Somatic and psychosomatic disorders of the body

Good to excellent symptom responses

The amygdala (a) in the limbic system plays the crucial part in the generation and transmission of anxiety

In excessive anxiety the hypothalamus (b) constantly produces excessive physical arousal, and a long list of anxiety symptoms and psychosomatic disorders

In 1937, it was suggested¹ that a group of structures, including the limbic system, was the anatomical source of the emotion which intensifies the individual's response to outside stimuli. Later work confirmed that view,² and has shown that anxiety and aggression are rooted in the amygdala.³ When that structure is removed or its activity suppressed, a tranquillizing effect is seen

When anxiety is excessive the amygdala stimulates the hypothalamus to produce an equally excessive level of physical arousal. In many instances such a state can serve no useful purpose: during academic examinations, for example,^{4,5} and even when watching films.⁶ It is now widely recognised that the whole process can '... trigger or otherwise promote psychosomatic and psychiatric disease'⁷

Nobrium acts mainly on the amygdala, and has a smaller, complementary action on the hypothalamus

Nobrium exerts its major effect on the amygdala, and has a smaller, complementary action on the hypothalamus.⁸ The value of this action has been explored in well over 50 published clinical trials, involving more than 5,000 patients. When the response of 3,443 individual symptoms and associated disorders was analysed, a good to excellent response was noted in 2,781 (80.8 per cent).

Nobrium: 13 Double-blind trials

Of the published clinical trials, 13 were double-blind studies in which Nobrium was compared with either placebo, phenothiazine, barbiturate or chlordiazepoxide^{9,11}

Nobrium was clearly superior to the placebo in every trial. It produced double the good to very good responses evoked by the phenothiazine,⁹ and a 76 per cent good to excellent response initially, compared with 29 per cent for phenobarbitone¹⁰

SAFETY The very small amount of inhalant often necessary to relieve an attack is important. Therapeutically, this is of benefit to the patient in avoiding any side-effects which might be brought about by taking too frequently a full measured dose. Over-dosage with the Rybarvin inhaler is virtually impossible.

ECONOMY Economically the very low cost of treatment by Rybarvin, 1500 average doses (half-minute) per 28 ml. bottle, i.e. about 1/36p per dose, must be of interest to both patient and doctor.

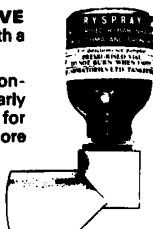

RYBARVIN INHALANT Bottles containing 15 ml. and 28 ml.

Note: **THE RYBAR INHALER CAN NEVER HAVE A BLOCKED SYPHON TUBE.** It is now fitted with a special filter (patent pending).

RYBAR LABORATORIES appreciate the convenience of the unobtrusive Pressured Pack particularly on social occasions and have produced Ryspray for prescription where doctors feel this type of pack is more suitable.

RYSPRAY PRESSURISED INHALANT is a powerful bronchodilator giving rapid and sustained relief in asthma and bronchitis. Complete unit (300 measured doses).

It is a great convenience to the patient that the amount of inhalant in the bottle can be seen.

ANTIBIOTICS AND THE INTESTINAL FLORA

Treatment with broad spectrum antibiotics suppresses the normal flora, which may be replaced by abnormal resistant organisms causing diarrhoea.

This change can be prevented or reversed by the implantation of *Lactobacillus acidophilus* which has been rendered antibiotic-resistant, and is thus able to multiply freely under these abnormal conditions. The products of growth of the organism are inimical to that of many other bacteria^{1 2} and thus contribute to its rapid preponderance over other species.

Oral treatment with antibiotic-resistant *L. acidophilus* in the form of ENPAC has been shown to eliminate *Candida* from the faeces of infants with antibiotic-induced diarrhoea, with relief of symptoms succeeded by rapid gain in weight^{3 4} and greatly to reduce the numbers of staphylococci in the faeces of patients treated with tetracyclines.⁵

Lentizol

a significant improvement in antidepressant therapy

Amitriptyline is one of the most widely-prescribed of all psychotropic agents. But like any drug, it works properly only when taken as prescribed. And published work¹ clearly shows that as many as 48% of outpatients default in taking tranquillisers and antidepressants. Even among inpatients, some 19% default in this way². A recent study reported in the *Practitioner*³, indicates that a once-daily dosage regimen is less likely to be abused.

Lentizol:

simplifying dosage to reduce patient default

Lentizol is a sustained-release form of amitriptyline designed to be taken once daily, at bedtime. Thus Lentizol offers a new simplicity of dosage to reduce patient default. Instead of having the trouble – and possible embarrassment – of taking three doses during each day, the patient simply takes one dose at bedtime.

Often lessens the incidence of daytime drowsiness

Lentizol has a sedative effect within a short time after the daily dose is taken. This can be very helpful to those depressed patients who have difficulty in getting off to sleep. Its sleep-enhancing effect is spread over the early

hours of the morning, too, so that Lentizol also benefits patients whose condition causes early-morning waking. By daytime, Lentizol will continue to provide symptom relief until the next daily dose is taken, with less risk of drowsiness.

No increase in treatment cost

One Lentizol 50 mg. capsule at bedtime will replace treatment by one 25 mg. amitriptyline tablet t.d.s. This means that the daily cost of Lentizol is equivalent to the daily cost of standard amitriptyline.

Clinical assessment in progress

Clinical appraisals of Lentizol are being carried out by a number of investigators throughout the United Kingdom. Early results⁴ indicate that Lentizol produces an improvement in patients who would be expected to respond to amitriptyline. Lentizol is widely preferred because of the simple, convenient dosage regimen. Also some workers have found it possible to discontinue night-time sedatives.

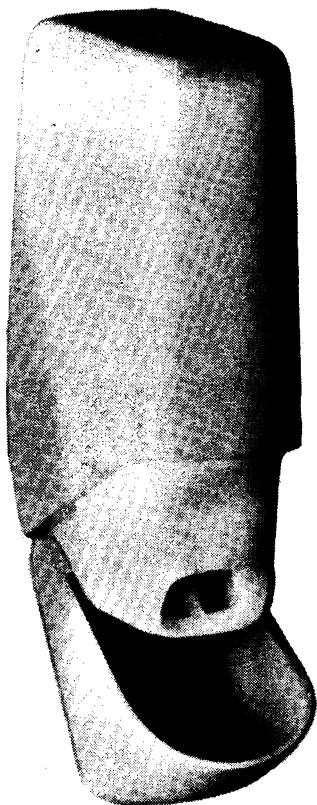

Lentizol is supplied as capsules of 50 mg. and 25 mg. amitriptyline in a sustained release formulation, each strength in packs of 50 and 250. Further information is available on request.

Autohaler

ISO-AUTOHALER OR DUO-AUTOHALER

A new kind of inhaler
operated by breath alone

Breath-triggered operation

A dose is automatically released at exactly the right moment in the patient's breathing cycle.

Built-in synchronism

The patient no longer has to co-ordinate pressing a vial and inhaling to be sure of an effective dose. *Autohaler* makes every patient an expert in inhalation technique with little instruction.

Controlled action

Patients cannot pump the *Autohaler* unit and take several puffs while inhaling. And *Autohaler* eliminates wasted doses resulting from test-firing or faulty use.

Treatment economy

Treatment costs as little as 0.33p per inhalation.* (Some ordinary aerosols cost more per puff.)

*Average cost per dose calculated from cost of one *Iso-Autohaler* complete plus one replacement cartridge.

Governed doses

With *Autohaler* it is more difficult for the patient to take excess dosage because the unit must be reset between inhalations.

Unparalleled inhalation efficiency

Because every dose from *Autohaler* is made to count, a patient is more likely to get full benefit from treatment and therefore less likely to take extra, ill-advised doses.

Iso-Autohaler and *Duo-Autohaler* are supplied as complete units for which replacement cartridges are available.

Composition *Iso-Autohaler* contains a suspension of Isoprenaline Sulphate B.P. 4 mg./ml. and delivers to the patient 0.08 mg. in each dose. *Duo-Autohaler* contains a suspension of isoprenaline hydrochloride 8 mg./ml. and phenylephrine bitartrate 12 mg./ml., and delivers to the patient 0.16 mg. isoprenaline hydrochloride and 0.24 mg. phenylephrine bitartrate in each dose.

Indications *Iso-Autohaler* and *Duo-Autohaler* give immediate relief of bronchospasm in bronchial asthma, chronic bronchitis and emphysema. **Dosage** One to three puffs should be sufficient to provide relief in most cases. It should not be necessary for the patient to take further treatment for at least thirty minutes, or more than eight treatments a day. Children: *Iso-Autohaler* and *Duo-Autohaler* should be administered to children only under the supervision of a responsible adult. **Side-effects** Overdosage may cause dry mouth, palpitations, or

nervousness. **Cautions and contra-indications** There are no absolute contra-indications, but *Iso-Autohaler* and *Duo-Autohaler* should be used with caution in the presence of cardiac disease, hypertension or hyperthyroidism.

Basic NHS prices *Iso-Autohaler*, complete unit £1.97, replacement cartridge £0.72. *Duo-Autohaler*, complete unit £2.10, replacement cartridge £0.85. *Autohaler*: registered trade mark. *Iso-Autohaler*, *Duo-Autohaler*: trade marks.

Mary Burns is thirty years old and she's suffering from an acute attack of pyelonephritis, with temperature, backache, rigors and dysuria. Her doctor's prescribing Ceporex because he wants a rapid remission of the symptoms and clearance of the causative organisms.

Ceporex is a bactericidal oral antibiotic which is

particularly effective against the common urinary pathogens. Within an hour of administration it produces high concentrations in the blood and urine, so essential for effective treatment.

In pyelonephritis, Ceporex therapy can prevent the acute condition becoming chronic. And it's well worth prescribing to that.

Successful treatment starts with
Ceporex
cephalexin

See previous page for more information

"There's a lot to be said for Ceporex in respiratory tract and ENT infections"

At the International Conference on Cephalosporins, 1970*, cephalixin was shown to be of great value in infections of the respiratory tract. That's because it kills the majority of pathogens commonly responsible for these conditions.

Ceporex was also shown to provide a valuable new therapy in ENT infections which had sometimes failed to respond to standard antibiotic treatment.

Rapid absorption, excellent serum and tissue levels, together with a wide spectrum of activity

against both gram-positive and gram-negative organisms, make it a logical choice in the stubborn infection. And a wide range of strengths and presentations make it simple and safe to prescribe.

the 'inside secret' of treating in-rolling feet

Prescribe an external shoe wedge, and you only do part of the job. The wedge wears away to become largely ineffective—and in any case it disturbs the proper balance of the shoe. On top of that you run the risk of introducing a psychological problem too—what child wants to wear shoes that make him look and feel abnormal?

The answer can be found in Start-rite INNERAZE, the shoes that are orthopaedically designed to correct in-rolling with an invisible built-in wedge that can't wear or change shape.

For further information about the shoes with an 'inside secret' or details of the explanatory 12-minute INNERAZE 16mm colour film available on loan, write to: C. James, Fitting Consultant, Start-rite Shoes Ltd., Crome Road, Norwich, NOR 60A.

A simple achievement. Yet a tremendous one for the angina patient. Because without Trasacor he could only manage five stairs before pain stopped him.

Trasacor gives the angina patient a new lease of life. Protects his heart from the effects of excessive sympathetic stimulation due to physical and emotional stress.

But Trasacor does more than just relieve anginal pain. It exerts a continual beneficial action on the heart, even at rest, producing a fundamental improvement in the heart's efficiency. Moreover, because Trasacor is less likely to provoke heart failure than previous beta-blockers it can be used earlier and more widely in angina.

BRITISH MEDICAL JOURNAL, 12 JUNE 1971

The unique mode of action of disodium cromoglycate offers the asthmatic patient outstanding benefits. A prophylactic treatment, it prevents the onset of asthmatic episodes - thus minimising long-term damage to lung tissue. Freedom from asthma attacks permits a happier, more normal life for the asthmatic patient.

Published clinical reports¹⁻²² confirm that with INTAL COMPOUND, the incidence and severity of acute attacks is considerably reduced - even in patients on conventional therapy such as bronchodilators, antihistamines and corticosteroids. Less time is lost from work or school,

exercise tolerance is improved and a consistent clinical comment on disodium cromoglycate has been the total absence of serious side effects.

INTAL COMPOUND - supplied in SPINCAPS (each containing 20 mg disodium cromoglycate, and 0.1 mg Isoprenaline Sulphate BP in powder form, together with an inert carrier). For use in a special insufflator - SPINHALER.

A name to conjure with.

'*Largactil*' has been a name to conjure with in psychiatric medicine for over sixteen years. An influence of such magnitude and long duration can be explained by examining this legendary name.

'*Largactil*' was so named because of its LARGE variety of ACTIons ; apart from being the first major tranquillizer, it acts in two other pharmacologically distinct ways – as a potentiator of central nervous depressants, including analgesics, narcotics and sedatives, and as an anti-emetic.

'*Largactil*' has achieved success in the fields of psychiatry, general medicine and anaesthetics in an ever-widening range of indications. These include major and minor psychoses ; as an adjuvant to E.C.T. ; drug withdrawal ; senile dementia ; the control of terminal pain and nausea and vomiting.

Alone, or as an adjuvant –
are you making **FULL** use of
'*Largactil*' ?

Diseases of the Joints

Arthritis and rheumatism are common complaints, even if patients are often vague about the exact meaning of the terms they use. In the last few years the diagnosis of joint disorders has become more exact, while the introduction of local and systemic steroid therapy and the powerful non-steroidal anti-inflammatory drugs has revolutionized treatment. In an attempt to bring doctors up to date in this field, the *B.M.J.* published in 1969 a series of short articles giving practical advice on the common disorders of the joints. The articles have now been revised by their authors and collected together to form this handbook on the management of arthritis.

GENERAL PRACTICE TRAINING POSTS

HEALTH SERVICES JOINT ADVISORY COMMITTEE FOR THE LIVINGSTON AREA

The Livingston Project Vocational Training Scheme

Applications are invited from registered medical practitioners for two vacancies in the Scheme. Preference will be given to doctors who have had some post-registration experience either in hospital or general practice. The programme is of three years duration and is designed to meet the needs and interests of individuals with a view to eventual appointment in the Livingston Integrated Health Services project as a General Practitioner/Medical Assistant with duties both in the community and a hospital specialty.

The training and opportunities offer a new and satisfying role for young doctors and anticipate likely developments in the health service.

Further particulars from the Principal Medical Adviser to the Health Services Joint Advisory Committee for the Livingston Area, Bangour General Hospital, Broxburn, West Lothian, to whom applications, stating age, qualifications, experience and giving the names of two referees should be sent by 21st June, 1971. NORTHAMPTON AND DISTRICT
HOSPITAL MANAGEMENT COMMITTEE
BOROUGH OF NORTHAMPTON AND COUNTY OF
NORTHAMPTONSHIRE

VOCATIONAL TRAINING for GENERAL PRACTICE

Applications are invited for two posts of trainee General Practitioner at Northampton, beginning 1st October, 1971.

The first of these appointments is for three years and is intended for a doctor who has completed his pre-registration year. The second appointment is for 2½ years and is intended for a doctor who has completed his pre-registration year and who has also held a recognised six months' appointment in obstetrics and gynaecology. On completion of training both will be entitled to the Vocational Training Allowance.

The trainee will spend his first year (or six months) in established posts in obstetrics and gynaecology (3 year post only) and paediatrics, after which he will be eligible to sit the D.Obst.R.C.O.G. and D.C.H. examinations. The first six months of the second year will be spent in one of a number of supernumary posts offering experience in a variety of specialties, and the second six months will be spent half time in general practice and half time in hospital (mainly in out-patient clinics). The third year will be spent in a different training practice and the trainee will be allowed adequate time to attend courses and particularly that run by the Thames Valley Faculty of the Royal College of General Practitioners (on a day release basis).

A memorandum about the scheme will be sent on request. Salary at SHO/registrar level for the first year, depending on previous experience, and at registrar level after that. Married accommodation may be available for the first 18 months of the training period.

Applications are invited by The Royal Australasian College of Physicians for an Adolph Basser Research Fellowship tenable in 1972.

The Fellowship will have a value in the range \$A7,000 to \$A10,000 according to qualifications and experience. Graduates in medicine, preferably with research experience, are eligible. The research project should be in a field related to the problems of clinical medicine. Work under the Fellowship must be carried out in Australia or New Zealand in a university department or institute approved by the College. Appointment will be for one year in the first instance but may be renewed on application each year to a maximum of five years. Detailed information of the conditions of award and regarding application may be obtained from the Honorary Secretary, The Royal Australasian College of Physicians, 145 Macquarie Street, Sydney, Australia.

Applications (sixteen copies) should be lodged with the Honorary Secretary on or before Monday, 2nd August, 1971. (H5420) 14-1

THE UNIVERSITY OF SHEFFIELD

THE JAMES MORRISON RESEARCH FELLOWSHIP

Applications are invited for the vacant James Morrison Research Fellowship. The person appointed, who need not necessarily be medically qualified, will be required to pursue full-time research in the laboratories of the new Western Park Hospital for Radiotherapy, which opened in April 1970. The research should have a link with the investigation or treatment of malignant disease and/or the effects of irradiation or radioactive materials. Further particulars on current lines of investigation in which the successful applicant may participate may be obtained from the Registrar, but applicants for the Fellowship are invited, if they so wish, to propose a project of their own choice. Tenure normally three years. Stipend according to qualifications and experience not exceeding £1,930 a year (with F.S.S.U. or N.H.S. Superannuation benefits in appropriate cases). Candidates expecting to graduate this Summer may apply and if successful, their terms of award will be similar to those of comparable M.R.C. or S.R.C. awards. Further particulars from the Registrar to whom applications (10 copies) should be sent by 21st June, 1971. Quote Ref: R. 94/P. (19652) 14-1

GUY'S HOSPITAL MEDICAL SCHOOL
Department of General Practice

LECTURER IN GENERAL PRACTICE

The integrated health service planned for the 60,000 people moving to Thamesmead near Woolwich will form the basis of a community teaching unit for Guy's medical and dental students. The first permanent health centre will be opened towards the end of this year.

There is now a vacancy for a third doctor to join the partnership to form a group practice in the autumn. For the first 6 months or so he will have an opportunity to gain research and other experience at Guy's, and work begun during this period can be carried forward while his list is building up. During this initial period he will be offered a full-time appointment in the lecturer grade (£2,450-£3,926), at a starting point appropriate to his experience and qualifications or a part-time appointment if he wishes to undertake limited clinical duties at Thamesmead from the beginning. Ultimately he will be expected to look after 2,000 to 2,500 patients, devoting 2 sessions a week to teaching as a part-time Lecturer.

Further details and application form may be obtained from the Dean, Guy's Hospital Medical School, London Bridge, S.E.1. (19535) 14-1

COMMERCIAL APPOINTMENTS

Beecham Pharmaceutical Division

MEDICAL ADVISOR Europe

Beecham's growth with its semi-synthetic penicillins and other pharmaceuticals necessitates the appointment of an experienced Medical Adviser to initiate and monitor clinical trials throughout Europe. He would be responsible professionally to the Medical Director of the Pharmaceutical Division, although his priorities would be set by the European management. He would be kept abreast of the Company's fundamental research and enjoy the full support of a well-established Medical Department. A significant proportion of his time would be spent in Europe in contact both with the Company's indigenous Medical Advisers and direct with medical practitioners.

The successful candidate will have had some years' experience in the Pharmaceutical industry and will preferably be fluent in French or another European language. He must be a qualified medical practitioner under 45.

An attractive starting salary will be offered together with a company car and membership of one of the best non-contributory pension and life assurance schemes available.

Please write briefly stating your qualifications and experience to: The Personnel Director, Beecham Pharmaceutical Division, Beecham House, Great West Road, Brentford, Middlesex. (19384) 15

Hospitals, tenable at the Radcliffe Infirmary, Oxford. At the
Radcliffe Infirmary the hospital bacteriological and public health
laboratories are fully integrated, and the successful applicant will be
in charge of the conjoined laboratory, and will be required to take a
full share in undergraduate and postgraduate teaching.
There is a separate bacteriological laboratory at the Churchill
Hospital, and plans are well advanced for a new teaching hospital at
Headington which will have provision for both hospital and public
health microbiology, and should open in 5-7 years' time, when the
responsibility for the various microbiological laboratories associated
with the United Oxford Hospitals will be determined.
The Laboratory may be visited by arrangement with the present
Consultant Microbiologist, Dr. W. H. H. Jebb, Telephone: Oxford
49231/2.
Salary and terms and conditions of service as for Consultants in the
NHS.
Full particulars may be obtained from the Administrator, United
Oxford Hospitals, Radcliffe Infirmary, Oxford, or from the
Secretary, PHLS Board, 24 Park Crescent, London, W1N 4DA, to
whom applications (12 copies) should be sent by 9 July, 1971,
stating date of birth, qualifications and experience, and naming
three referees. (H9977) 33-1

MICROBIOLOGY

RICHARDSON-MERRELL LTD.

MICROBIOLOGIST

One division of Richardson-Merrell concerns itself with the
manufacture of a range of preparations designed to combat
infection in infants both in the hospital environment and in
the home.

This division now needs a microbiologist to undertake four
specific types of activity:

1. To conduct Clinic Trials and
Epidemiological surveys.
2. To assist with the organisation of
Scientific Symposia.
3. To maintain a close liaison with medical
and other hospital workers in fields of
epidemiology and infection control.
4. To advise on the microbiological content
of advertising material and
representatives' training.

The job will involve a considerable amount of travel within
the U.K. and, to a limited extent, in Europe. A company
car will be provided.

We are looking for an M.B., Ph.D. or M.Sc. who has
experience of work in a microbiological laboratory. We
need also a man or woman with initiative, ambition and a
penchant for hard work.

Write giving brief details initially to:

Dr. A. L. Macnair, Richardson-Merrell Limited
20 Savile Row, London W1X 2AN

When you diagnose Tonsillitis, you're in Penbritin Territory

The right-first-time antibiotic for infections in children

Penbritin is right because its broad spectrum includes β -haemolytic streptococci. This pathogen, the most common bacterial cause of tonsillitis, is becoming increasingly resistant to the tetracyclines.

Penbritin destroys it.

Penbritin is right because its safety is well proven. This contrasts with recent publicity drawing attention to the problems of tooth staining and bone deposition which may follow tetracycline therapy.

Two palatable syrups, capsules, tablets and the new paediatric suspension enable you to prescribe Penbritin in the right form for any patient. Injectable Penbritin is also available if required. Following the recent price reduction the average daily cost of treating tonsillitis with Penbritin is just 8½p.

Penbritin is right because it is well proven. Published references show that Penbritin has an overall success rate of 95% in upper respiratory infections. This figure confirms Penbritin as the right-first-time antibiotic.

Dosage: Children under 10 years – 125 mg q.i.d. $\frac{1}{2}$ – 1 hour a.c.
Older children and adults – 250 mg q.i.d. $\frac{1}{2}$ – 1 hour a.c.
In severe infections these dosages may be increased.

Contra-indication: Penicillin hypersensitivity.

Side-effects: as with other penicillins.

Further information is available on request.

undamental' or anxiety!

● Found effective in 90% of patients

▶ In recent G.P. studies, Integrin was found effective in 9 out of 10 cases. In a double-blind comparison Integrin gave relief to 9% more patients than did chlordiazepoxide.

● Gives more profound relief from anxiety

▶ Seventy eight patients, most of whom were already on tranquillo-sedatives, were switched to Integrin. Their average anxiety-rating dropped to less than a third of its previous level!

▶ In another trial Integrin gave complete, as opposed to partial, relief of anxiety to 35% of patients; chlordiazepoxide to only 20%.

● Lifts any depressive overlay

▶ In contrast to the tranquillo-sedatives, Integrin actually enhances mood and restores a normal sense of well-being.

● Most patients respond within a week

▶ Clinical trials report that up to 90% of patients obtain relief from anxiety within the first week of treatment.
