MODURETIC[®]
 **DIURETIC**

a highly effective
diuretic that entirely
obviates the need for
potassium supplement

the problems... answered by 'Moduretic'

diet — low in potassium

'... elderly patients select for themselves a diet relatively poor in potassium content even in circumstances where an adequate intake is available.'

Geront. clin. (Basel), 1971, 13, 119 (May-Jun)

potassium loss — with standard diuretics

'Hypokalaemia is a common problem during prolonged diuretic therapy.'

Brit. med. J. 1969, 3, 222 (26 Jul)

'Moduretic' provides a smooth and highly effective diuresis and, at the same time, *helps the body to conserve its natural potassium*. These features are of additional benefit when, perhaps unknown to the physician, an oedematous patient is also living on a diet which is low in potassium.

potassium supplements — their limitations

'It is difficult to persuade patients to take [potassium] supplements of more than 25–40 mEq per day, and the ability of such a dose to prevent potassium depletion has not yet been proved.'

Brit. med. J., 1969, 3, 157 (19 Jul)

'Moduretic' offers a most acceptable alternative to the numerous and often unpalatable potassium supplements. 'Moduretic' is a highly effective diuretic that conserves body potassium—entirely obviating the need for potassium supplements, which in fact should not be given.

symptoms — often mistaken as 'old age'

'All too often the effects of potassium depletion are accepted as being due to old age, general debility and so on. Because of this the significance of the patient's complaints, especially weakness and lethargy, may be missed.'

Brit. J. Hosp. Med., 1971, 6, 83 (Jul)

If the patient is on diuretic therapy, weakness and lethargy may well be due to the effects of potassium depletion and not just old age. By conserving the body's natural potassium, 'Moduretic' will help to combat these symptoms.

digitalis — heightened risk of intoxication

'Digitalis overdose is very common especially in the elderly.'

'... [The most common causes] today are simple overdose, impaired renal function and depletion of body potassium.'

Brit. J. Hosp. Med., 1971, 6, 83 (Jul)

'Moduretic' should always be considered for oedematous patients who also require digitalis. The potassium-conserving effect of 'Moduretic' can play an important part in reducing the risk of digitalis intoxication.

Moduretic' is available as peach-coloured, diamond-shaped tablets containing 5 mg amiloride hydrochloride and 50 mg hydrochlorothiazide. Detailed information is available to physicians on request. ® denotes registered trademark.

A name to conjure with.

'*Largactil*' has been a name to conjure with in psychiatric medicine for over sixteen years. An influence of such magnitude and long duration can be explained by examining this legendary name.

'*Largactil*' was so named because of its LARGE variety of ACTIons; apart from being the first major tranquillizer, it acts in two other pharmacologically distinct ways – as a potentiator of central nervous depressants, including analgesics, narcotics and sedatives, and as an anti-emetic.

'*Largactil*' has achieved success in the fields of psychiatry, general medicine and anaesthetics in an ever-widening range of indications. These include major and minor psychoses; as an adjuvant to E.C.T.; drug withdrawal; senile dementia; the control of terminal pain and nausea and vomiting.

Alone, or as an adjuvant –
are you making **FULL** use of
'*Largactil*'?

Doctors in the Australian Army get the best of all worlds

A new life in Australia. With first class passage paid for you and your family. A job waiting—and all the advantages of a service practice.

With extraneous administration taken off your hands, you can really do your job properly. You could be in an R.M.O. unit, field ambulance station or military hospital and there are opportunities for updating medical knowledge and techniques. Then there's the sports and social side, too.

The sort of man we're looking for is preferably under 40—with medical qualifications registerable in the Commonwealth of Australia. He's medically fit—prepared to serve anywhere and is a British subject eligible for permanent residence in Australia. If this sounds like you, this is what we'll do for you.

You'll be appointed to a Short Service Commission for 4 years in the Medical Corps of the Australian Army in the minimum rank of Captain, where your pay would amount to £11.78 a day after the equivalent of 5 years service. (Your professional experience in England serves to ante-date your period of service). Tax and a refunded retirement benefit will be deducted from this—though your clothing and marriage allowances of £0.13 and £0.91 a day are not taxed. You also receive a bounty of about £1,540.

If this sounds like your sort of life, contact: Brigadier L. I. Hopton, MBE, Australian Army Representative, Australia House, Strand, London WC2. Telephone: 01-836 2435. Extn. 356.

Diseases of the Joints

Arthritis and rheumatism are common complaints, even if patients are often vague about the exact meaning of the terms they use. In the last few years the diagnosis of joint disorders has become more exact, while the introduction of local and systemic steroid therapy and the powerful non-steroidal anti-inflammatory drugs has revolutionized treatment. In an attempt to bring doctors up to date in this field, the *B.M.J.* published in 1969 a series of short articles giving practical advice on the common disorders of the joints. The articles have now been revised by their authors and collected together to form this handbook on the management of arthritis.

Superior to ampicillin or sulphadimidine

In a comparative trial,¹ cure rates achieved in urinary tract infections were 85% with SEPTRIN*, 70% with ampicillin and 40% with sulphadimidine. SEPTRIN was judged "clearly superior to either of the other treatments."²

(Cure criterion = eradication of infecting organism 1 week after end of treatment).

Lundbeck in Britain

Lundbeck Limited is backed by all the experience and scientific resources of H. Lundbeck & Co. of Copenhagen and Aktiebolaget Leo of Helsingborg, Sweden. We are thus a research-based pharmaceutical house with firmly established laboratories employing more than 300 staff on research and development alone.

Our manufacturing experience, too, goes back many years, during which we have developed a devotion to quality control that is one of our most cherished traditions.

From our laboratories have come advances in the fields of antibiotics, hormones, sulphonamides, and psychotropic drugs, which are recognised, in terms of prescription, by the doctors of over 40 countries.

One of these countries is Britain, where already many of our contributions are well known and widely used.

Current research projects are concentrating on cancer, mental illness, and inflammatory diseases. New products of Lundbeck research will become available here during 1972 and we will provide full details through our medical information services. Our Managing Director Dr. W. T. Simpson will also be happy to deal with any enquiries direct.

When babies* have duodenal ulcers...

Caved-S in contrast to other liquorice preparations can be prescribed because the liquorice principle has been deglycyrrhizinated. This means that the hazards normally associated with ordinary liquorice agents are avoided.

*(A 13 week old infant with D.U. reported)

But for your adult patients

who have failed to respond to other forms of chemotherapy, the reason may be due to underdosage or the normal dosage produced side effects which cannot always be tolerated.

A metabolic study¹ and more than twenty hospital trials, and treatment with more than eight million patients in over forty countries has proven Caved-S deglycyrrhizinated liquorice is free from side effects of oedema, hypokalaemia, muscle paresis etc.^{2' 3' 4}

An unpublished hospital trial, the results of which are in our hands, has been carried out with Caved-S tablets at increased dosage on forty severe duodenal ulcer patients (age range 40-65) who had all been referred for surgery has demonstrated recurrent episodes can be prevented. The report stated "Patients with severe duodenal ulcers who had been referred for surgery were divided into two groups and treated with either eight or twelve tablets daily, for eight or sixteen weeks respectively. The higher dosage was statistically more effective than the lower dosage in preventing relapses..." Patients were followed up for a minimum of one year and it was concluded that,

"HIGH DOSES OF DEGLYCYRRHIZINATED LIQUORICE (CAVED-S) SHOULD BE GIVEN TO PATIENTS WITH DUODENAL ULCERS BEFORE SURGERY IS ATTEMPTED".

A girl student aged 15 years, who, wanting to commit suicide, ingested 26 tablets of Mogadon.

In the absence of her parents, the patient took this dose together with half a bottle of wine. The patient was admitted to hospital 12 hours later. Respiration and circulation were normal, the patient was in a state of fairly prolonged deep sleep with marked muscle relaxation.¹

Now you can sleep easy

Against a background of increasing concern about the danger of barbiturate poisoning (as few as 20 or 30 tablets may prove fatal), the advent of Mogadon must be of considerable importance. Indeed, Mogadon "..... appears to be as nearly as safe as a drug can be."² Even as many as 80 tablets have produced no untoward effects. Moreover, a recent trial in the B.M.J. showed Mogadon comparable in effect to butobarbitone.³ When such a drug exists, should you risk using anything else?

New power to stop pain crippling

No previous agent
has combined
such power to control
arthritic pain and
improve joint function
with such freedom from
serious side effects

Description and Presentation

PRINALGIN alclofenac (4-allyloxy-3-chlorophenylacetic acid) is a powerful new analgesic which shows marked anti-inflammatory action in animal experiments. Clinically, it has been compared favourably with phenylbutazone, indomethacin, pentazocine and morphine in well controlled double-blind trials. PRINALGIN tablets, each containing alclofenac 500 mg are available in packs of 100 and 500. (Basic N.H.S. cost of 100: £2.26)

Prescribing Information

Indications: Pain, especially in arthritis and rheumatism.

Dose: One or two tablets every 4-6 hours.

In arthritic and rheumatic conditions 2 tablets 3 times daily, reducing this initial dose as symptoms are controlled.

Side Effects: PRINALGIN is very well tolerated and there are no serious side effects.

There are occasionally reports of nausea and indigestion but these are rarely sufficient to warrant cessation of treatment.

Occasionally cutaneous intolerance occurs but this is reversible on withdrawal of the drug.

One case of possible hypersensitivity to PRINALGIN has been reported.

Precautions

There are no special precautions to be taken in the administration of PRINALGIN but, as with any drug, it should be

administered with caution in cases of impaired renal or hepatic function and in diabetes.

Although animal tests in several mammalian species have revealed no teratogenic effects, as with all new drugs

PRINALGIN is not recommended during the first trimester of pregnancy.

The effect of
PRINALGIN
upon joint pain
and function
ranks with that of
phenylbutazone
or indomethacin, yet **PRINALGIN**
has caused no serious side effects
in any of the 4,500 patients
treated in clinical trials.

PRINALGIN does not cause
gastric erosions, blood dyscrasias
or liver damage and
has no hormonal actions.

SPECIAL APPOINTMENTS

Help give Diabetic Children a Holiday —

SIX MEDICAL OFFICERS

The British Diabetic Association will be running their Summer Holidays for Diabetic Children during the period from the second week in July until the third week in August this year. The sites will be located in rural and coastal areas in Sussex, Essex, Scotland and Wales. These holiday camps help diabetic children to understand and cope with their disease. They get the chance of meeting other children with the same handicap, thereby giving them confidence. Parents also get a respite while their children are away. The British Diabetic Association urgently wants helpers at the camps. The B.D.A. will pay all expenses and an honorarium. In return will you help look after some children who need your help?

Please write to Mrs. J. Brimfield, The British Diabetic Association, 3/6 Alfred Place, London WC1E 7EE. (19149) 18

APPLICANTS ARE ADVISED NOT
To send original testimonials when replying to advertisements. Copies will serve the purpose quite as well, and in the event of their being lost or mislaid no inconvenience will ensue.

COMMERCIAL APPOINTMENTS

Clinical Research

Squibb, which is one of the world's leading and expanding pharmaceutical companies is looking for an experienced doctor to work in the U.K. Medical Department. The post will encompass the whole range of medical advisory duties, but most of the time will be spent in the development of new and existing drugs in both the United Kingdom and to a lesser extent Scandinavia.

Ideally we hope to find a doctor between the ages of 30 and 45 with previous experience in the industry. Preference would be given to someone with a specialist knowledge of psychotropic drugs, but none of these factors are essential.

In order that he should keep up to date with progress in medicine, he will be encouraged to attend courses, symposia etc., and to take up a clinical assistantship at a nearby hospital.

Prospects are good, the salary is attractive and there are numerous company benefits including a car, non-contributory pension fund, life assurance and free membership of B.U.P.A.

Applications with details of education and experience should be sent to:

RYNACROM[®]

Sodium Cromoglycate BP for hay fever

In the form of Intal, Sodium Cromoglycate is already proven as a valuable anti-allergic therapy.^{1,2} The introduction of Rynacrom now makes Sodium Cromoglycate available for the control of symptoms of hay fever. Administration is by a specially-designed nasal insufflator that is recharged with a Rynacrom capsule at each application.

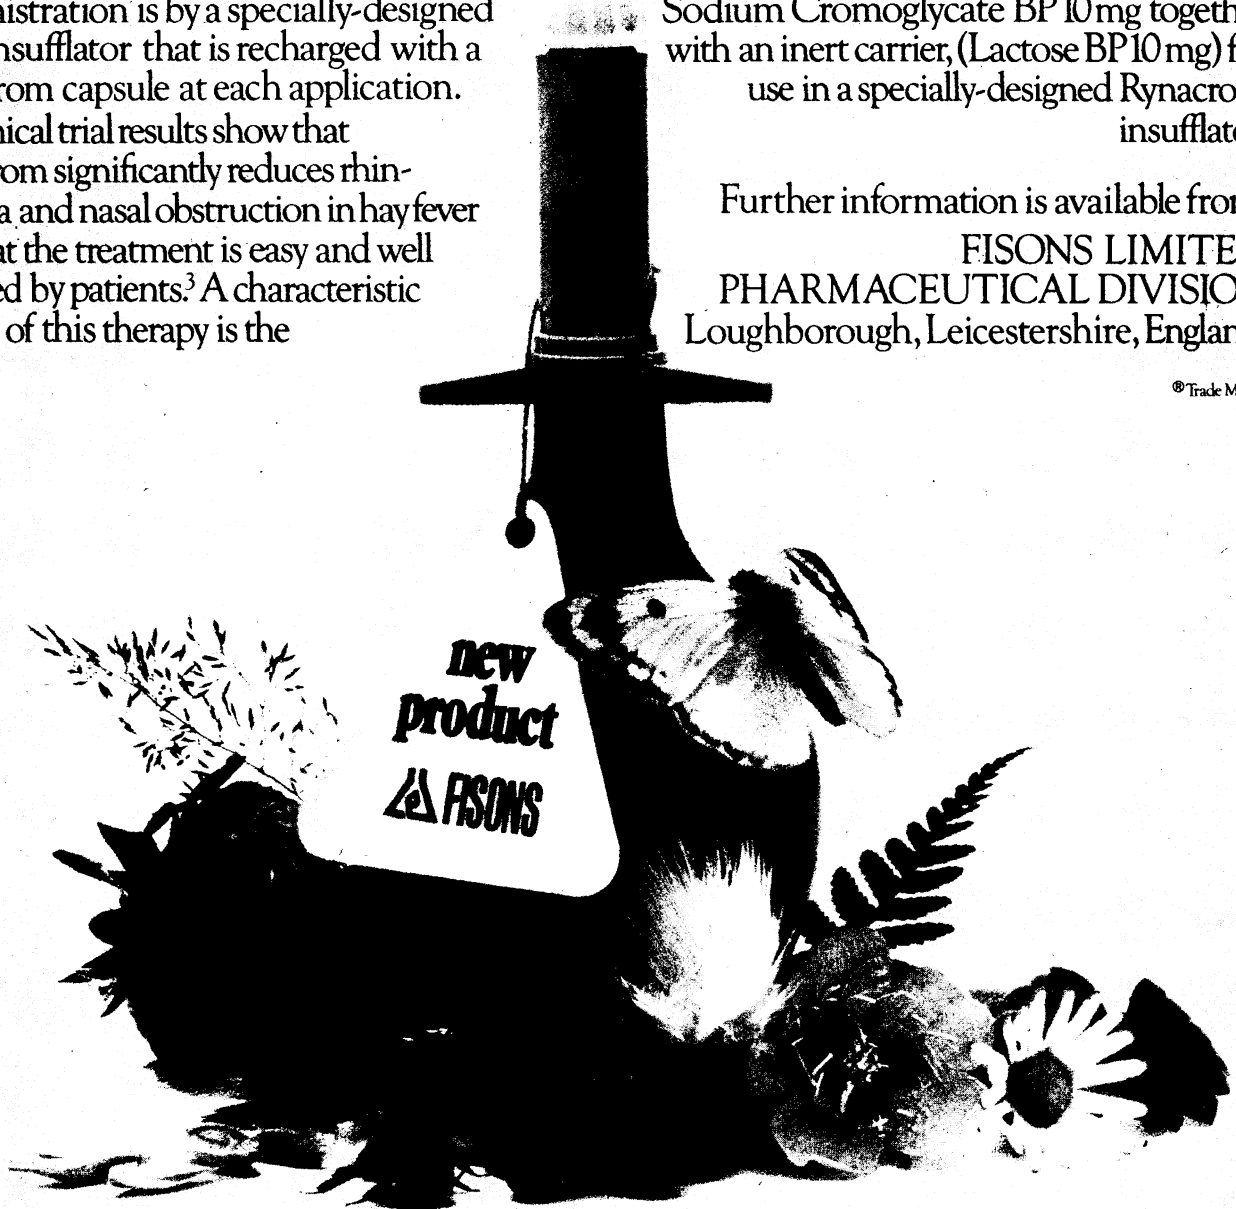

Clinical trial results show that Rynacrom significantly reduces rhinorrhoea and nasal obstruction in hay fever and that the treatment is easy and well accepted by patients.³ A characteristic feature of this therapy is the

extremely low incidence of side effects.^{1,2,3}

For this reason many of the problems of conventional hay fever therapy do not arise with Rynacrom. Rynacrom is supplied as capsules containing Sodium Cromoglycate BP 10 mg together with an inert carrier, (Lactose BP 10 mg) for use in a specially-designed Rynacrom insufflator.
