

Fight cancer with a will

When testators ask your advice, please remind them of the urgent work of the Imperial Cancer Research Fund. In the Fund's up-to-date laboratories trained minds are using every weapon of modern science to fight all forms of cancer, including leukaemia.

Now one of the world's great research centres, the I.C.R.F. relies entirely on public support. The cancer problem *must* be solved. Please help now.

Somatic and psychosomatic disorders of the body

Good to excellent symptom responses

The amygdala (a) in the limbic system plays the crucial part in the generation and transmission of anxiety

In excessive anxiety the hypothalamus (b) constantly produces excessive physical arousal, and a long list of anxiety symptoms and psychosomatic disorders

In 1937, it was suggested¹ that a group of structures, including the limbic system, was the anatomical source of the emotion which intensifies the individual's response to outside stimuli. Later work confirmed that view,² and has shown that anxiety and aggression are rooted in the amygdala.³ When that structure is removed or its activity suppressed, a tranquillizing effect is seen

When anxiety is excessive the amygdala stimulates the hypothalamus to produce an equally excessive level of physical arousal. In many instances such a state can serve no useful purpose: during academic examinations, for example,^{4,5} and even when watching films.⁶ It is now widely recognised that the whole process can '... trigger or otherwise promote psychosomatic and psychiatric disease'⁷

Nobrium acts mainly on the amygdala, and has a smaller, complementary action on the hypothalamus

Nobrium exerts its major effect on the amygdala, and has a smaller, complementary action on the hypothalamus.⁸ The value of this action has been explored in well over 50 published clinical trials, involving more than 5,000 patients. When the response of 3,443 individual symptoms and associated disorders was analysed, a good to excellent response was noted in 2,781 (80.8 per cent).

Nobrium: 13 Double-blind trials

Of the published clinical trials, 13 were double-blind studies in which Nobrium was compared with either placebo, phenothiazine, barbiturate or chlordiazepoxide^{9,21}

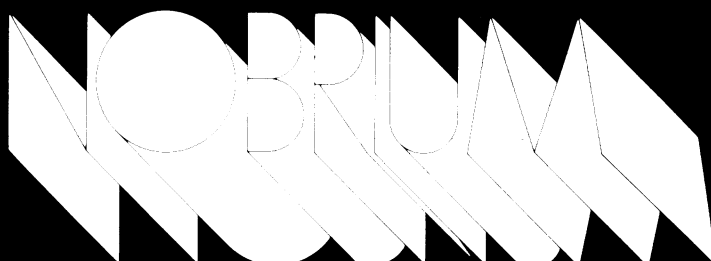

Nobrium was clearly superior to the placebo in every trial. It produced double the good to very good responses evoked by the phenothiazine,⁹ and a 76 per cent good to excellent response initially, compared with 29 per cent for phenobarbitone¹⁰

Flora Margarine is an exceedingly rich source of polyunsaturates, 50% natural *cis-cis* linoleic, polyunsaturated fatty acid, prepared from sunflower oil. No prescription. Available at any supermarket.

Flora is commended to those heart risk patients whose blood cholesterol level should be reduced. It is an effective replacement for butter, ordinary margarine, cooking fats and lard—highly saturated animal fats. Flora supplies all known needs for essential fatty acids.

This simple substitution is almost effortless, tastes good and costs little, if anything, extra. All of which makes Flora the best kind of advice to give—the kind people are likely to follow.

How many of the drugs you prescribe are as well documented as Alka-Seltzer?

TRADE MARK

In the booklet 'A Scientific Assessment of Alka-Seltzer' no less than forty-three sources of reference are quoted – and that represents only part of the documentation available on the product. Based on these references the facts about Alka-Seltzer are presented in explicit detail:

Physico-chemical studies—on pH, solubility, ionisation and fat-solubility, antacid and buffering action *in vitro*.

Pharmacological studies—on

antacid and buffering action *in vivo*, effect on gastric emptying, absorption, salicylate blood levels, excretion.

Therapeutic studies—on its antacid and analgesic properties.

Safety studies—on the difference between sodium acetylsalicylate and acetylsalicylic acid, gastroscopic observations, faecal blood loss, and special studies related to alcohol ingestion.

The total picture that emerges

is that of a safe and effective home remedy which is as well documented as many ethical prescription items.

For every doctor who is concerned about the subject of self-medication 'A Scientific Assessment of Alka-Seltzer' makes instructive reading. Copies available from: Dept G 1, Miles Laboratories Limited, Stoke Court, Stoke Poges, Bucks.

1905 An important year for coffee lovers

It was the year Dr. Ludwig Roselius discovered how to remove caffeine from coffee without altering its flavour.

Since then, thanks to him and his Kaffee H.A.G., no one need say "No" to coffee! Today, in nearly every country in the world, the Medical Profession is recommending it increasingly in cases where caffeine is contra indicated.

Road Accidents and the Family Doctor

Road accidents are now acknowledged to be one of the major epidemics of our time. It has been estimated that many accident deaths could be saved by skilled treatment at the site of the accident, and recently doctors in Britain and abroad have been playing an increasingly active part in this. This booklet, which reprints a series of articles which appeared in the *B.M.J.*, contains contributions on organization and medical equipment, the management of soft-tissue injuries, resuscitation, fractures of the spine, and extrication of persons trapped in a vehicle. The introduction is written by Mr. Norman Capener, Chairman of the Medical Commission on Accident Prevention.

A name to conjure with.

'*Largactil*' has been a name to conjure with in psychiatric medicine for over sixteen years. An influence of such magnitude and long duration can be explained by examining this legendary name.

'*Largactil*' was so named because of its LARGE variety of ACTIons; apart from being the first major tranquillizer, it acts in two other pharmacologically distinct ways – as a potentiator of central nervous depressants, including analgesics, narcotics and sedatives, and as an anti-emetic.

'*Largactil*' has achieved success in the fields of psychiatry, general medicine and anaesthetics in an ever-widening range of indications. These include major and minor psychoses; as an adjuvant to E.C.T.; drug withdrawal; senile dementia; the control of terminal pain and nausea and vomiting.

The diuretic you prescribe for patients needing long-term therapy should be gentle.

'Massive, rapid diuresis might produce considerable reductions in blood volume and blood pressure, which might be particularly dangerous in elderly patients.'*

Such a diuretic should be combined with a potassium supplement, but there is a risk of small bowel ulceration or obstruction when patients take preparations which release a large concentration of potassium ions in the small bowel.

CENTYL K reduces the risk by combining the highly effective diuretic, bendrofluazide BP (a Leo discovery) with a slow-release potassium chloride supplement to provide greater safety during long-term maintenance therapy.

Day after day of freedom from asthmatic attack

The unique mode of action of disodium cromoglycate offers the asthmatic patient outstanding benefits. A prophylactic treatment, it prevents the onset of asthmatic episodes - thus minimising long-term damage to lung tissue. Freedom from asthma attacks permits a happier, more normal life for the asthmatic patient.

Published clinical reports confirm that with INTAL COMPOUND, the incidence and severity of acute attacks is considerably reduced - even in patients on conventional therapy such as bronchodilators, antihistamines and corticosteroids. Less time is lost from work or school, exercise tolerance is improved and a consistent clinical comment on disodium cromoglycate has been the total absence of serious side effects.

INTAL COMPOUND - supplied in SPINCAPS (each containing 20 mg disodium cromoglycate, and 0.1 mg Isoprenaline Sulphate BP in powder form, together with an inert carrier). For use in a special insufflator - SPINHALER.

"My whole face hurts"

Frank Adams has sinusitis. He gets it nearly every time he gets a cold. Over the years his doctor's prescribed a number of antibiotics without any great success. This time he's trying Ceporex.

In sinusitis "the choice of an antibiotic can be based on culture and sensitivity results obtained from nasal swabs or antral washings. When in doubt a broad-spectrum antibiotic should be administered, since mixed infections are often encountered". * Ceporex kills both gram-positive and gram-negative bacteria, that's why it's so suitable. It's also very effective against

penicillin-resistant staphylococci and can be the logical alternative if penicillin hypersensitivity is suspected. Ceporex gives high serum levels within an hour of administration and penetrates fast to the tissues.

With Ceporex you have a broad-spectrum antibiotic that acts fast and is well tolerated. In sinusitis, it usually eradicates the bacterial infection, with the subsequent relief of both the congestion and pain. So make Ceporex your first choice.

"Ceporex seems to be a logical choice for bronchitis and pyelonephritis"

At the International Conference on Cephalosporins, 1970, Ceporex was found to be of great value in infections of the respiratory and urinary tracts. * Its broad spectrum and bactericidal activity against both gram-positive and gram-negative pathogens, coupled with its rapid absorption and excellent serum and tissue levels, make it a valuable new treatment for stubborn cases of bacterial infection.

Why bread is essential to a well-balanced diet

-even for the slimmer

Bread is a major source of protein, the B vitamins, iron and calcium, as well as providing energy. As such, it plays a key role in the national diet, and few can afford to do without it. For instance, almost *one-fifth* of the protein in an average diet comes from bread alone.

Yet bread is often under-estimated as the source of such a wide range of essential nutrients. In the right amount, it plays a vital part in helping to keep any diet in healthy balance. To deprive anyone, including the slimmer, of all the goodness of bread, can throw a diet drastically – and even imprudently – out of balance.

How the findings of the latest National Food Survey (1968) confirm the vital importance of bread in the national diet.

Percentage of essential nutrients in the average daily diet deriving from bread alone:

Protein..18.1	
Calcium..14.5	Niacin.....15.3
Iron.....17.7	Thiamine (vitamin B ₁) 20.4

In addition, 15.3% of the energy is also derived from bread.

What is the word for emotional distress?

The presenting symptoms? "Can't sleep . . . irritable . . . no appetite . . . tired . . . aches and pains"—consultation after consultation.

The task? To penetrate behind the facade to the underlying condition.

The aim? To make the patient feel better quickly and reveal the problem, without unnecessary consultations.

Tranquillizers or hypnotics may deal with part of this aim, but only part.

Prothiaden can meet all the requirements. It is rapidly effective in both anxiety and depression.

One ingredient, a single-strength capsule means straightforward dosage.

Prothiaden is well tolerated even by the elderly.

Prothiaden can mean trouble-free treatment of anxiety, depression, in fact any manifestation of emotional distress.

HOW TO CHOOSE THE BEST COURSE

It may indeed be difficult to choose the best course, when there are so many fine ones available. The choice is obvious, however, when it comes to safeguarding your own and your family's future.

It will pay handsomely to get in touch with the Insurance Agency which specialises in selecting the right policies for medical men, and can discuss his particular problems knowledgeably and sympathetically.

The Medical Insurance Agency can through its country-wide organisation give unbiased, expert advice on all insurance, estate duty and many financial problems, and undoubtedly "Choose the best Course" for you, personally.

is it gout?

Gout does not always present in the classical manner, with an inflamed big toe. It can present as pain in almost any joint. Colicky pain due to urate stones is sometimes a precursor of gout.

In circumstances like these it is worth remembering gout and having the serum uric acid level checked.

If the diagnosis is gout, ZYLORIC* is there to provide effective prophylactic treatment. ZYLORIC provides the rational way of treating gout by controlling uric acid formation and so preventing the acute attacks and the degenerative changes associated with the history of the disease.

Psychological Medicine is a journal for the publication of original research in clinical psychiatry and the basic sciences related to it. These comprise not only the several fields of biological inquiry traditionally associated with medicine, but also the various psychological and social sciences whose relevance to medicine has become increasingly apparent. Editorials and commissioned review articles will also be published from time to time.

The first issue was published in November 1970. Subsequent issues appear quarterly in February, May and August. Each issue contains approximately 80 pages. The title page, contents list and volume index for the first five issues will be contained in the November (1971) issue.

PRACTICES

(Executive Council)

For vacancies (except those in Scotland) apply on Form E.C.16A, obtainable from the Executive Council. Mark envelopes "Vacancy."

ERSKINE, RENFREWSHIRE

Applications are invited from registered medical practitioners to start a new practice within the new community being developed by Renfrew County Council at Erskine.

Applicants should be prepared to start practice by 1st September, 1971, when it is estimated that the population will be about 400/500 persons. The ultimate population of the new community is expected to be approximately 30,000 and the projected build-up is as follows:— By December, 1971 — 1,000; By December, 1972 — 3,500; By December, 1973 — 6,500; By December, 1974 — 10,000; By December, 1975 — 13,500; By 1982 — 30,000.

Renfrew County Council will arrange for temporary consulting accommodation to be made available on rental and, if desired, consideration will be given to an application for the tenancy of residential accommodation in a public-sector housing area. Private housing for purchase will also be available from early 1972. Health centre development is planned and the appointed practitioner will be expected to move to health centre accommodation when it becomes available.

A Type 'D' initial practice allowance will be payable to a practitioner with the necessary qualities and experience. The experience expected will normally be about ten years as a qualified doctor, of which two have been in hospital appointments and five in a busy general practice in this country. This allowance, regarding which further information will be given to applicants, may continue for three years and takes the form of a guarantee that the doctor's net annual professional income from all sources, after allowing for practice expenses actually incurred and accepted by the Scottish Home and Health Department, will be made up if necessary to an amount accepted by the Department as the amount of his previous net annual professional income from all sources, subject to a maximum of £5,290 net per annum.

It is anticipated that the successful applicant will lead in the development of general medical practitioner services in the community and, as the need arises, will assume partners. Further information and forms of application may be obtained from The Clerk, Renfrew County Executive Council, 64 Espedair Street, Paisley, with whom applications should be lodged by 14th June, 1971. (H9848) 3

ROYAL COLLEGE OF SURGEONS OF EDINBURGH**COURSE IN OPERATIVE SURGERY AND SURGICAL PATHOLOGY**

A course of approximately 150 lectures and demonstrations will be given commencing 19th July, 1971. The course will extend for nine weeks and is designed for graduates preparing for the Final F.R.C.S. Examinations.

For further particulars, and for enrolment form, application should be made to the Administrative Officer, Royal College of Surgeons, 18 Nicolson Street, Edinburgh EH8 9DW. (17863) 2

FINAL F.R.C.S. DAY-RELEASE COURSE**ST. BARTHOLOMEW'S HOSPITAL MEDICAL COLLEGE (University of London)**

A course of clinical demonstrations and lectures, suitable for Final F.R.C.S. examination candidates, will be given at St. Bartholomew's Hospital every Wednesday between 10.00 a.m. and 5.00 p.m. from 4th August to 20th October, 1971. The fee will be £35 and the course is officially recognised for Study Leave so that candidates may claim reimbursement of the fee from their employing authorities under the provisions of HM/67(27).

Application forms may be obtained from Mr. I. McColl, M.S., F.R.C.S. Postgraduate Assistant Dean, The Medical College of St. Bartholomew's Hospital, West Smithfield, London, EC1A 7BE (01-606 7404). (19131) 2

ROYAL COLLEGE OF PHYSICIANS**CLINICAL PHYSIOLOGY**

The programme for the Clinical Physiology session on 8th June 1971 is as follows. The session will begin at 2.30 p.m. and continue until about 6.00 p.m. with a break for tea.

HERTFORDSHIRE EXECUTIVE COUNCIL Revised Advertisement

VACANCY AT ST. NICHOLAS STEVENAGE NEW TOWN

Applications are invited for a registered medical practitioner to succeed to rapidly expanding partnership practice having a combined list of approximately 4,500 patients in the St. Nicholas area of Stevenage, which is at present classified as "Restricted". Joint applications will be considered. The vacancy arises as a result of the resignation of the two existing partners, who have been building up a new practice in this development area. It is anticipated that the practice will expand to approximately 11,000 patients over the next two to three years.

A Health Centre is planned for the area within two years, from which the successful applicants would be invited to practise, with the prospect of developing a four or five doctor group.

The resigning practitioners are practising temporarily from premises provided by the Development Corporation.

Further information and Form E.C.16A, which must be returned by the first post on 14th June, 1971, can be obtained from The Clerk, Hertfordshire Executive Council, Crown Court, Pegg Lane, Hertford. Telephone Hertford 3195. (H9863) 3

THE MEDICAL PROTECTION SOCIETY A New Post

The Medical Protection Society is expanding as growth both at home and overseas indicates. Last year an office was opened in Leeds and this created a medical staff vacancy in London, which was recently filled. To meet the needs of the future and provide an even better service to members, a FURTHER ASSISTANT MEDICAL SECRETARY for the London office is to be appointed as from 1st January, 1972, and the Council of the Society invites applications for the post.

Experience of the National Health Service is important, and some experience of lecturing and interest in the Law or medical jurisprudence would be valuable. It is anticipated that the candidate appointed would be between the ages 35-50.

Salary will be on a scale which will be incremental and superannuated. The point of entry will have regard to experience and age and will lie between £4,500 and £5,325; thereafter there will be FIVE ANNUAL increments of £200.

The professional whole-time staff of the Society includes at present five doctors and two dental surgeons.

Further details of the post may be obtained either from the Secretary, Dr. H. A. Constable, 50 Hallam Street, London, W.1. or from Dr. P. G. T. Ford, 30 Park Square, Leeds, 1. Applications (Envelope marked "Assistant Secretary"), giving full particulars, together with the names of not more than 3 referees, should reach The Secretary, Medical Protection Society Ltd., 50 Hallam Street, London, W1N 6DE, not later than 16th June, 1971. SALARY SCALES OF HOSPITAL MEDICAL STAFF

Following the Twelfth Report of the Review Body, new salary scales have been approved. These came into force on April 1, 1970. The scales are set out below:

HOUSE OFFICER: Each post in this grade shall be tenable for six months. £1,626 per annum for the posts held during the first year; £1,755 per annum for posts held during the second year; £1,884 per annum for posts held during the third and subsequent years, subject to full registration.

Deductions of £177 per annum in respect of lodging only for voluntary residence.

SENIOR HOUSE OFFICER: £2,040 per annum in the first year; £2,184 per annum in the second year; £2,328 per annum in the third or subsequent years.

Deductions of £210 per annum in respect of lodging only for voluntary residence.

REGISTRAR: £2,328 per annum x £144(3) x £126(1) — £2,886. Deductions of £210 per annum for those with remuneration at the first incremental point on the scale, and £243 per annum for those on the second and subsequent points will be made in respect of lodging only for voluntary residence.

On assimilation to the scale for Registrars, one increment and one only shall be given for any year or part of a year in excess of two spent previously in the senior house officer grade.

Allowances at rates up to £183 per annum shall be payable to house officers, senior house officers and registrars occupying posts approved for such allowances in peripheral hospitals.

SENIOR REGISTRAR: £2,760 per annum x £126(1) x £174(1) x £177(1) x £174(1) x £177(1) — £3,588.

Deductions of £270 per annum in respect of lodging only for voluntary residence.

On assimilation to the salary scale for senior registrars, increments to a maximum of two shall be given for each year or part of a year in excess of three spent previously in the registrar grade.

MEDICAL ASSISTANT: £2,520 per annum x £144(1) x £156(3) x £144(10) — £4,572.

Deductions of £270 per annum in respect of lodging only for voluntary residence.

CONSULTANT: £4,512 per annum x £201(8) x £210(1) — £6,330. Deductions of £420 per annum in respect of lodging only for voluntary residence.

COMPULSORY RESIDENCE: The Terms and Conditions of Service of Hospital Medical and Dental Staff state:

173. A practitioner who is required as a condition of his appointment to reside in a hospital shall be provided with lodging, without charge, except where the practitioner elects to occupy a house, flat or apartment for which a rental is appropriate.

All National Health Service hospital appointments are in accordance with the Terms and Conditions of Service of Hospital Medical Staff.

Further details concerning standards of residential accommodation, telephone charges, removal allowances, study leave and other matters may be obtained from the Hospital Secretary; or by B.M.A. members from the Secretary, British Medical Association. November 1970

Trends in Clinical Pathology

Essays in Honour of Gordon Signy

This book is no pious collection of personal tributes but a survey of the old and the new disciplines in clinical pathology since the second world war — research in atherosclerosis and ischaemic heart disease, progress in medical virology, microbiology and cytology, the impact of antibiotics on medical bacteriology, chemical pathology and also molecular defence, haematology in mid-century, including haemostasis and blood transfusion. The place of fibrin in the story of hyalin is another modern study, so also is that on automation. The outlook on some members of the family Enterobacteriaceae is changing, and the 'old' forensic medicine is indeed new. And those pathologists working in the under-developed countries are not forgotten. The contributors are internationally renowned.

ST. ANDREW'S HOSPITAL NORTHAMPTON

Medical Director: James Harper M.B., F.R.C.P. (Edin.) D.P.M.

St. Andrew's Hospital is a private psychiatric hospital situated in 130 acres of parkland in the county town of Northampton. In general, patients are admitted to Wantage House, a reception unit in the grounds which is equipped for the investigation and treatment of all forms of Psychiatric illness. In addition, there is accommodation mainly in private rooms both in the main hospital and in various villas for longer stay patients and geriatric patients. The hospital's amenities include Gloucester House, which comprises an Occupational Therapy department, a swimming pool, a squash court and library, while in the grounds there are tennis courts, a ninehole golf course, etc.

Fees range from £31.50 per week, and subscribers to private medical insurance schemes such as British United Provident Association and Private Patients Plan, may claim benefit in respect of these charges.

Further particulars may be obtained from the Medical Director, St. Andrew's Hospital, Northampton (Tel. Northampton 34354), who can be seen in consultation by appointment either at the hospital or at 55 Harley Street, London, W.1. 99

It goes down well with patients

Patients find Broxil Syrup easy to take. Children, for example, enjoy its fruit flavour and will readily accept their medicine. Patients with sore throats find the syrup easy to swallow, while some patients always have difficulty taking tablets or capsules. For the same reasons, Broxil Syrup may be simpler for your elderly patients too.

Broxil works. In practice, patients do seem to get better quicker with Broxil. It has the excellent safety record of a well-tried penicillin. For respiratory and ENT infections, few antibiotic treatments can match up to Broxil's record of safety and effectiveness over ten years of practice.

undamental' or anxiety!

● Found effective in 90% of patients

— In recent G.P. studies, Integrin was found effective in 9 out of 10 cases. In a double-blind comparison Integrin gave relief to 9% more patients than did chlordiazepoxide.

● Gives more profound relief from anxiety

— Seventy eight patients, most of whom were already on tranquillo-sedatives, were switched to Integrin. Their average anxiety-rating dropped to less than a third of its previous level!

— In another trial Integrin gave complete, as opposed to partial, relief of anxiety to 35% of patients; chlordiazepoxide to only 20%.

● Lifts any depressive overlay

— In contrast to the tranquillo-sedatives, Integrin actually enhances mood and restores a normal sense of well-being.

● Most patients respond within a week

— Clinical trials report that up to 90% of patients obtain relief from anxiety within the first week of treatment.
