# AMOXIL

an excellent new antibiotic for routine treatment

URTI Chest infections UTI Skin and soft tissue infections

Amoxil is a new antibiotic with distinct advantages in routine treatment.

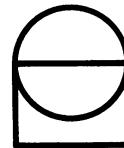

Amoxil has a broad spectrum of activity against the common bacterial pathogens encountered in practice and its bactericidal action means further confidence in its everyday use.

The most practical advantage of Amoxil is that its oral absorption is outstanding, giving extremely high serum and tissue levels, irrespective of the presence of food. This ensures rapid and decisive activity at all sites of infection, even the more inaccessible.

Extensive British clinical trials have demonstrated its efficacy and penicillin safety in the treatment of Upper Respiratory Tract Infections, Otitis Media, Bronchitis, Urinary Tract Infections, and Skin and Soft Tissue Infections.

Add to this a convenient t.d.s. dosage—ensuring undisturbed sleep—a wide range of highly acceptable presentations, treatment costing as little as 16p per day and it is easy to see why Amoxil is practical antibiotic therapy at its best.

## PRESCRIBING INFORMATION

**Dosage:** Adults 250 mg three times a day. Children—up to 10 years: 125 mg three times a day. In the case of severe infections the dosage should be doubled.

**Presentation:** Amox capsules 250 mg. Amoxil syrup 250 mg /5 ml, 100 ml bottle. Amoxil syrup 125 mg /5 ml, 100 ml bottle. Amoxil paediatric Suspension 125 mg /5 ml, 20 ml bottle with pipette. Amoxil presentations contain amoxycillin trihydrate.

**Contra-indication:** Amoxil is a penicillin and should not be given to penicillin hypersensitive patients.

**Side effects:** In clinical trials involving more than 1,500 patients no serious side effects were reported. Those side effects which were encountered were of a mild transitory nature.

# Largactil

a name  
that covers  
a multitude  
of ills

In major and minor psychoses, drug withdrawal, senile dementia, control of terminal pain, and nausea and vomiting, the name to write is 'Largactil'. The established one. And the versatile one — because of its wide variety of presentations 'Largactil' allows

treatment to be tailored to the individual needs of each patient at a very reasonable cost. 'Largactil' is available as tablets, syrup, forte suspension, injection solution and suppositories. Full information is available on request

# New Ulcedal®

**"A problem shared is a problem more than halved."**

Now you can more than halve your peptic ulcer problems by giving your ulcer patient Ulcedal together with his antacid for pain relief.....  
**because Ulcedal heals ulcers.**

The peptic ulcer patient has most probably been taking stomach tablets and mixtures to relieve his pain for some time. He may also need reassurance, and you may consider regular diet and a curb on alcohol and tobacco desirable. Ulcedal capsules taken regularly, together with his antacid when required, will more than halve the peptic ulcer problem ... his and yours.

Because Ulcedal heals ulcers.

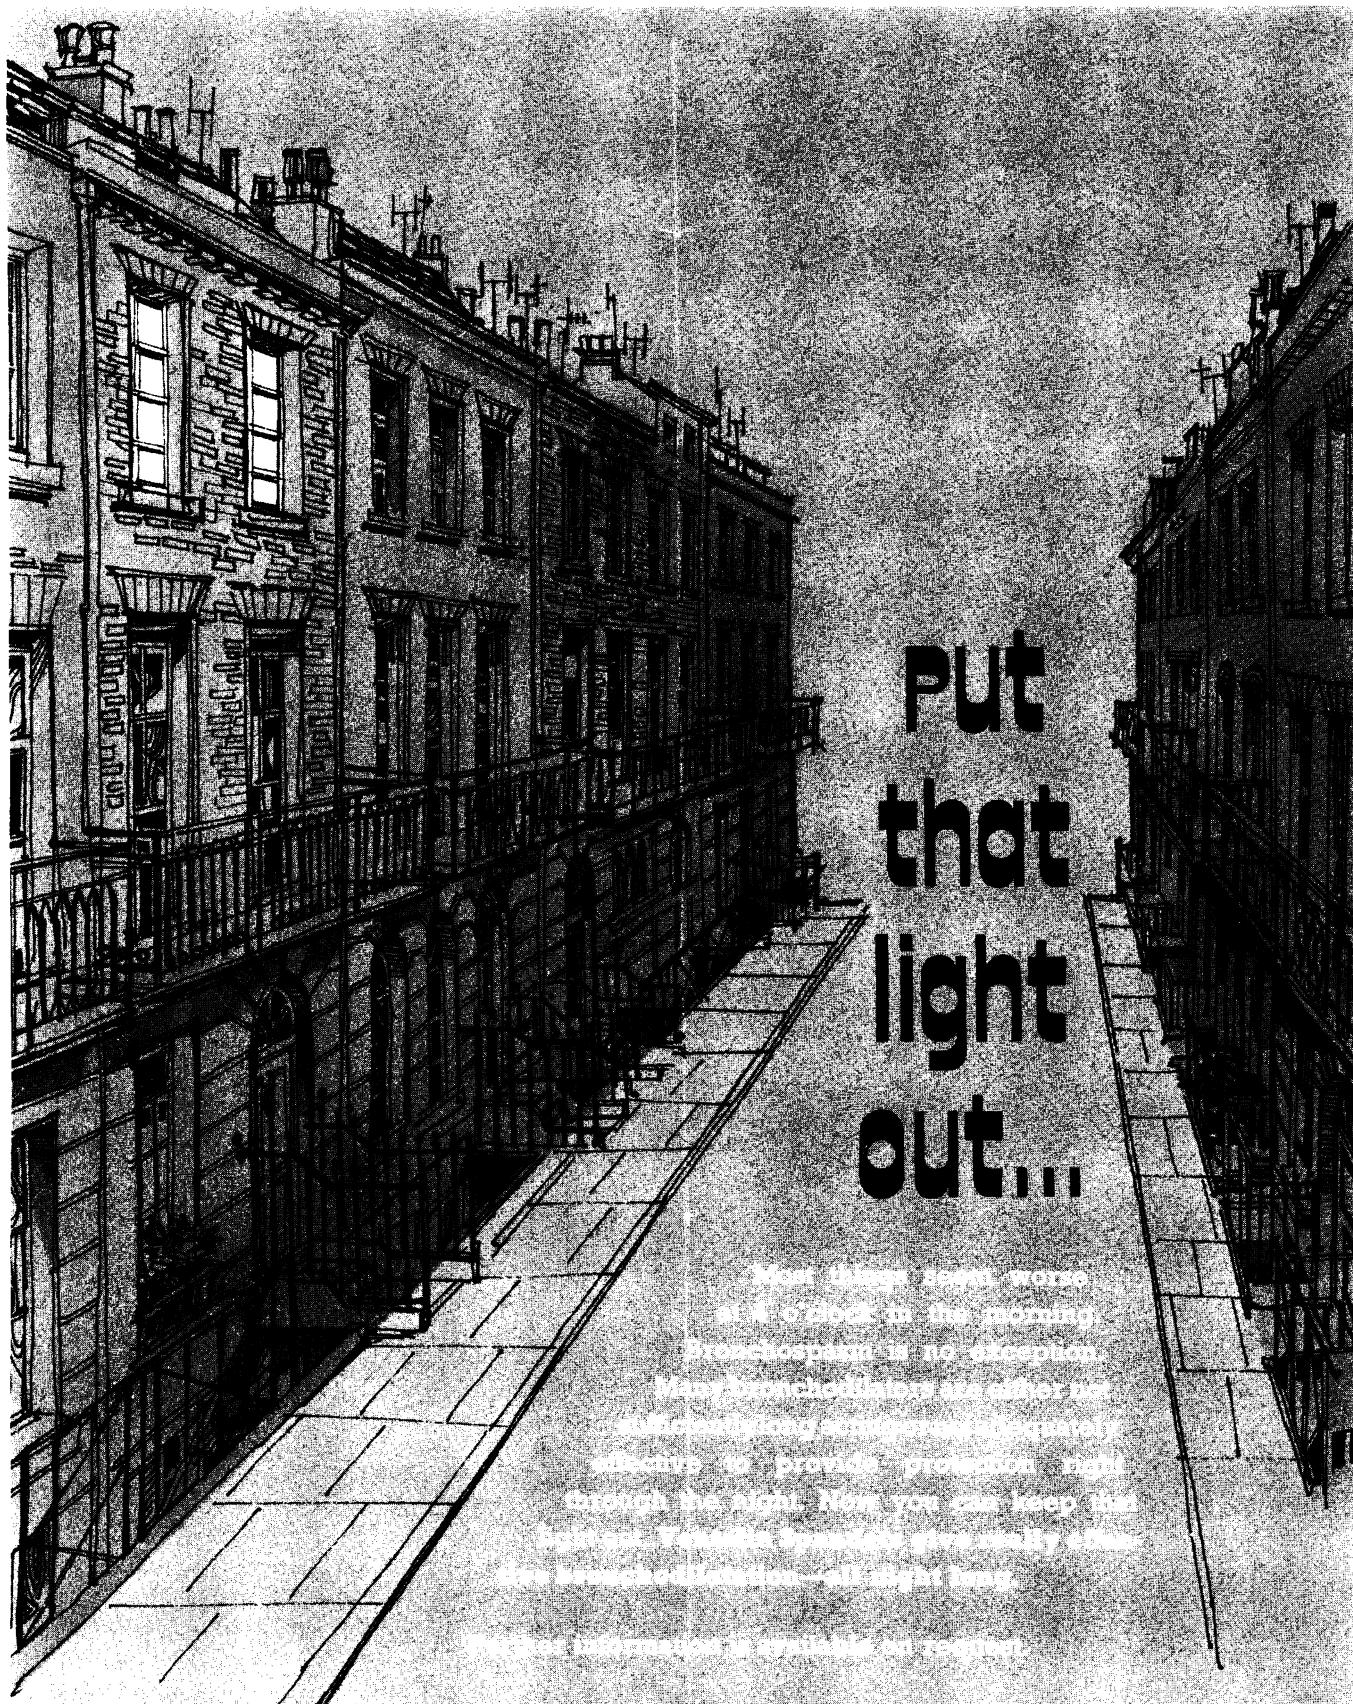

Each Ulcedal capsule contains 450 mg. deglycyrrhizinated liquorice (DGL).

# A Citroën DS owner only falls in love twice.

A man and his Citroen DS have a beautiful relationship. Quietly, taking the rough with the smooth, they move through life in aerodynamic harmony.

Rightly a man gives his DS credit, not only for its good looks, but its ability to adjust where the going is toughest.

Citroen's unique self-levelling Hydropneumatic suspension combines the ultimate in comfort and roadholding. Front-wheel drive straightens out the trickiest corners.

A perfected power-operated braking system pulls you up in a safe, straight line.

And at speeds up to 117 mph the world inside a DS is still and quiet and even.

There are interesting options like swivelling driving lights that beam intelligently round corners; hydraulic transmission; heated rear windows; electronic fuel injection; metallic paintwork and Pallas finish (our Pallas is spelt a little differently but it comes to the same thing).

The Citroen D range starts at £1497.48.

*The problem facing the prescribing doctor today  
is choice. Catalogues of drugs — no matter how  
detailed — are of little help unless accompanied  
by advice on which drug to give for what condition.*

### Today's Drugs/1

not only gives a full account of the drugs but also includes clear accounts of the management of common conditions such as urinary infections and epilepsy. It deals with only three subjects— infections, vitamin deficiencies and anaemias, and disorders of the nervous system.

PRICE £1.00 (U.S.A. \$3.00), *including postage*

### Today's Drugs/2

deals with hormones and oral contraceptives, cardiovascular agents, and drugs acting on the gastrointestinal tract. As with the first volume the articles have been revised to bring them up to date.

## Gynaecology in General Practice

As in other branches of medicine, the pattern of gynaecological problems likely to be encountered by the general practitioner will probably change in the future. Moreover, many doctors, now in practice were taught little about some of the topics which are important today and are likely to become even more so. In 1971 the *B.M.J.* published a series of articles in the "Medical Practice" section discussing the management of various gynaecological disorders in a domiciliary setting. These have now been collected together as a booklet entitled *Gynaecology in General Practice* and provides a useful and up-to-date account of gynaecology in general practice.

# The beauty of Calmuri® HC in eczema:

The difficulty in treating the essentially inflammatory condition of dry eczema is that it occurs beneath a barrier of dry, scaly skin.

So the heavy artillery is wheeled in. The massively potent fluorinated steroids. The logic: saturation treatment. The result? Only too often such serious side effects as skin atrophy and wasting, systemic absorption and adrenal suppression.

Now reverse the logic. *Select*, rather than *saturate*. Take a medicament proven highly successful in the treatment of dry, scaly skin. Calmudol. Use its deeply penetrating action as a means of carrying the milder, natural steroid hydrocortisone, right through to the eczematous area.

The result this time is a very evident clearing of inflammation. And the remarkably early disappearance of the dry, scaly skin.

**Double blind trials have shown that Calmance incorporating hydrocortisone, at least equals the potent fluorinated steroids in efficacy, but without their hazards. Calmance itself especially to the treatment of infants and children make use in all long-term therapy. A sample will be sent on your request.**

## Flora margarine can help prevent heart disease.

In 1972, one in four deaths will be caused by coronary heart disease. Many victims dying before retiring age.

Some premature deaths might be prevented, however, by substituting Flora margarine, the spread highest in poly-unsaturated fats, for animal fats in normal diet.

For 50% of Flora's fat content is natural cis-cis linoleic essential fatty acid.

And it is widely accepted that substituting polyunsaturated fats for

saturated fats can lower the risk of coronary heart disease.

Because of its cholesterol-reducing properties, Flora margarine is particularly effective as part of the dietary treatment of hyperlipidaemia.

For people at risk from coronary heart disease, indeed for almost anyone, Flora margarine makes very good advice.

"... an obese woman, deliberately swallowed 70 tablets (350mg) of nitrazepam [Mogadon] with suicidal intent. To her disgust, she did not die . . . No side-effects or complications were observed. "<sup>1</sup>

## Now you can sleep easy

Against a background of increasing concern about the danger of barbiturate poisoning (as few as 20 or 30 tablets may prove fatal), the advent of Mogadon must be of considerable importance. Indeed, Mogadon "... appears to be as nearly as safe as a drug can be."<sup>2</sup> Even as many as 80 tablets have produced no untoward effects. Moreover, a recent trial in the B.M.J. showed Mogadon comparable in effect to butobarbitone.<sup>3</sup> When such a drug exists, should you risk using anything else?

## a certain way to treat a lady

The certainty of positive microbicidal action, against all classes of vaginitis pathogens, is provided by Betadine vaginal pessaries. Therefore the risk of overgrowth of non-susceptible organisms associated with specific therapies is avoided.

Because of povidone iodine's decisively microbicidal action Betadine pessaries deodorize, which is particularly important in all forms of infective vaginitis.

Oral systemic anti-protozoal agents, antifungals and antibiotics may be used concomitantly if this is desired.

The following alternative forms of Betadine vaginal therapies are recommended:

Betadine Vaginal Pessaries - night and morning  
Each pessary contains povidone-iodine  
200 mg (USNF)

Betadine Vaginal Gel - at night

## **Low dosage, low cost in the control of pain**

Clinical experience shows that, in fibrositis, dysmenorrhoea, sinusitis, and other commonly encountered conditions of persistent pain, just one tablet of Paramol-118 every four hours provides relief.

By fortifying 500 mg paracetamol with a low dose (10 mg) of dihydrocodeine it is possible to control pain with a minimum daily intake of both drugs : in such low dosage the possibility of side effects is remote.

Needless to say, if necessary, this dosage can be increased to two tablets every four hours—and, even at this higher dosage level, risk of any really undesirable side effect is insignificant.

Costs, too, are kept low : with one tablet every four hours the basic NHS cost of a day's therapy is only about 2p.

### VOCATIONAL TRAINING FOR GENERAL PRACTICE

A vacancy has arisen in this scheme which commences on 1st August, 1972.

Under the scheme trainees spend the first two years in hospital service posts at Senior House Officer grade. These posts include experience in Casualty, Dermatology, E.N.T., Orthopaedics, Paediatrics, Obstetrics and Gynaecology. By a degree of flexible operation it is hoped to give each trainee additional experience in Orthopaedics, General Medicine, and other subjects of his or her choice.

The third year will be spent mainly as an assistant in a local training practice from which two half days per week release will be arranged for courses in psychological and preventive medicine, and for visits to other practices and to the Social Services relevant to the work of the family doctor.

Those wishing to be considered should complete and return by 12th June, 1972 an application form obtainable from:

The Secretary (AFT3/B), Board of Management for the Foresterhill and Associated Hospitals, Foresterhill House, Aberdeen Road West, Aberdeen AB9 8AO.

Details of the training schedule will be sent out with the application form, but any additional enquiries about the scheme may be addressed to:

### COMBINED TRAINING PROGRAMME FOR GENERAL PRACTICE WITH OBSTETRICS AND PAEDIATRICS

Applications are invited from registered medical practitioners for a two year training post which will include Obstetrics, Paediatrics and General Practice, starting on 1st September, 1972.

During the two years each doctor will spend six months in Obstetrics, six months in Paediatrics, and two six month periods in two separate group practices. The training offered would be of value not only to those intending to enter General Practice, but also to those hoping to specialise, particularly in Obstetrics and Paediatrics.

The Obstetric post will be at Mill Road Maternity Hospital, Liverpool, and the Paediatric post at Alder Hey Children's Hospital, Liverpool. General Practice training will be in two approved training group practices. The Obstetric training will be available for the D.O.B. R.C.O.G. examination, and the Paediatric training will be available for the D.C.H. examination. The appointment in Paediatrics allocated to this training scheme is one of the Senior House Officer posts which are advertised in the Paediatric section of this issue. Any candidate who has already spent at least one year post-registration in a hospital appointment would also qualify for the Vocational training allowance on entering general practice.

Salaries will be at the appropriate hospital grade and, in the practice year, on the Trainee Practitioners' Scheme, with car allowance.

Applicants wishing to visit the two practices should apply to Dr. J. F. Lowe, Cantrell Farm Health Centre, 85 Round Hey, Cantrell Farm, Liverpool L28 8QQ. Tel: 051-489 9924, or Dr. C. W. Walker, Woolton Street, Liverpool, 25. W. Tel: 051-428 4184.

Application forms are obtainable from the Group Personnel Manager, East Liverpool University Hospital Management Committee, Group Headquarters, Broadgreen Hospital, Liverpool L14 3LB, and should be returned by 12th June, 1972. (11232) 22

VACANCIES EXIST in a Vocational Training Scheme for General Practice (recognized by the Royal College of General Practitioners). Commencing date to be arranged. The scheme involves a series of S.H.O. appointments for two years and a further year as a trainee in general practice. Subjects covered in hospital will be obstetrics, paediatrics, accident, work or geriatrics. Experience in other disciplines can be arranged. The period in general practice will include a day release course and attendance at hospital out-patient clinics. Enquiries and applications to Secretary, Birmingham R.H.B., 146, Hagley Road, Birmingham B16 9PA immediately. (33306) 22

APPLICANTS ARE ADVISED NOT TO send original testimonials when replying to advertisements. Copies will serve the purpose quite as well, and in the event of their being lost or mislaid no inconvenience will ensue.

### UNITED NORWICH HOSPITALS VOCATIONAL TRAINING SCHEME FOR GENERAL PRACTITIONERS

To Commence 1st August, 1972

The Scheme of General Professional Training is in accordance with the recommendations of the Royal Commission on Medical Education 1965-68. Two years are spent in hospital and a third in General Practice.

There is a rotation of four S.H.O. posts over two years through in-patient departments as follows: Obstetrics, six months; General Medicine and Dermatology, six months; Paediatrics, three months; Geriatrics, three months; Accident and Emergency, three months; and a period of three months during which the S.H.O. will (a) act as a locum for his colleagues' holidays, and (b) undertake study of a subject of his particular interest. There will be a three month period of general practice early in the first year. Over the two year period, one half-day per week will be allocated for attendance at specialist clinics, e.g. Rheumatology, Psychiatry, Ophthalmology, etc., and to give opportunity to visit general practices in the area.

Modern married accommodation is provided during the two years of hospital appointments.

A third year will be spent as a trainee in one or more general practices in the area.

During the three year period, General Practitioners will organize a programme of evening tutorials with meetings and seminars on Human Behaviour and Social Medicine, with a variety of psychology topics. There will also be an intensive course on practice organization and methods early in the trainee year.

Further information can be obtained on request from the Secretary, Norfolk and Norwich Institute for Medical Education, Norfolk & Norwich Hospital, Norwich, Norfolk NOR 53A.

Keppel Street, London, W.C.1

CHRONIC DISEASE  
CONTROL STUDY UNIT

The School is considering making a further appointment of a senior medical graduate to the Chronic Disease Control Study Unit which forms a constituent part of the Public Health Department. This would be a full-time post, preferably for an epidemiologist with a particular interest in the problems associated with the practical aspects of chronic disease prevention and control in the context of the National Health Service. The Unit is supported, as is the Organization of Medical Care Unit in the same Department to which its interests are complementary, by the Department of Health and Social Security.

Salary would be on an appropriate scale (clinical senior lecturer, reader or professor) according to experience and seniority.

Further information can be obtained from Professor J. N. Morris. Applications should be sent to the Dean by 23rd June, 1972.

UNIVERSITY OF OXFORD  
Board of Governors of  
The United Oxford Hospitals  
Oxford Regional Hospital Board

SENIOR REGISTRAR

Training Posts in Medical Administration. The 2 Hospital Boards together with the University have created a programme of training spanning four years designed for candidates with good clinical backgrounds who have an interest in medical administration. Although previous administrative experience is not essential, candidates should be able to demonstrate their ability to organise effectively and work closely with professional and other colleagues. The first year of the programme is intended to create a link between clinical work and administration. The candidate spending this year as Admissions Officer for the United Oxford Hospitals and as a Trainee Epidemiologist in the Department of the Regius Professor of Medicine.

This attachment would continue in the second year when the candidate would be working with the Oxford Regional Hospital Board instead of the United Oxford Hospitals. The third year of the programme would be spent on the full time course at the London School of Hygiene and Tropical Medicine leading to the M.Sc. degree in medical administration. During the fourth year, the candidate would be engaged in research leading to the thesis required for the M.Sc. It is intended that the programme will allow the fourth year to be spent in Oxford with one or more of the organisations participating in the programme. The posts will be paid on the Senior Registrar grade.

Further details may be obtained from the Group Assistant Secretary, Radcliffe Infirmary, Oxford. Application forms should be returned to him by 3rd June, 1972. (32937) 111

# power to stop pain crippling

#### Description and Presentation

PRINALGIN alclofenac (4-allyloxy-3-chlorophenylacetic acid) is a powerful new analgesic which shows marked anti-inflammatory action in animal experiments. Clinically, it has been compared favourably with phenylbutazone, indomethacin, pentazocine and morphine in well controlled double-blind trials. PRINALGIN tablets, each containing alclofenac 500 mg are available in packs of 100 and 500. (Basic N.H.S. cost of 100: £2.26)

#### Prescribing Information

**Indications:** Pain, especially in arthritis and rheumatism.

**Dose:** One or two tablets every 4-6 hours. In arthritic and rheumatic conditions 2 tablets 3 times daily, reducing this initial dose as symptoms are controlled.

**Side Effects:** PRINALGIN is very well tolerated and there are no serious side effects. There are occasionally reports of nausea and indigestion but these are rarely sufficient to warrant cessation of treatment. Occasionally cutaneous intolerance occurs but this is reversible on withdrawal of the drug. One case of possible hypersensitivity to PRINALGIN has been reported.

#### Precautions

There are no special precautions to be taken in the administration of PRINALGIN but, as with any drug, it should be administered with caution in cases of impaired renal or hepatic function and in diabetes.

Although animal tests in several mammalian species have revealed no teratogenic effects, as with all new drugs

PRINALGIN is not recommended during the first trimester of pregnancy.

**The effect of PRINALGIN upon joint pain and function ranks with that of phenylbutazone or indomethacin, yet PRINALGIN has caused no serious side effects in any of the 4,500 patients treated in clinical trials.**

**PRINALGIN does not cause gastric erosions, blood dyscrasias or liver damage and has no hormonal actions.**

# Penbritin Territory

Right from the time they're too young to tell you where it hurts, treatment of children poses special problems. During this period, more than ever, the antibiotic you prescribe should ideally be safe—and sure.

The effectiveness of Penbritin and its safety as a penicillin are well-established. In contrast, tetracyclines are "absolutely contra-indicated for children aged under 8" because of serious effects on tooth development (Brit. med. J. (1970), 4, 509).

For the under two's, acceptability is of great importance. Penbritin paediatric suspension provides it—in an easily administered form. Syrup and paediatric tablets for the older child complete the Penbritin paediatric range.

In Paediatric Territory there's really only one choice.

## our anti-nauseant

Vertigo. Migraine. Gastric disturbance. Whatever the cause of nausea and vomiting, 'Stemetil' can be relied upon to bring welcome relief - quickly, effectively and with a tolerance one would expect of a preparation boasting more than 13 years' successful clinical use.

Full information is available on request

## does that little bit more

In addition to its anti-nauseant action, 'Stemetil' exerts a mild tranquillizing effect which helps the patient cope with both physical and mental discomfort. In fact, 'Stemetil' frequently makes patients feel not just better, but better than they've felt for some time. Moreover, because it combines two effects in the one prescription item, 'Stemetil' makes economic, as well as therapeutic sense.

# RYNACROM®

Sodium Cromoglycate BP for hay fever

In the form of Intal, Sodium Cromoglycate is already proven as a valuable anti-allergic therapy.<sup>1,2</sup> The introduction of Rynacrom now makes Sodium Cromoglycate available for the control of symptoms of hay fever. Administration is by a specially-designed nasal insufflator that is recharged with a Rynacrom capsule at each application.

Clinical trial results show that Rynacrom significantly reduces rhinorrhoea and nasal obstruction in hay fever and that the treatment is easy and well accepted by patients.<sup>3</sup> A characteristic feature of this therapy is the

extremely low incidence of side effects.<sup>1,2,3</sup>

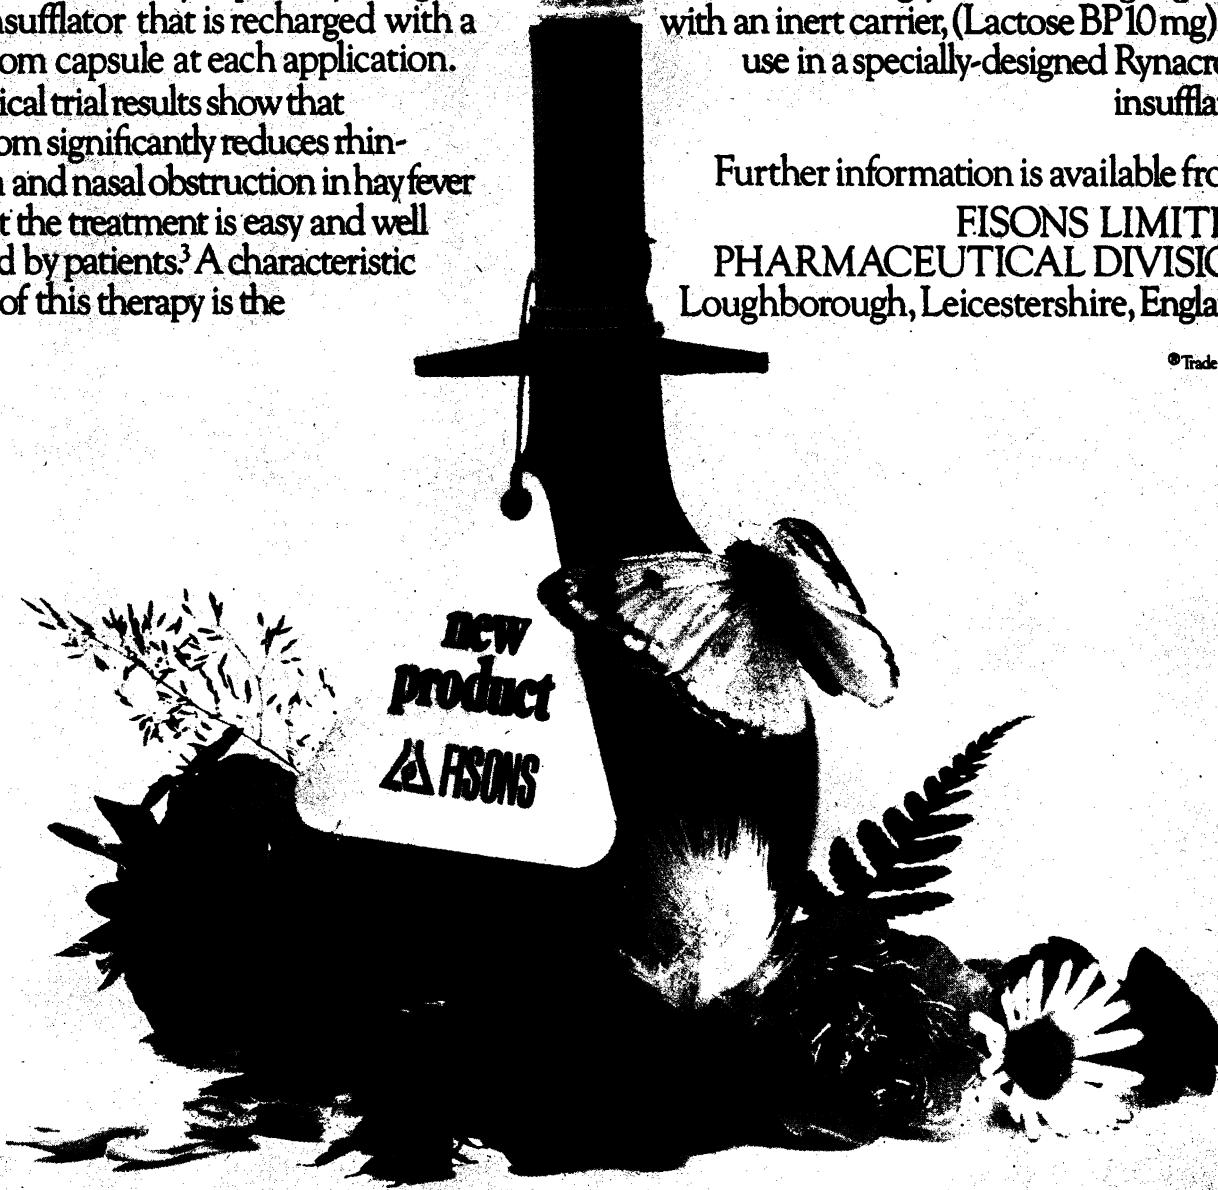

For this reason many of the problems of conventional hay fever therapy do not arise with Rynacrom.

Rynacrom is supplied as capsules containing Sodium Cromoglycate BP 10 mg together with an inert carrier, (Lactose BP 10 mg) for use in a specially-designed Rynacrom insufflator.

**Lipha** arrive en Grande Bretagne

What has Lyons, the gastronomic centre of France – or of Europe for that matter – got to do with medicine?

The answer is 'a great deal', for Lyons is also a major centre of medical research from which many important products have emerged to take their rightful place in worldwide medicine.

We come from Lyons.

And shortly we will be introducing one of our research-based products to you.

Other equally important compounds will follow: all will be of the highest quality and reliability, backed by the painstaking research and quality control that is the byword of Lipha.
