# Penbritin the right-first-time antibiotic

Penbritin is a unique antibiotic. It combines the rapid decisive action of penicillin with broad-spectrum activity, a powerful combination which makes Penbritin a first-choice treatment for many infections seen in general practice.

Penbritin retains the safety of penicillin, an advantage no other broad-spectrum antibiotic can share. Where safety is particularly important, during pregnancy or in paediatrics for example, Penbritin may be prescribed with confidence.

Penbritin provides an appropriate presentation for all of your patients. There are capsules, scored paediatric tablets and fruit-flavoured syrup in two strengths. Penbritin can also be given by injection if the patient's condition demands it.

Penbritin is the preferred antibiotic for good reasons. The experience of nine years' extensive usage in hospitals and in general practice endorses Penbritin as the right-first-time antibiotic.

Further information is available on request.

**Single or return?** The problem of the relapsing schizophrenic has become more acute in these days of early discharge from hospital. It is probably aggravated by failure of the unsupervised patient to take the prescribed antipsychotic medication. This default may be triggered by distressing side-effects and/or by a wearisome dosage schedule. ORAP (pimozide) is a new antipsychotic drug unrelated to phenothiazine or butyrophenone. It offers a degree of activity comparable with fluphenazine but virtually no Parkinsonian effects or sedation at recommended dosages. Further, ORAP is inherently long acting and a once-a-day dosage regime has been found most satisfactory. ORAP tablets contain 2 mg. pimozide. Full information on request.

Mary Burns is thirty years old and she's suffering from an acute attack of pyelonephritis, with temperature, backache, rigors and dysuria. Her doctor's prescribing Ceporex because he wants a rapid remission of the symptoms and clearance of the causative organisms.

Ceporex is a bactericidal oral antibiotic which is

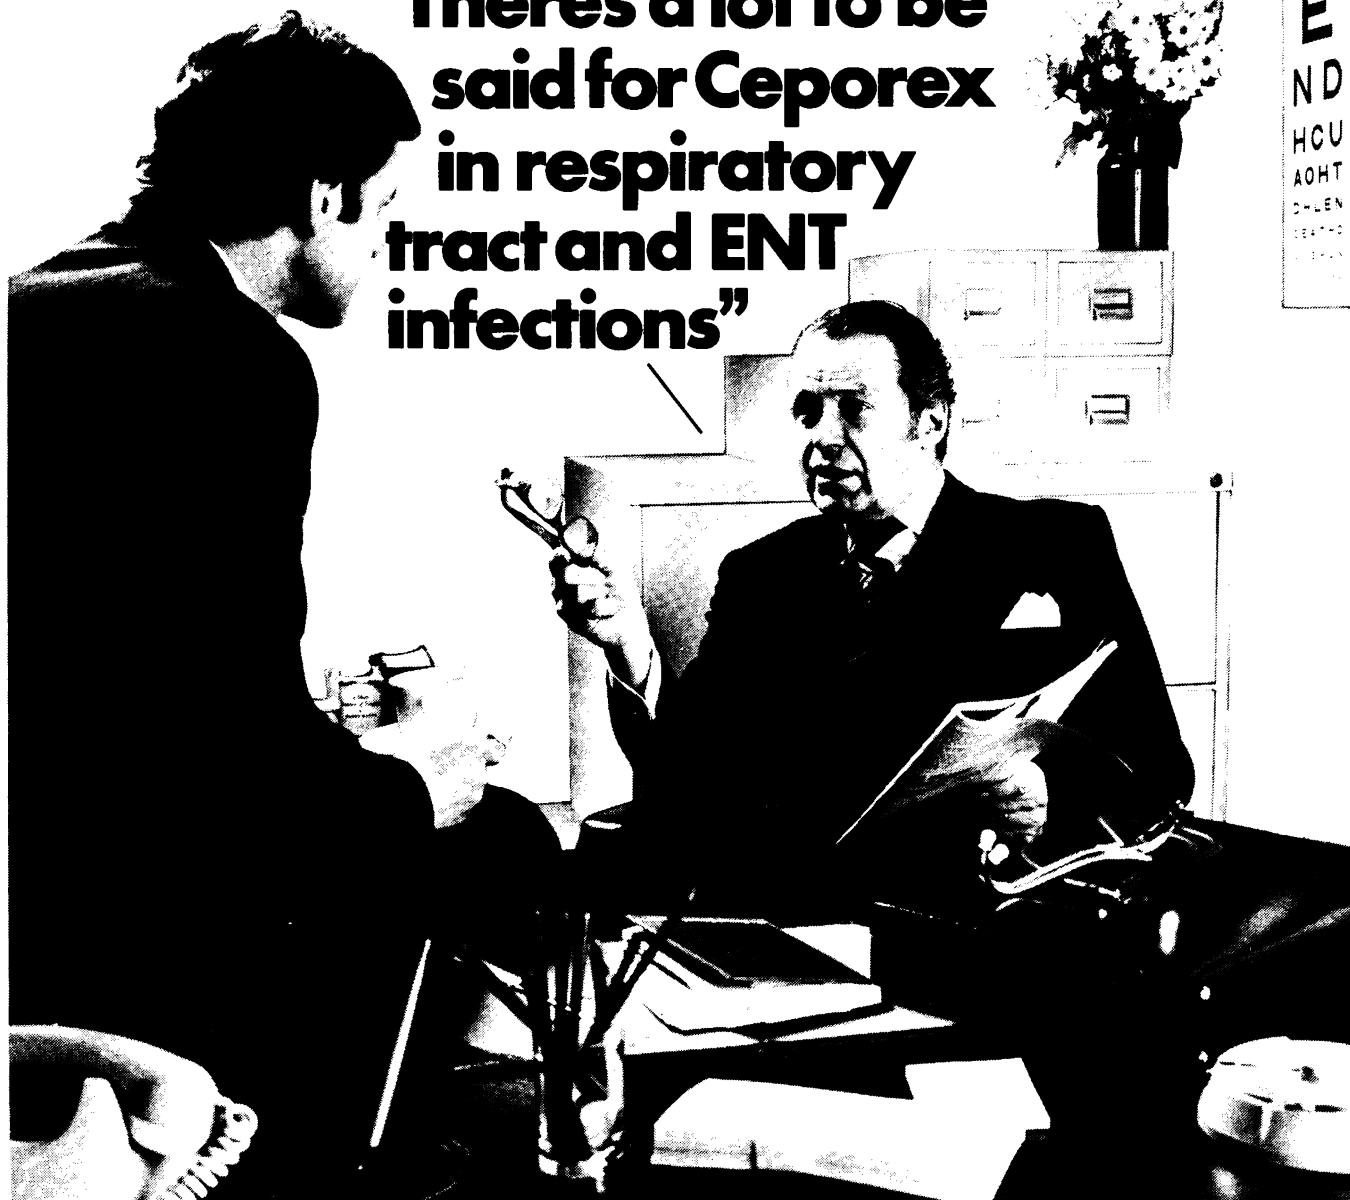

particularly effective against the common urinary pathogens. Within an hour of administration it produces high concentrations in the blood and urine, so essential for effective treatment.

In pyelonephritis, Ceporex therapy can prevent the acute condition becoming chronic. And it's well worth prescribing to that.

Successful treatment starts with

# "There's a lot to be said for Ceporex in respiratory tract and ENT infections"

At the International Conference on Cephalosporins, 1970\*, cephalexin was shown to be of great value in infections of the respiratory tract. That's because it kills the majority of pathogens commonly responsible for these conditions.

Ceporex was also shown to provide a valuable new therapy in ENT infections which had sometimes failed to respond to standard antibiotic treatment.

Rapid absorption, excellent serum and tissue levels, together with a wide spectrum of activity

against both gram-positive and gram-negative organisms, make it a logical choice in the stubborn infection. And a wide range of strengths and presentations make it simple and safe to prescribe.

## ACTS ON FAT

The more overweight the patient – the more fat they have – the more Ponderax they need.

Ponderax has an exercise-like glycolytic effect to melt away excess fat – without diet – without stimulation – without tolerance.

Prescribing is simple – weigh the patient, take skinfold thickness reading, give the patient the appropriate dosage schedule sheet with the required number of tablets and they will start to lose their excess fat after 2/3 weeks.

# What is the word for emotional distress?

The presenting symptoms? "Can't sleep . . . irritable . . . no appetite . . . tired . . . aches and pains"—consultation after consultation.

The task? To penetrate behind the facade to the underlying condition.

The aim? To make the patient feel better quickly and reveal the problem, without unnecessary consultations.

Tranquillizers or hypnotics may deal with part of this aim, but only part.

Prothiaden can meet all the requirements. It is rapidly effective in both anxiety and depression. One ingredient, a single-strength capsule means straightforward dosage.

Prothiaden is well tolerated even by the elderly. Prothiaden can mean trouble-free treatment of anxiety, depression, in fact any manifestation of emotional distress.

Psychological Medicine is a journal for the publication of original research in clinical psychiatry and the basic sciences related to it. These comprise not only the several fields of biological inquiry traditionally associated with medicine, but also the various psychological and social sciences whose relevance to medicine has become increasingly apparent. Editorials and commissioned review articles will also be published from time to time.

The first issue was published in November 1970. Subsequent issues appear quarterly in February, May and August. Each issue contains approximately 80 pages. The title page, contents list and volume index for the first five issues will be contained in the November (1971) issue.

## ANTIBIOTICS AND THE INTESTINAL FLORA

Treatment with broad spectrum antibiotics suppresses the normal flora, which may be replaced by abnormal resistant organisms causing diarrhoea.

This change can be prevented or reversed by the implantation of *Lactobacillus acidophilus* which has been rendered antibiotic-resistant, and is thus able to multiply freely under these abnormal conditions. The products of growth of the organism are inimical to that of many other bacteria<sup>1 2</sup> and thus contribute to its rapid preponderance over other species.

Oral treatment with antibiotic-resistant *L. acidophilus* in the form of ENPAC has been shown to eliminate *Candida* from the faeces of infants with antibiotic-induced diarrhoea, with relief of symptoms succeeded by rapid gain in weight<sup>3 4</sup> and greatly to reduce the numbers of staphylococci in the faeces of patients treated with tetracyclines.<sup>5</sup>

# PROGNOSIS IN ELEVATED BLOOD PRESSURE

## Implications of insurance statistics

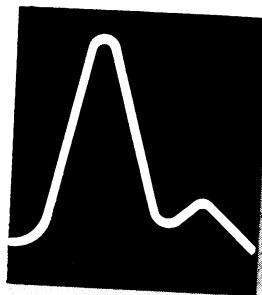

The charts on the opposite page are based on the accumulated experience of 26 insurance companies in America covering nearly 4,000,000 people who were accepted for life insurance. The statistics reveal that even modest elevations of blood pressure are associated with definite decreases in life expectancy.

For example, a male of 45 years with a blood pressure 150/100 mm Hg has his average life expectancy reduced from 32 to 20½ years—a loss of 11½ years.

Fortunately, substantial evidence has accumulated to show that effective treatment with modern antihypertensive drugs can considerably improve the depressing prognosis indicated by the insurance companies' statistics.

## Prognosis In Elevated Blood Pressure

### Reduction in Life Expectancy

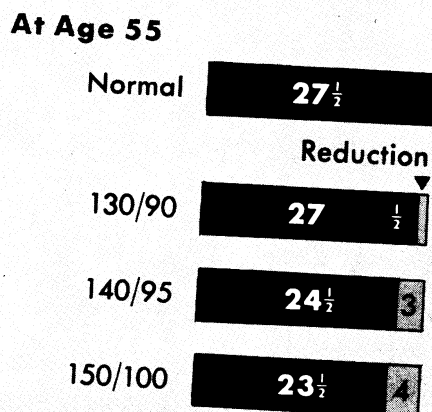

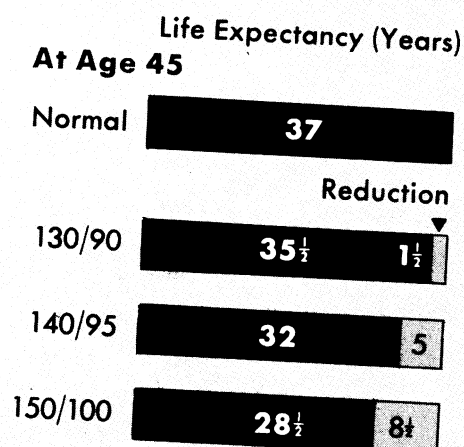

Life Expectancy in Elevated Blood Pressure Compared with Normal Expectancy

Reductions in expectation of life associated with elevated blood pressure are **not** proportionate to the degree of excess mortality. This holds even for very high blood pressures.

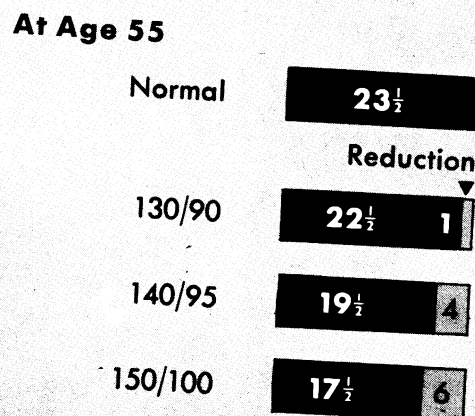

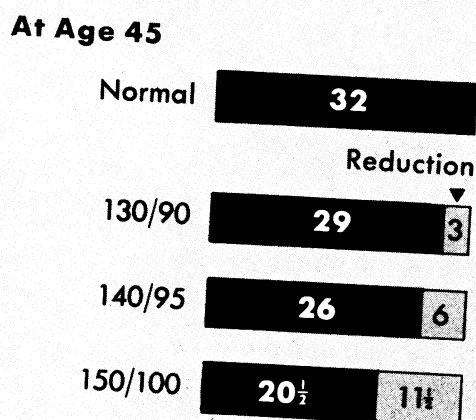

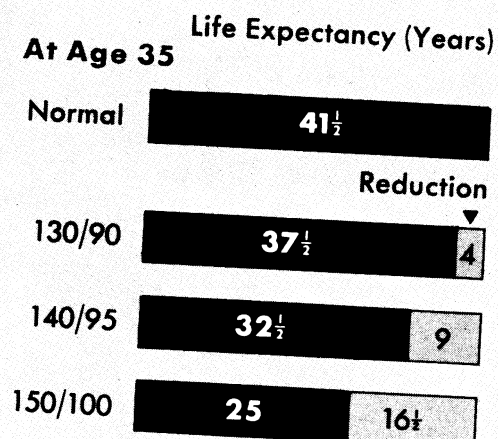

The magnitude of the reduction in life expectancy increases with elevation in blood pressure, but decreases with age.

The figures illustrate approximate reductions in life expectancy associated with indicated elevations in blood pressure.

### DIPLOMA IN PSYCHOLOGICAL MEDICINE

Registered medical practitioners are invited to apply for a course in preparation for this diploma which starts in October, 1971. Instruction is part-time for eight University terms, occupying two half days a week for the first two terms and three half days for the remaining six terms. Further particulars from Professor Neil Kessel, Department of Psychiatry, Swinton Grove, Manchester, M13 0EU, to whom application should be made as soon as possible. Candidates for the course should normally hold training posts in the N.H.S. These may be at one of the two teaching hospitals, United Manchester Hospitals and the University Hospital of South Manchester at Withington, which offer a number of posts in the S.H.O. and Registrar grades, or at other psychiatric units in the Manchester Region. Special provisions for extended part-time clinical work can sometimes be made for married women. Doctors intending to apply for the course who wish to obtain a hospital post in this area should state this in their application and also watch the medical press for details of such vacancies. # Clinical Research Pharmacologist (with Honorary Hospital Appointment) Department of Clinical Research

Syntex Pharmaceuticals Ltd. is the U.K. subsidiary of the internationally based Syntex Corporation, world leaders in steroid research and development.

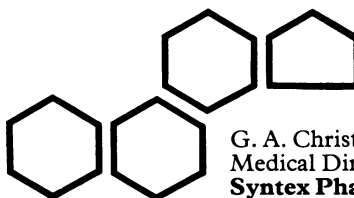

Rapid expansion of our research programme into new fields of interest has created the need for a research pharmacologist, who will be responsible for initiating, progressing and analysing clinical trials on existing and future products at both early and late stages of development. The position will carry an honorary clinical appointment, at Registrar or Senior Registrar grade, in the Central Middlesex Group of Hospitals.

This is a new post, and its success will depend on the ability of the successful applicant to work unobtrusively and smoothly in co-operation with senior Medical and Surgical Staff. He will be personally responsible for clinical trials, including supervision of patients, but will be backed by the facilities of Syntex and the expertise of its Department of Clinical

Research. Some post-graduate lecturing, to groups of doctors in and around London, will also be involved.

Applications are invited from registered medical practitioners of appropriate seniority, preferably with post-graduate (research) experience, and a higher medical qualification.

The initial period of employment, subject to the usual conditions, will be for 1 year, renewable thereafter. The salary offered is negotiable according to qualifications and experience but will be in the range of £3,000 to £4,000; a company car is provided. Additional benefits include non-contributory pension and life assurance schemes. In the first instance please apply to:

G. A. Christie, M.D., B.Sc.,  
Medical Director,  
Syntex Pharmaceuticals Limited,  
St. Ives House, Maidenhead, Berkshire.

# Clinical Research: Physician

Riker Laboratories, an international pharmaceutical company and subsidiary of the 3M Company, wish to recruit a physician to take charge of their programme of clinical research within the UK. The successful candidate will be responsible to the Technical Director for all clinical and human pharmacology programmes conducted on the new products. At the same time he will be expected to become a member of a small team orientated to the total field of new product development rather than individual subjects.

Encouragement is given to publish and one day a week would be set aside in which to undertake external clinical work or further academic study of an approved nature.

Applications are invited from graduates of United Kingdom Universities who are registered medical practitioners and preferably have some clinical research experience. Experience in pharmacy or pharmacology would be a considerable advantage though not essential. In return an above average salary, a car, and excellent fringe benefits are offered.

The Company is located in a pleasant part of Leicestershire within easy reach of Derby, Leicester, and Nottingham; communications with the rest of the country are excellent. Housing is both plentiful and reasonably priced; consideration will be given to offering the successful candidate assistance with removal expenses.

Applicants are asked to write, giving brief details, to:-

Dr P F D'Arcy  
Technical Director  
Riker Laboratories  
Morley Street  
Loughborough, Leicestershire

**ROYAL GWENT HOSPITAL**  
Newport, Mon. (432 beds)

(Recognised F.R.C.S.)

**SENIOR HOUSE OFFICER**  
required either immediately or within a reasonable period. Resident or non-resident. House is available if required. The Department is in the charge of a full-time Consultant Surgeon, has five Senior House Officers and all emergency cases are admitted through the department, which is responsible for initial resuscitation. The Department is equipped with apparatus for cardiac monitoring, positive pressure ventilation, as well as X-ray intensifiers and a Berman F. B. Locator.

The hospital is the base hospital for the Group, and therefore has a large volume of acute cases in all specialties. It is being extensively re-developed by a major capital building programme. A new intensive care unit has recently been opened.

There is a close connection with the teaching hospital at Cardiff, 10 miles to the west, and there is an extensive postgraduate education programme with a very good library. A Postgraduate Centre has recently been opened. The appointment gives ample opportunity to the holder to avail himself of the facilities.

The successful candidate will be expected to be resident on the nights on which he is on first call, which will on average be one night in five.

## NORTH WEST METROPOLITAN REGIONAL HOSPITAL BOARD Amended Advertisement

**1. CONSULTANT ANAESTHETIST** whole-time or maximum part-time required for:— Mount Vernon Hospital, Northwood, Middlesex. (Tel: Northwood 26111) 4 half-days a week. Harefield Hospital, Harefield, Middlesex. (Tel: Harefield 2181) (including cardio-thoracic surgery with open heart by-pass) 7 half-days a week. Residence required within ten miles of Harefield Hospital. Hospitals may be visited by direct appointment.

Preference will be given to suitable candidates willing to devote most of their seasonal time to duties within the Cardiothoracic Unit at Harefield with one session at Mount Vernon. This does not preclude candidates with a preference for less thoracic surgical work and more sessions on the general side at Mount Vernon Hospital from applying and being considered. In either case 'open heart' surgery is included.

**2. CONSULTANT ANAESTHETIST** whole-time or maximum part-time, required for Harefield and Northwood Group, with duties at Harefield Hospital, Wembley Hospital (Tel: 01-902 3136) and Mount Vernon Hospital. Residence required within ten miles of Harefield Hospital. Hospitals may be visited by direct appointment.

With reference to the advertisement for this post, depending on the terms of appointment of the first mentioned post in the Harefield and Northwood Group (above), duties associated with this post may be required at Mount Vernon and Wembley Hospitals only, and may exclude the Thoracic surgery sessions at Harefield in which case the duties would be allocated as follows:— Mount Vernon Hospital, 7 half-days a week. Wembley Hospital, 4 half-days a week, not residence required within ten miles of Mount Vernon Hospital.

Application forms and further particulars obtainable from the Secretary, North West Metropolitan Regional Hospital Board, 40 Eastbourne Terrace, London, W2 3QR. (Tel: 01-262 8011, Ext. 248). Returnable before 7th June, 1971. (18446) 20-1

**Scottish Health Services  
Research & Intelligence Unit****Deputy  
Director****New appointment: £5640**

This Unit is a division of the Scottish Home & Health Department. It is primarily responsible for the collection, analysis and publication of data on the operation of the Health Service; for carrying out research into its workings; for development of computer applications; and for advising on and providing (as appropriate) financial support for operational research by universities and other relevant outside organisations.

The Deputy Director will assist the two Co-Directors (one a Principal Medical Officer and the other non-medical) in directing the Unit but will be given specific supervisory responsibilities suitable to his interest and experience. He will be encouraged to develop his own lines of work and to publish results. At present there are several projects at varying stages concerned with the health and welfare of old people, with the development of a computer policy, and with staffing requirements and operations of the Health Service. An important part of the duties will be the written and oral exposition of the Unit's work, and the maintenance and development of close relationships with colleagues and support staff within the Health Service and universities, etc.

Candidates must be fully registered as medical practitioners in the UK and have wide experience in epidemiological or medical care research. The post is in the grade of Senior Medical Officer: non-contributory pension.

Fuller details of this appointment may be obtained by writing to the **Scottish Office, Establishment Division, Room 172, St. Andrew's House, Edinburgh EH1 3BX**, quoting S/7721/AM/2. Closing date 20th May, 1971. (18249) 55

# Transvasin at the summit

The summit of Annapurna 8090 metres high, was reached on 20th May 1970, by Owens and Day of the British Nepalese Army Expedition. During the 3-hour climb from Camp 5 at 7400 metres, oxygen breathing apparatus was used. The only previous ascent, by Herzog and Lachenal in 1950, took 8 hours. They had no oxygen and suffered severe frostbite, losing all their toes and Herzog his hands. The temperature at the summit for Owens and Day was  $-30^{\circ}\text{F}$ .

**ON ANNAPURNA** the members of the British Nepalese Army Expedition chose Transvasin to relieve muscular pain. Three British climbers used it:

"One suffered badly strained back and chest muscles following involvement in an avalanche. The second developed severe intercostal fibrositis, and the third had badly bruised himself after falling 30 feet and jamming in a crevasse. Transvasin gave considerable relief to all three climbers."

*Personal communication, 3rd September 1970.*

Transvasin was also used with great success by many other members of the party who complained of various other aches and pains.

**IN GENERAL PRACTICE** too, Transvasin provides effective relief from muscular and rheumatic pains. It contains esters of nicotinic and salicylic acids which ensure a rapid hyperaemic and analgesic effect.

Available in 30 g tubes.

Basic NHS price 12½p, plus P.T.

## Ponstan will make the next step safer for this arthritic patient

When her condition requires more than just the simple analgesic therapy offered by aspirin, codeine co., or paracetamol, PONSTAN\* should be prescribed. PONSTAN is the effective analgesic step for this arthritic patient. Her needs have now gone beyond simple analgesic treatment and yet exposure to the more potent anti-inflammatory drugs is not justified.

In circumstances such as this you can now take a decisive therapeutic step for your arthritic patients – prescribe PONSTAN (mefenamic acid, Parke-Davis).

### **Ponstan** the analgesic for your arthritic patients

Available as KAPSEALS\* and as a Suspension. Full information is available on request.
