

Test Tube

A crowded tube: a tough test confirming the success of Declinax measured both in mm/Hg¹ and in the patient's ability to cope with and enjoy life^{1, 2}

Brit. med. J., 1966, *ii*, 732.

1. "In this trial many patients treated with debrisoquine [Declinax] had been unsatisfactorily controlled by other hypotensive agents; the change to this drug made satisfactory blood-pressure control possible, and there was relative freedom from troublesome side-effects."

Declinax is the registered trade mark for pharmaceutical preparations containing debrisoquine sulphate.

Trasicor

oxprenolol hydrochloride

The fundamental approach to long-term treatment of angina

Unique combination of benefits

Highly effective

- Frequency and severity of anginal attacks dramatically reduced
- Trinitrin requirements reduced or eliminated

Improved safety

- Greater protection against induced heart failure
- Less likely to increase airways resistance

Trasicor goes further than just relief of pain

- it offers a better quality of life

Before using Trasicor, it is important that doctors consult the detailed literature for full prescribing information.

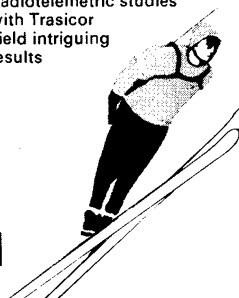

Tablets 40 mg (for angina) and 20 mg, 100's and 500's.

Basic NHS price 100 x 40 mg: £2.60

Ampoules 2 mg.

It goes down well with patients

Patients find Broxil Syrup easy to take. Children, for example, enjoy its fruit flavour and will readily accept their medicine. Patients with sore throats find the syrup easy to swallow, while some patients always have difficulty taking tablets or capsules. For the same reasons, Broxil Syrup may be simpler for your elderly patients too.

Broxil works. In practice, patients do seem to get better quicker with Broxil. It has the excellent safety record of a well-tried penicillin. For respiratory and ENT infections, few antibiotic treatments can match up to Broxil's record of safety and effectiveness over ten years of practice.

Heart-risk people and polyunsaturates

Diet is related to coronary disease. It is not the only factor and the relationship is still far from clear, but already considerable concern has been expressed about the amount of animal fats most of us are eating.

So to be on the safe side, it is suggested that we limit our consumption of fats to no more than 40% of our calorie intake, and as far as possible make sure the fats are polyunsaturated.

This means all of us, not just the incipient

heart case, and the younger we start the better.

Flora vegetable oil margarine was designed a few years ago to meet just this situation, and recently its polyunsaturate content—already high—was almost doubled. It tastes noticeably good, spreads easily, cooks well, and can be bought in almost any supermarket.

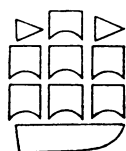

Everything you need to make Flora the kind of advice that people are likely to take.

Flora vegetable oil margarine contains 50% of polyunsaturates (natural cis-cis linoleic), ratio of polyunsaturates to saturates 2:1.

ACTS ON FAT

The more overweight the patient – the more fat they have – the more Ponderax they need.

Ponderax has an exercise-like glycoliptic effect to melt away excess fat – without diet – without stimulation – without tolerance.

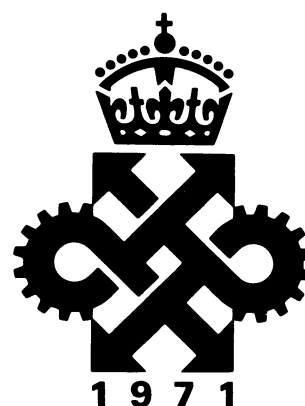

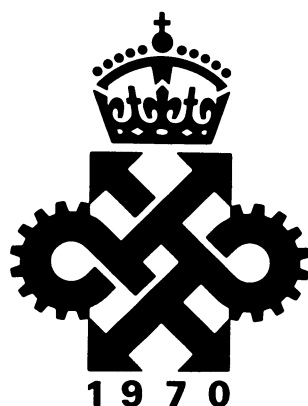

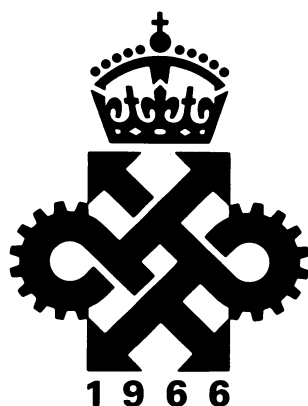

Prescribing is simple – weigh the patient, take skinfold thickness reading, give the patient the appropriate dosage schedule sheet with the required number of tablets and they will start to lose their excess fat after 2/3 weeks.

Dark and comfortless

The Duke of Gloucester's anguish in 'King Lear'—after his torture and blinding, and the revealed treachery of his son, Edmund—may not find many exact parallels in modern society, but his mood 'all dark and comfortless' is seen often enough in patients suffering from depression and anxiety. In such cases

Triptafen-DA can often help; lifting the basic depression and calming any underlying or overt anxiety. The combined action of amitriptyline and perphenazine relieves the symptoms of depression and anxiety, no matter which condition predominates.

Each Triptafen-DA tablet contains amitriptyline hydrochloride BP 25mg and perphenazine BP 2mg. Also available: Triptafen-DA Suspension.

Will she reach a diagnosis?

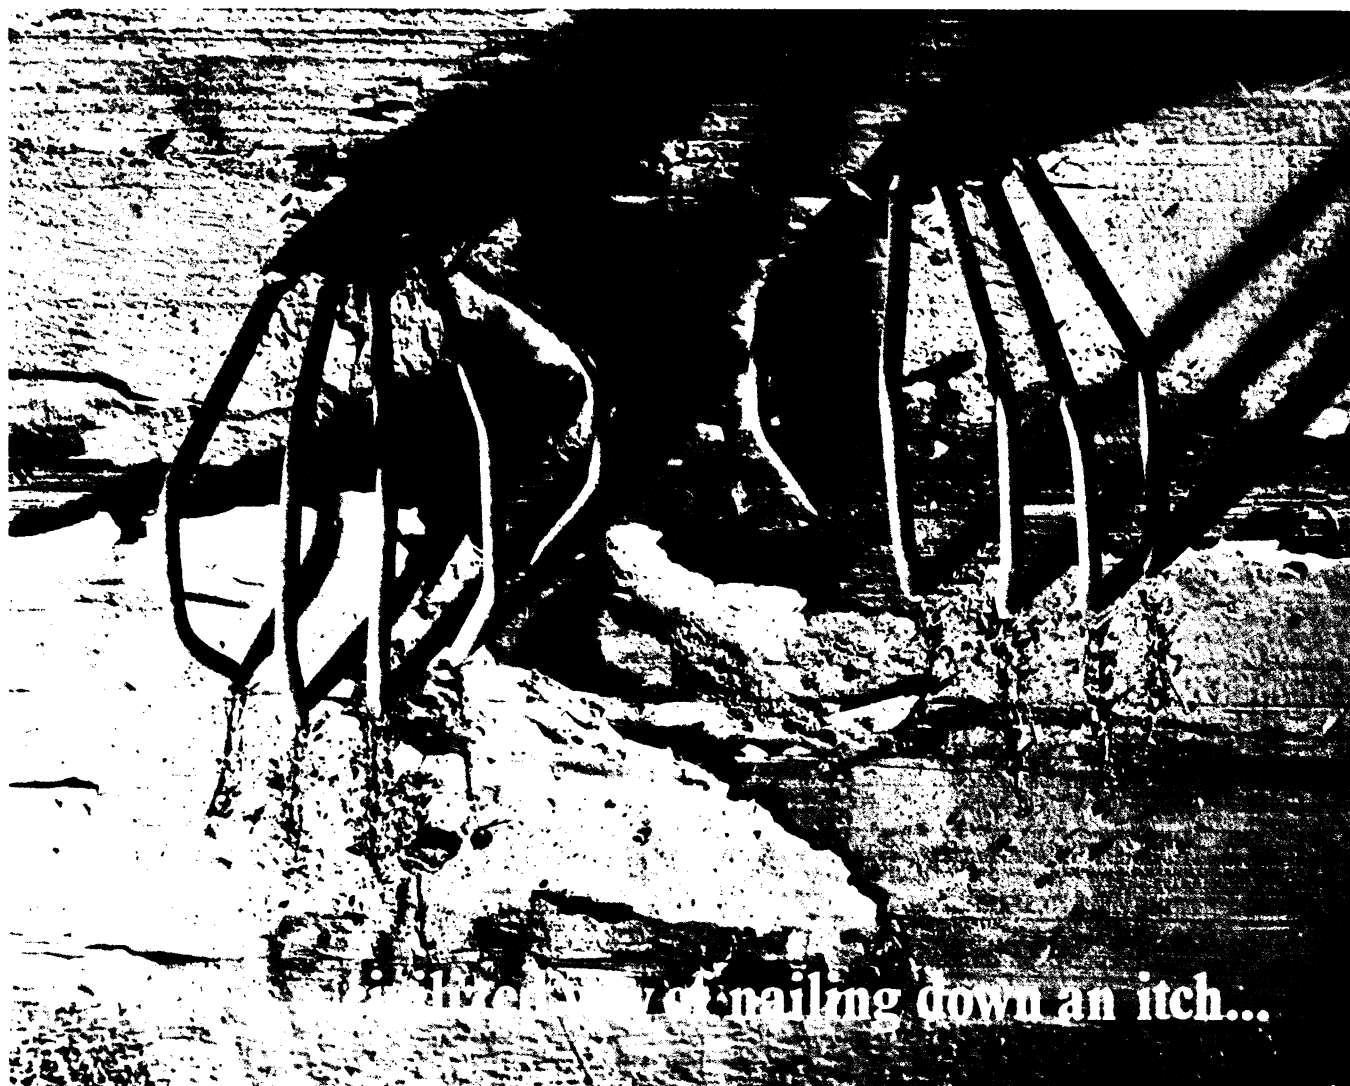

colofac[®]
mebeverine
relieves irritable colon directly

A paper in the *Lancet** described how difficult it is to reach a conclusive diagnosis of irritable (or spastic) colon. So often these patients first complain of diarrhoea plus other vague abdominal symptoms. Examination frequently reveals gas in the colon. Further enquiry may reveal a history of repeated attacks of abdominal pain, discomfort after meals in addition to disordered bowel function. This is strongly indicative of irritable (or spastic) colon. Colofac is specific for irritable (or spastic) colon and can be started immediately. It relieves colon spasm by a direct action on smooth muscle. It is totally unrelated to the anticholinergic or atropine-like drugs and is free from their typical effects – dry mouth, blurred vision, urinary retention. Colofac acts selectively on smooth muscle in spasm. It has no effect on normal gut motility.

Colofac is supplied as tablets of 100mg mebeverine.**Lancet*, 2, 753-756, 1969 Further information is available on request.

UNITED NORWICH HOSPITALS

Vocational Training Scheme for General Practitioners

To commence 1st August, 1971. The scheme of General Professional Training is in accordance with the recommendations of the Royal Commission on Medical Education 1965-68.

There is a rotation of four S.H.O. posts over two years through in-patient departments as follows: Obstetrics, six months; General Medicine and Dermatology, six months; Paediatrics, three months; Geriatrics, three months; Accident and Emergency, three months; and a period of three months during which the S.H.O. will (a) act as locum for his colleagues holidays, and (b) undertake study of a subject of his particular interest. Over the two year period, one half day per week will be allocated for attendance at specialist clinics, e.g. Rheumatology, Psychiatry, Ophthalmology etc., and to give opportunity to visit general practices in the area.

Modern married accommodation is provided during the two years of hospital appointments.

A third year will be spent as a trainee in one or more general practices in the area. During the three year period, General Practitioners will organise a programme of evening tutorials with meetings and seminars on Human Behaviour and Social Medicine, with a variety of psychology topics. There will also be an intensive course on practice organisation and methods early in the trainee year.

Further information can be obtained on request from the Secretary, Norfolk & Norwich Institute for Medical Education, Norfolk & Norwich Hospital, Norwich, Norfolk, NR1 3A.

The hospital may be visited and General Practitioner teachers may be met. Requests should be addressed to the Secretary, Norfolk & Norwich Hospital, Norwich, Norfolk, NR1 3A.

Applications with full particulars and the names of two referees should be sent to the Group Secretary, Norwich, Lowestoft and Great Yarmouth Hospital Management Committee, St. Stephen's Road, Norwich, by 1st May, 1971.

COMMERCIAL APPOINTMENTS

ROCHE

CLINICAL RESEARCH

We have two vacancies for registered medical practitioners interested in making a career in the pharmaceutical industry. The Company is a member of a large international group in this field.

One post, arising through a promotion, is based at Welwyn Garden City, Hertfordshire, and will be concerned with organising, and advising on the progress of, clinical trials of promising new chemical compounds. Some travel, mainly in the United Kingdom, will be involved. Previous experience in drug assessment at an early stage would be valuable; a knowledge of either cardio-vascular or endocrinological diseases is particularly required.

For the second post, which is new, we are seeking a man who, though based in Welwyn Garden City, can also conveniently work in our Head Office at the address below. He will be concerned with arranging and advising on the clinical trials of our products already on the market, in order to establish further indications for their use, and so on. Again, some travel in the United Kingdom will be necessary.

For both these positions, we envisage arranging an initial period of 3 to 6 months as an honorary research physician in a university clinical pharmacology department.

Please write, in confidence, for further job descriptions and information on the Company, together with an application form. You are asked to quote reference CP and write to Mr A. R. Milne, Head of Personnel, at:-

MSD MERCK SHARP & DOHME LIMITED

MEDICAL
ADVISER

This is an opportunity for a qualified doctor, male or female, to establish a career outside the direct practice of medicine. This leading manufacturer of ethical pharmaceuticals requires a physician to join its team of Medical Advisers which, under the Medical Director, provides a service of information and advice to the profession on the application of the Company's products, and the investigation of clinical problems. The team also monitors published data and product information material and trains the Company's Medical Representatives. The training of Representatives is very important and the candidate should enjoy teaching.

The Medical Adviser has a very important position in the Company and in this appointment there is considerable scope for a physician who also possesses commercial aptitude.

The work is highly congenial and the offices are situated in a pleasant part of Hertfordshire near London. Benefits include a company car, life insurance and superannuation. Please write for further details and Application Form to:

Clinical Research and Development

The Pharmaceuticals Division of ICI invites applications from doctors with an interest in joining its expanding Medical Departments.

We are concerned with many fields of research, notably cardiovascular disease, rheumatology, gastro-enterology, dermatology, and disease of the C.N.S., anaesthetics and metabolism.

It is the responsibility of Medical Department to evaluate and gain acceptance for new drugs arising from our own research. The varied and interesting work includes advising the Research and Commercial Departments; co-operation with leading clinicians at home and with our medical advisers abroad in the planning and co-ordination of clinical trials.

Successful applicants should

(H9205)

have a good general medical background and will be encouraged to maintain active participation in clinical work. A higher qualification would be an advantage, but is not essential. A knowledge of a foreign language, or willingness to learn one, would be an asset.

The Pharmaceuticals Division of ICI is in rural North Cheshire, with excellent housing and education facilities. Assistance over relocation expenses may be given.

Letters may be addressed, in confidence, to:

GOVERNMENTAL

Scottish Health Services
Research & Intelligence UnitDeputy
Director

New appointment: £5640

This Unit is a division of the Scottish Home & Health Department. It is primarily responsible for the collection, analysis and publication of data on the operation of the Health Service; for carrying out research into its workings; for development of computer applications; and for advising on and providing (as appropriate) financial support for operational research by universities and other relevant outside organisations.

The Deputy Director will assist the two Co-Directors (one a Principal Medical Officer and the other non-medical) in directing the Unit but will be given specific supervisory responsibilities suitable to his interest and experience. He will be encouraged to develop his own lines of work and to publish results. At present there are several projects at varying stages concerned with the health and welfare of old people, with the development of a computer policy, and with staffing requirements and operations of the Health Service. An important part of the duties will be the written and oral exposition of the Unit's work, and the maintenance and development of close relationships with colleagues and support staff within the Health Service and universities, etc.

Candidates must be fully registered as medical practitioners in the UK and have wide experience in epidemiological or medical care research. The post is in the grade of Senior Medical Officer: non-contributory pension.

Fuller details of this appointment may be obtained by writing to the *Scottish Office, Establishment Division, Room 172, St. Andrew's House, Edinburgh EH1 3BX*, quoting S/7721/AM/1. Closing date 20th May, 1971. (17967) 55

Directorate of Health Services

Medical Division

Dr. N. C. Walsh has been appointed Chief Medical Officer in the Directorate's Medical Division and three new posts of Principal Medical Officer have also been established, as follows:—

Principal Medical Officer (School Health) — £3,897-£4,557 p.a.

Applications are invited from registered Medical Practitioners for the above post, which is a joint appointment by the London Borough of Lambeth and the Inner London Education Authority.

The Borough has one of the largest school populations in the I.L.E.A. area with ten special schools providing for all categories of special education. These include an autistic unit, unit for deaf/blind and a remedial unit. There is an audiology assessment centre and close liaison with the I.L.E.A. child guidance unit.

This officer will be responsible for introductory courses for doctors coming into the School Health Service, and for supervision of the work of school doctors which is in process of change and development. Previous experience in School Health Service and approval for ascertainment of E.S.N. children is essential.

Principal Medical Officer (Community Care, M. & C.H., etc.) £3,897-£4,557 p.a.

Applications are invited from registered Medical Practitioners for the above full-time appointment. Duties will include day-to-day management of maternity and child health services, including family planning, cervical cytology and immunisation programmes, working closely with family doctors in the Borough and with the Council's nursing services and health education officer; registration and consultant geriatricians and general practitioners in the care of the aged. The successful candidate will also be concerned with the planning of health centres in co-operation with the Directorate's Development Officer.

Principal Medical Officer (Advice to Council Directorates (excluding Housing and Property Services) and Staff Medicals) — £3,897-£4,557 p.a.

Applications are invited from registered Medical Practitioners for the above full-time appointment. This officer will advise the Directorate of Social Services on medical and health problems in general and on a case basis, also other Directorates, and the duties will also include developing a staff medical service for the Council. Previous paediatric experience is essential, and approval for ascertainment of E.S.N. children an advantage. Duties in this area will be concerned with maintenance of the register for handicapped children and planning for their care and management, including the mentally subnormal, battered babies, adoption procedures, etc.

The post will carry an attachment to a teaching hospital paediatrics department for assessment of handicapped children and research into special problems, including those of mentally handicapped. Close working liaison has been established with the Regional Assessment Centre for children. Duties will include postgraduate training for health department staff and for general practitioners engaged in child health work, as well as hospital undergraduate teaching.

The Principal Medical Officers will each be assisted by a senior medical officer, and clerical assistance will also be provided.

Candidates for all three posts should be appropriately qualified (D.P.H. and/or D.C.H. an advantage) and have had considerable relevant experience at senior medical officer level.

COMMERCIAL APPOINTMENTS

Clinical Research: Physician

Riker Laboratories, an international pharmaceutical company and subsidiary of the 3M Company, wish to recruit a physician to take charge of their programme of clinical research within the UK. The successful candidate will be responsible to the Technical Director for all clinical and human pharmacology programmes conducted on the new products. At the same time he will be expected to become a member of a small team orientated to the total field of new product development rather than individual subjects.

Encouragement is given to publish and one day a week would be set aside in which to undertake external clinical work or further academic study of an approved nature.

Applications are invited from graduates of United Kingdom Universities who are registered medical practitioners and preferably have some clinical research experience. Experience in pharmacy or pharmacology would be a considerable advantage though not essential. In return an above average salary, a car, and excellent fringe benefits are offered.

The Company is located in a pleasant part of Leicestershire within easy reach of Derby, Leicester, and Nottingham; communications with the rest of the country are excellent. Housing is both plentiful and reasonably priced; consideration will be given to offering the successful candidate assistance with removal expenses.

Applicants are asked to write, giving brief details, to:-

Dr P F D'Arcy
Technical Director
Riker Laboratories
Morley Street
Loughborough, Leicestershire

All applications will be treated with the strictest confidence.

More published evidence

Many patients have now been safely treated with Trasacor, and its effectiveness has been confirmed in well-designed double-blind studies. Comprehensive evidence of the value of Trasacor is found in the Symposium proceedings carried in the November (1970) Supplement to the Postgraduate Medical Journal. Copies are available on request to CIBA Laboratories, Horsham, Sussex.

Diseases of the Joints

Arthritis and rheumatism are common complaints, even if patients are often vague about the exact meaning of the terms they use. In the last few years the diagnosis of joint disorders has become more exact, while the introduction of local and systemic steroid therapy and the powerful non-steroidal anti-inflammatory drugs has revolutionized treatment. In an attempt to bring doctors up to date in this field, the *B.M.J.* published in 1969 a series of short articles giving practical advice on the common disorders of the joints. The articles have now been revised by their authors and collected together to form this handbook on the management of arthritis.

Betnovate is better. So is he.

**Psoriasis of the scalp:
all the better for Betnovate Scalp Application**

Psoriasis patients respond better to Betnovate than to other topical steroids. Two clinical trials, involving 916 patients and comparing Betnovate with five other leading topical steroids, proved this conclusively.

Their findings included:

"... whenever preferences were expressed, there were always more for betamethasone 17-valerate than for the other corticosteroids."¹

"Betamethasone 17-valerate was statistically superior to the other topical corticosteroids in fourteen of the twenty separate subdivisions of the trial; in no instance was it inferior."¹

"A better response is more likely with betamethasone 17-valerate than with any of the other corticosteroids tested."¹

"... response in psoriasis is a more stringent test

of the efficacy of a corticosteroid than response in eczema. The superiority of betamethasone 17-valerate in this context is noteworthy."²

Betnovate Scalp Application gives rapid relief from itching and inflammation and thus achieves the best response. It's also easy to apply and gets to the root of the trouble without making a mess. In psoriasis of the scalp it's the one thing to remember because Betnovate is the most effective steroid you can prescribe.
