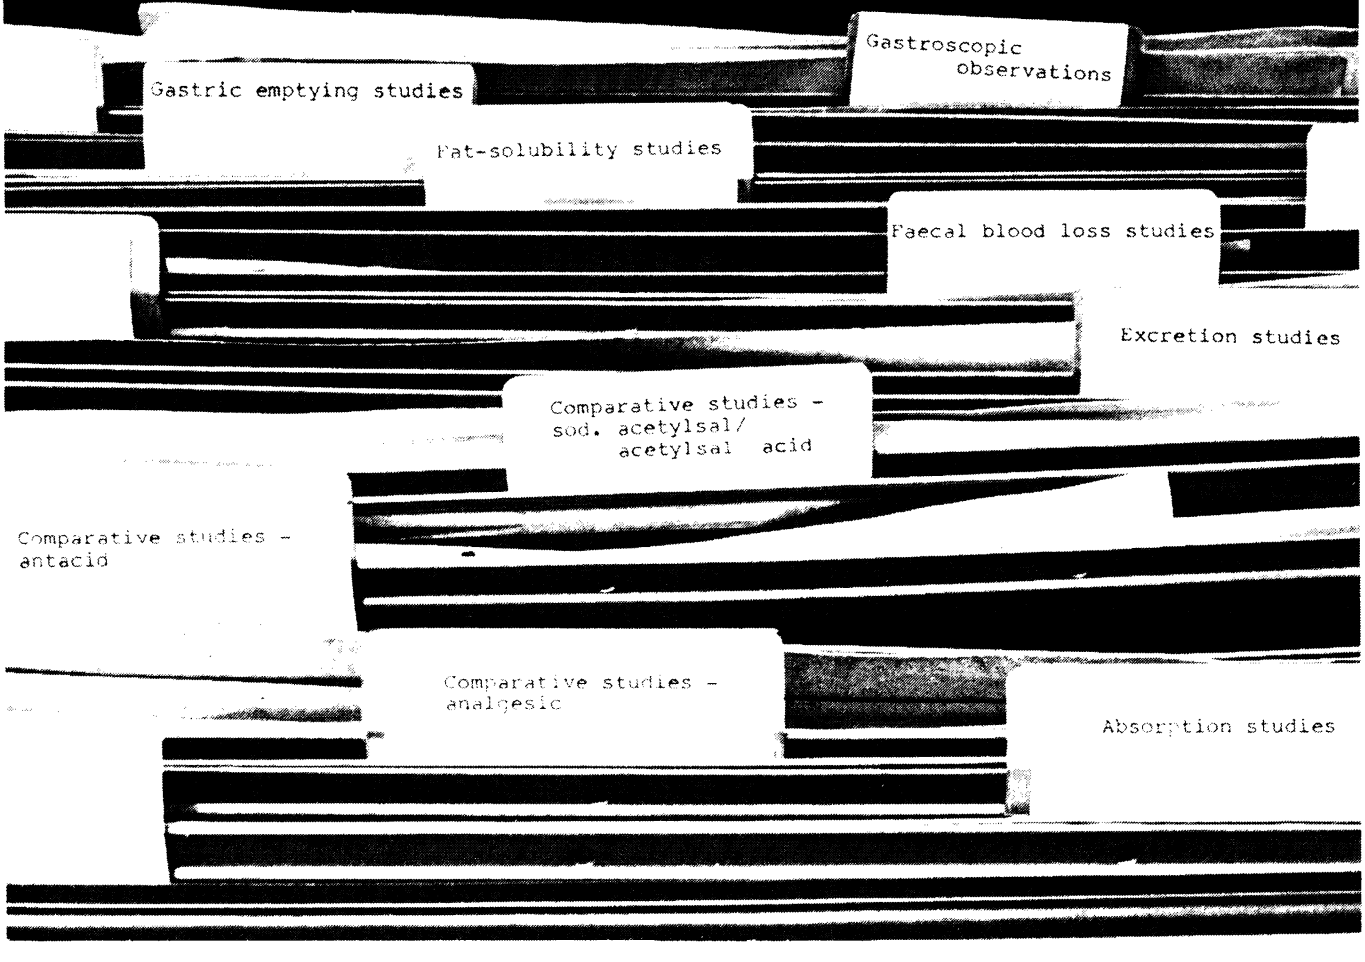

Therapeutic studies–on its antacid and analgesic properties.

Safety studies–on the difference between sodium acetylsalicylate and acetylsalicylic acid, gastroscopic observations, faecal blood loss, and special studies related to alcohol ingestion.

The total picture that emerges is that of a safe and effective home remedy which is as well documented as many ethical prescription items.

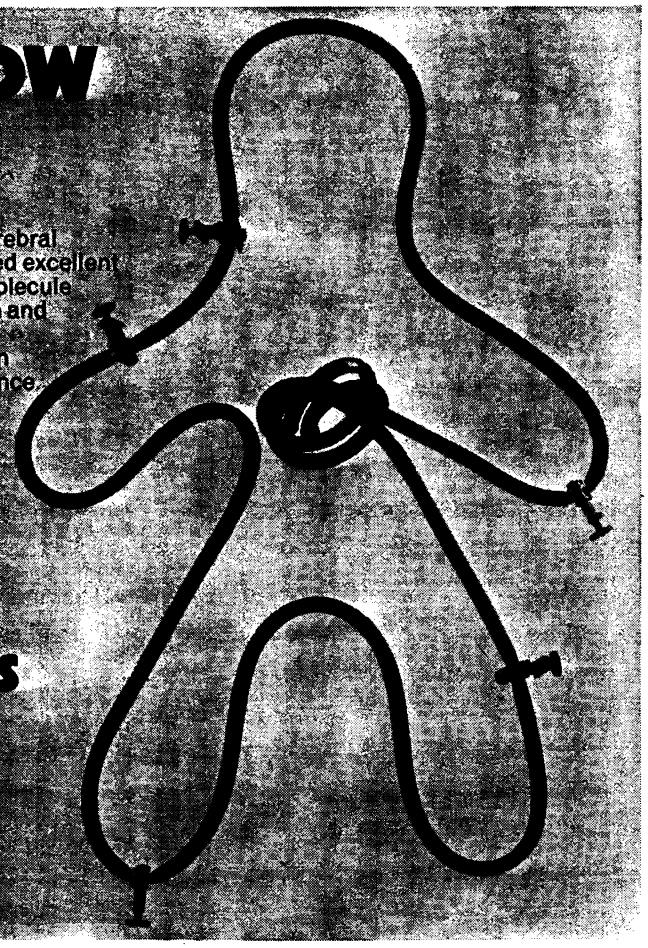

For every doctor who is concerned about the subject of self-medication 'A Scientific Assessment of Alka-Seltzer' makes instructive reading. Copies available from: Dept G 1, Miles Laboratories Limited, Stoke Court, Stoke Poges, Bucks.

Let the blood flow through

In the treatment of ischaemia due to intermittent claudication, cerebral arteriosclerosis and vasospastic disorders, Bradilan® has achieved excellent results. Because Bradilan employs tetranicotinoylfructose, the molecule of which is gradually hydrolised in the intestine, release is smooth and even – with no peaks or troughs. Consequently, efficient and prolonged vasodilation is maintained, with less risk of over dilation in flush areas. For the same reason, headaches are a rare occurrence. Bradilan acts directly on vessel walls and is especially indicated when ischaemia is due to vasospasm. Ideally, treatment should be continued for at least 12 weeks so that progress can be realistically evaluated.

Chances are you have over 100 Psoriatics on your list... ...Alphosyl could help them.

A great many people in Britain suffer from Psoriasis. On average, more than 100 for every G.P. in the country. And that's why every G.P. should know about Alphosyl.

Alphosyl Lotion is the most widely prescribed treatment specifically for Psoriasis. Patients get complete clearing or a marked improvement without systemic reactions, without uncomfortable restrictive dressings and without serious side effects or contraindications.

Alphosyl Lotion is the primary treatment, for use all over the body. And its effectiveness is backed up by the Cream and Application PC. The Cream is particularly effective in the intertrigenous areas, and Application PC removes scales from the scalp and prepares the head for treatment with the Lotion.

Alphosyl therapy (Lotion, Cream and Application PC) can be adjusted to suit the patients individual needs . . . or preferences.

Alphosyl is available as a 5% refined alcoholic extract of coal tar and allantoin (2%) in a Cream and Lotion. Alphosyl Application PC is a unique combination of coal tar extract (5%) and hexachlorophane (1%).

Clinimycin 500 mg Tablets

Tailor-made for acute on chronic bronchitis

A new 500 mg tablet has been introduced in the Clinimycin range. This is particularly valuable in cases of acute on chronic bronchitis where a regimen of 500 mg oxytetracycline three or four times daily is indicated. With this new 500 mg strength Clinimycin tablet you can, for the first time, prescribe each 500 mg dose in a single tablet. This makes life much easier for the patient and ensures that the correct dosage is more likely to be taken.

"My whole face hurts"

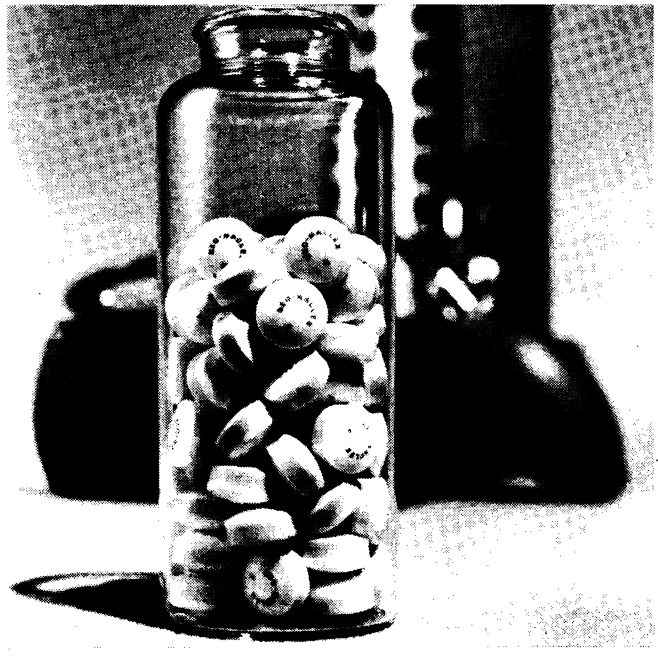

Frank Adams has sinusitis. He gets it nearly every time he gets a cold. This time his doctor's trying Ceporex. With Ceporex you have a broad-spectrum antibiotic that acts fast and is well tolerated. In sinusitis, it usually eradicates the bacterial infection, with the subsequent relief of both the congestion and pain. Ceporex kills both gram-positive and gram-negative bacteria – that's why it's so suitable. It's also very effective against penicillin-resistant staphylococci and can be the logical alternative if penicillin-hypersensitivity is suspected.
Ceporex (cephalexin) gives high serum levels within an hour of administration and penetrates fast to the tissues. So this time – make your first choice Ceporex.

Neo-NaClex-K for the safer management of all grades of hypertension

Neo-NaClex-K is a unique two-layered bendrofluazide/potassium chloride tablet which is helping doctors to treat all grades of hypertension more effectively and safely. In mild cases it can be used alone to lower blood pressure. And in severe cases it can be used in conjunction with other more potent drugs to enable the dosage and side effects of the latter to be substantially reduced. Neo-NaClex-K is particularly well-suited to the long-term management of hypertension in the elderly because side effects are very rare, and the special formulation of the tablet ensures that no great concentration of the potassium chloride is reached in the body at any one time.

Why **Tricloryl Syrup** works like a dream

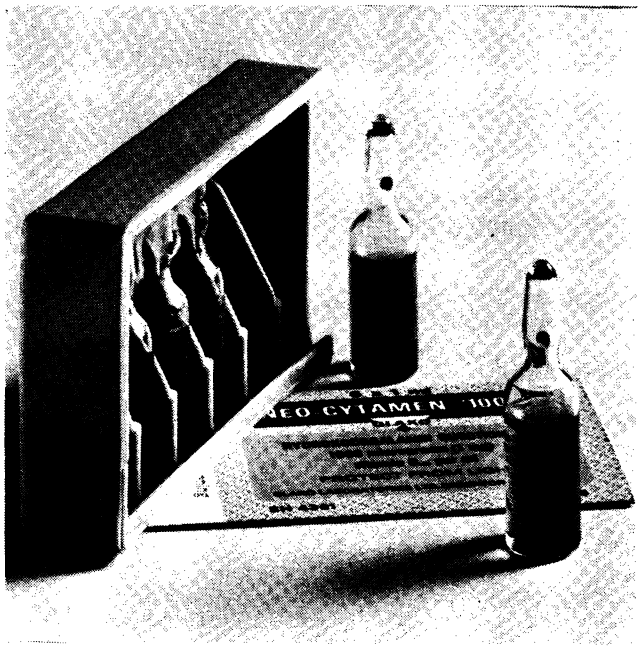

It's a very safe hypnotic.
It induces really sound, physiological sleep.
It's not a barbiturate.
It rarely causes distressing confusion.
It usually lets patients wake up without 'hangover'.
So it is particularly useful in treating the elderly and children.
And it isn't expensive either.

One **Neo-Cytamen** injection treats pernicious anaemia for two to three months

Laboratory reports have shown that higher and more persistent B_{12} serum levels are obtained with hydroxocobalamin (Neo-Cytamen) than with cyanocobalamin.[1] A report of a study of patients on maintenance treatment for pernicious anaemia concluded that "1,000 micrograms of hydroxocobalamin every three months should be adequate."[2] From both biological and therapeutic aspects, hydroxocobalamin is preferable to cyanocobalamin and should therefore become the standard preparation for the treatment of vitamin B_{12} deficiency."[1]

Don't let tinea pedis get a foothold in your practice. Prescribe **Tinaderm Cream** and **Powder** from the start.

They work together. The cream brings swift relief from burning, itching and discomfort, followed by prompt clearance of lesions. While the powder dries up perspiration and guards against re-infection.

Fungicidal to all dermatophytes
Tinaderm Cream and Powder contain 1% tolnaftate – an anti-fungal agent which has proved outstandingly successful in treating dermatophyte infections, like tinea pedis. Tolnaftate is not a keratolytic agent. It *penetrates* lesions to kill the infecting fungi.

Prompt relief, rapid clearance
Tinaderm gives outstanding results, often within two to three weeks, regardless of the duration of the infection. Relief from pruritus and discomfort is notable, usually within 48 hours.
Patients with acute and chronic tinea or dermatophyte infections, unsuccessfully treated with other topical preparations, often respond excellently to Tinaderm.

PRACTICAL PSYCHIATRY

Most doctors who have been qualified for more than ten years received very little training in psychiatry as medical students. Yet psychiatric problems confront all those practising clinical medicine. The articles collected together in this book were written for the *B.M.J.* to give practical advice to general practitioners and others on how to recognize and cope with the more common forms of mental disorder. Many patients are anxious or depressed; when should the doctor try to do something about it? This is the sort of question the authors set out to answer. As far as possible they have avoided the use of psychiatric jargon, and case histories have been used freely to illustrate the points made. Any doctor who feels ignorant about psychological medicine will find here a readable introduction to the practical aspects of clinical psychiatry.

To commence 1st August, 1971. The scheme of General Professional Training is in accordance with the recommendations of the Royal Commission on Medical Education 1965-68.

There is a rotation of four S.H.O. posts over two years through in-patient departments as follows: Obstetrics, six months; General Medicine and Dermatology, six months; Paediatrics, three months; Geriatrics, three months; Accident and Emergency, three months; and a period of three months during which the S.H.O. will (a) act as locum for his colleagues holidays, and (b) undertake study of a subject of his particular interest. Over the two year period, one half-day per week will be allocated for attendance at specialist clinics, e.g. Rheumatology, Psychiatry, Ophthalmology, etc., and to give opportunity to visit general practices in the area.

Modern married accommodation is provided during the two years of hospital appointments.

A third year will be spent as a trainee in one or more general practices in the area.

During the three year period, General Practitioners will organise a programme of evening tutorials with meetings and seminars on Human Behaviour and Social Medicine, with a variety of psychology topics. There will also be an intensive course on practice organisation and methods early in the trainee year.

Further information can be obtained on request from the Secretary, Norfolk & Norwich Institute for Medical Education, Norfolk & Norwich Hospital, Norwich, Norfolk, NOR 53A.

The hospital may be visited and General Practitioner teachers may be met. Requests should be addressed to the Secretary, Norfolk & Norwich Hospital, Norwich, Norfolk, NOR 53A.

Applications with full particulars and the names of two referees should be sent to the Group Secretary, Norwich, Lowestoft and Great Yarmouth Hospital Management Committee, St. Stephen's Road, Norwich, by 1st May, 1971.

Provisional interviews will be held on Wednesday 19th May, 1971, from 2.00 p.m. (44339) 11

LONDON SCHOOL OF HYGIENE & TROPICAL MEDICINE

TUC CENTENARY INSTITUTE OF OCCUPATION HEALTH

offers an attractive appointment for a doctor aged about 30-35 interested in occupational health to undertake a research survey into existing and planned occupational health services in hospitals in England and Wales. Hospital Memorandum (71) 27 "Care of the Health of Hospital Staff" refers.

This project, which will take 3 to 5 years to complete, needs a doctor with experience as a registrar or senior registrar, and the post would suit someone already in occupational health or wishing to enter this field.

Salary according to age, qualifications and experience, but probably in the Clinical Senior Lecturer range £3,635-£5,324.

Applications and requests for further information to Dr. Peter Taylor, Deputy Director of the Institute at Keppel Street, London, WC1E 7HT. 14-1

MEDICAL RESEARCH COUNCIL
Tuberculosis and Chest Diseases Unit
Brompton Hospital

Applications are invited from medical graduates for a vacancy on the scientific staff of this Unit to assist with the initiation and development of a variety of research projects into the aetiology, epidemiology and therapy of chest diseases. The Unit's programme includes investigations in Britain into tuberculosis, carcinoma of the bronchus, sarcoidosis, asthma and other non-tuberculosis conditions, and into tuberculosis abroad, and the organisation and evaluation of medical services.

The post is particularly suitable for an experienced research worker interested in the possibility of a career in medical research. Experience in chest diseases, epidemiology or social medicine is, however, an advantage. Less experienced candidates seeking further training and broader experience can apply. Honorary clinical status within the Hospital and an honorary appointment in the Department of Medicine in the Institute of Diseases of the Chest are possible for a candidate with appropriate experience. Salary according to age, qualifications and experience, plus London allowance; superannuation provision.

Application, giving full details of qualifications, experience and the names of three referees should be sent to the Director, MRC Tuberculosis and Chest Diseases Unit, Brompton Hospital, Fulham Road, London, S.W.3. (H9113) 14-1

COUNCIL FOR POSTGRADUATE MEDICAL EDUCATION

DEPUTY SECRETARY

Applications are invited from Registered Medical Practitioners for appointment to the new post of Deputy Secretary to the recently constituted council for Postgraduate Medical Education in England and Wales.

Experience in the organisation of Postgraduate Medical Education is desirable and a knowledge of developments in vocational training for general practice would be advantageous.

The Council's function is to co-ordinate and stimulate the organisation and development of Postgraduate Medical Education in England and Wales and to provide the Government with an authoritative source of advice on these matters. The successful applicant will work closely with the Secretary in planning and advising on the implementation of the Council's policies. This will entail consultation with individuals and organisations active in this field at a national level. It is also envisaged that the Deputy will spend a reasonable amount of time in the regions in order to ensure effective liaison between the Council and Regional Postgraduate Committees and other regional and local interests. The post offers the opportunity to undertake new and challenging responsibilities in shaping the development of Postgraduate Medical Education.

General conditions of service will be similar to those for Hospital medical staff in the NHS. Ths salary will be on a personal basis and will depend on previous experience but is expected to be within the range of £4,512-£6,330. The Council would consider an appointment on a secondment basis.

Applications with the names of three referees should be submitted to the Secretary of the Council, Dr. J. O. F. Davies, from whom further particulars may be obtained, at Royal College of Obstetricians and Gynaecologists, 27 Sussex Place, Regent's Park, London, N.W.1. The closing date for applications is May 15, 1971.

Following the Twelfth Report of the Review Body, new salary scales have been approved. These came into force on April 1, 1970. The scales are set out below:

HOUSE OFFICER: Each post in this grade shall be tenable for six months. £1,626 per annum for the posts held during the first year; £1,755 per annum for posts held during the second year; £1,884 per annum for posts held during the third and subsequent years, subject to full registration.

Deductions of £177 per annum in respect of lodging only for voluntary residence.

SENIOR HOUSE OFFICER: £2,040 per annum in the first year; £2,184 per annum in the second year; £2,328 per annum in the third or subsequent years.

Deductions of £210 per annum in respect of lodging only for voluntary residence.

REGISTRAR: £2,328 per annum x £144(3) x £126(1) — £2,886.

Deductions of £210 per annum for those with remuneration at the first incremental point on the scale, and £243 per annum for those on the second and subsequent points will be made in respect of lodging only for voluntary residence.

On assimilation to the scale for Registrars, one increment and one only shall be given for any year or part of a year in excess of two spent previously in the senior house officer grade.

Allowances at rates up to £183 per annum shall be payable to house officers, senior house officers and registrars occupying posts approved for such allowances in peripheral hospitals.

SENIOR REGISTRAR: £2,760 per annum x £126(1) x £174(1) x £177(1) x £174(1) x £177(1)-£3,588.

Deductions of £270 per annum in respect of lodging only for voluntary residence.

On assimilation to the salary scale for senior registrars, increments to a maximum of two shall be given for each year or part of a year in excess of three spent previously in the registrar grade.

MEDICAL ASSISTANT: £2,520 per annum x £144(1) x £156(3) x £144(10)-£4,572.

Deductions of £270 per annum in respect of lodging only for voluntary residence.

CONSULTANT: £4,512 per annum x £201(8) x £210(1)-£6,330.

Deductions of £420 per annum in respect of lodging only for voluntary residence.

COMPULSORY RESIDENCE: The Terms and Conditions of Service of Hospital Medical and Dental Staff state:

173. A practitioner who is required as a condition of his appointment to reside in a hospital shall be provided with lodging without charge, except where the practitioner elects to occupy a house, flat or apartment for which a rental is appropriate.

All National Health Service hospital appointments are in accordance with the Terms and Conditions of Service of Hospital Medical Staff.

Further details concerning standards of residential accomodation, telephone charges, removal allowances, study leave and other matters may be obtained from the Hospital Secretary; or by B.M.A. members from the Secretary, British Medical Association. November 1970

ONLY A FEW HOURS AWAY

CANADA

with years of growth ahead

Since 1867, when Canada was founded, enterprising and resourceful people from many lands have built this big, young country into one of the world's fastest developing industrial nations.

With a modern technological economy, sharing in the continuing economic development of North America, Canada already has one of the highest standards of living in the world. Yet Canada has its own distinctive way of life.

Rich in resources, largest country in the Commonwealth, second largest in the world, Canada has years of even greater growth ahead. And, of course, Canada is only a few hours away by air – six days by sea.

PA Management Consultants Limited

Associate Director

Clinical Research U.S.A.

The Medical Research Laboratories of this international company have gained a reputation for a highly professional approach. Members of the Department of Clinical Research are given every encouragement to publish and attend outside meetings whenever possible. The work of the department is stimulating and an Associate Director is involved with various projects from their inception, working closely with colleagues from other disciplines engaged in basic research. Candidates may presently be working in a University Department of Medicine and/or Therapeutics but in any case will have had extensive experience in general medicine. An interest in drug metabolism or biochemistry would be advantageous as would a higher qualification and experience in the industry. The laboratories are situated in one of the most pleasant rural areas of the Eastern Seaboard with easy access to a full range of amenities. Full removal expenses will be paid. A starting salary will be negotiated within the range $24,000 to $28,000.

The Council of Management of the Scottish Hospital Centre invite applications for the post of DIRECTOR.

The function of the Centre is to promote and conduct research into the functional design and operation of hospitals and hospital equipment, to exhibit hospital furniture and equipment and to maintain a reference library. The Director, supported by a wide range of professional staff, will be required to advise the Council on the activities of the Centre and direct the programme of work to be undertaken.

The successful candidate, who may be recruited from any discipline, will be expected to produce evidence of initiative, the ability to plan programmes of investigative work and have an extensive background of relevant experience. Essential requirements are the ability to co-ordinate and control the activities of a multi-professional research staff in the health services field.

Salary will be within the range of £4,500-£5,500 depending on the experience and qualifications of the successful applicant.

Applications with the names of three referees should be submitted by Friday 21st May, 1971 to the Secretary, Scottish Hospital Centre, Crewe Road South, Edinburgh, EH4 2LF, from whom further details of the post should be obtained.

ST. ANDREW'S HOSPITAL
NORTHAMPTON

Medical Director: James Harper M.B., F.R.C.P. (Edin), D.P.M.

St. Andrew's Hospital is a private psychiatric hospital situated in 130 acres of parkland in the county town of Northampton. In general, patients are admitted to Wantage House, a reception unit in the grounds which is equipped for the investigation and treatment of all forms of mental and nervous illness. In addition, there is accommodation mainly in private rooms, both in the main hospital and in various villas, for longer-stay patients and geriatric patients.

The hospital's amenities include Gloucester House, which comprises an Occupational Therapy department, a swimming pool, a squash court and library, while in the grounds there are tennis courts, a nine-hole golf course, etc.

Fees range from £31.50 per week, and subscribers to private medical insurance schemes such as British United Provident Association and Private Patients Plan, may claim benefit in respect of these charges.

Further particulars may be obtained from the Medical Director, St. Andrew's Hospital, Northampton (Tel. Northampton 34354), who can be seen in consultation by appointment, either at the hospital or at 55 Harley Street, London, W.1. 99

When you diagnose Tonsillitis, you're in Penbritin Territory

The right-first-time antibiotic for Upper Respiratory Infections

Penbritin is right because it destroys penicillin-sensitive bacteria as effectively as penicillin V or G, and also kills other respiratory pathogens sensitive to broad-spectrum antibiotics only.

Penbritin is right because the sensitivity of respiratory pathogens is unchanged after 9 years' extensive use. In contrast, some bacteria, especially streptococci, now show a much reduced sensitivity to tetracyclines.

Penbritin retains the safety of penicillin which makes it an ideal treatment for children's infections and other situations where safety is a prime consideration. This is an advantage not shared by any other broad-spectrum antibiotic.

Two syrups, capsules and tablets enable you to prescribe Penbritin in the right form for each patient. Twenty papers involving 400 patients and showing an overall success rate of 95% confirm Penbritin as the right-first-time antibiotic in upper respiratory infections.

Dosage: Adults and children over 10 yrs. 250 mg q.i.d. a.c.
Children under 10 yrs. 125 mg q.i.d. a.c.

Contra-indication: Penicillin allergy.

Side-effects: As with other penicillins.

Further information is available on request.

THE QUEEN'S AWARD TO INDUSTRY 1966 1970

DOCTORS RECOGNISE THE EFFECTIVENESS OF VENTOLIN THERAPY.

Over 30 published references in 18 months confirm the effectiveness of Ventolin (salbutamol), and the weight of favourable comment continues to grow.

". . . it seems clear, therefore, that because of its effectiveness in producing bronchodilatation, its long duration of action, its lack of cardiovascular stimulant action, and its lack of tendency to produce falls in PaO_2, salbutamol is the most effective drug at present available by aerosol inhalation for the relief of asthmatic airway obstruction."
Brit. med. J. (1970), **2,** 23.

PATIENTS PREFER VENTOLIN THERAPY.

Following a double-blind, cross-over sequential trial in general practice, comparing salbutamol (100mcg per puff) with isoprenaline sulphate (100mcg per puff), the author concluded: "My trial has shown unequivocally that patients prefer salbutamol to isoprenaline."
Practitioner, (1970) **205,** 213.

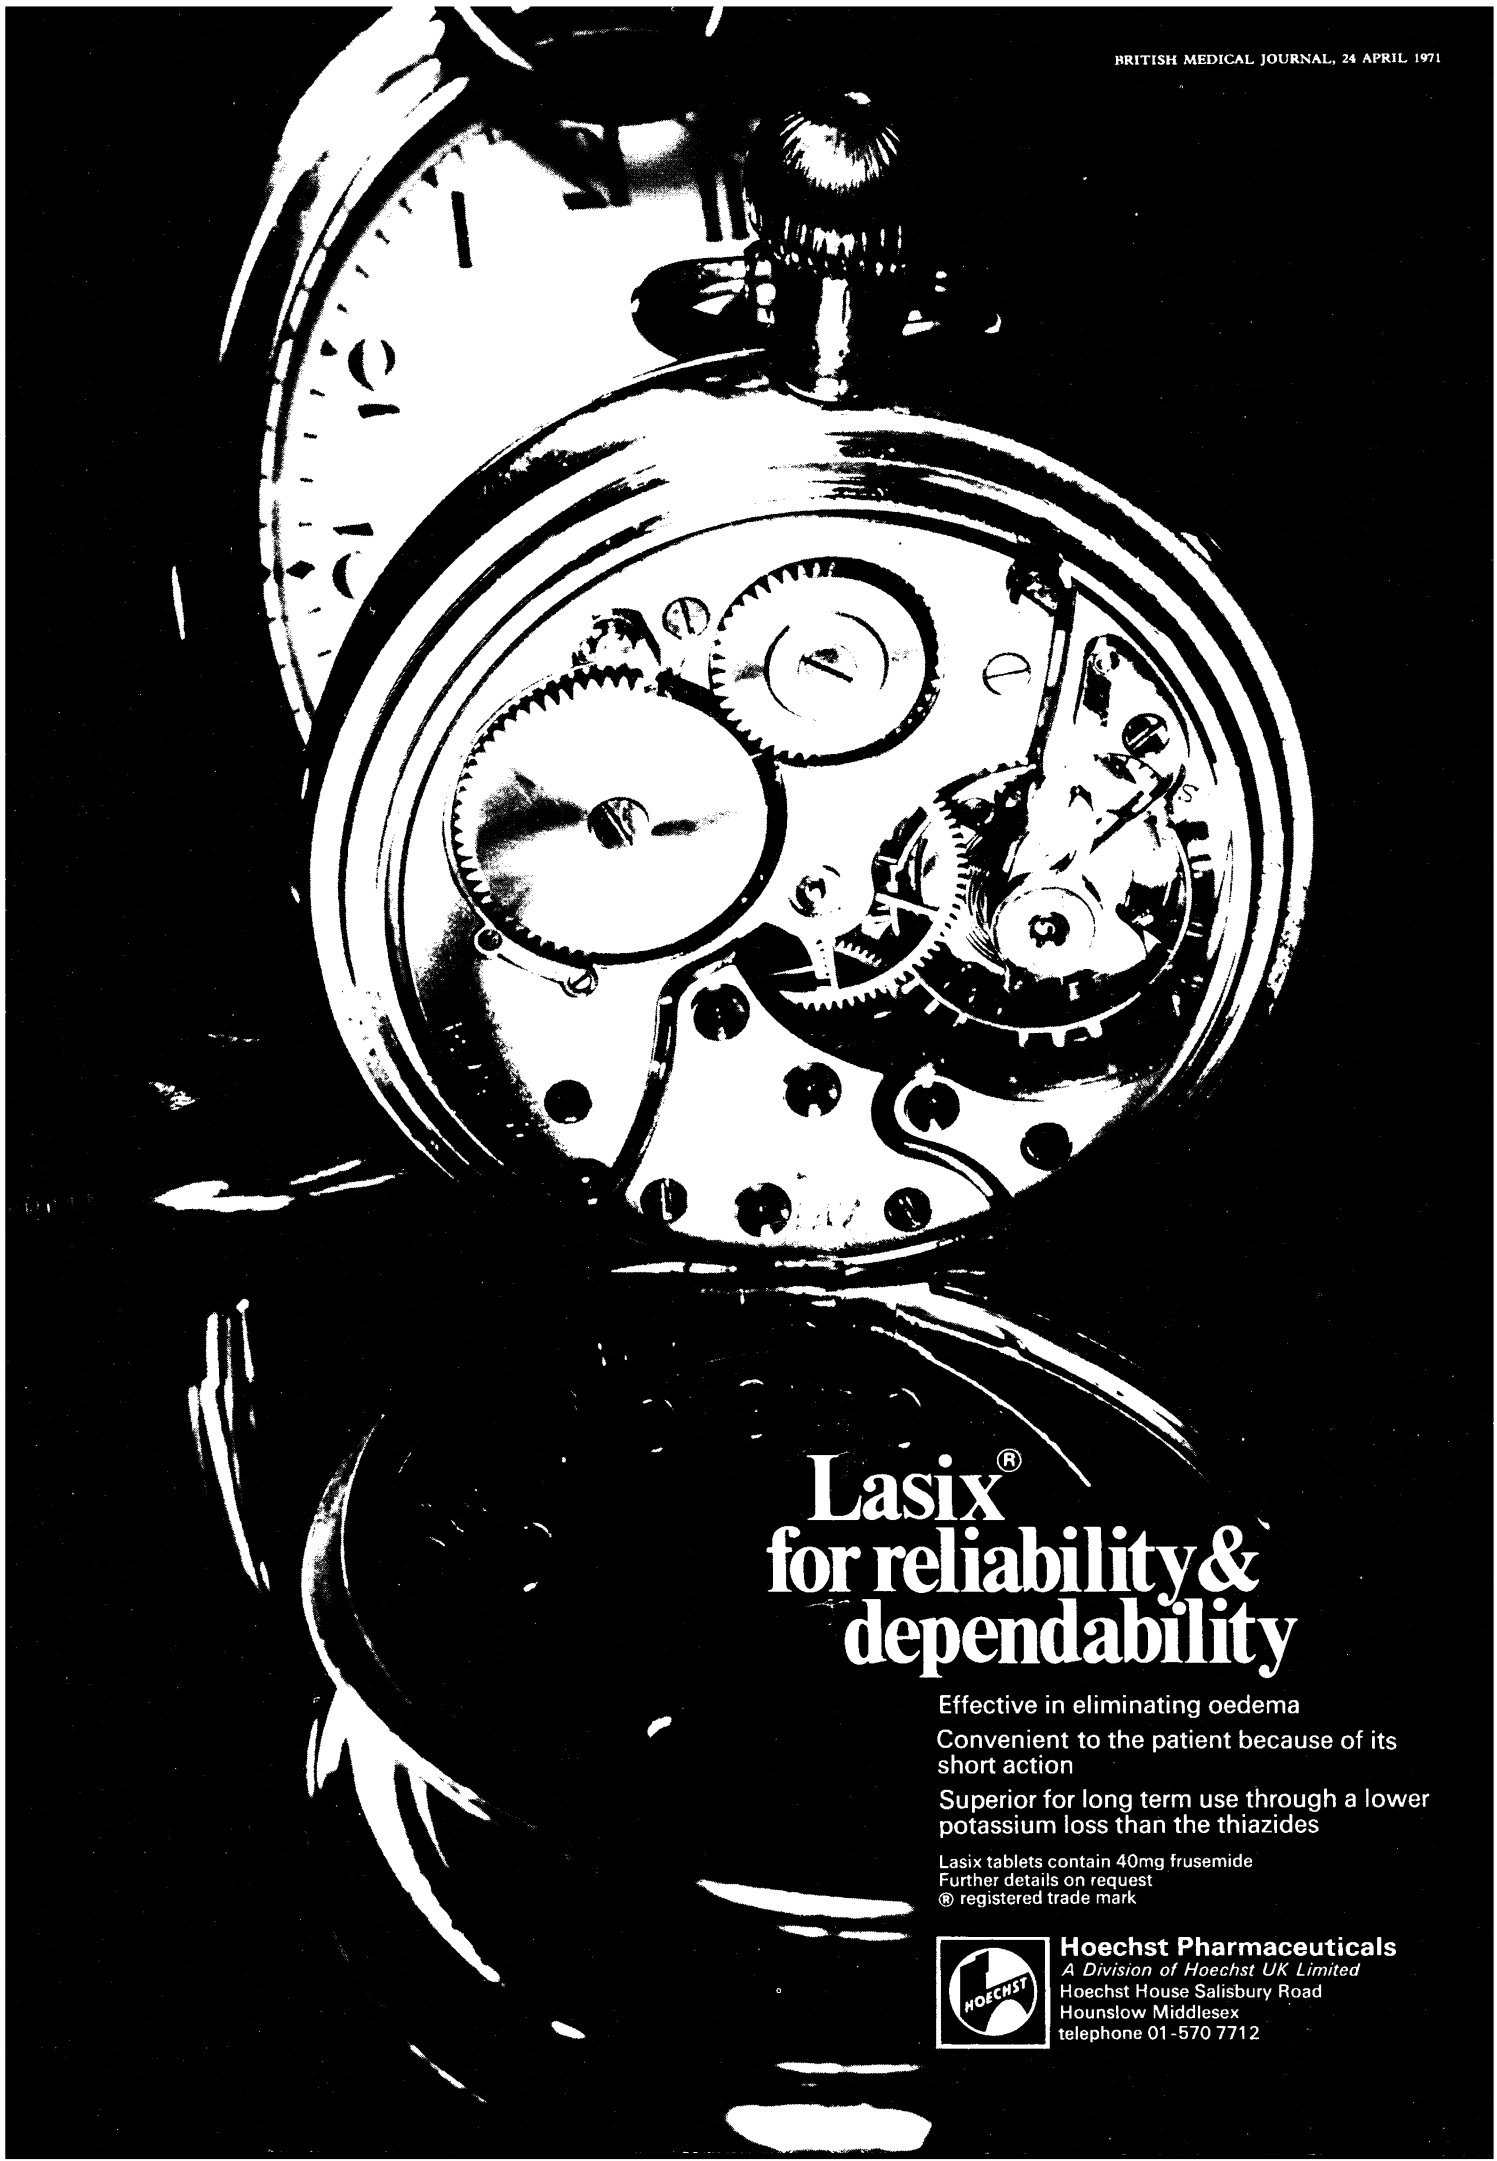

". . . In the double-blind subjective assessment it (Ventolin) was rated as the best of four treatments (placebo, isoprenaline 100mcg, orciprenaline 1,500mcg and Ventolin 200mcg) by 13 patients, while only three preferred orciprenaline."
Brit. med. J., (1969) **2,** 287.

VENTOLIN–a real advance over existing bronchodilator therapy

PRESENTATION Ventolin Inhaler is a metered aerosol, delivering 100mcg salbutamol per inhalation. Ventolin Tablets each contain salbutamol 2mg as sulphate. Full information is available on request.
