

## Prescribe Penbritin with Confidence for infections in pregnancy

Confidence is born of experience. And experience with Penbritin in the treatment of urinary tract infections has established an outstanding record of effectiveness and penicillin-safety.

In contrast to the trimethoprim-sulphonamide combination products, Penbritin can be prescribed with confidence even when your patient is pregnant.

Psoriasis

After 8 days' treatment with clobetasol propionate

When the next patient presents with a psoriasis or eczema requiring a more effective steroid than has so far been available, take the opportunity to assess the merits of Dermovate yourself.

Dermovate contains clobetasol propionate, a new Glaxo steroid that has been the subject of clinical trials in over 1,100 referred patients with these conditions.

In psoriasis, a notably stringent test of topical steroid efficacy, thorough comparison with the modern steroids suggested Dermovate superior.

Dermovate also proved second to none in various other stubborn, inflammatory dermatoses.

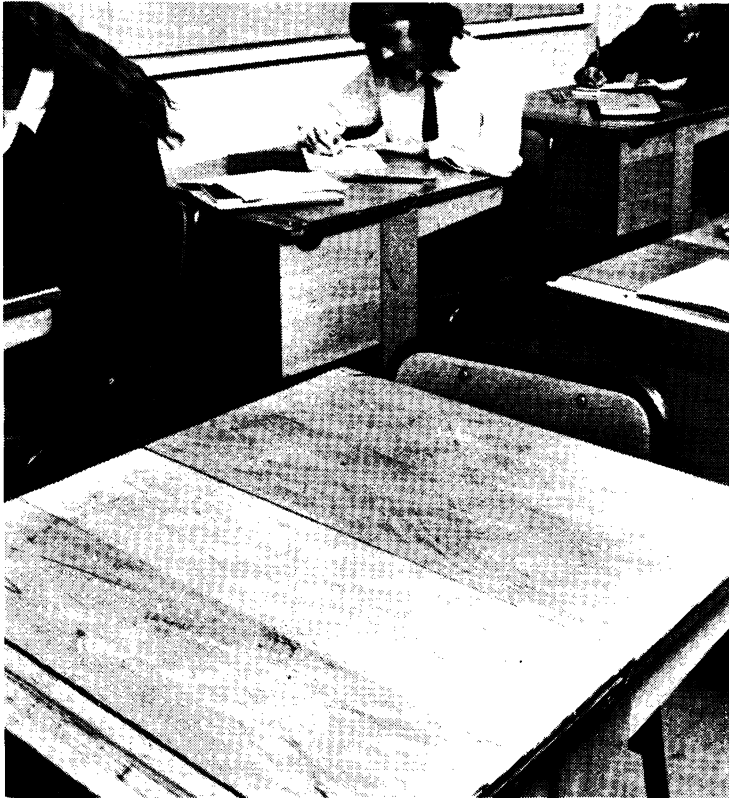

So next time psoriasis or a recalcitrant eczema looks like becoming a clinical problem, why not put Dermovate to the test?

A sample and detailed information are available on request from:  
Medical Department, Glaxo Laboratories Ltd, Greenford, Middlesex

Dermovate (clobetasol propionate 0.05% w/w) is available as cream or ointment in 25 and 100 gram tubes

# Intal doesn't relieve asthmatic attacks

## It prevents them

All too often the asthmatic child loses valuable school time through frequent attacks. Yet—regularly inhaled—INTAL could *prevent* them.

More than 150 clinical trials have proved INTAL to be one of the most effective methods of providing continuous prophylaxis without troublesome side-effects.

Leading authorities are agreed that it is now justifiable for all new asthmatics to be given the benefit of a trial of INTAL—and they may never have attacks again.

Electron micrograph of H. influenzae magnified 11,000 times, after three hours incubation with 'Eskacef'. In vitro study.

1973

**Five species are responsible for most bacterial respiratory infections.  
'Eskacef' is effective against all of them.**

Because more than one of these species may be cultured in respiratory infection, and some may be resistant to penicillin, you need 'Eskacef'.

'Eskacef' is rapidly bactericidal against most common Gram-positive and Gram-negative organisms.

It challenges both pneumococcus and

Haemophilus influenzae, organisms commonly associated with acute exacerbations of chronic bronchitis.

It is so low in toxicity that it can be used in children, may be suitable for long term use, and, with adjustment of dosage to avoid accumulation may be used in renal failure.

'Eskacef' is available in both capsule and suspension presentations. Use it... to be sure.

Each capsule contains cephadrine 250 mg or 500 mg. Each 5 ml of suspension contains 125 mg or 250 mg cephadrine.

# There may be more to his insomnia than sleepless nights

**'Tryptizol' can help to relieve the anxiety-depression that disturbs sleep.**

Insomnia is one of the most frequent presenting symptoms of the anxiety-depressive syndrome. In addition to its antidepressant action, 'Tryptizol' has a rapidly apparent anti-anxiety effect. It can quickly relieve the sleep disturbance associated with depression, usually obviating the need for hypnotics. While the patient is encouraged by this early improvement, 'Tryptizol' can effectively treat other distressing symptoms of the illness, such as agitation, anorexia, lack of interest, and lowered mood.

## Tryptizol<sup>®</sup>

# A good friend in

Cystitis, or indeed any infection of the urinary tract, needs immediate attention. In all cases you can depend on Amoxil for routine treatment. Its broad spectrum activity and high urine concentrations deal decisively with the principal urinary pathogens while its outstanding oral absorption ensures that bactericidal serum levels are available to combat potential ascending infection into renal tissue.

Amoxil can be prescribed with confidence in women of child-bearing age – and especially in pregnancy where choice of treatments is limited. Having the safety of a penicillin, Amoxil is equally suitable for children, the elderly and those patients requiring long-term therapy.

In addition Amoxil has highly acceptable oral presentations, a convenient t.d.s. dosage and is one of the most economic treatments available in this indication.

Amoxil is indeed a good friend in urinary tract infections. To both you and your patients.

Further information on Amoxil (regd) is available from: Bencard, Freepost, Great West Road, Brentford, Middlesex.

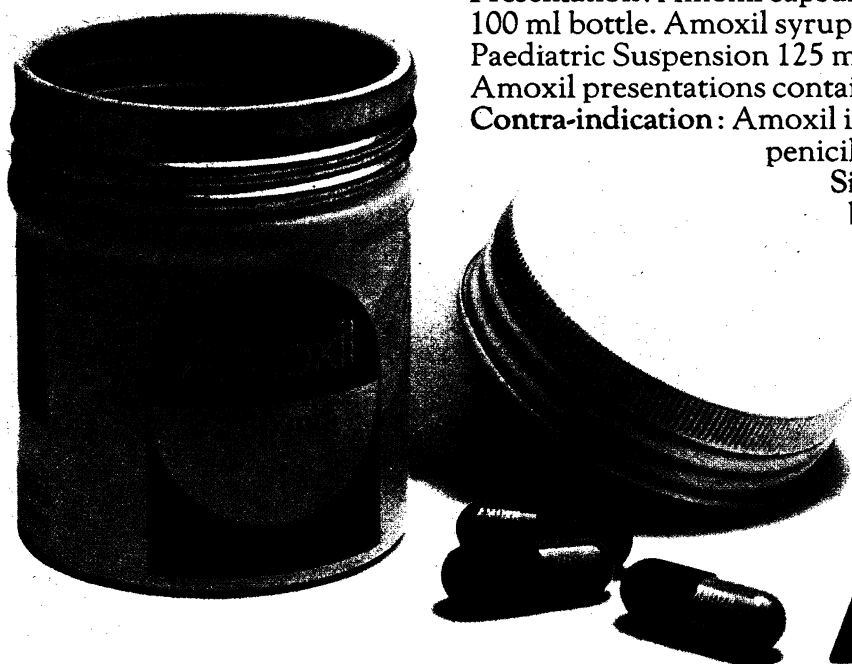

## Prescribing Information.

**Dosage:** Adults 250 mg three times a day. Children – up to 10 years: 125 mg three times a day. In the case of severe infections the dosage should be doubled.

**Presentation:** Amoxil capsules 250 mg. Amoxil syrup 250 mg/5 ml, 100 ml bottle. Amoxil syrup 125 mg/5 ml, 100 ml bottle. Amoxil Paediatric Suspension 125 mg/1.25 ml, 20 ml bottle with pipette. Amoxil presentations contain amoxycillin as the trihydrate.

**Contra-indication:** Amoxil is a penicillin and should not be given to penicillin-hypersensitive patients.

**Side effects:** No serious side effects have been reported in extensive clinical trials. Those side effects which were encountered were mild and of a transitory nature.

## Flora margarine can help prevent heart disease.

In 1973, one in four deaths will be caused by coronary heart disease. Many victims dying before retiring age.

Some premature deaths might be prevented, however, by substituting Flora margarine, the spread highest in polyunsaturated fats, for animal fats in normal diet.

For 50% of Flora's fat content is natural *cis-cis* linoleic essential fatty acid.

And it is widely accepted that substituting polyunsaturated fats for

saturated fats can lower the risk of coronary heart disease.

Because of its cholesterol-reducing properties, Flora margarine is particularly effective as part of the dietary treatment of hyperlipidaemia.

For people at risk from coronary heart disease, indeed for almost anyone, Flora margarine makes very good advice.

## GENERAL PRACTICE TRAINING POSTS

SOUTH EAST KENT  
HOSPITAL MANAGEMENT COMMITTEE

CINQUE PORTS  
VOCATIONAL TRAINING SCHEME  
Applications are invited for the first two trainee posts in the scheme, which is based on the towns of Dover and Deal. Medical institutions include a District General Hospital, a General Practitioner Hospital and a new multi-group Health Centre.

The initial and closing periods of the three-year scheme will be spent in General Practice and there will be four six month Senior House Officer posts in the hospital — in Medicine/Geriatrics, Paediatrics/Dermatology, Obstetrics/Gynaecology, and Psychiatry. The last of these will include a good deal of work within the community.

A day release scheme will operate which will include participation in a continuing course at the Kent Postgraduate Medical Centre at Canterbury. This Centre, and the scheme itself, have close links with the Health Service Research Unit at the University of Kent.

Throughout the three year period each trainee will be in continuous touch with his own General Practitioner. Approval is being sought for the appropriate posts to be recognized for the D.R.C.O.G. and D.C.H. Fluidity within the organisation will allow an alternative post, such as Anaesthesia, and the opportunity to work for the W.A. Trainees will be encouraged to sit for the M.R.C.G.P.

The first posts will begin on 1st July, 1973. Further details of the scheme can be obtained from the Postgraduate Tutor, at Buckland Hospital, Dover. (48811) 22

## VOCATIONAL TRAINING FOR GENERAL PRACTICE CAMBRIDGE SCHEME

# Opportunities for Experienced Doctors with emphasis on Psychiatry

As a Medical Officer in the Prison Medical Service you are responsible for the general medical care of the inmates of the establishment — borstal, prison or remand centre — to which you are attached. Current vacancies are at H.M. Prisons, Stafford, Maidstone and Bristol, and H.M. Borstal, Lowdham Grange.

A good proportion of the work at many establishments lies in making medical and psychiatric assessments for the Department and the Courts, and, at most establishments, assistance is available from psychologists, social workers and pharmacists. You will also be concerned with the general hygiene and dietary requirements of the establishment. Surgical and psycho-therapeutic units employing part-time specialists are established at selected centres and use is made of the facilities available in N.H.S. Hospitals for consultations and special investigations.

These posts provide a unique opportunity to research into mental and physical disorders.

Candidates must be fully registered as medical practitioners in the U.K. and possess good all-round medical and surgical experience. A knowledge of psychological medicine is desirable, and a Dip.P.M. an advantage.

Starting salary within the scale £4,313 — £6,045 (plus £111 environment allowance) according to qualifications and experience. Promotion prospects. Non-contributory pension scheme. Rented accommodation may be available.

For full details and an application form (to be returned by 2nd May, 1973) write to *Civil Service Commission, Alencon Link, Basingstoke, Hants. RG21 1JB, or telephone Basingstoke 29222, Ext. 500 or London 01-839 1992 (24 hour answering service), quoting S(M)/630/1.*

## UPDATE PUBLICATIONS LTD

We are increasing our Medical Editorial staff. What we offer is an exciting opportunity in one of the largest firms of Medical Journal publishers in the United Kingdom. Our publishing interests are growing in the United States and Europe and we are establishing new departments for audio visual material and books. Our Company is deeply involved in many aspects of medical education and publishes journals directed towards family doctors — Update: junior hospital staff — Teach-In: medical educators — Medical Teacher: Dental practitioners — Dental Update: We are a young company with young staff and you will be part of a dynamic team.

We are looking for a youngish man 28-35. He will have obtained Membership and will have considerable hospital experience. He may have done some general practice — at any rate he will be sympathetic to it. He may have had journalistic experience. He will be highly literate and able to write clearly. He will be precise and painstaking, imaginative and a good person to work with. He will have a "feeling" for medical education and will be genuinely interested in making life easier for doctors and students through medical education.

The work will consist of the day to day routine of manuscripts and proofs, and control of editorial standards of accuracy, together with the commissioning of material, the contribution of new ideas, discussions with authors and a general involvement in the editorial direction of the Company's journals.

The rewards, depending on calibre and ability to climb, can be very attractive. The salary is progressive and will start in or near the range of a junior consultant. An annual bonus is paid and there is a non-contributory pension scheme.

Please write with details of career and experience to Dr. A. Marcus, Update Publications Ltd., 33/34 Alfred Place, London WC1E 7DP.

# The Future General Practitioner

## LEARNING AND TEACHING

General or family practice is a special subject. This book is written by six experienced teachers selected by the Council of the Royal College of General Practitioners. It is intended chiefly for teachers, but it will also be valuable to those who are learning and to all who are concerned about the place of family practice within a country's medical services.

A syllabus is developed in five main parts:

**Health and Diseases : Human Development : Human Behaviour : Medicine and Society : The Practice**

Throughout the book the authors have tried to indicate ways in which the teacher may approach the task of passing on what he had learned by his own experience. The theme is the search for objectives which will satisfy the needs of learner and teacher. The belief is that this search will benefit the future family practitioner and through him the community of his patients.

THE ADELAIDE CHILDREN'S HOSPITAL  
North Adelaide, South Australia 5006

### PAEDIATRIC SURGEON

Department of Paediatric Surgery Applications are invited from suitably qualified medical practitioners for the full-time position of paediatric surgeon at the above hospital. The staff establishment in the Department is a Director, two other full-time surgeons, and two visiting surgeons, each of whom give five sessions per week to the hospital. At the present time the position of Director is vacant and one of the two full-time surgeons has recently resigned. Other staff include one senior and one junior registrar who have twelve month appointments and there is another Junior Registrar who is on a rotation scheme from the Royal Adelaide Hospital.

The position entails appointment as Clinical Lecturer in the University of Adelaide and involves undergraduate and postgraduate teaching. The Department has a separate research laboratory staffed by a Research Fellow and two trained technologists. Fields of current research include nutrition in the short gut syndrome, intravenous alimentation, bacteriology of appendicitis, and catecholamine studies in burns.

The Adelaide Children's Hospital is the main paediatric centre in South Australia and is the teaching hospital in paediatrics for the University of Adelaide. There are 400 beds and each year approximately 18,000 in-patients are treated and there are more than 140,000 outpatient attendances.

Salary: Within the range \$13,604- \$15,104. A scheme of limited private practice within the hospital is in operation.

Conditions: Five weeks annual leave, 12 working days sick leave per annum and three months long service leave after 10 years service. Membership of a generous superannuation scheme is available on request.

Applications in writing, giving full personal details and professional qualifications together with the names of two referees should be received by Friday, 25th May, 1973 and should be addressed to: Medical Superintendent, Adelaide Children's Hospital Inc., North Adelaide, South Australia 5006. ## NEW PRODUCT

# MUCODYNE®

## clears mucous congestion

A new oral agent capable of clearing viscous bronchial secretions, reducing hypersecretion and adjusting the chemical balance of mucus, MUCODYNE is a new, physiological approach to the management of mucous congestion.

The illustrations show how MUCODYNE cleared viscous secretions in rats with SO<sub>2</sub> induced bronchitis, and reduced hypersecretion despite continuing exposure to SO<sub>2</sub>. In man MUCODYNE has proved clinically beneficial in trials involving 400 patients with chronic respiratory disease.

MUCODYNE is a flavoured, clear yellow syrup containing 5% w/v of S-carboxymethylcysteine. It is available in bottles of 200 ml.

# IN ASTHMA

## **Becotide INHALER**

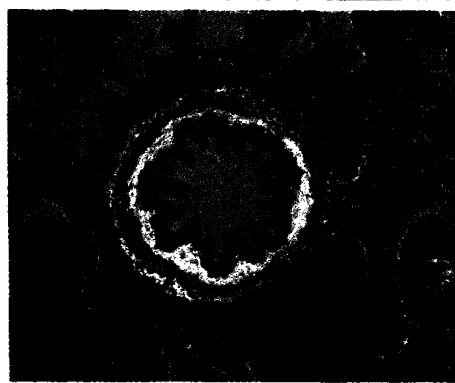

*puts steroid therapy  
in its place*

Becotide Inhaler contains beclomethasone dipropionate BP, a steroid which differs from those previously administered to asthmatics by aerosol in that it is highly active within the lungs in doses which are not systemically active. Used as an aerosol it provides remarkable control of asthma without causing significant systemic effects. This result is attributable to the intrinsic properties of the compound and to its localisation at the intended site of action.

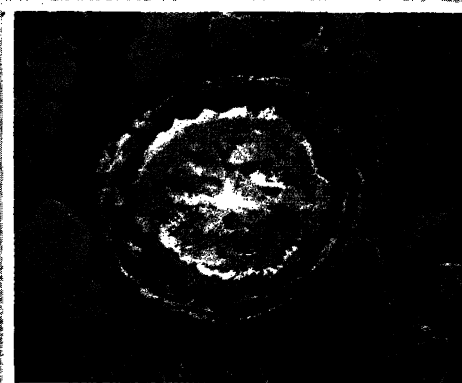

Becotide effectively controls the three pathological processes of asthma — bronchospasm, bronchial mucosal oedema and hypersecretion of mucus.

Cross section of a bronchiole showing BRONCHOSPASM

Cross section of a bronchiole showing BRONCHIAL MUCOSAL OEDEMA

Cross section of a bronchiole showing the effect of HYPERSECRETION OF MUCUS

*"If a drug could be produced that had the anti-asthmatic properties of steroids without their side effects, it would be a breakthrough."*

## SELECTIVE STEROID THERAPY IN ASTHMA

Extensive clinical trials of Becotide Inhaler have shown that it gives effective control of asthmatic symptoms in patients who are no longer obtaining adequate relief from bronchodilators or sodium cromoglycate.

In addition it has been shown that Becotide Inhaler therapy can be used successfully to replace systemic steroids even in asthmatic patients who have become steroid dependent.

In a double-blind controlled trial involving asthmatic patients, Becotide Inhaler provided control which was at least as effective as that obtained from oral prednisolone; the only significant difference was that plasma cortisol levels were not depressed with Becotide Inhaler therapy.

(*Brit. med. J.*, 1972, 3, 314)

### IMPORTANT

*Clinical trials have highlighted the need for particular attention to the selection and clinical management of patients.*

*It is also important that the patient uses Becotide Inhaler correctly and regularly and that it is not confused with bronchodilator aerosols.*

For complete and full prescribing information, including details of clinical management, is available on request.

Becotide Inhaler ensures for your asthmatic patients:

- ☐ Highly effective treatment controlling the three main pathological processes involved in asthma—bronchospasm, oedema of bronchial mucosa, and hypersecretion of mucus.
- ☐ Freedom from steroid side effects including adrenal suppression.
- ☐ A fuller and less restricted life as the advantages of steroid therapy can be introduced at an earlier stage of the disease.

### PRESENTATION

Becotide Inhaler is a metered aerosol which delivers 50 mcg beclomethasone dipropionate BP per inhalation. Each container of Becotide Inhaler provides 200 inhalations.
