MODURETIC[®] DIURETIC

'Moduretic' provides a smooth and highly effective diuresis and, at the same time, *helps the body to conserve its natural potassium*. These features are of additional benefit when, perhaps unknown to the physician, an oedematous patient is also living on a diet which is low in potassium.

'Moduretic' offers a most acceptable alternative to the numerous and often unpalatable potassium supplements required during prolonged diuretic therapy. Oral potassium should not be given with 'Moduretic'.

By conserving the body's natural potassium, 'Moduretic' helps the patient whose symptoms of weakness and lethargy are not 'just old age', but are in fact caused by potassium depletion.

'Moduretic' should always be considered for oedematous patients who also require digitalis. The potassium-conserving effect of 'Moduretic' can play an important part in reducing the risk of digitalis intoxication.

a highly effective diuretic that entirely obviates the need for potassium supplements

'Moduretic' is available as peach-coloured, diamond-shaped tablets containing 5 mg amiloride hydrochloride and 50 mg hydrochlorothiazide. Detailed information is available to physicians on request. ® denotes registered trademark.

THE FAT PATIENT

What makes some people fat? Weight stability depends upon a balance between calorie intake and metabolic expenditure. As knowledge has grown it has become necessary to review the problem of the great majority of people whose overweight was ascribed to overeating. It has been shown that they may have basic defects in their peripheral carbohydrate and fat metabolism.

Ponderax (fenfluramine), introduced in 1963, has been shown to be effective in producing weight loss in patients who had not responded or found dietary control of body weight difficult. In recommended dosage it is without signs of central stimulation, addiction or tolerance. Its principal actions are on glucose uptake and lipid turnover. It increases utilisation of carbohydrate.

Just think!

In the literature regarding the efficacy of ear wax solvents conclusions have been drawn based wholly on in vitro studies but their validity in clinical practice has been questioned.

A recently published report of in vitro studies of ear wax solvents with a controlled clinical trial, probably the first carefully designed and controlled work on the subject, compared the efficacy of six widely used solvents and again confirmed the importance of in vivo studies.

Cerumol was found to be the only product significantly more effective than the control.

Reference: J. Laryngology & Otology (1970), LXXXIV No. 10, 1055.

Small wonder that CERUMOL remains the most widely prescribed ear wax preparation.

BACKACHE? SCIATICA?

**"If exercises do not work,
try a corset"**

(The Practitioner, Vol. 208. "The Management of Low Back Pain and Sciatica").

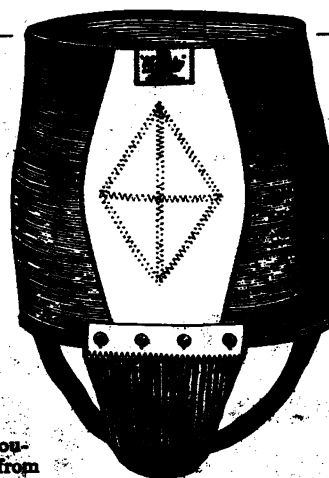

Relief from lumbar pain can be obtained by exercises or wearing a corset.

However, many sufferers need not go to these extremes. This is where the "MANLY" belt has proved so helpful.

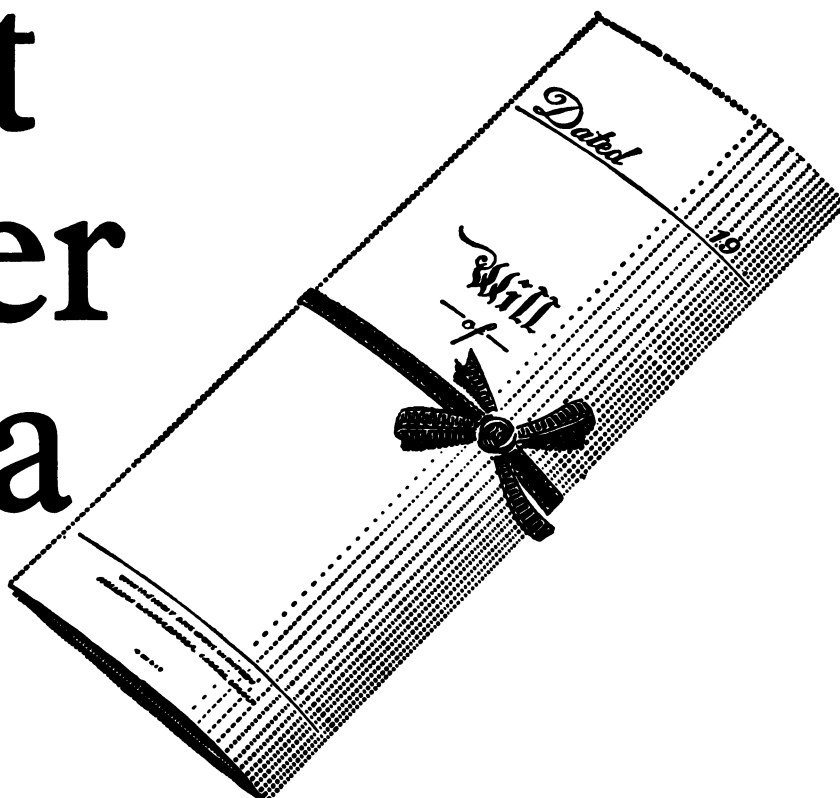

The "Manly" is the modern approach, Comfortable, convenient . . . no bones, laces or buckles . . . and invisible when worn.

Over two decades, thousands of male sufferers from various forms of backache have gained relief by wearing the "Manly." (Also imparts invaluable abdominal support).

Johnny's had more than his fair share of infections

For children such as Johnny who, every year, seem to be more often in the surgery than out of it, Keflex has a lot to offer.

Rapidly absorbed and reaching high serum levels, Keflex has a broad spectrum of antibacterial activity that even includes penicillinase-producing pathogens, and so increases the chances of first-time success in treating infective episodes.

All these properties, plus an extremely low incidence of rash and gastro-intestinal disturbance, make the pleasant-tasting Keflex suspensions a treatment which ensures that most patients like Johnny can overcome infection quickly and with the minimum of complications.

In urinary tract infections

Do bacteria like liquorice ?

They won't when it is accompanied by the nitrofurantoin in CEDURAN tablets. Deglycyrrhizinated liquorice is included in CEDURAN tablets to effectively combat the gastric side-effects, so often a cause of unsuccessful treatment with nitrofurantoin. In 82 patients* in whom treatment had to be abandoned because of side-effects. There was an almost complete absence of untoward reactions from CEDURAN. Furthermore, in a recent survey† of the sensitivities of urinary pathogens, nitrofurantoin was one of the only three preparations recommended as primary oral treatment.

The next best thing to a new skin. Metosyn.

The Chameleon inhabiting Africa, India and the Mediterranean regions of France and Spain, sheds its skin all year round. The new skin is soft, smooth and healthy.

Patients with inflammatory dermatoses may often wish that they could step out of their old skin with all its defects and, like the Chameleon, emerge with a healthy new skin. Unfortunately, they can't—so for them the next best thing to a new skin is 'Metosyn'.

"It would seem therefore, that fluocinonide ['Metosyn'] is an important advance in the

treatment of psoriasis and eczema compared to betamethasone valerate." *Acta Dermatoven., Suppl. 67*, (1972), 64-65.

Anything less than full support for topical hydrocortisone is undesirable

In addition to the production of contact dermatitis, the dangers of the selective action of topical antibiotics in the treatment of infected dermatoses are now well-recognised.⁽¹⁾

Experimental studies⁽¹⁾ have shown, that even in healthy subjects, pyoderma developed following occlusive treatment with neomycin. It was concluded that these experiments "do emphasize the dangers which can follow the alteration of the normal flora of the skin." In view of the variety of hazards associated with topical antibiotics, it was also stated: "...serious doubt must now be cast on their routine use."

In Betadine® H/C Cream, povidone-iodine provides ideal support for hydrocortisone because it kills all pathogenic and potentially pathogenic organisms within 15 seconds of contact. "It does not allow the emergence of antibiotic resistant strains as it kills pathogenic organisms in an unselective manner."⁽²⁾

Betadine Ointment, which has no hydrocortisone

acetate content, is also available when purely antimicrobial therapy is required.

The beauty of Calmurid HC in eczema:

The difficulty of treating the essentially inflammatory condition of dry eczema is that it occurs beneath a barrier of dry, scaly skin.

So the heavy artillery is wheeled in. The massively potent fluorinated steroids. The logic: *saturation* treatment. The result? Only too often such serious side effects as skin atrophy and wasting, systemic absorption and adrenal suppression.

Now reverse the logic. *Select*, rather than saturate. Take a medicament proven highly successful in the treatment of dry, scaly skin. Calmurid. Use its deeply penetrating action as a means of carrying the milder, natural steroid, hydrocortisone, right through to the eczematous area.

The result this time is a very evident clearance of inflammation. And the remarkably early disappearance of the dry, scaly skin.

Double blind trials have shown that Calmurid incorporating hydrocortisone at least equals the potent fluorinated steroids in efficacy. It is without their hazards. It lends itself especially to the treatment of infants and children and for use in all long-term therapy. A sample awaits your request.

Indications

Atopic Eczema, Besnier's Prurigo, acute and chronic allergic eczema, neurodermatitis and other hyperkeratotic skin conditions with accompanying inflammation.

Unwanted Effects

Being hypotonic and acidic, Calmurid HC may cause stinging following initial application to raw, fissured or weeping surfaces. Application to mucous membranes may cause stinging for the same reason.

Contra-indications

Skin tuberculosis, viral infections, secondarily infected dermatoses, syphilis, herpes simplex, vaccinia, chicken pox and measles. Syphilis, skin lesions, concurrent mycotic infections (excepting Candida) may be aggravated by combination with antimycotic treatment.

Application

Apply twice daily after washing the affected area. The action is moist therapy, should be aimed at drying the area before instituting Calmurid HC therapy.

Earning £5,000 a year is one thing. Getting some real capital together is another.

Achieving a high income level is very gratifying, but it doesn't necessarily follow that you have an adequate amount of capital at your disposal.

And yet it's essential to make some provision for the time, perhaps 10 or more years ahead, when your income level is bound to drop, probably quite sharply.

The Abbey Ten Plus Bond is one of the few investment plans that recognizes this simple fact of life.

Basically, the Ten Plus Bond is a savings scheme which, through the medium of life assurance, is designed specifically for the man with adequate disposable income, and with the prospect of sustaining this income and his premiums for a period of at least ten years. The Ten Plus Bond builds up a capital sum, with no tax liability on the eventual benefit, full tax relief on the contributions, and life assurance cover to protect your family while your investment is accumulating.

The tax benefits of the Ten Plus Bond are simply stated. First, you are entitled to claim income tax relief on your premiums.

And secondly, provided you have maintained payment of your premiums for at least 10 years, you will take the accrued benefit completely free of income tax, capital gains tax and surtax.

But perhaps the greatest attraction to the sophisticated investor is the Ten Plus Bond's unique flexibility. Several options are available, both as to where your money is invested and as to

when you take the benefit of your investment.

You can, for example, allocate your investment to the Abbey Equity Bond Fund, to the Abbey Property Bond Fund, or to the Abbey Selective Bond Fund, or to a combination of any two, or to all three of these Funds. These multi-million pound funds provide the important combination of security and growth. If you pay annually, you can vary the allocation year by year. You can also switch your accumulated investment among the funds.

At the end of 10 years you have the option of cashing in your investment, or leaving it to accumulate free of tax, or continuing your contributions. Alternatively, you may take an annual withdrawal from your Bond as an income.

The specimen plan illustrated will show you how the Abbey Ten Plus Bond could develop for a man aged 44, prepared to invest £500 a year. (Naturally, it's impossible to predict exactly how any investment will perform, and the benefits projected here are subject to fluctuation, but they are based on estimates of a 5½% annual capital appreciation in the Abbey Selective Bond Fund and a net income yield of 2½%.)

The Abbey Ten Plus Bond will not appeal to every investor.

It's not designed that way. But for the family man earning more than £5,000, and likely to remain at that income level for the next 10 to 15 years, it makes a lot of sense.

At the very least it deserves looking into.
This coupon will let you do just that.

Now

After 10 years

Or after 15 years

Or after 20 years

A man aged 45 next birthday contributes £500 each year, total investment £5,000, equivalent to £4,225 after tax relief. Continuing life cover is £6,000.

On the assumed growth rates he will receive £7,063.

He will receive £10,223.

He will receive £14,865.

MEDICINE IN A TROPICAL ENVIRONMENT

Medicine in a Tropical Environment is intended for medical students and doctors working in tropical and developing countries. The essays bring together specific problems of the tropical environment which have been the subject of recent investigation, and the authors write on them from personal experience. Little of the material on which the essays are based was available more than five years ago. The book should stimulate the interest of students, doctors, and non-medical scientists in trying to solve some of the problems raised in almost every chapter. To doctors in temperate climates preparing themselves for medical work in developing parts of the world *Medicine in a Tropical Environment* is essential reading.

COMMERCIAL APPOINTMENTS

Opportunities in Clinical Research

up to £5,500+car

One of the world's leading ethical pharmaceutical companies, with a strong research base in the UK and a wide range of new and established therapeutic products, is currently expanding its clinical research programme. There are currently opportunities for **three** registered medical practitioners, who may be at quite different stages of their own personal and career development.

These are key opportunities as the successful candidates will work in close association with research scientists in many other disciplines, and will make a real contribution to the planning and management of specific research projects.

They will have particular responsibility for maintaining close liaison with physicians and research workers outside the company, for initiating, coordinating and conducting clinical trials, and for evaluating and presenting the results. Publication of research findings and attendance at medical meetings is encouraged.

The candidates we seek may currently be :
in hospital work at the registrar level or above
or in an academic appointment
or in general practice
or already within the pharmaceutical industry.

They may be male or female, and, within reasonable limits, of any age. They will, however, be keenly interested in therapeutics and in a career within industry. In addition, each will possess an active and keen mind, a flair for lucid expression, a positive attitude towards responsibility, challenge and hard work, and a

successful career record to date. A higher qualification would be particularly advantageous, but is not essential.

In addition to a basic salary of £4,500 to £5,500 (or even more for an exceptional candidate), there are many additional benefits. These include a Company car, bonus, free life assurance, generous pension scheme, a pleasant geographical location in Southern England in a lowish-cost housing area, and extensive financial assistance towards removal and re-establishment costs.

Other progressive opportunities exist within the Group, and enquiries are also welcomed from qualified medical practitioners whose interests lie beyond the scope of the present appointments.

Job Satisfaction

occurs when a person's tasks are clearly defined, when he is allowed to rise to the job's intellectual challenge, to get on with his work without interference and without anyone breathing down his neck, when there is a convivial and stimulating atmosphere, when he has opportunity for others to see how good he is (such as by publication), when he is supported by experience and resources and when he is judged on, and rewarded for, his efforts and achievements. If your present position lacks any one of these assets – read on.

The company that already markets a number of drugs including CLOMID (a fascinating product), DEBENDOX, KOLANTYL, MERBENTYL, NETHAPRIN, TENUATE and TACE, and which has others – even more interesting – in the pipeline, has a vacancy in its Medical Department for a

Deputy Medical Director

This position of responsibility and opportunity requires a well trained and experienced Medical Adviser. Alternatively, we are prepared to consider a less experienced doctor as

Medical Adviser

with a view to promotion when (s)he is worth it. In this case, full training and supervision will be given; in either case, the right personality and a willingness to learn are more important than present knowledge.

The company policy on remuneration is to start at a better than fair salary and then to reward effort and achievement. We want a person who rises to this sort of challenge. The work is varied and interesting (refer to the BMJ for 4th December, 1971, pages 586 and 590 to see what we mean). The company is vigorous and dynamic but works to the highest ethical standards. We're a good crowd to work with and all things will be going for you.

Why don't you write to me, telling me all about yourself, what you've done and why, what you hope to do and why. It's in both of our interests that the right person is appointed, so let's be frank throughout. Write to

UNIVERSITY OF OXFORD
Board of Governors of
The United Oxford Hospitals
Oxford Regional Hospital Board

SENIOR REGISTRAR TRAINING POSTS IN MEDICAL ADMINISTRATION
The 2 Hospital Boards together with the University have created a programme of training spanning four years designed for candidates with good clinical backgrounds who have an interest in medical administration. Although previous administrative experience is not essential, candidates should be able to demonstrate their ability to organize effectively and work closely with professional and other colleagues. The first year of the programme is intended to create a link between clinical work and administration, the candidate spending this year as Admissions Officer for the United Oxford Hospitals and as a Trainee Epidemiologist in the Department of the Regius Professor of Medicine. This attachment would continue in the second year when the candidate would be working with the Oxford Regional Hospital Board instead of the United Oxford Hospitals. The third year of the programme would be spent on the full-time course at the London School of Hygiene and Tropical Medicine leading to the M.Sc. degree in medical administration. During the fourth year, the candidate would be engaged in research to the thesis required for the M.Sc. It is intended that the arrangements will allow the fourth year to be spent in Oxford with one or more of the organizations participating in this programme. The posts will be paid on the Senior Registrar grade. Further details may be obtained from the Group Assistant Secretary, Radcliffe Infirmary, Oxford. Application forms should be returned to him by 6th May, 1972. (31517) 54-5

DEPARTMENT OF HEALTH AND SOCIAL SECURITY
HOSPITAL SCIENTIFIC AND TECHNICAL SERVICES

Following the Government's acceptance of the recommendations of the Zuckerman Report on Hospital Scientific and Technical Services it has been decided to set up a new unit in the Department under a Chief Scientist, and approval has been given for the creation of a number of new posts for doctors and other professionally qualified staff.

The candidates appointed will be required to take part in the formation of policies relating to the application of science to medicine, including the organization of scientific services within the N.H.S. and training of staff and the co-ordination of scientific research in hospitals.

The fields in one of which candidates will be required to be qualified include pathology, medical physics, nuclear medicine, applied physiology and clinical measurement, medical electronics and electro-mechanical engineering. Persons appointed will preferably have had experience in a senior capacity in their specialty.

It may be possible for candidates appointed from the National Health Service to be seconded from their employing authorities for a period of up to 3 years. Otherwise the appointments will be on contract terms for 3 years.

Candidates who are fully registered medical practitioners in the United Kingdom may be considered for appointment as Medical Officer. Other candidates should normally have a first or second class honours degree in an appropriate subject, or an equivalent qualification, but evidence of high professional attainment in a relevant field would be an acceptable alternative qualification.

General Medical Practitioners

Lusaka

These appointments are with an association of international companies who intend to provide medical services for their employees. The scheme envisages the sharing of work in a way which will give reasonable time off to each practitioner and consultations will be made from an office which will be staffed, furnished and administered by the association. Lusaka, the capital of Zambia, has a university teaching hospital and a medical diagnostic centre and the companies' employees have access to a medical society nursing home as well as a general hospital. The society also employs its own specialist medical staff. Appointments will be on a three-year contract basis and a gratuity will be paid on completion. Other benefits include car, housing, children's education allowances and return flights. Annual leave accrues at the rate of 42 days per annum. Candidates must be registered medical practitioners ideally with four years or more post-qualification experience in general medicine. Please write or telephone 01-629 1844 (at any time)-in confidence-for further information. R. Llewellyn reference AM.3152.

"Yes, I feel better than I've felt for weeks, doctor."

our anti-nauseant

Vertigo. Migraine. Gastric disturbance. Whatever the cause of nausea and vomiting, 'Stemetil' can be relied upon to bring welcome relief – quickly, effectively and with a tolerance one would expect of a preparation boasting more than 13 years' successful clinical use.

does that little bit more

In addition to its anti-nauseant action, 'Stemetil' exerts a mild tranquillizing effect which helps the patient cope with both physical and mental discomfort. In fact, 'Stemetil' frequently makes patients feel not just better, but better than they've felt for some time. Moreover, because it combines two effects in the one prescription item, 'Stemetil' makes economic, as well as therapeutic sense.

even try.

For the asthmatic child, blowing up a balloon may be an impossible task. Synacthen Depot remits bronchospasm and improves respiration; lets him join in the fun again.

Synacthen Depot is as effective as oral steroids, but it doesn't have the same well known side effects – adrenal suppression, difficulty of withdrawal, and growth retardation in children.

Synacthen Depot also has many advantages over animal ACTH – easier injection, longer action and constant composition.
