the diuretic that entirely obviates the need for potassium supplements

'Moduretic' is a completely new diuretic from Merck Sharp & Dohme that induces a highly effective diuresis as well as helping the body to *conserve* its natural balance of potassium.
'Moduretic' offers the physician the means of treating patients with a diuretic while avoiding the limitations imposed by potassium supplements. Indeed, 'Moduretic' conserves body potassium so effectively that potassium supplements are contra-indicated.

'Moduretic' is available as peach-coloured, diamond-shaped tablets containing 5 mg amiloride hydrochloride/MSD and 50 mg hydrochlorothiazide/MSD.

Detailed information is available to physicians on request.
'Moduretic' is a registered trademark.

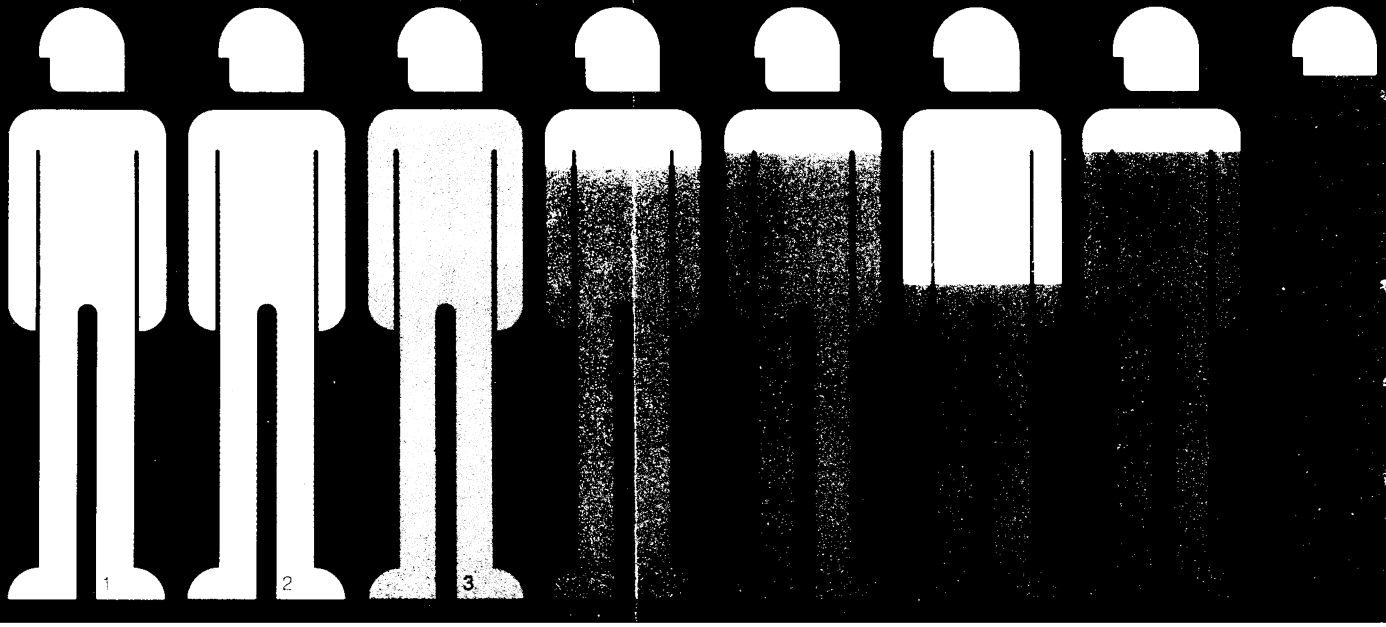
Somatic and psychosomatic disorders of the body

Good to excellent symptom responses



The amygdala (a) in the limbic system plays the crucial part in the generation and transmission of anxiety

In 1937, it was suggested[1] that a group of structures, including the limbic system, was the anatomical source of the emotion which intensifies the individuals response to outside stimuli. Later work confirmed that view,[2] and has shown that anxiety and aggression are rooted in the amygdala.[3] When that structure is removed or its activity suppressed, a tranquillizing effect is seen

In excessive anxiety the hypothalamus (b) constantly produces excessive physical arousal, and a long list of anxiety symptoms and psychosomatic disorders

When anxiety is excessive the amygdala stimulates the hypothalamus to produce an equally excessive level of physical arousal. In many instances such a state can serve no useful purpose: during academic examinations, for example,[4,5] and even when watching films.[6] It is now widely recognised that the whole process can '... trigger or otherwise promote psychosomatic and psychiatric disease'[7]

Nobrium acts mainly on the amygdala, and has a smaller, complementary action on the hypothalamus

Nobrium exerts its major effect on the amygdala, and has a smaller, complementary action on the hypothalamus.[8] The value of this action has been explored in well over 50 published clinical trials, involving more than 5,000 patients. When the response of 3,443 individual symptoms and associated disorders was analysed, a good to excellent response was noted in 2,781 (80.8 per cent).

Nobrium: 13 Double-blind trials

Of the published clinical trials, 13 were double-blind studies in which Nobrium was compared with either placebo, phenothiazine, barbiturate or chlordiazepoxide[9-21]

Nobrium was clearly superior to the placebo in every trial. It produced double the good to very good responses evoked by the phenothiazine,[9] and a 76 per cent good to excellent response initially, compared with 29 per cent for phenobarbitone[10]

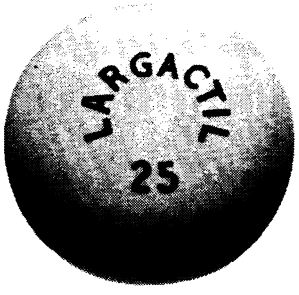
A name to conjure with.

'Largactil' has been a name to conjure with in psychiatric medicine for over sixteen years. An influence of such magnitude and long duration can be explained by examining this legendary name.

'Largactil' was so named because of its LARGe variety of ACTIons ; apart from being the first major tranquillizer, it acts in two other pharmacologically distinct ways – as a potentiator of central nervous depressants, including analgesics, narcotics and sedatives, and as an anti-emetic.

'Largactil' has achieved success in the fields of psychiatry, general medicine and anaesthetics in an ever-widening range of indications. These include major and minor psychoses ; as an adjuvant to E.C.T. ; drug withdrawal ; senile dementia ; the control of terminal pain and nausea and vomiting.



Alone, or as an adjuvant – are you making FULL use of 'Largactil' ?

The Duke of Gloucester's anguish in 'King Lear'– after his torture and blinding, and the revealed treachery of his son, Edmund – may not find many exact parallels in modern society, but his mood 'all dark and comfortless' is seen often enough in patients suffering from depression and anxiety. In such cases Triptafen-DA can often help; lifting the basic depression and calming any underlying or overt anxiety. The combined action of amitriptyline and perphenazine relieves the symptoms of depression and anxiety, no matter which condition predominates.

Each Triptafen-DA tablet contains amitriptyline hydrochloride BP 25mg and perphenazine BP 2mg. Also available: Triptafen-DA Suspension.

If doctors had founded their own insurance company, they'd probably have called it the Medical Sickness Society.

They did.

Eighty seven years later the Society still concerns itself solely with the assurance needs of the medical and dental professions.

And nobody else.

Which gives us a particularly expert knowledge of your problems and needs.

As you'd expect, we offer a specialised range of pension policies, sickness insurance and life policies. All designed for doctors like you.

And they're especially profitable policies because we're a mutual society. Which means all the profits go back to our with-profit policyholders.

If you're a doctor, isn't it time you found out more? Write for a prospectus today quoting ref BMJ4.

What is the word for emotional distress?
The presenting symptoms? "Can't sleep . . . irritable . . . no appetite . . . tired . . . aches and pains"—consultation after consultation.
The task? To penetrate behind the facade to the underlying condition.
The aim? To make the patient feel better quickly and reveal the problem, without unnecessary consultations.
Tranquillizers or hypnotics may deal with part of this aim, but only part.
Prothiaden can meet all the requirements. It is rapidly effective in both anxiety and depression.
One ingredient, a single-strength capsule means straightforward dosage.
Prothiaden is well tolerated even by the elderly.
Prothiaden can mean trouble-free treatment of anxiety, depression, in fact any manifestation of emotional distress.

Half-hearted

measures in the treatment of hypertension can be fatal.

There is now convincing evidence that in hypertension, whether mild or severe, blood pressure must be maintained in the normal range. Any degree of hypertension – and by inference, incomplete therapeutic control– still carries a high long-term morbidity.

Complete control is usually impracticable with conventional antihypertensive agents because of prohibitive side effects. Not so with 'Inderal'. This drug maintains normal blood pressure by night as well as day. Hypotensive crises due to changes in posture, activity or external temperature do not occur. Mental, sexual and gastro-intestinal functions are unimpaired.

'Inderal', with a thiazide diuretic, controls some 80% of hypertensive patients. It is a real step forward in preventive medicine.

Detailed information, available on request, should be consulted before prescribing.

Halt at the flashing light

Flashing lights and visual disturbances, classically early warnings of migraine, are signals for arresting all manifestations of an attack – at onset.
MIGRIL* acts in the minutes between initial warning and the otherwise inevitable full-blown attack.
As well as containing an effective dose of ergotamine (2 mg in each tablet), enhanced by caffeine, MIGRIL contains the anti-emetic, cyclizine. Nausea and vomiting, due to migraine itself or to ergotamine, are very effectively relieved.
MIGRIL, taken at the first warning of an attack, provides a specific treatment that the patient will learn to rely on.

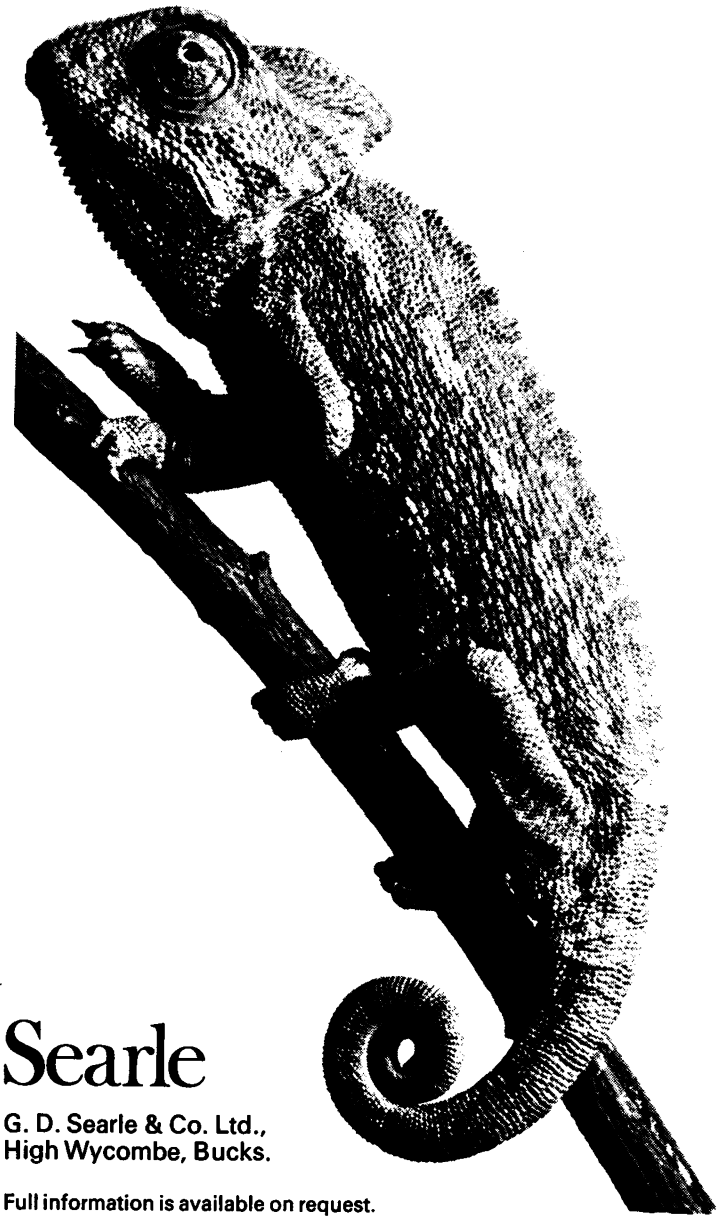
Migril masters migraine

The changing background of diuretic therapy

...in congestive cardiac failure



● Diuretic therapy

The traditional approach to C.C.F. was rest, digitalis to improve cardiac function, and a diuretic to reduce oedema. The diuretic could be mild, moderate or potent, according to the doctor's judgement.

The problem of potassium loss

Under diuresis the reduction in plasma volume leads to a compensatory increase in the secretion of aldosterone. This causes reabsorption of sodium and water in exchange for potassium. The result is a feeling of general ill-health in the patient, and a growing risk of digitalis intoxication.

● Diuretic with potassium supplements

To moderate the effects of potassium loss doctors have tried supplemental potassium, in the hope that the extra potassium ingested might compensate for that being excreted.

Is the problem solved?

Unfortunately this has shortcomings. Extracellular potassium is easily replaced, but if the intracellular levels have been disturbed the problem of correction is extremely difficult. Without constant electrolyte checks potassium supplements are at best a hit or miss solution, and the long-term risk of bowel ulceration can never be ignored.

● The role of spironolactone . . .

to supplement and enhance the effectiveness of your chosen diuretic.

To obviate many of the hazards already mentioned more and more doctors are now adding Aldactone-A to the initial regimen of digitalis and a diuretic. By its unique action Aldactone-A effectively reduces potassium loss caused by conventional diuretics, and eliminates the need for potassium supplements.
Aldactone-A will combat the effects of diuretic-induced secondary aldosteronism. By its synergism with the more proximally acting diuretic Aldactone-A will provide a smooth, increased diuresis, with the later possibility of a reduction in diuretic dosage.

Used from the start of therapy, Aldactone-A will:—

- **Reduce the long-term hazards of thiazide therapy e.g. drug-induced diabetes, gout.**
- **Not normally allow refractory states to develop.**
- **Eliminate the need for potassium supplements.**
- **Avoid the "washed out" feeling common to so many patients on long-term diuretic therapy.**
- **Improve the long-term prognosis.**

In the treatment of arthritis, Brufen relieves pain, stiffness and swelling. By extending the range of pain-free movement, Brufen provides the improved joint flexion essential for progressive improvement in functional capacity.
Because Brufen is so well tolerated, dosage can be adjusted in the individual patient to achieve the best response. There is little likelihood of having to reduce dosage or withdraw treatment because of side-effects.

These are the facts about Brufen – it is highly effective, dosage is simple and flexible and has a singularly low incidence of side-effects. These are the very real benefits for your arthritic patients when you prescribe Brufen. Brufen is available as tablets, each containing 200 mg of ibuprofen. Full information is available from

A few hard facts about ear wax solvents

In the literature regarding the efficacy of ear wax solvents conclusions have been drawn based wholly on in vitro studies but their validity in clinical practice has been questioned.

A recently published report of in vitro studies of ear wax solvents with a controlled clinical trial—probably the first carefully designed and controlled work on the subject—compared the efficacy of six widely used solvents and again confirmed the importance of in vivo studies.

Cerumol was found to be the only product significantly more effective than the control.

Small wonder that CERUMOL remains the most widely prescribed ear wax preparation.

Which patients benefit most from Floxapen?

Young patient aged 4 Sore throat, temperature 101·4; "Pharyngitis, may develop into quinsy."

Elderly patient aged 73 Deep seated infection of knee which had failed to respond to penicillin G and tetracycline.

Diabetic aged 29 Presents with infected wound on left foot. "Only seemed a scratch at first," she says. You notice extensive reddening around the area.

You can recognise in your practice the patients who will most benefit from Floxapen, Beecham's new penicillin.

Patients who need a more effective antibiotic, in whom the risks of infection are greatest or where the consequences of inadequate treatment are serious. The young and elderly, diabetics, asthmatics, patients suffering severe infection, patients on steroids or recently discharged from hospital and those with a history of treatment failure, will all benefit from Floxapen's extra margin of activity.

Floxapen is uniquely well absorbed, orally or by injection. Both methods achieve similarly high blood levels at a simple dose of 250 mg q.i.d.

Floxapen offers the traditional penicillin advantages of low toxicity and bactericidal action against streptococci, pneumococci, and staphylococci.

Moreover it destroys staphylococci resistant to other penicillins, which present an increasing problem in General Practice.

V.I.P treatment for the new hypertensive

If the patient who has started on new therapy is to co-operate fully, maintain his composure and increase his confidence, early effective control of blood pressure must also be accompanied by the lowest possible risk of distressing side-effects. Because ESBATAL* meets these criteria it is of special value for the new hypertensive patient and also for those patients who are uncomfortable or uncontrolled on other therapy. Individual dosage is rapidly and reliably achieved, and dose response is soon predictable in a particular patient. ELECTRIC ANAESTHESIA by interference currents

The NEIP-1 apparatus operates on the phenomenon of alternating sinusoidal currents of different frequency. This new method consists in depressing the central nervous system by means of electric current of varying characteristics thus having predominant depressant effects on the brain.

The advantages of electric anaesthesia are immediate introduction and withdrawal with no toxic after-effects, and the simplicity and compactness of the NEIP-1. Eminently suitable for patients in terminal conditions, or those suffering from severe forms of myasthenia, and in cases where anaesthesia is needed urgently but chemical anaesthesia is not recommended. Clinical tests have proven the effectiveness of the NEIP-1 apparatus.

1905 An important year for coffee lovers

It was the year Dr. Ludwig Roselius discovered how to remove caffeine from coffee without altering its flavour.

Since then, thanks to him and his Kaffee H.A.G., no one need say "No" to coffee! Today, in nearly every country in the world, the Medical Profession is recommending it increasingly in cases where caffeine is contra indicated. Enjoy good coffee and good sleep.

Liberal samples are free to any doctor applying to The A.A. Supply Co. Ltd., Dept. BM, 31/33 Priory Park Road, London, N.W.6.

THE MEDICAL PROTECTION SOCIETY

A New Post

The Medical Protection Society is expanding as growth both at home and overseas indicates. Last year an office was opened in Leeds and this created a medical staff vacancy in London, which was recently filled. To meet the needs of the future and provide an even better service to members, a FURTHER ASSISTANT MEDICAL SECRETARY for the London office is to be appointed as from 1st January, 1972, and the Council of the Society invites applications for the post.

Experience of the National Health Service is important, and some experience of lecturing and interest in the Law or medical jurisprudence would be valuable. It is anticipated that the candidate appointed would be between the ages 35-50.

Salary will be on a scale which will be incremental and superannuated. The point of entry will have regard to experience and age and will lie between £4,500 and £5,325; thereafter there will be FIVE ANNUAL increments of £200.

The professional whole-time staff of the Society includes at present five doctors and two dental surgeons.

GUY'S HOSPITAL MEDICAL SCHOOL
Department of General Practice

LECTURER IN GENERAL PRACTICE

A community teaching unit for Guy's medical and dental students is being developed at Thamesmead (Greenwich/Bexley). The first permanent health centre will be opened towards the end of this year. Two members of the department are already engaged in developing the medical services as the population grows, and a third partner is now required. Applications are invited from doctors interested in a post that combines teaching and general practice. This partner will ultimately be expected to build up a list of 2,000-2,500 patients, but the first six months might be spent in a clinical or research department at Guy's and work begun during this period could be carried on while the list is building up. Remuneration would be derived from N.H.S. funds on the basis of the list size and from academic funds on a sessional basis.

SPECIAL APPOINTMENTS

Update Publications Limited

DEPUTY EDITORIAL DIRECTOR

Update Publications Limited will shortly appoint a deputy editorial director to work in close association with the editorial director, Dr. Abraham Marcus.

The company is responsible for three publications Update and Update Plus directed to general practitioners, and Teach-In, directed to junior hospital staff and senior students, which will commence publication in January 1972.

The successful applicant will be a doctor between 30 and 40 years old, he will have had ample experience in hospital and will have a wide understanding of medicine in general practice and in the community as well as in the hospital. He will have extensive contacts in medicine including the academic sector.

He will also have an interest in medical education; he will be imaginative and will be able to follow through ideas and secure their practical application. The selection and presentation of information at all levels in medicine will be within his scope and to this task he will bring flair and insight.

He will be involved in all the publications run by the company. He will have day to day responsibility in the editing of these formerly as well as a share in future planning and in the development of new projects. His work will touch on production, advertising and management. But his principle role will be in creative editing. He will probably have had experience in medical journal publishing.

This is a progressive post and the commencing salary is £4,000 per year. Ability and application will push it well beyond this level. To a large extent the successful applicant can fashion his own future within the organisation.

Applicants should provide a detailed account of their careers in medicine and in medical journalism. Write to:

Dr. Abraham Marcus, Update Publications Limited, Albany House, 324 Regent Street, London W1R 5AA.

HOUSE OFFICER: **Each post in this grade shall be tenable for six months. £1,626 per annum for the posts held during the first year; £1,755 per annum for posts held during the second year; £1,884 per annum for posts held during the third and subsequent years, subject to full registration.**

Deductions of £177 per annum in respect of lodging only for voluntary residence.

SENIOR HOUSE OFFICER: **£2,040 per annum in the first year; £2,184 per annum in the second year; £2,328 per annum in the third or subsequent years.**

Deductions of £210 per annum in respect of lodging only for voluntary residence.

REGISTRAR: **£2,328 per annum x £144(3) x £126(1) — £2,886.**

Deductions of £210 per annum for those with remuneration at the first incremental point on the scale, and £243 per annum for those on the second and subsequent points will be made in respect of lodging only for voluntary residence.

On assimilation to the scale for Registrars, one increment and one only shall be given for any year or part of a year in excess of two spent previously in the senior house officer grade.

Allowances at rates up to £183 per annum shall be payable to house officers, senior house officers and registrars occupying posts approved for such allowances in peripheral hospitals.

SENIOR REGISTRAR: **£2,760 per annum x £126(1) x £174(1) x £177(1) x £174(1) x £177(1)-£3,588.**

Deductions of £270 per annum in respect of lodging only for voluntary residence.

On assimilation to the salary scale for senior registrars, increments to a maximum of two shall be given for each year or part of a year in excess of three spent previously in the registrar grade.

MEDICAL ASSISTANT: **£2,520 per annum x £144(1) x £156(3) x £144(10)-£4,572.**

Deductions of £270 per annum in respect of lodging only for voluntary residence.

CONSULTANT: **£4,512 per annum x £201(8) x £210(1)-£6,330.**

Deductions of £420 per annum in respect of lodging only for voluntary residence.

COMPULSORY RESIDENCE: The Terms and Conditions of Service of Hospital Medical and Dental Staff state:

173. A practitioner who is required as a condition of his appointment to reside in a hospital shall be provided with lodging without charge, except where the practitioner elects to occupy a house, flat or apartment for which a rental is appropriate.

All National Health Service hospital appointments are in accordance with the Terms and Conditions of Service of Hospital Medical Staff.

Further details concerning standards of residential accomodation, telephone charges, removal allowances, study leave and other matters may be obtained from the Hospital Secretary; or by B.M.A. members from the Secretary, British Medical Association. November 1970

ONLY A FEW HOURS AWAY

CANADA

with years of growth ahead

Since 1867, when Canada was founded, enterprising and resourceful people from many lands have built this big, young country into one of the world's fastest developing industrial nations.

With a modern technological economy, sharing in the continuing economic development of North America, Canada already has one of the highest standards of living in the world. Yet Canada has its own distinctive way of life.

Rich in resources, largest country in the Commonwealth, second largest in the world, Canada has years of even greater growth ahead. And, of course, Canada is only a few hours away by air – six days by sea.

LECTURER OR SENIOR LECTURER IN ANATOMY

Applications are invited from suitably qualified persons for appointments as Lecturer/Senior Lecturer in Anatomy. Applications from graduates with teaching and research experience in cytology and histology including histo-chemistry, or embryology including developmental biology, or neuroanatomy will be welcome.

The Department has excellent facilities for electron microscopy and some preference may be given to candidates with experience in this field.

Salary according to qualifications and experience within the following scales:—Science Graduate: Lecturer: $NZ4,300 x $200 to $5,500 per annum. Senior Lecturer: $NZ5,600 x $200 to $7,200 per annum with a bar at $6,600 per annum. Medical Graduate: Lecturer: $NZ5,335 to $7,639 with a bar at $6,291 per annum. Senior Lecturer: $NZ7,866 to 9,101 per annum. (Note: $NZ100 equals £46.67 stg; $US112; $A100.)

Academic salary scales are subject to regular cost-of-living increases and to triennial review. An adjustment is expected shortly.

Promotion to the grade of Senior Lecturer is normally considered when the lecturer reaches the maximum for that grade.

A particularly well qualified candidate could be appointed at the grade of Associate Professor at a salary within the range $NZ7,000-$8,200 (Science Graduate), or $NZ9,550-$10,281 (Medical Graduate).

The post in cytology and histology is available for a two-year term and an appointment with return fares paid could be negotiated. With the increased pre-clinical student intake, however, this position may well become a permanent one.

Further particulars should be obtained from the Secretary-General, Association of Commonwealth Universities (Appts.), 36 Gordon Square, London, WC1H 0PF (Tel: 01-387 8572) or from the Registrar of the University.

Applications close in New Zealand and London on 31st July, 1971. (19806) 61-1

ST. ANDREW'S HOSPITAL
NORTHAMPTON

Medical Director: James Harper M.B., F.R.C.P. (Edin). D.P.M.

St. Andrew's Hospital is a private psychiatric hospital situated in 130 acres of parkland in the county town of Northampton. In general, patients are admitted to Wantage House, a reception unit in the grounds which is equipped for the investigation and treatment of all forms of psychiatric illness. In addition, there is accommodation mainly in private rooms, both in the main hospital and in various villas, for longer-stay patients and geriatric patients.

The hospital's amenities include Gloucester House, which comprises an Occupational Therapy Department, a swimming pool, a squash court and library, while in the grounds there are tennis courts, a nine-hole golf course, etc.

Fees range from £31.50 per week, and subscribers to private medical insurance schemes such as British United Provident Association and Private Patients Plan, may claim benefit in respect of these charges.

Further particulars may be obtained from the Medical Director, St. Andrew's Hospital, Northampton (Tel. Northampton 34354), who can be seen in consultation by appointment, either at the hospital or at 55 Harley Street, London, W.1. 99

4 separate problems- solved with one antibiotic

'Keflex' is the oral antibiotic that could resolve these problems – combining bactericidal action, broad-spectrum activity, *and very high urine levels.* With care, 'Keflex' may be used even in patients with renal damage.

Its rapid action together with almost complete absorption, plus a very low incidence of gastro-intestinal side effects are the reasons why so many patients with urinary infections recover so quickly with so few problems following 'Keflex' therapy.

THE NEW GENERAL PRACTICE 2

from the British Medical Journal

What important developments are there in General Practice? Does the General Practice Team work successfully? What is the Family Doctor's future role in the Hospital Service? These and other questions are answered in *The New General Practice 2* which, published two years after the first volume in this series, also deals with topics such as the use of computers, plans for the new towns, and Scandinavian developments in general practice. This second volume contains 27 articles published in the *B.M.J.* in the last two years. The introduction has been written by Professor J. D. E. Knox, Professor of General Practice at Dundee University.

undamental' or anxiety!

Found effective in 90% of patients

In recent G.P. studies, Integrin was found effective in 9 out of 10 cases. In a double-blind comparison Integrin gave relief to 9% *more* patients than did chlordiazepoxide.

Gives more profound relief from anxiety

Seventy eight patients, most of whom were already on tranquillo-sedatives, were switched to Integrin. Their average anxiety-rating dropped to less than a third of its previous level!

In another trial Integrin gave *complete*, as opposed to partial, relief of anxiety to 35% of patients; chlordiazepoxide to only 20%.

Lifts any depressive overlay

In contrast to the tranquillo-sedatives, Integrin actually enhances mood and restores a normal sense of well-being.

Most patients respond within a week

Clinical trials report that up to 90% of patients obtain relief from anxiety within the first week of treatment.

Betnovate is better. So is she.

Infected infantile eczema: all the better for Betnovate-N

Eczema patients respond better to Betnovate than to other topical steroids. Two clinical trials, involving 916 patients and comparing Betnovate with five other leading topical steroids, proved this conclusively.

Their findings included:

"... whenever preferences were expressed, there were always more for betamethasone 17-valerate than for the other corticosteroids."[1]

"Betamethasone 17-valerate was statistically superior to the other topical corticosteroids in fourteen of the twenty separate subdivisions of the trial; in no instance was it inferior."[1]

"A better response is more likely with betamethasone 17-valerate than with any of the other corticosteroids tested."[1]

"... response in psoriasis is a more stringent test of the efficacy of a corticosteroid than response in eczema. The superiority of betamethasone 17-valerate in this context is noteworthy."[2]

When you add the broad-spectrum antibiotic neomycin to the most effective steroid you can prescribe, the result is Betnovate-N. In infected infantile eczema it gives rapid relief from itching and inflammation and thus achieves the best response. The one thing to remember is Betnovate. Add an N to fight the infection.
