

In infected eczema, it's the eczema you worry about.

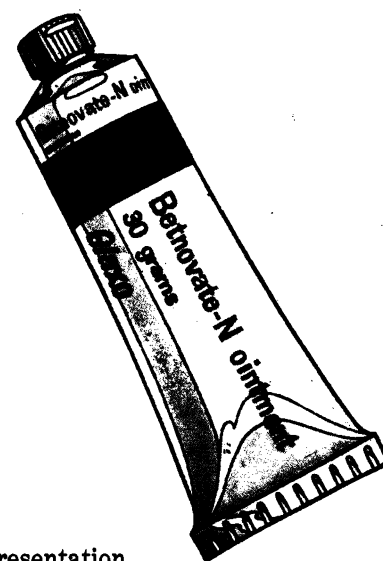

And no combination of anti-infectives will stop the scratching that starts the infection that results in infected eczema.

**But Betnovate-N will.**

And it will do it quicker than other preparations designed to combat infected eczema, because it contains betamethasone as 17-valerate, a more effective steroid.

Betnovate-N also contains neomycin so it stops the infection at the same time.

All at a price others can't match.

# A lifetime of freedom begins with Intal

Before INTAL, a diagnosis of asthma often meant a life sentence of constantly aborting attacks with bronchodilators, anti-histamines or steroids. Patients were constantly at risk from the relentless progress of lung damage and lived in perpetual fear of an asthmatic episode.

The discovery of INTAL (Sodium Cromoglycate BP) represents a turning point in the management of this distressing complaint. Newly diagnosed patients, as well as those of long standing, benefit from this entirely new approach to therapy. INTAL actually prevents the onset of asthmatic attacks, and is notably free from serious side effects.

By preventing asthma attacks the possibility of consequent lung damage may be avoided enabling the patients to lead a fuller, happier life. If they remember their daily INTAL—they can forget their asthma.

INTAL—supplied in SPINCAPS<sup>®</sup> (each containing 20 mg Sodium Cromoglycate BP). For use in a special insufflator—SPINHALER.<sup>®</sup>

## **When a child has tonsillitis Ceporex Syrup reduces the risks and improves the results**

Tonsillitis treated with penicillin can result in diarrhoea. And penicillin-hypersensitivity rashes are another problem which can complicate therapy.

Ceporex (cephalexin) is ideally suited for tonsillitis treatment. It is clinically as effective as penicillin G against the beta-haemolytic streptococci, but is less likely to produce side effects. It is very well tolerated by children of all ages and can normally be

used in penicillin-hypersensitive patients. And Ceporex also achieves a rapid result since it produces high blood levels within an hour of administration, penetrates the tissues quickly and is not metabolised in the body so it remains fully active to fight infection.

Ceporex Syrup has a pleasant blackcurrant flavour which encourages children to finish the course. It comes in two strengths for children: 125mg and 250mg.

### **Children get on well with Ceporex Syrup**

**Ceporex safety**

"Considering its efficacy and the relative freedom from side effects, we conclude that it is as good a drug as penicillin G and certainly is a valuable addition to the therapeutic armamentarium of beta-haemolytic streptococcal infections in children."<sup>1</sup>

(89 children with beta-haemolytic streptococcal infections.)

"The response to therapy was uniformly good, and no significant toxic effects were encountered."<sup>2</sup>

"Cephalexin appears to be a highly effective drug in the treatment of bacterial pneumonias of older infants and children who are able to take oral medication. The drug has the added advantage of low toxicity."<sup>2</sup>

(55 children with bacterial pneumonia.)

**Ceporex speed**

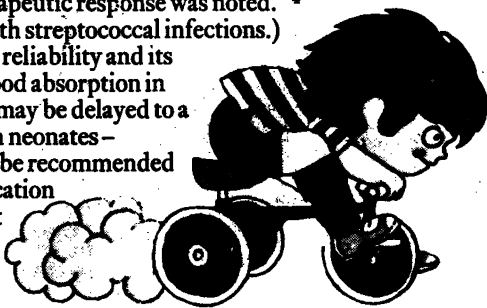

"The clinical response to cephalexin was prompt. Fever subsided within the first 24 hours after initiating therapy."<sup>3</sup>

(30 children with pneumonia.)

"A rapid therapeutic response was noted."<sup>4</sup>

(185 children with streptococcal infections.)

"... due to its reliability and its exceptionally good absorption in infants - which may be delayed to a certain degree in neonates - cephalexin may be recommended as the oral medication of choice against sensitive organisms in newborns."<sup>5</sup>

**Less side effects with Ceporex**

"No side effects from cephalexin were noted. The medication was accepted without difficulty. There was no nausea, vomiting or diarrhoea, and no rashes were observed."<sup>2</sup>

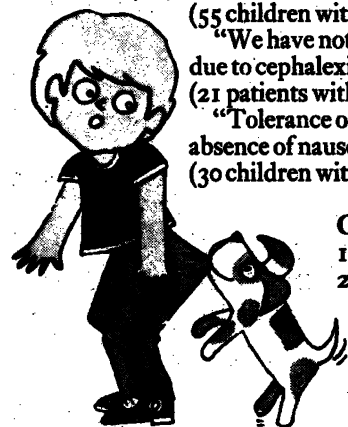

(55 children with bacterial pneumonia.)

"We have not encountered any side effects due to cephalexin."<sup>6</sup>

(21 patients with cystic fibrosis.)

"Tolerance of the drug was satisfactory with absence of nausea, vomiting or diarrhoea."<sup>3</sup>

(30 children with pneumonia.)

## The Mental Health Service After Unification

This report from a Tripartite Committee of the Royal College of Psychiatrists, the British Medical Association and the Society of Medical Officers of Health discusses the organization of the Mental Health Service in the context of the forthcoming reorganization of the National Health Service.

The Committee has taken the mental health needs of a population unit of  $\frac{1}{4}$  million on which to base a realistic appraisal of the Government's present policy and the role of doctors, nurses, social workers, voluntary workers, and others in this field.

Constructive proposals are made for an essential framework of requirements in hospital and in the community, and guidelines are laid down for all those concerned with mental health and related social work and community services.

Copies of the report *The Mental Health Service After Unification* (95 pages) are available price 50p plus 6p postage from the British Medical Journal Publishing Department, BMA House, Tavistock Square, London, WC1H 9JR.

# The Cephalosporins\*

\*Extracts from The British Journal of Hospital Medicine (Dec) 1971, 795-804.

## Cephalexin

The value of parenteral cephaloridine is so universally established that it highlights the need for a form that is active by mouth. This is now available as a semisynthetic derivative of cephalosporin C. It is broad spectrum, bactericidal, well absorbed after oral administration and not significantly bound to serum protein. Following a single dose, peak blood levels are noted at one hour in fasting subjects. Food causes a delay in onset, a lower peak and prolongation of the blood levels but does not decrease total absorption. Most of it is excreted unchanged by glomerular filtration and tubular secretion in the urine during the first 8 hours after absorption. Probenecid causes retention and delay in excretion (Braun et al, 1968) and raises peak serum levels by between 50 and 100 per cent. Serum protein-binding is of the low order of 25 per cent.

## Antimicrobial spectrum

The cephalosporins are broad spectrum (Table 2) and bactericidal, acting, like penicillin, on bacterial cell walls and interfering with cell wall synthesis by preventing cross-linkage of the linear peptidoglycan strands of the cell wall (Benner, 1971). Whereas the cephalosporins are stable to staphylococcal penicillinase, they may be susceptible to the  $\beta$ -lactamases produced by *Proteus vulgaris*, *Proteus morganii*, *Proteus rettgeri* and *Aerobacter aerogenes*. Resistance in organisms may be due to these  $\beta$ -lactamases as well as to native intrinsic resistance (in the same fashion as methicillin-resistant staphylococci).

## Gram-positive pathogens

The Gram-positive bacteria are susceptible to the cephalo-

sporins (Table 2). *Staphylococcus aureus*, whether sensitive or resistant to penicillin, is sensitive to cephaloridine. Commonly

# "Estimates of the frequency of allergic reactions to penicillin vary from 1-10 per cent..."<sup>1</sup>

With allergic reactions to the penicillins apparently on the increase, Ceporex deserves an increasingly important place as first line antibiotic therapy.

It can safely be prescribed where the penicillins are considered unsuitable and rarely produces side effects. "No cross sensitivity was seen with cephalixin in the eight patients with a history of penicillin hypersensitivity."<sup>2</sup>

"When side effects had occurred

they usually had been mild, many disappearing during treatment."<sup>2</sup>

It all adds up the simple fact that when the penicillins aren't suitable, you can trust Ceporex to reduce the risks and improve the results.

# Ceporex

is cephalixin from Glaxo

encountered Gram-positive bacteria, chiefly pneumococci, group A streptococci, and staphylococci (whether penicillinase producers or not) are uniformly susceptible to low concentrations of these antibiotics.

### Gram-negative pathogens

A variety of Gram-negative organisms respond to the cephalosporins (**Table 2**). *Escherichia coli*, behaving in somewhat the same fashion as *Staph. aureus*, is often resistant to ampicillin in hospital practice but still sensitive to ampicillin in domiciliary practice. This organism is sensitive to all the cephalosporins, and oral cephalexin has become established as a major advance in the management of urinary tract infections.

Guttman (1970) has made a careful survey of the antibiotic sensitivities of urinary pathogens by the disc diffusion method, comparing ampicillin with cephaloridine and cephalexin, against *E. coli*, *Proteus* and *Klebsiella*. The percentage sensitive to ampicillin was 75, compared with 86 per cent sensitive to cephaloridine and 96 per cent sensitive to cephalexin.

### Cephalosporins versus penicillins

In clinical practice the choice of antibiotic in the first instance has resolved itself into the decision of whether to use ampicillin or a cephalosporin (**Table 3**). Inhibitory concentrations of these antibiotics for Gram-positive bacteria are comparable, but as a group the Gram-negative bacteria show considerable variability in their susceptibility to them. Other antibiotics including the tetracyclines, sulphonamides, erythromycin, chloramphenicol, and the polymyxins all have a special and sometimes unique role to play in the management of infections, but a penicillin or a cephalosporin is nowadays a central issue.

The penicillins are usually chosen unless the patient is allergic to this antibiotic. Hence the problem of whether or not an individual is allergic to penicillin is pertinent. There may be a previous history of adverse reactions to penicillin itself or to other drugs. Estimates of the frequency of allergic reactions

to penicillin vary from 1–10 per cent ranging from immediate histamine-type acute fatal anaphylaxis to mild delayed-type contact dermatitis. Particular care should be taken of the fair-headed blue-eyed diathesis, or of patients with a history of eczema, asthma or hayfever.

# Ceporex

## the logical alternative to the penicillins

When you prescribe Ceporex (cephalexin) you are prescribing the logical oral alternative to the penicillins. Ceporex has a broad spectrum of activity and recent clinical evidence<sup>2</sup> shows that cephalexin has achieved 94% success rate in acute bronchitis, 87% in chronic bronchitis/bronchiectasis and 91% in pneumonia and bronchopneumonia. These results were based on 805 case histories.

Ceporex gives peak blood levels one

hour after administration and is not significantly protein-bound, leaving most of the antibiotic free to fight infection.

Ceporex is available as 500mg and 250mg tablets, capsules and syrups.

# Medicine in a Tropical Environment

Edited by A. G. Shaper, J. W. Kibukamusoke, M. S. R. Hutt

*Medicine in a Tropical Environment* is intended for medical students and doctors working in tropical and developing countries. The essays bring together specific problems of the tropical environment which have been the subject of recent investigation, and the authors write on them from personal experience. Little of the material on which the essays are based was available more than five years ago. To doctors in temperate climates preparing themselves for medical work in developing parts of the world *Medicine in a Tropical Environment* is essential reading.

## Diseases of the Urinary Tract

One of the most rapidly growing specialties over the last few years has been that of urology. Many doctors now in practice could not have been taught much of the present-day management of many urinary tract diseases. Last year the *B.M.J.* published a series of "Current Practice" articles on diseases in the urinary tract, and these have now been collected together in a booklet. Beside articles on the newer aspects of the specialty, the booklet contains articles on established methods of managing renal disorders. Any doctor who wishes to bring himself up to date on modern practice in this field will find this a readable account of the important aspects of the specialty.

## Hypertension. Introduce her to treatment gently with Neo-NaClex-K.

**When a patient is new to hypertension, Neo-NaClex-K makes it a lot easier to live with.**

Easier, because just once-a-day treatment can control the mild to moderate case.

Easier, because her sleep won't be disturbed by diuresis during the early days of treatment.

Easier, because postural hypotension won't be something she'll wake up to.

And even in severe hypertension you can still keep her on Neo-NaClex-K in conjunction with minimal doses of a more potent antihypertensive. So you can control the severe condition with less risk of side effects.

Neo-NaClex-K is a unique two layered tablet containing bendroflumazide to lower blood pressure safely and surely, plus a potassium supplement to replace any loss. And right from the start, it provides a gentle introduction to the long-term treatment your new hypertensive patient may need.

# The beauty of Calmurid HC in eczema:

The difficulty of treating the essentially inflammatory condition of dry eczema is that it occurs beneath a barrier of dry, scaly skin.

So the heavy artillery is wheeled in. The massively potent fluorinated steroids. The logic: *saturation* treatment. The result? Only too often such serious side effects as skin atrophy and wasting, systemic absorption and adrenal suppression.

Now reverse the logic. *Select*, rather than saturate. Take a medicament proven highly successful in the treatment of dry, scaly skin: Calmurid. Use its deeply penetrating action as a means of carrying the milder, natural steroid, hydrocortisone, right through to the eczematous area.

The result this time is a very evident clearance of inflammation. And the remarkably early disappearance of the dry, scaly skin.

Double blind trials have shown that Calmurid incorporating hydrocortisone at least equals the potent fluorinated steroids in efficacy. It is without their hazards. It lends itself especially to the treatment of infants and children and for use in all long-term therapy. A sample awaits your request.

## Indications

Atopic Eczema, Besnier's Prurigo, acute and chronic allergic eczema, neurodermatitis and other hyperkeratotic skin conditions with accompanying inflammation.

## Unwanted Effects

Calmurid HC may cause stinging and burning on application to raw, fissured or weeping surfaces.

Application to an infant's face may cause irritation for the same reason.

## Contra-indications

Skin tuberculosis, viral infections, acromycotic dermatitis, rosacea, herpes simplex, impetigo, chicken pox and measles. Do not use Calmurid HC on infected or severely inflamed skin. Do not use Calmurid HC on the face of infants.

**Application:** Apply Calmurid HC daily after washing the affected area. Calmurid HC is a long-term therapy and should be continued at dryness and before instituting Calmurid HC therapy.

## AMOXIL

an excellent new antibiotic for routine treatment

URTI Chest infections UTI Skin and soft tissue infections

Amoxil is a new antibiotic with distinct advantages in routine treatment.

Amoxil has a broad spectrum of activity against the common bacterial pathogens encountered in practice and its bactericidal action means further confidence in its everyday use.

The most practical advantage of Amoxil is that its oral absorption is outstanding, giving extremely high serum and tissue levels, irrespective of the presence of food. This ensures rapid and decisive activity at all sites of infection, even the more inaccessible.

Extensive British clinical trials have demonstrated its efficacy and penicillin safety in the treatment of Upper Respiratory Tract Infections, Otitis Media, Bronchitis, Urinary Tract Infections, and Skin and Soft Tissue Infections.

Add to this a convenient t.d.s. dosage—ensuring undisturbed sleep—a wide range of highly acceptable presentations, treatment costing as little as 16p per day and it is easy to see why Amoxil is practical antibiotic therapy at its best.

# Largactil

a name  
that covers  
a multitude  
of ills

In major and minor psychoses, drug withdrawal, senile dementia, control of terminal pain, and nausea and vomiting, the name to write is 'Largactil'. The established one. And the versatile one — because of its wide variety of presentations 'Largactil' allows

treatment to be tailored to the individual needs of each patient at a very reasonable cost. 'Largactil' is available as tablets, syrup, forte suspension, injection solution and suppositories. Full information is available on request

'Largactil' is a trade mark of May & Baker Ltd Dagenham Essex RM10 2XS for its preparations of chlorpromazine.

# When urinary infection is anything but simple

For the umpteenth time she's back with cystitis. Previously had surgery for removal of renal calculi. Investigation at that time indicated a degree of renal insufficiency. MSU's during acute episodes usually reveal presence of *E. coli*. Difficult to determine whether recurrence is due to antibiotic failure or re-infection.

## Flora margarine can help prevent heart disease.

In 1972, one in four deaths will be caused by coronary heart disease. Many victims dying before retiring age.

Some premature deaths might be prevented, however, by substituting Flora margarine, the spread highest in polyunsaturated fats, for animal fats in normal diet.

For 50% of Flora's fat content is natural cis-cis linoleic essential fatty acid.

And it is widely accepted that substituting polyunsaturated fats for

saturated fats can lower the risk of coronary heart disease.

Because of its cholesterol-reducing properties, Flora margarine is particularly effective as part of the dietary treatment of hyperlipidaemia.

For people at risk from coronary heart disease, indeed for almost anyone, Flora margarine makes very good advice.

## Doctors in the Australian Army get the best of all worlds

A new life in Australia. With first class passage paid for you and your family. A job waiting—and all the advantages of a service practice.

With extraneous administration taken off your hands, you can really do your job properly. You could be in an R.M.O. unit, field ambulance station or military hospital and there are opportunities for updating medical knowledge and techniques. Then there's the sports and social side, too.

The sort of man we're looking for is preferably under 40—with medical qualifications registerable in the Commonwealth of Australia. He's medically fit—prepared to serve anywhere and is a British subject eligible for permanent residence in Australia. If this sounds like you, this is what we'll do for you.

You'll be appointed to a Short Service Commission for 4 years in the Medical Corps of the Australian Army in the minimum rank of Captain, where your pay would amount to £11.78 a day after the equivalent of 5 years service. (Your professional experience in England serves to ante-date your period of service). Tax and a refunded retirement benefit will be deducted from this—though your clothing and marriage allowances of £0.13 and £0.91 a day are not taxed. You also receive a bounty of about £1,540.

If this sounds like your sort of life, contact: Brigadier L. I. Hopton, MBE, Australian Army Representative, Australia House, Strand, London WC2. Telephone: 01-836 2435. Extn. 356.

RE-ADVERTISEMENT  
COUNTY OF SALOP EXECUTIVE COUNCIL  
PRACTICE VACANCY TELFORD NEW TOWN  
STIRCHLEY DISTRICT

Applications are invited for an experienced general medical practitioner to commence a new practice in the Starchley District of Telford New Town. The New Town is set in the East Shropshire countryside, midway between Wolverhampton and Shrewsbury, and within easy reach of Central and North Wales and its coastline.

The Starchley District now under construction will eventually accommodate a population of about 24,000 people in a variety of house types for both rent and sale, any of which will be available to the appointed Doctor. The estimated growth is expected to be:— 1,400-1,700 in 1972; 4,400-4,800 in 1973; 7,500-7,700 in 1974 continuing thereafter to the eventual population of 24,000.

The District will broadly comprise three housing areas, each with its primary schools, shops for daily needs, Social and Community Centres, with a Central District Centre with a wider range of shops and services including a top tier Comprehensive School.

Temporary surgery accommodation will be located in a pair of specially adapted Corporation houses until the Health Centre is available in late 1974, and a new District General Hospital is planned for the area with over 950 beds, including a G.P. Maternity Unit. There is the possibility of Local Authority work and the practice is expected to develop as an integrated service. It will be expected that normally the Doctor appointed will have been qualified for about ten years of which two should have been in hospital appointments and five in a busy general practice in this country and so be eligible to be paid a type "D" Initial Practice Allowance as described in E.C.N. 631. The Medical Practices Committee have agreed that initially the District be classified "Designated" for this purpose and then "Restricted". As the practice grows the appointed Doctor will be expected to take partners and to become the leader of the Medical Team in the Development Area. He should therefore have enthusiasm for administering a new project and the ability to attract and work with other practitioners.

Further details and Form E.C.16A may be obtained from the Clerk, County of Salop Executive Council, Abbeydale, 39 Abbey Foregate, Shrewsbury, Shropshire, and the closing date for receipt of applications is 14th July, 1972. (H6774)

## Not everyone has Adequate Capital

to meet the cost of a new car or to replace equipment. Many seek financial help - Bank loans, Personal loans, and Hire Purchase - but some of these are expensive.

The M.I.A. can help and in many cases can arrange loans at competitive rates.

## ADMINISTRATIVE

# Vacancy for a Medical Graduate interested in the administration of research

If you are a Medical Graduate, aged under 40, with at least five years' postgraduate experience and interest in research, there is a particularly interesting administrative appointment available with the Medical Research Council, in London.

The Council is the main Government agency responsible for the promotion of medical research and sponsors an extensive programme both at home and abroad. The position offers an excellent opportunity to keep in touch with the latest developments in medicine and the biological sciences. The work involves maintaining close liaison with scientific staff and others in the medical research field working in the Council's own establishments, in universities, hospitals and other institutions. Salary will be at a point in the range £4,206-£5,665 per annum, with superannuation provision. The appointment will be to the Council's established staff, subject to satisfactory completion of a probationary period of two years.

Application forms may be obtained by writing to or telephoning Miss M. Walton, Medical Research Council, 20 Park Crescent, London W1N 4AL, Tel: 01-636 5422. Closing date for applications is 7th July. Please quote E.2/492. (34859) 111

The region covers the counties of Hereford, Salop, Stafford, Warwick and Worcester, in which there are 18 hospital groups with 42,000 beds serving a population of over five million. There are very close links with the four universities (Birmingham, Keele, Warwick, Aston) and numerous technical colleges contained within the region, especially for

educational and research programmes.

In respect of the Regional Hospital Board, the region, for the purposes of administration and organisation, is divided into four areas. Each area has a team representing all disciplines of the Board's organisation, responsible to the senior officers.

# Assistant Senior Medical Officer

The doctor appointed will assist the Senior Administrative Medical Officer and a Principal Assistant Medical Officer in an Area Team in the planning and administration of hospital services in the Region. Attachments may also be arranged to other branches of the service, for example, to the health department of a large local health authority for a doctor without experience in this field so that a general all-round training will be given to fit the successful candidate for a career in an integrated health service. Opportunities for operational research and attendance at appropriate courses in medical administration.

(34857)

Salary (superannuable): —  
£4,017 x £222(1) — £4,239 x  
£234(5) — £5,409.

Further particulars of duties and responsibilities of the post obtainable from Senior Administrative Medical Officer.

Applications stating age, experience and qualifications, and naming three referees to Secretary, 146 Hagley Road, Birmingham B16 9PA, by 10th July.

AUSTIN HOSPITAL — HEIDELBERG  
(Situated in Melbourne,  
Victoria, Australia)

**MEDICAL DIRECTOR  
SPINAL INJURIES UNIT**  
Applications for the above post are invited from medical practitioners, preferably with experience in the management of spinal injuries in the acute phase and during subsequent rehabilitation. Other considerations being equal, a higher qualification in Medicine (preferably) or Surgery will be deemed an advantage.

The Spinal Injuries Unit is well-established within this general teaching hospital associated with the University of Melbourne. It is officially recognized as the centre for the treatment and rehabilitation of patients suffering from spinal cord injuries, serving the whole of the States of Victoria and Tasmania and the southern T. Riverina part of New South Wales — a total population of about 4,000,000. Average annual admissions total about 100 acute cases, and 300-350 re-admissions.

Salary will be at the Wages Board rate for a Senior Specialist in Charge (Teaching Hospital) — currently \$A17,425 per annum.

Applicants are asked to indicate whether, in the event of a consequential vacancy occurring for the post of Assistant Medical Director, they wish to be considered for such appointment, for which salary will be within the range \$A11,414 to \$A15,621 per annum, according to qualifications and experience.

Both appointments carry eligibility for a limited right of private practice under agreed conditions.

Application forms and a memorandum giving further details are available on request from the Manager, Austin Hospital, Heidelberg, Victoria, Australia, 3084. Applications will be received until 4 p.m. on 31st August, 1972. R. H. Kronborg, Manager. (12247) 118

This is a new post for a doctor to form and lead a medical team to advise the Centralised Licensing Directorate in Swansea on the suitability of people with medical complaints or disabilities to obtain or hold driving licences. The initial task will be to plan and test medical enquiry procedures and to set up administrative support.

The medical team will need to acquire some knowledge of the law relating to driving licences and will investigate cases referred to it. It may also have to provide medical evidence in the event of appeals against the Secretary of State's decision in individual cases.

Candidates, preferably under 50, must be fully registered as medical practitioners in the United Kingdom. Some experience in an administrative capacity is desirable, e.g. in central or local government or in commerce.

Non-contributory pension scheme. Promotion prospects.

Full details of this appointment may be obtained by writing to the **Civil Service Commission, Alencon Link, Basingstoke, Hants.**, or by telephoning BASINGSTOKE 29222, ext. 500 or LONDON 01-839 1696 (24-hour "Ansafone" service) quoting reference S/7991/AM/1.

# Trends in Clinical Pathology

## Essays in Honour of Gordon Signy

This book is no pious collection of personal tributes but a survey of the old and the new disciplines in clinical pathology since the second world war — research in atherosclerosis and ischaemic heart disease, progress in medical virology, microbiology and cytology, the impact of antibiotics on medical bacteriology, chemical pathology and also molecular defence, haematology in mid-century, including haemostasis and blood transfusion. The place of fibrin in the story of hyalin is another modern study, so also is that on automation. The outlook on some members of the family Enterobacteriaceae is changing, and the 'old' forensic medicine is indeed new. And those pathologists working in the under-developed countries are not forgotten. The contributors are internationally renowned.

# Project Leader required by Medical Research Council in KENYA

Applications are invited for the post of Project Leader to the UK Medical Research Council Project, Kisumu, Kenya.

The Project has been established to study the short and long-term effects of large scale irrigation on the pattern of infectious diseases, particularly arbovirus infections and their mosquito and wild vertebrate hosts, on the Kano Plain near Kisumu. Studies of other diseases, infectious and non-infectious, are likely to be attracted to the Project as it develops. It is anticipated that the study, which started in 1971, will take not less than ten years to complete. The Project has a scientific staff of six and an administrative officer and is supported by virology laboratories in Britain.

The Project Leader should be medically qualified and have wide experience of epidemiology (although not necessarily in the arbovirus field) and of administration of a research team. He will co-ordinate field projects within the following broad objectives:—

(1) To follow and evaluate the effects of irrigation on the pattern of infectious diseases and on the significance of population changes in the mosquito and vertebrate hosts of arboviruses.

(2) To devise control measures to minimize health problems following ricefield development. The programme is reviewed annually with the team. The Project Leader plays a major role in formulating future plans and is responsible for local execution of the agreed programme. The study is being carried out with the agreement, collaboration and support of the Kenyan Government.

The post will become available late 1972/early 1973. The period of appointment to the Council's service is open to negotiation but will be for a minimum of five years.

It is expected that the successful applicant will be between 35 and 43 years and the starting salary between £3,742 and £4,633. Overseas and education allowances provided with two free passages a year for children at UK boarding school. F.S.S.U. Rent free furnished accommodation. Further details of conditions of service will be given to candidates at interview.

Psychiatrist. A residence is available at a reasonable rental with some, but  
not all, positions.

## Qualifications:

To be a qualified medical practitioner with degrees registrable in the State  
of Victoria, i.e. to have a degree or diploma conferred by a recognized  
medical school or university in any of the Australian States, the Australian  
Capital Territory, the United Kingdom, the Republic of Ireland, or, New  
Zealand.

To be a member of the Australian and New Zealand College of  
Psychiatrists, or to hold the Diploma of Psychological Medicine, or other  
recognized equivalent postgraduate qualification in psychiatry.

To have had appropriate and adequate training and wide experience in  
general psychiatry.

To have displayed ability to take full clinical responsibility for psychiatric  
patients without supervision, and of advising colleagues, including  
general practitioners, on the management of patients in their care.

To be, in the opinion of the Authority, capable of teaching medical  
undergraduates and graduates, as well as nurses and other auxiliary  
disciplines, and to be willing to teach as a normal part of his duties.

To have made contributions to research and scientific literature, or to  
have had experience in special aspects of psychiatry accepted by the  
Authority as evidence of advanced knowledge of psychological medicine.

## Location:

Vacancies exist at the following locations, although the list is not  
exhaustive. Applications may if desired specify one or other of these  
locations:

# Hazard Ahead...

but with care, one that is readily overcome.

The 'Hazards' facing you and your family are not so easily tackled, but with the same care you can provide for yourself and your dependants with the right type of insurance.

Understandably, you may not know where to start, but the Medical Insurance Agency, with its knowledge of the insurance market and of the needs of the medical and dental professions, will help you to find the policy that is exactly right for you.
