

In infected eczema, it's the eczema you worry about.

And no combination of anti-infectives will stop the scratching that starts the infection that results in infected eczema.

But Betnovate-N will.

And it will do it quicker than other preparations designed to combat infected eczema, because it contains betamethasone as 17-valerate, a more effective steroid.

Betnovate-N also contains neomycin so it stops the infection at the same time.

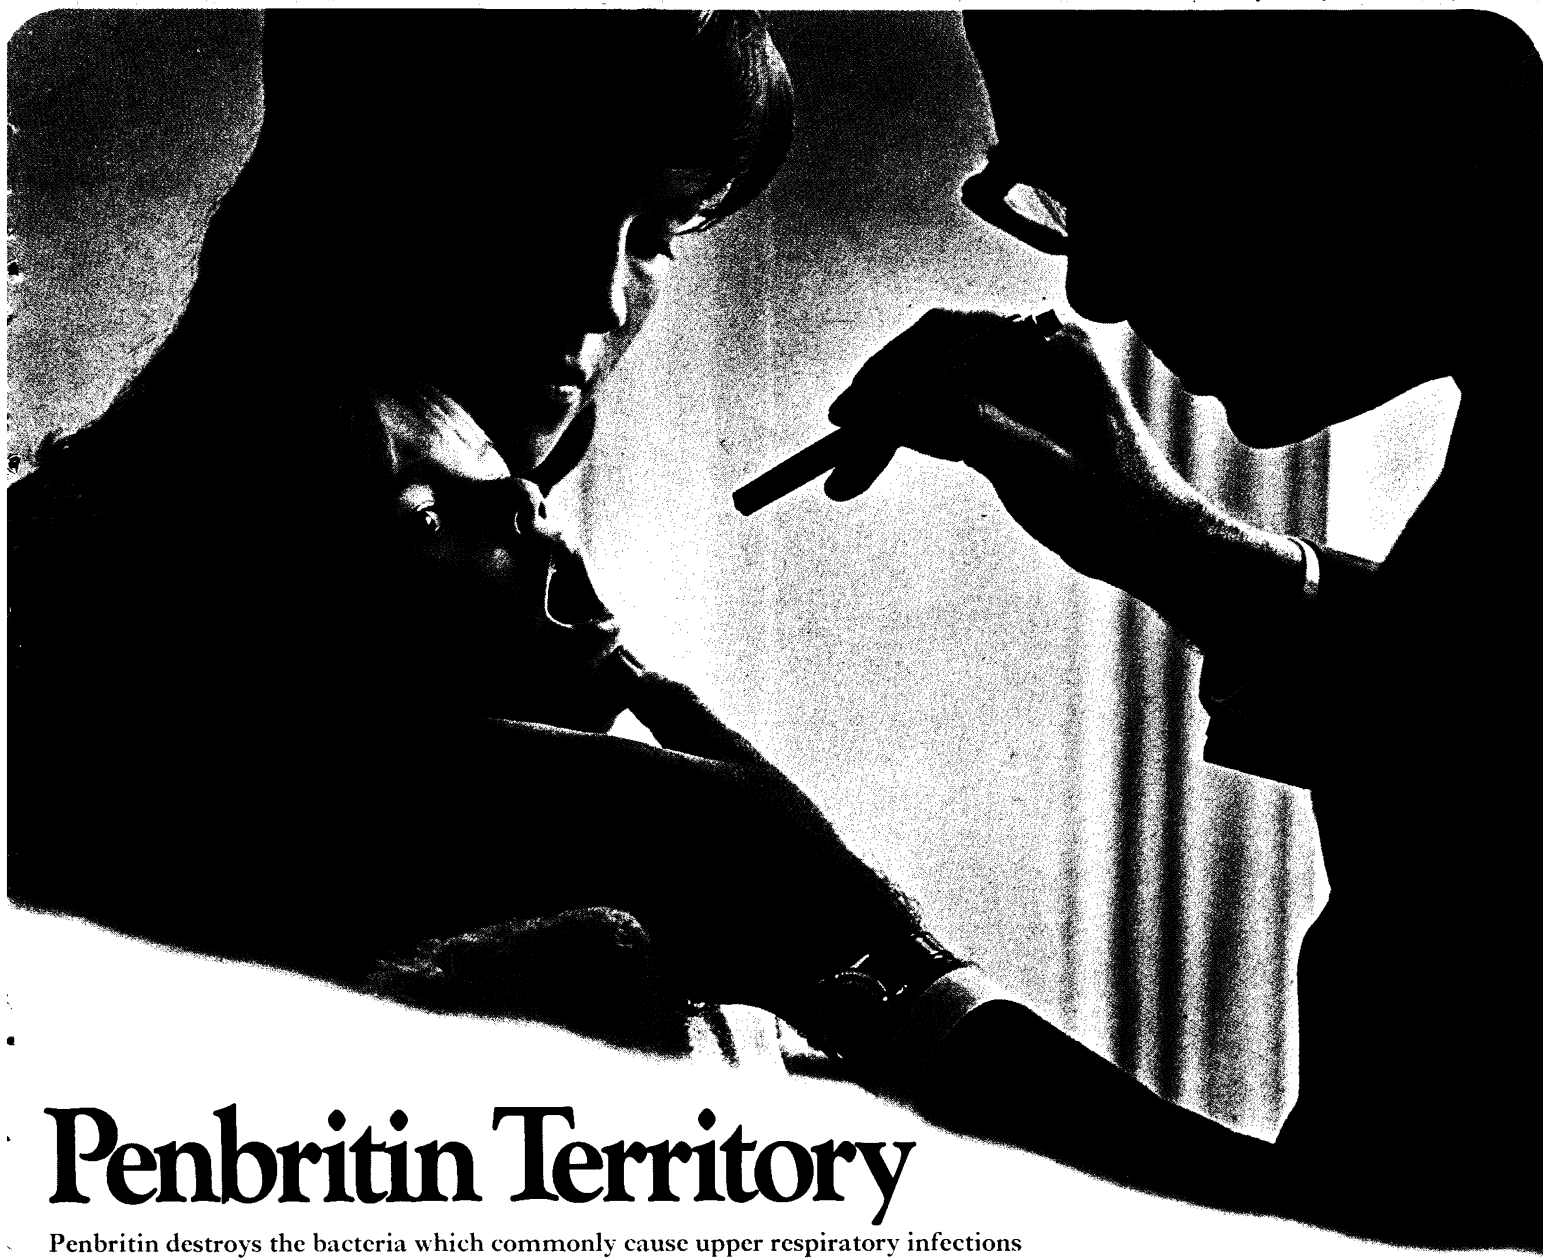

All at a price others can't match.

Penbritin Territory

Penbritin destroys the bacteria which commonly cause upper respiratory infections and otitis media. Its spectrum of activity includes streptococci—now less sensitive to tetracyclines than they were—and *Haemophilus influenzae*. This pathogen often causes otitis media in the young and is insensitive to oral penicillins V and G.

Penbritin's decisive bacteria-destroying action, so important in treating infections in children, contrasts with the tetracyclines and erythromycins which merely inhibit bacterial growth.

As a penicillin Penbritin has a well-documented record of safety. In contrast it has been suggested that tetracyclines are "absolutely contra-indicated for children aged under 8" because of serious effects on tooth development.

(Brit. med. J. (1970), 4, 509).

Acceptability is important in choosing an antibiotic for children. Penbritin syrup, paediatric tablets and the new paediatric suspension are extremely acceptable to the young. And at the normal children's dosage, Penbritin syrup's N.H.S. cost is just 8½p a day.

Usual children's dosage: 125mg. q.i.d. ½ – 1 hr a.c.

Contra-indication: Penicillin hypersensitivity.

Side effects: As with other penicillins.

Further information is available on request.

AN ANNOUNCEMENT FROM SERVIER

Although our anti-obesity product Ponderax (fenfluramine) has come to be accepted as the most effective available chemotherapeutic weight reducer, our duty to the medical profession does not stop with drug research.

As a company Servier has issued through doctors' surgeries nearly two million of our famous blue diet guide booklets. Naturally, we have been pleased to be of service to you and your patients, but we are always seeking to improve our service.

Our new **Servier Unit Eating Guide** has been developed in conjunction with one of the country's leading nutritional experts. This new Guide enables you to offer your patient an easy-to-follow, easy-to-adhere-to new way of eating. There are no gimmicks, few restrictions; just a sensible approach to the problem of correct eating.

In its tenth year of clinical use Ponderax is one of the most heavily documented drugs today with nearly five hundred references in world literature. By itself Ponderax will give consistently good weight losses, when used as recommended, without any CNS stimulation. The action of Ponderax on glucose and lipid metabolism, with consequent benefits to your patients, is now very well known, having been proved with ten million treatments.

Individually Ponderax and the Servier Unit Eating Guide are exceptional. Together they offer the most satisfactory combination for you to treat the serious condition of overweight.

Floxapen destroys staph and strep

In skin, for example.

You can use Floxapen with confidence for infections of skin and soft tissue, or any other staph. and strep. infections.

Floxapen's excellent absorption gives high blood levels right at the site of the infection—blood levels which are as high orally as by injection.

Floxapen destroys virtually all staphylococci, and all streptococci and pneumococci. It destroys them whether or not they're sensitive to other antibiotics.

Floxapen's safety is the renowned safety of the penicillins. And its clinical record is one of outstanding success. (97% in skin and soft tissue infections¹).

BACKACHE? SCIATICA?

"If exercises do not work, try a corset"

(*The Practitioner*. Vol. 208. "The Management of Low Back Pain and Sciatica").

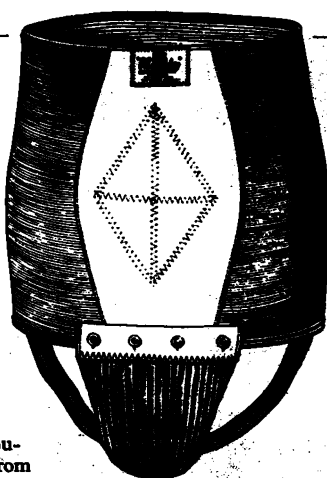

Relief from lumbar pain can be obtained by exercises or wearing a corset.

However, many sufferers need not go to these extremes. This is where the "MANLY" belt has proved so helpful.

The "Manly" is the modern approach. Comfortable, convenient . . . no bones, laces or buckles . . . and invisible when worn.

Over two decades, thousands of male sufferers from various forms of backache have gained relief by wearing the "Manly." (Also imparts invaluable abdominal support).

When babies* have duodenal ulcers...

and senior citizens present problems

Caved-S in contrast to other liquorice preparations can be prescribed because the liquorice principle has been deglycyrrhizinized. This means that the hazards normally associated with ordinary liquorice agents are avoided.

*(A 13 week old infant with D.U. reported)

But for your adult patients who have failed to respond to other forms of chemotherapy, the reason may be due to underdosage or the normal dosage produced side effects which cannot always be tolerated.

A metabolic study¹ and more than twenty hospital trials, and treatment with more than eight million patients in over forty countries has proven Caved-S deglycyrrhizinized liquorice is free from side effects of oedema, hypokalaemia, muscle paresis etc.^{2, 3, 4}

An unpublished hospital trial, the results of which are in our hands, has been carried out with Caved-S tablets at increased dosage on forty severe duodenal ulcer patients (age range 40-65) who had all been referred for surgery has demonstrated recurrent episodes can be prevented. The report stated "Patients with severe duodenal ulcers who had been referred for surgery were divided into two groups and treated with either eight or twelve tablets daily, for eight or sixteen weeks respectively. The higher dosage was statistically more effective than the lower dosage in preventing relapses . . ." Patients were followed up for a minimum of one year and it was concluded that,

"HIGH DOSES OF DEGLYCYRRHIZINATED LIQUORICE (CAVED-S) SHOULD BE GIVEN TO PATIENTS WITH DUODENAL ULCERS BEFORE SURGERY IS ATTEMPTED".

a certain way to treat a lady

The certainty of positive microbicidal action, against all classes of vaginitis pathogens, is provided by Betadine vaginal pessaries. Therefore the risk of overgrowth of non-susceptible organisms associated with specific therapies is avoided.

Because of povidone iodine's decisively microbicidal action Betadine pessaries deodorize, which is particularly important in all forms of infective vaginitis.

Oral systemic anti-protozoal agents, antifungals and antibiotics may be used concomitantly if this is desired.

The following alternative forms of Betadine vaginal therapies are recommended:

Johnny's had more than his fair share of infections

For children such as Johnny who, every year, seem to be more often in the surgery than out of it, Keflex has a lot to offer.

Rapidly absorbed and reaching high serum levels, Keflex has a broad spectrum of antibacterial activity that even includes penicillinase-producing pathogens, and so increases the chances of first-time success in treating infective episodes.

All these properties, plus an extremely low incidence of rash and gastro-intestinal disturbance, make the pleasant-tasting Keflex suspensions a treatment which ensures that most patients like Johnny can overcome infection quickly and with the minimum of complications.

RYNACROM[®]

Sodium Cromoglycate BP for hay fever

In the form of Intal, Sodium Cromoglycate is already proven as a valuable anti-allergic therapy.^{1,2} The introduction of Rynacrom now makes Sodium Cromoglycate available for the control of symptoms of hay fever. Administration is by a specially-designed nasal insufflator that is recharged with a Rynacrom capsule at each application.

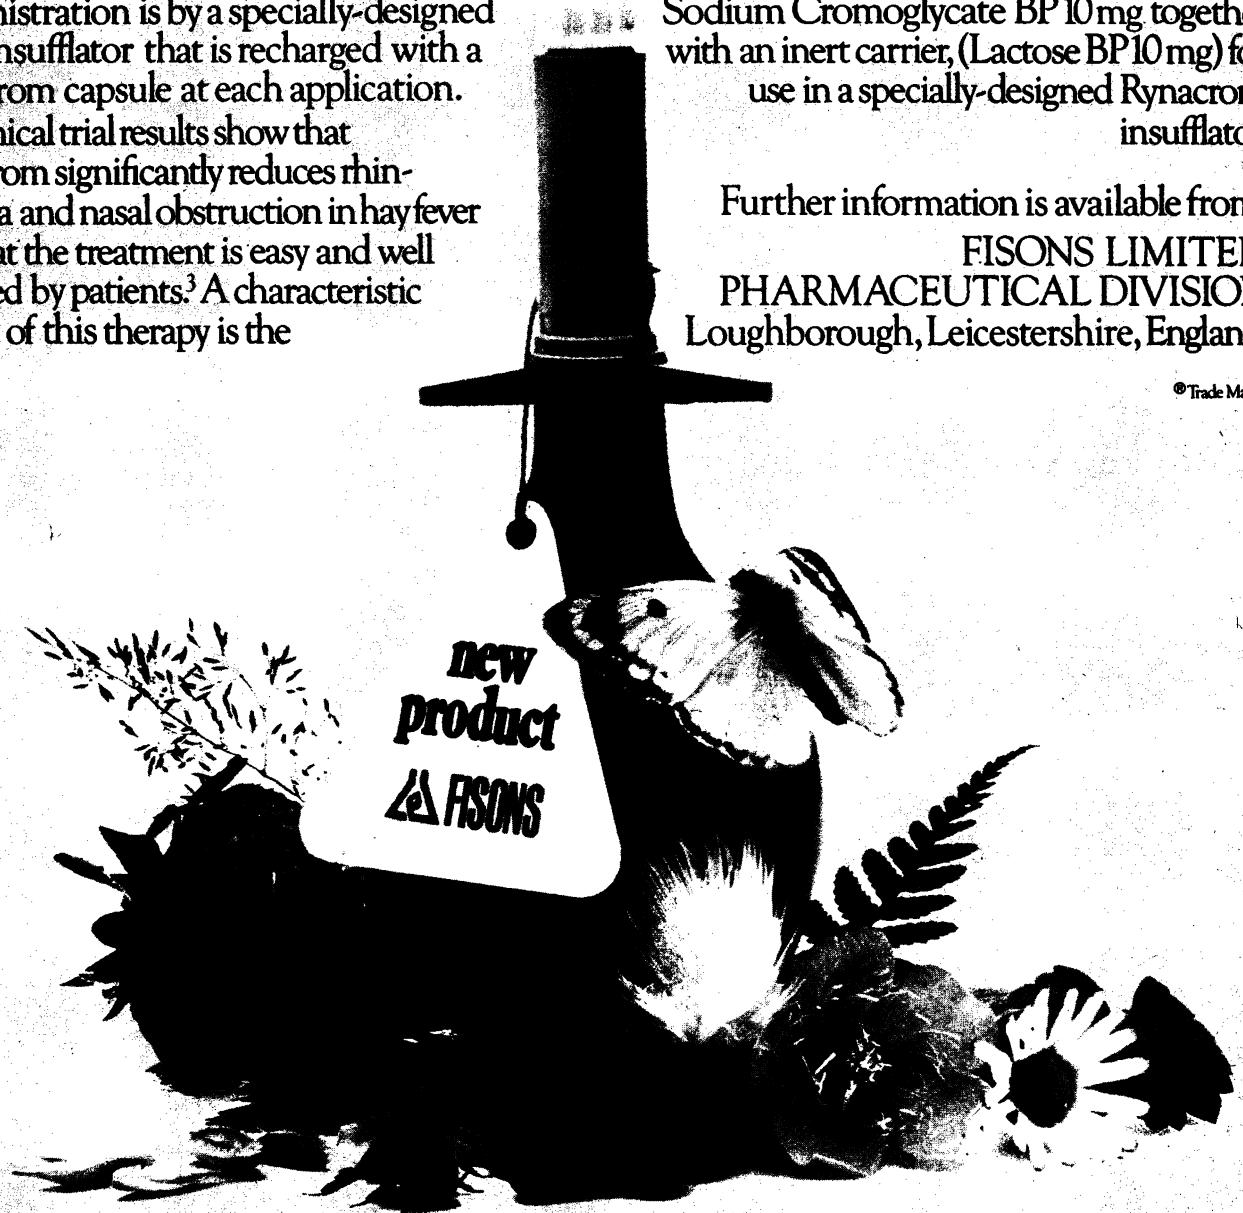

Clinical trial results show that Rynacrom significantly reduces rhinorrhoea and nasal obstruction in hay fever and that the treatment is easy and well accepted by patients.³ A characteristic feature of this therapy is the

extremely low incidence of side effects.^{1,2,3}

For this reason many of the problems of conventional hay fever therapy do not arise with Rynacrom. Rynacrom is supplied as capsules containing Sodium Cromoglycate BP 10 mg together with an inert carrier, (Lactose BP 10 mg) for use in a specially-designed Rynacrom insufflator.

AMOXIL

an excellent new antibiotic for routine treatment

URTI Chest infections UTI Skin and soft tissue infections

Amoxil is a new antibiotic with distinct advantages in routine treatment.

Amoxil has a broad spectrum of activity against the common bacterial pathogens encountered in practice and its bactericidal action means further confidence in its everyday use.

The most practical advantage of Amoxil is that its oral absorption is outstanding, giving extremely high serum and tissue levels, irrespective of the presence of food. This ensures rapid and decisive activity at all sites of infection, even the more inaccessible.

Extensive British clinical trials have demonstrated its efficacy and penicillin safety in the treatment of Upper Respiratory Tract Infections, Otitis Media, Bronchitis, Urinary Tract Infections, and Skin and Soft Tissue Infections.

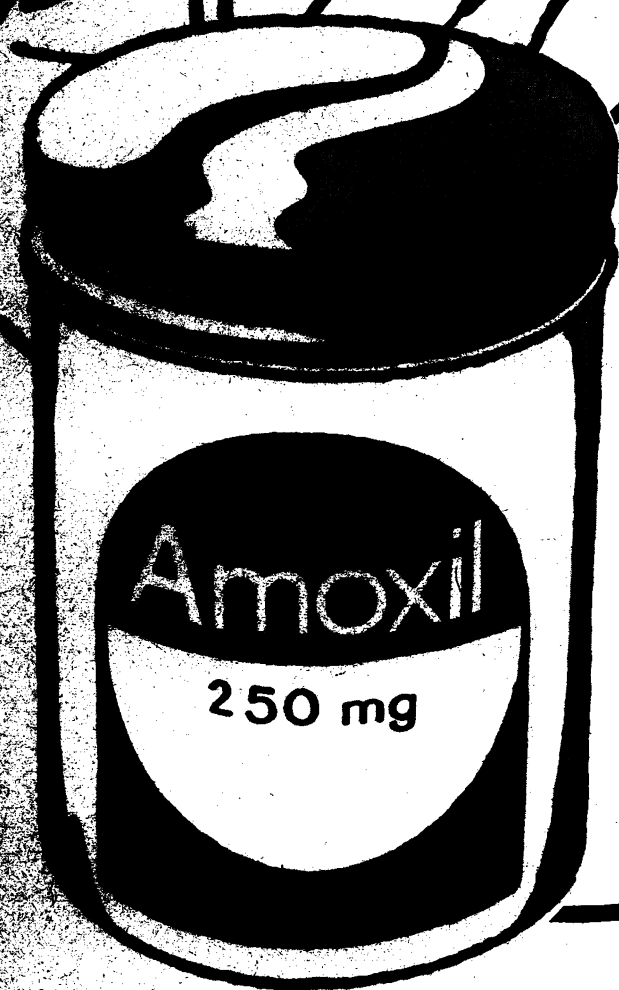

Add to this a convenient t.d.s. dosage—ensuring undisturbed sleep—a wide range of highly acceptable presentations, treatment costing as little as 16p per day and it is easy to see why Amoxil is practical antibiotic therapy at its best.

A name to conjure with.

'Largactil' has been a name to conjure with in psychiatric medicine for over sixteen years. An influence of such magnitude and long duration can be explained by examining this legendary name.

'Largactil' was so named because of its LARGE variety of ACTIONS; apart from being the first major tranquillizer, it acts in two other pharmacologically distinct ways – as a potentiator of central nervous depressants, including analgesics, narcotics and sedatives, and as an anti-emetic.

'Largactil' has achieved success in the fields of psychiatry, general medicine and anaesthetics in an ever-widening range of indications. These include major and minor psychoses; as an adjuvant to E.C.T.; drug withdrawal; senile dementia; the control of terminal pain and nausea and vomiting.

COMMERCIAL APPOINTMENTS

Part-time Medical Officer SOUTH HANTS

Cyanamid is a leading international pharmaceutical (**Lederle**) and chemical company employing some 1,000 people at its U.K. subsidiary located at Gosport. The Company places great emphasis on the safety, health and welfare of its employees, and to this end has established a first rate medical department comprising a part time medical officer, two S.R.N's, and a modern fully-equipped surgery. The existing medical officer is due to leave the country in June, and applications for the post are invited from registered medical practitioners.

The doctor is responsible for all pre-employment medical examinations, and general help and advice on health problems of established staff. In addition, to these regular duties there is a real involvement in industrial medicine in advising Company Management on appropriate standards of safety, protection and industrial hygiene in the manufacturing and handling of pharmaceutical and speciality chemical products.

For this reason it will be preferred if applicants have some previous experience of industrial medicine and toxicology.

The working arrangements are flexible but it is anticipated that the doctor will visit the Company daily and that the total time will be of the order of 10 to 15 hours per week, dependant upon the number of medicals and/or special investigations at any time.

Salary will be by negotiation. Any doctor who is interested should apply by 'phone or in writing to:

Mr. D. A. Thompson (Personnel Manager),
Cyanamid of Great Britain Limited,
Fareham Road,
Gosport, Hants. (Fareham 4311)

Rotational training scheme for SENIOR REGISTRARS IN MENTAL SUBNORMALITY

Applications are invited for the post of senior registrar in mental subnormality. These posts are intended to run in parallel with a scheme already in existence for senior registrars in child psychiatry. It is intended that the successful applicants will spend nine months at each of five hospitals in the Birmingham area, depending on the length of training required. During this period there will be an opportunity to take part in the assessment and management of the multiply handicapped child and also to work in special units for the cerebral palsied, deaf/blind and rehabilitation units for adolescent and adult mentally handicapped. Three sessions per week will be spent, over the whole period of training, in attending a child psychiatric out-patients clinic, this placement to remain constant, regardless of movement between subnormality hospitals, in order to maintain continuity. The facilities of the newly opened Institute of Mental Subnormality at Lea Castle Hospital will be available to trainees. D.P.M. required. Accommodation, married or single, will be made available as conveniently as possible. Candidates will be given a residence within Birmingham area. Candidates invited to arrange to meet the Director of the Institute of Mental Subnormality. (Tel: Wolverley 251) to discuss the appointments and at the same time they will be given an opportunity of viewing the various units in which they would be working and to visit the hospitals involved. GOVERNMENTAL

Opportunities for experienced doctors to specialise in Psychiatry

As a Medical Officer in the Prison Medical Service you are responsible for the general medical care of the inmates of the establishment — borstal, prison or remand centre — to which you are attached.

Psychiatric treatment is a major part of the work. Indeed, if you do not already hold a postgraduate qualification in Psychological Medicine you will be encouraged to work for one, and the Service will grant leave of absence for courses, secondment for training, etc.

Your initial experience — on the staff of a Senior Medical Officer in a large establishment — can extend for three years or more, depending on your needs. The experience you'll gain could be of considerable value to you in any subsequent career, as these posts provide a unique opportunity to research into mental and physical disorders. A good proportion of the work lies in assessing the psychiatric state of individuals for the Courts and Parole Boards, and giving advice on treatment to be associated with after-care and rehabilitation.

There are vacancies in establishments in many parts of the country.

You need to be a fully registered medical practitioner in the U.K., and to possess good all-round medical and surgical experience. A knowledge of psychological medicine is desirable, and a Dip. P.M. an advantage.

Starting salary within scale £4,031-£5,490 (plus an extra allowance up to £175 for a London post) according to your qualifications and experience. You can normally expect promotion to Senior Medical Officer (£6,300) and there are posts beyond this. Superannuation is interchangeable with the N.H.S. For full details and an application form (to be returned by 26th May, 1972) write to the Civil Service Commission, Alencon Link, Basingstoke, Hants., or telephone Basingstoke 29222, Ext. 500 or London 01-839 1696 (24 hour "Ansafone" service). SERVICES

Are you in your Pre-Registration Year —or recently fully registered?

Before you commit yourself to your permanent pattern of life, consider what the Royal Air Force has to offer.

The chance to practise total medical care, as a GP

Your first job would probably be a Junior Medical Officer on a large RAF Station. There would be at least one other doctor. Between you, you would have a 'list' of 2000 to 3000 people—servicemen and their families. You would meet all the usual clinical problems of a GP—and get plenty of experience in pediatrics. As well as this, you would be actively involved in the practice of aviation medicine and gain experience in the preventive, occupational and social fields.

Conditions of work are extremely good. You would have a consulting room in a specially built *Medical Centre*—like a small hospital with its own treatment room, theatre and resuscitation room, and wards for a dozen or so short-stay patients. There is a full secretarial and nursing staff. Your clinical freedom would be absolute.

The chance to specialise, too

Because General Practice is so highly developed in the RAF, this does not mean you have no chance to specialise. The contrary is true. 47% of all RAF doctors are now working in specialist departments. On a 'full career' contract you have every opportunity to reach consultant status in your late or middle thirties—perhaps earlier.

The chance to study for higher qualifications

Any RAF doctor, whether specialist or GP (as long as he is not on the very shortest of contracts) can apply for six months study leave on full salary. On a permanent commission, he may have up to two years' external study leave.

The chance to travel

The RAF operates in many different conditions and climates. Abroad, the RAF doctor looks after RAF personnel and their families and, very often, the local population as well. Your gain in clinical experience would be marked.

The chance of a good social and family life

The RAF is a young community, with a full and active social life. There are facilities for almost every kind of sport and, which is most important, the time to enjoy your family while you are still a young man. Living conditions are excellent. If you are single you live in the Officers' Mess, which has all the amenities of a good hotel. If you are married, you will nearly always have a furnished house that goes with the job; rent for this is very modest; and it can save a large financial outlay at the beginning of your career.

General Practice? With a difference. At this RAF Clinic, in the busy town of Limassol, in Cyprus, almost all the patients are women and children (specially children). Staff is 7 doctors, each with his (or her) own panel of patients; and 5 dentists. There are 5 SRN Nurses, and 7 Health Visitors. Next door is the RAF's Child Guidance Clinic, with psychiatrist, educational psychologist and speech therapist.

A realistic pay scale

Pay is based on the average earnings of a civilian GP. Immediately after full registration, the present basic salary is £3668; after 5 years it rises to £4424; after 13 years to £5453. There are various other allowances; for instance, with children at boarding school the figures are £330 (net) for one child, £723 (net) for two children, £1194 (net) for three children. There are tax-free gratuities of £1500 after 3 years, or £3000 after 5 years. After service of 16 years or more there is a pension, payable for life, and a generous terminal grant.

For full information please write, giving your age, nationality, and date of full registration, to Group Captain J. G. Donald, OBE, MB, ChB, MRCP, DTM&H, RAF, Ministry of Defence, 1-6 Tavistock Square (724JZ4), London, WC1H 9NL.

Medical Officers Zambia

You are offered the prospect of a tour of duty — for as little as one year — in Zambia, one which will give you both a wide range of professional experience and early responsibility (all in addition to a wide extension of your personal horizons). It is with the nation's major mining organisation, Nchanga Consolidated Copper Mines Ltd., with an international staff of technical specialists.

The company is responsible for providing full medical care to its employees — over 30,000 — and their families; the total of persons to be looked after is about 150,000.

There is a senior doctor staff of over 40, including a full complement of specialists, and 150 fully qualified nurses. The modern facilities include 5 well-equipped hospitals (814 beds), 16 clinics and 8 main first aid dressing stations.

General Duty Medical Officers will be involved in preventive and curative medicine, surgery, anaesthetics, gynaecology/obstetrics, public health and nutrition; and although the mines have a strict safety code, an amount of accident work can be expected.

Contracts may be negotiated for periods of one to three years. Locums can also often be arranged.

Salaries will depend on experience but the minimum is K8620 (£4,600) gross per annum. In addition there is a cash settling-in allowance: a detached, furnished house with garden is provided for £1.50 per week; and children receiving secondary education overseas are granted up to £500 per child per year towards school fees and two free return passages to visit their parents during holidays.

Income Tax is lower than in the U.K. Currency regulations allow up to 33% of gross income to be sent home per month with an additional end of contract allowance. Please send for details to:

In re Interpretation of Will of
JACOB WOOLF LIPSHITZ

HAVING heard MR. L. E. M. GOLDSMID, Counsel for the Applicants and having read the Notice of Motion and the other documents filed of record:-

IT IS ORDERED:

A. THAT a Rule *Nisi* do issue calling upon all persons interested to show cause, if any, before this Court on Tuesday, 1st August, 1972 at 10 a.m., or so soon thereafter as Counsel may be heard, why an Order should not be granted:-

1. Declaring that the condition attaching to each of the legacies contained in the Will of the late JACOB WOOLF LIPSHITZ dated 23rd July, 1949, namely

(a) the first who shall discover a suitable remedy for arteriosclerosis of the brain;

(b) the first who shall discover a suitable remedy for cataract of the eye;

is impossible of fulfilment and that the legacies have failed;

2. Declaring that the Testator died intestate in respect of two-thirds of his Estate;

3. Authorizing the Executor in the said Estate to distribute the said two-thirds of the Testator's Estate among the heirs ab intestato of the Testator;

4. Authorizing the Executor, subject to the approval of the Master of the Supreme Court (Transvaal Provincial Division) to make payment out of the balance of the Testator's Estate of a reasonable remuneration to the Trustees for the services rendered by them since the date of their appointment as such;

5. For Alternative relief;

6. That the costs of this Application, including the fees payable to Dr. HILLEL ABBE SHAPIRO in respect of his Report to the Trustees, be paid out of the Estate.

B. THAT this order be published as soon as possible once in "The South African Medical Journal" and once in "The British Medical Journal."

BY ORDER OF THE COURT

power to stop pain crippling

Description and Presentation

PRINALGIN alclofenac (4-allyloxy-3-chlorophenylacetic acid) is a powerful new analgesic which shows marked anti-inflammatory action in animal experiments. Clinically, it has been compared favourably with phenylbutazone, indomethacin, pentazocine and morphine in well controlled double-blind trials. PRINALGIN tablets, each containing alclofenac 500 mg are available in packs of 100 and 500. (Basic N.H.S. cost of 100: £2.26)

Prescribing Information

Indications: Pain, especially in arthritis and rheumatism.

Dose: One or two tablets every 4-6 hours.

In arthritic and rheumatic conditions 2 tablets 3 times daily, reducing this initial dose as symptoms are controlled.

Side Effects: PRINALGIN is very well tolerated and there are no serious side effects. There are occasionally reports of nausea and indigestion but these are rarely sufficient to warrant cessation of treatment.

Occasionally cutaneous intolerance occurs but this is reversible on withdrawal of the drug. One case of possible hypersensitivity to PRINALGIN has been reported.

Precautions

There are no special precautions to be taken in the administration of PRINALGIN but, as with any drug, it should be administered with caution in cases of impaired renal or hepatic function and in diabetes. Although animal tests in several mammalian species have revealed no teratogenic effects, as with all new drugs PRINALGIN is not recommended during the first trimester of pregnancy.

The effect of
PRINALGIN
upon joint pain
and function
ranks with that of
phenylbutazone

or indomethacin, yet **PRINALGIN**
has caused no serious side effects
in any of the 4,500 patients
treated in clinical trials.

PRINALGIN does not cause
gastric erosions, blood dyscrasias
or liver damage and
has no hormonal actions.

A lifetime of freedom begins with Intal

Before INTAL, a diagnosis of asthma often meant a life sentence of constantly aborting attacks with bronchodilators, anti-histamines or steroids. Patients were constantly at risk from the relentless progress of lung damage and lived in perpetual fear of an asthmatic episode.

The discovery of INTAL (Sodium Cromoglycate BP) represents a turning point in the management of this distressing complaint. Newly diagnosed patients, as well as those of long standing, benefit from this entirely new approach to therapy. INTAL actually prevents the onset of asthmatic attacks, and is notably free from serious side effects.

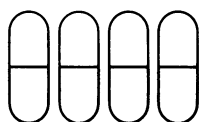

By preventing asthma attacks the possibility of consequent lung damage may be avoided enabling the patients to lead a fuller, happier life. If they remember their daily INTAL—they can forget their asthma.

INTAL—supplied in SPINCAPS® (each containing 20 mg Sodium Cromoglycate BP). For use in a special insufflator—SPINHALER®.

Maxolon for flatulence, dyspepsia, gastritis, and peptic ulcer symptoms

For the first time, treatment of gastro-duodenal disorders can move beyond the simple alleviation of hyperacidity and spasm.

Disturbance of gastro-duodenal motility has become increasingly established as a major factor in the aetiology of gastro-duodenal symptoms. In restoring this disturbed motility to normal, Maxolon represents a unique approach to therapy. And it works—flatulence, dyspepsia, gastritis, hiatus hernia and peptic ulcer symptoms have all shown high symptomatic response to Maxolon. Even difficult post-cholecystectomy dyspepsias have responded well.

Maxolon acts by synchronising antral and duodenal contractions, increasing the competence of the cardiac and pyloric sphincters and promoting normal peristalsis. Reflux, gastric stasis, retention and spasm are all alleviated. Normal motility is restored and gastro-duodenal symptoms resolved.

Further information is available on request.
