AMOXIL

an excellent new antibiotic for routine treatment

URTI Chest infections UTI Skin and soft tissue infections

Amoxil is a new antibiotic with distinct advantages in routine treatment.

Amoxil has a broad spectrum of activity against the common bacterial pathogens encountered in practice and its bactericidal action means further confidence in its everyday use.

The most practical advantage of Amoxil is that its oral absorption is outstanding, giving extremely high serum and tissue levels, irrespective of the presence of food. This ensures rapid and decisive activity at all sites of infection, even the more inaccessible.

Extensive British clinical trials have demonstrated its efficacy and penicillin safety in the treatment of Upper Respiratory Tract Infections, Otitis Media, Bronchitis, Urinary Tract Infections, and Skin and Soft Tissue Infections.

Add to this a convenient t.d.s. dosage—ensuring undisturbed sleep—a wide range of highly acceptable presentations, treatment costing as little as 16p per day and it is easy to see why Amoxil is practical antibiotic therapy at its best.

PRESCRIBING INFORMATION

Dosage: Adults 250 mg three times a day. Children—up to 10 years: 125 mg three times a day. In the case of severe infections the dosage should be doubled.

Presentation: Amoxil capsules 250 mg.
Amoxil syrup 250 mg/5 ml, 100 ml bottle.
Amoxil syrup 125 mg/5 ml, 100 ml bottle.
Amoxil paediatric Suspension 125 mg/5 ml, 20 ml bottle with pipette. Amoxil presentations contain amoxycillin trihydrate.

Contra-indication: Amoxil is a penicillin and should not be given to penicillin hypersensitive patients.

Side effects: In clinical trials involving more than 1,500 patients no serious side effects were reported. Those side effects which were encountered were of a mild transitory nature.

does that little bit more

In addition to its anti-nauseant action, 'Stemetil' exerts a mild tranquillizing effect which helps the patient cope with both physical and mental discomfort. In fact, 'Stemetil' frequently makes patients feel not just better, but better than they've felt for some time. Moreover, because it combines two effects in the one prescription item, 'Stemetil' makes economic, as well as therapeutic sense.

BACKACHE? SCIATICA?

**"If exercises do not work,
try a corset"**

(The Practitioner. Vol. 208. "The Management of Low Back Pain and Sciatica").

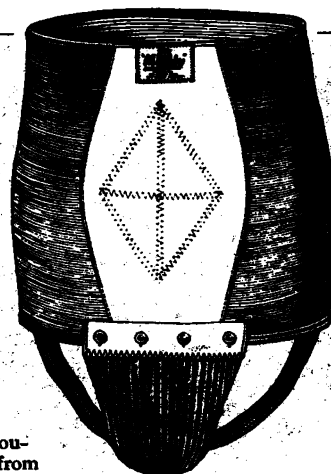

Relief from lumbar pain can be obtained by exercises or wearing a corset.

However, many sufferers need not go to these extremes. This is where the "MANLY" belt has proved so helpful.

The "Manly" is the modern approach. Comfortable, convenient . . . no bones, laces or buckles . . . and invisible when worn.

Over two decades, thousands of male sufferers from various forms of backache have gained relief by wearing the "Manly." (Also imparts invaluable abdominal support).

MEDICINE IN A TROPICAL ENVIRONMENT

Medicine in a Tropical Environment is intended for medical students and doctors working in tropical and developing countries. The essays bring together specific problems of the tropical environment which have been the subject of recent investigation, and the authors write on them from personal experience. Little of the material on which the essays are based was available more than five years ago. The book should stimulate the interest of students, doctors, and non-medical scientists in trying to solve some of the problems raised in almost every chapter. To doctors in temperate climates preparing themselves for medical work in developing parts of the world *Medicine in a Tropical Environment* is essential reading.

Superior to ampicillin or sulphadimidine

In a comparative trial,¹ cure rates achieved in urinary tract infections were 85% with SEPTRIN*, 70% with ampicillin and 40% with sulphadimidine. SEPTRIN was judged "clearly superior to either of the other treatments."²

(Cure criterion = eradication of infecting organism 1 week after end of treatment).

Lick them with liquorice !

The nausea, vomiting and gastric side effects associated with nitrofurantoin are now effectively prevented by the addition of deglycyrrhizinated liquorice in CEDURAN tablets. In 82 patients¹ previously completely intolerant of nitrofurantoin, there was virtually a total absence of gastric side-effects when they were treated with CEDURAN. In a recent survey² of the sensitivities of urinary pathogens, nitrofurantoin was one of the only three preparations recommended as primary oral treatments. And in a further report,³ nitrofurantoin had the lowest number of resistant strains of the agents studied.

Anything less than full support for topical hydrocortisone is undesirable

In addition to the production of contact dermatitis, the dangers of the selective action of topical antibiotics in the treatment of infected dermatoses are now well-recognised.⁽¹⁾

Experimental studies⁽¹⁾ have shown, that even in healthy subjects, pyoderma developed following occlusive treatment with neomycin. It was concluded that these experiments "do emphasize the dangers which can follow the alteration of the normal flora of the skin." In view of the variety of hazards associated with topical antibiotics, it was also stated: "...serious doubt must now be cast on their routine use."

In Betadine® H/C Cream, povidone-iodine provides ideal support for hydrocortisone because it kills all pathogenic and potentially pathogenic organisms within 15 seconds of contact. "It does not allow the emergence of antibiotic resistant strains as it kills pathogenic organisms in an unselective manner."⁽²⁾

Betadine Ointment, which has no hydrocortisone

acetate content, is also available when purely antimicrobial therapy is required.

ASTHMA

A lifetime of freedom begins with Intal

Before INTAL, a diagnosis of asthma often meant a life sentence of constantly aborting attacks with bronchodilators, anti-histamines or steroids. Patients were constantly at risk from the relentless progress of lung damage and lived in perpetual fear of an asthmatic episode.

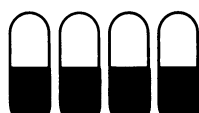

The discovery of INTAL (Sodium Cromoglycate BP) represents a turning point in the management of this distressing complaint. Newly diagnosed patients, as well as those of long standing, benefit from this entirely new approach to therapy. INTAL actually prevents the onset of asthmatic attacks, and is notably free from serious side effects.

By preventing asthma attacks the possibility of consequent lung damage may be avoided enabling the patients to lead a fuller, happier life. If they remember their daily INTAL—they can forget their asthma.

Hypertension. Introduce her to treatment gently with Neo-NaClex-K.

When a patient is new to hypertension, Neo-NaClex-K makes it a lot easier to live with.

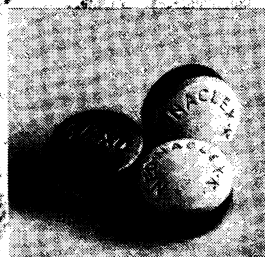

Easier, because just once-a-day treatment can control the mild to moderate case.

Easier, because her sleep won't be disturbed by diuresis during the early days of treatment.

Easier, because postural hypotension won't be something she'll wake up to.

And even in severe hypertension you can still keep her on Neo-NaClex-K in conjunction with minimal doses of a more potent antihypertensive. So you can control the severe condition with less risk of side effects.

Neo-NaClex-K is a unique two layered tablet containing bendroflumazide to lower blood pressure safely and surely, plus a potassium supplement to replace any loss. And right from the start, it provides a gentle introduction to the long-term treatment your new hypertensive patient may need.

The beauty of Calmurid HC in eczema:

The difficulty of treating the essentially inflammatory condition of dry eczema is that it occurs beneath a barrier of dry, scaly skin.

So the heavy artillery is wheeled in. The massively potent fluorinated steroids. The logic: *saturation* treatment. The result? Only too often such serious side effects as skin atrophy and wasting, systemic absorption and adrenal suppression.

Now reverse the logic. *Select*, rather than saturate. Take a medicament proven highly successful in the treatment of dry, scaly skin. Calmurid. Use its deeply penetrating action as a means of carrying the milder, natural steroid hydrocortisone, right through to the eczematous area.

The result this time is a very evident clearance of inflammation. And the remarkably early disappearance of the dry, scaly skin.

Double blind trials have shown that Calmurid incorporating hydrocortisone at least equals the potent fluorinated steroids in efficacy, but without their hazards. It lends itself especially to the treatment of infants and children and for use in all long-term therapy. A sample awaits your request.

Indications

Atopic Eczema, Eczema Prurigo, acute and chronic allergic eczema, neurodermatitis and other hyperkeratotic skin conditions with accompanying inflammation.

Unwanted effects

Being hydrocortisone and applied Calmurid HC may cause stinging following initial applications to raw, fissured or weeping surfaces.

Application to mucous membranes may cause stinging for the same reason.

Contra-indications

Skin infections, viral infections, eczema herpeticum, herpetic infections, herpes simplex, varicella, chicken pox, and measles. Syphilis, tuberculosis, bacterial, mycotic infections (except *Candida*). Eczema should be completely settled with antieczema treatment.

Application

Apply twice daily after washing the affected area. Rub in thoroughly. The action is more therapeutic should be aimed at drying areas before instituting Calmurid HC therapy.

It is skin deep

In acute cystitis 92% success rate with cephalexin

Recent clinical results with cephalexin confirm the extremely low incidence of side effects accompanying the high clinical success rate.

"Even when cephalexin had been used in high dosage for long periods, the tolerance had been good. Only rarely had treatment been discontinued because of side effects. When side effects had occurred they usually had been mild, many disappearing during treatment."*

"No cross sensitivity was seen with cephalexin in the eight patients with a history of penicillin hypersensitivity."*
It all adds up to the simple fact that in acute

cystitis and pyelonephritis, you can trust Ceporex to reduce the risks and improve the results.

Crystapen V Tablets now they've got a *new* look

Crystapen V Tablets are now film-coated and orange in colour. This, together with the engraved product name and strength, means that now they are instantly identified.

Crystapen V Tablets are indicated in penicillin-susceptible infections, such as those due to beta-haemolytic streptococci, pneumococci and susceptible staphylococci.

Hypertension. Introduce her to treatment gently with **Neo-NaClex-K**

When a patient is new to hypertension, **Neo-NaClex-K** makes it a lot easier to live with. Easier, because just once-a-day treatment can control the mild to moderate case. Easier, because her sleep won't be disturbed by diuresis during the early days of treatment. Easier, because postural hypotension won't be something she'll wake up to. And even in severe hypertension you can still keep her on **Neo-NaClex-K** in conjunction with minimal doses of a more potent antihypertensive. So you can control the severe condition with less risk of side effects. **Neo-NaClex-K** is a unique two layered tablet containing bendrofluazide to lower blood pressure safely and surely, plus a potassium supplement to replace any loss. And right from the start, it provides a gentle introduction to the long-term treatment your new hypertensive patient may need.

Measles needn't be a part of growing up

Measles is still a serious illness in Britain today. Measles and its complications can cause permanent disability and even death. Yet measles can, and should, be prevented. With **Mevilin-L**. One injection of **Mevilin-L** can provide a lifetime's immunity from measles. **Mevilin-L** has a very good safety record and reactions are mild. The ideal age for injection is 12 months, or as soon as possible afterwards.

Can't eat

When patients are unable to eat, they don't get the nourishment they need to get well. Help them break this vicious circle by recommending Complan. Complan provides the right kind of nourishment in a form that's easy to take even during illness. A pleasant-tasting, soothing drink, Complan is easy to digest and provides the nourishment patients need to regain their health and strength.

COMMERCIAL APPOINTMENTS

MD in commerce

Throughout all the activities of our Medical Services Division, there runs a common and very heavy responsibility; that of establishing and maintaining a highly ethical medical standard. However good our pharmacists, however professional our marketing men and salesmen—their work must always be tempered by the advice of trained medical people. Naturally enough, they're called Medical Advisers, and we need just such a person now. You can expect to be involved in all aspects of our work, from the administration of new drugs to volunteers, and clinical trials, to supportive work for products already marketed. Your advice will be sought, and heeded, in research, development, and marketing activities. So there are some obvious qualities required. You must hold a British medical degree, preferably for at least five years. You must have a strong, even resilient, personality. And you must be able to communicate, lucidly and persuasively

with people of varying types at all levels. Other doctors, researchers, salesmen, product managers—you'll have to handle them all. Quite often, too, there'll be times when a strong commercial instinct will prove invaluable. On the academic side, we'll encourage you to take opportunities of keeping abreast with the progress in medical science, including your attending symposia, and participating in a weekly clinical session. No easy job, but one that's well rewarded with an attractive salary determined according to previous experience, a company car, and a non-contributory pension and life assurance scheme. Some of your work—in liaison with university, hospital and general medical contacts—will mean travelling in this country and in Europe. As for the future, our personnel development policy will allow you a variety of opportunities in both scientific and commercial fields.

Please write, giving details of qualifications and career to date, to

K. S. Woodford, Personnel Manager,**NICHOLAS RESEARCH INSTITUTE****225 Bath Road, Slough, Bucks.**

Prothiaden

breaks the web of depressive illness

Prothiaden is an anti-depressant which not only treats depression, but also relieves the anxiety so often associated with depressive illness. A recent study* has shown Prothiaden to be superior to amitriptyline in the treatment of depressive disorders, and to be much better tolerated. With Prothiaden, your patients will persevere with treatment – more of them will recover.

**Psychopharmacologia*, 1971, 19, 153
Prothiaden is dothiepin hydrochloride in capsules of 25 mg.

Hazard Ahead...

but with care, one that is readily overcome.

The 'Hazards' facing you and your family are not so easily tackled, but with the same care you can provide for yourself and your dependants with the right type of insurance.

Understandably, you may not know where to start, but the Medical Insurance Agency, with its knowledge of the insurance market and of the needs of the medical and dental professions, will help you to find the policy that is exactly right for you.
