Intal doesn't relieve asthmatic attacks

It prevents them

Since more than 2,000,000 working days are lost in this country every year through asthma it makes so much more sense to *prevent* attacks with INTAL. Over 150 clinical trials have shown that regular treatment with this revolutionary drug is not only effective in providing continuous and troublefree prophylaxis but justified because, for many patients, the asthmatic attack could become a thing of the past.

Doctors in the Australian Army get the best of all worlds

A new life in Australia. With first class passage paid for you and your family. A job waiting—and all the advantages of a service practice.

With extraneous administration taken off your hands, you can really do your job properly. You could be in an R.M.O. unit, field ambulance station or military hospital and there are opportunities for updating medical knowledge and techniques. Then there's the sports and social side, too.

The sort of man we're looking for is preferably under 40—with medical qualifications registerable in the Commonwealth of Australia. He's medically fit—prepared to serve anywhere and is a British subject eligible for permanent residence in Australia. If this sounds like you, this is what we'll do for you.

You'll be appointed to a Short Service Commission for 4 years in the Medical Corps of the Australian Army in the minimum rank of Captain, where your salary would amount to £4,773 per annum after the equivalent of 5 years service. (Your professional experience in England serves to ante-date your period of service). Tax and a refunded retirement benefit will be deducted from this—though your clothing and marriage allowances of £51 and £345 per annum are not taxed. You also receive a bounty of about £1,540.

If this sounds like your sort of life, contact: Brig. C. F. Flint, O.B.E., Australian Army Representative, Australia House, Strand, London WC2. Telephone: 01-836 2435. Extn. 356.

THE MEDICAL PRACTITIONER'S YEARBOOK 1973

A new publication which provides an unrivalled source of immediate reference information on all matters relating to the day-to-day work of the medical practitioner.

It may be a sudden emergency never before encountered. An income tax problem. A legal threat. A mortgage.

A new partner. A locum. Precise information on some hospital or clinic. Clear guidance on Government acts relating to doctors.

Details of major reports. Ethics and etiquette. Transplantation. Artificial insemination. Confidential information—when and when not to divulge it.

Whatever the problem, this new Yearbook will help to provide a ready and authoritative solution.

CANCER OF THE UTERINE CERVIX

This book describes the evolution of the comprehensive, coordinated, and multi-disciplinary cancer control programme for cervical cancer in a population approaching five million. This programme, centred at the Christie Hospital, Manchester, England, includes preventive cytological screening, early diagnosis by public and professional education, the treatment of patients with established cervical cancer, rehabilitation, follow-up and statistical evaluation and, finally, terminal care for those requiring it. Each of these aspects of cancer control is discussed in detail.

The aim was to write a balanced book, the emphasis being on the need for a holistic approach to cervical cancer in a large population. The reader will, however, find a full description of the Manchester Radium Technique, the rationale of which is often ill-understood and misquoted. Hitherto unpublished reports on a series of six clinical trials are presented, as well as a report on a study of radio-resistance in cervical cancers. The statistical details of curability will be new to some readers, especially perhaps to gynaecologists.

Terry & McLaren :

PLANNING A DIAGNOSTIC RADIOLOGY DEPARTMENT

This new work attempts to indicate and resolve the problems one should consider before starting to plan an X-ray service for a hospital or clinic, something never done before in any one publication. Throughout the book, the radiology department is treated as part of the hospital as a whole, and one of its unique features is the consideration of the X-ray department as a possible source of hospital infection.

Although considering all contemporary X-ray department designs, emphasis has been given to the concept of the "db" system. These two letters can form the basic design elements for a modern X-ray department. The central area, between the uprights of the two letters, can contain the administration, filing, and reporting activities, with the reception-control area at the top. Round the hemi-circumference of the two letters the X-ray rooms can be sited, surrounding the processing facilities. On either side of the reception office are the main waiting areas.

Many schematic diagrams are included, illustrating such concepts as the so-called sandwich design, and db designs for radiology departments with from 12 to 41 X-ray rooms. Basic considerations and philosophy have been adopted throughout, and this approach has enabled the authors to place the parameters of design upon something more than an arbitrary basis.

Flatulent dyspepsia. And not for the first time.

Or even the second or third. For this patient it is a recurring problem, and one which a wide variety of anti-acids and other medications have so far failed to control.

Maxolon offers a real break in this all too familiar routine. It treats the disturbed motility which is often the underlying cause of flatulent dyspepsia. Maxolon prevents symptoms arising in four out of five patients. In a month, normal motility may be re-established.

Prescribe a month's course of Maxolon for your next regular patient. She'll get *effective* relief, probably for the first time.

Prove Maxolon for yourself. Use Maxolon on your regular flatulent dyspepsia patients. For a 7 day starter pack write to Beecham Research, Freepost, Brentford, Middlesex—post-free in the United Kingdom. *Full information is available on request.*

Renal Biopsy

Second Edition

D. B. BREWER

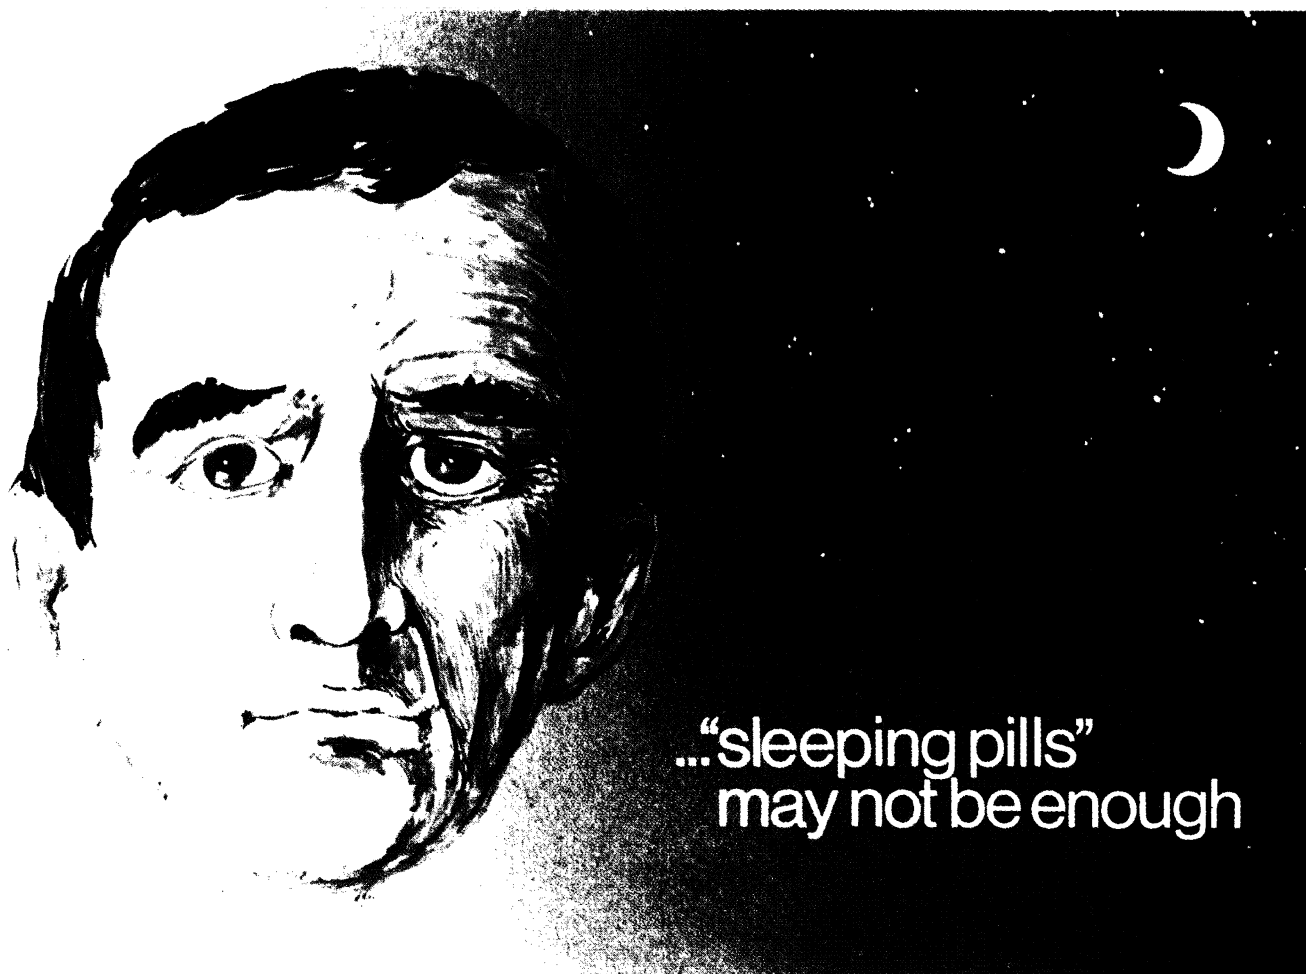

This book is a very fully illustrated account of renal diseases as revealed by a study of renal biopsies. Although the main emphasis is on the structural changes as seen by light microscopy, clinical details and prognosis are extensively discussed and closely related to the structural changes by means of numerous detailed clinical histories. In many cases the progress of the disease is illustrated by successive biopsies sometimes taken over a period of many years. All the material has been collected personally by the author and his clinical colleagues.

‘Surmontil’

provides complete treatment to make sleep easy again

In the many patients whose sleep problem stems from depression, ‘Surmontil’ offers significant advantages over other forms of therapy.

- **Causal as well as symptomatic relief**
Unlike hypnotics, ‘Surmontil’ does more than just rapidly relieve sleeplessness. It gets to the root of the problem by acting on the underlying depression.
- **Preservation of normal sleep patterns**
‘Surmontil’ acts without reducing REM sleep time. Because of this the sleep which it promotes is both sound and natural.
- **Reduced daytime anxiety**
Besides its immediate sleep-inducing and gradual mood-elevating actions ‘Surmontil’ also has a rapid effect on the anxiety which invariably accompanies depression.
- **Conveniently taken in a single nightly dose**
The good tolerance of ‘Surmontil’ means that the total daily requirement for effective relief of depression may be conveniently taken in a single night-time dose.

SOME EXTRACTS	CAVED-S	CARBENOXOLONE
75% or more healing	62%	62%
Healed	45%	41%
Mean reduction in ulcer area	69%	70%
Mean duration of pain	17 days	19 days
Side Effects after "high risk" carbenoxolone patients excluded, e.g. over 75 years and a diastolic B.P. over 90mm Hg. and with cardiac or renal disease.	2 loose bowels	1 Hypokalaemia 2 Hypertension 2 Hypertension plus oedema

No serious side effects observed in Caved-S treated patients in the double blind or open series, which included "high risk" carbenoxolone cases of 11 hypertensive patients, one man with angina pectoris and bundle branch block, and one man of 80 years

with a history of hemiparesis. The safety of CAVED-S was confirmed by the treatment of the elderly patients with cardiovascular and cerebrovascular diseases. The trial established beyond reasonable doubt the healing action of CAVED-S on gastric ulcers.

DUODENAL ULCER PATIENTS

(Unpublished trial on file)

A hospital trial with CAVED-S tablets at increased dosage established recurrent episodes can be prevented. The high dosage was statistically more effective than the lower dosage in preventing relapses.

Patients were followed up for a minimum of one year, and it was concluded that "HIGH DOSES OF (CAVED-S) SHOULD BE GIVEN TO PATIENTS WITH DUODENAL ULCERS BEFORE SURGERY IS ATTEMPTED."

Behind this great product for oedema...

...is a great product for hypertension

'... in the management of hypertension, the major clinical advantage to be obtained from combination thiazide-amiloride therapy (in comparison with thiazide drug alone) is the occurrence of moderate antikaluresis and diuretic-antihypertensive efficiency.'

J. clin. Pharmacol., 1969, 9, 217 (Jul-Aug)

'Moduretic' provides thiazide antihypertensive therapy—alone or as adjunctive therapy—

whilst conserving body potassium. In fact, potassium supplements should not be given concurrently.

'Moduretic' combines amiloride hydrochloride, a potassium-conserving agent, with hydrochlorothiazide, the well established thiazide antihypertensive.

Many physicians are already recognising the advantages of 'Moduretic' in the treatment of thiazide-responsive hypertension.

How much tax relief are you turning down?

If your annual life insurance premiums don't at present add up to one-sixth of your income, you aren't getting as much tax relief as you're entitled to.

Why not take out a Nest Egg Plan for the difference? You will not only get tax relief on every pound you put in, but also a healthy tax-paid gain.

For example, assuming that present rates of interest and tax law continue, a man of 39 earning £7,000 and putting in £30 a month would get back £4,687 in 10 years – tax paid. That's a profit of £1,087 plus £540 tax relief. This could mean a gross return of 14.9% a year over 10 years.

Nest Egg Plans run for 10 years, but cancellation is possible without penalty after the first two years. You can also dip into your Nest Egg if you need cash at any time.

Nest Egg Plans are designed to allow you to use your full quota of tax relief on life insurance to maximum profit and without tying your money up.

It's the only scheme of its kind devised and operated by a clearing bank. Call in at any branch of Williams & Glyn's Bank, or post the coupon for further details.

Up with natural gas!

SIMECO is a new, double-action answer to the common problem of hyperacidity and gas.

SIMECO quickly brings relief of those uncomfortable feelings of 'fullness' and bloating whilst easing indigestion and gastric distress.

Pleasant, smooth, spearmint-flavoured SIMECO* tablets each contain Aluminium hydroxide (present in 750 mg aluminium hydroxide-sucrose stable mixture containing 375 mg $\text{Al}(\text{OH})_3$) and activated polydimethylsiloxane 250 mg. Supplied in boxes of 100 (10 rolls of 10).

Full information is available on request.

COMMERCIAL APPOINTMENTS

Pharmaceuticals Division

Medical Advisers

The work of the Medical Department of I.C.I. Pharmaceuticals Division is expanding vigorously. We are looking for Doctors who enjoy responsibility and would like to work as members of multi-disciplinary teams. The work itself includes assisting in the development of new drugs, especially in the field of cardiovascular medicine; the technical servicing of established drugs; liaison with Research Department and advising the Commercial Departments. One of our main growing points is in business overseas. This involves some foreign travel and the chance to work in collaboration with leading clinicians abroad. No rigid frameworks exist and our doctors are free, within broad limits, to develop the pattern of their work according to their own special interests and abilities.

The Medical Department is located at our Research establishment in rural Cheshire, fourteen miles south of Manchester, an attractive area with excellent housing and education facilities. A competitive salary will be offered, based on qualifications and experience, and there are pension and profit sharing schemes in operation. Assistance towards re-location expenses will be given to married appointees.

Letters may be addressed, in confidence, to:-

**The Medical Director,
Imperial Chemical Industries Limited,
Pharmaceuticals Division,
Alderley House, Alderley Park, Macclesfield,
Cheshire SK10 4TF.**

EASTERN REGIONAL HOSPITAL BOARD Dundee Teaching Hospitals Department of Obstetrics & Gynaecology

REGISTRAR (Ultrasonics Unit)
Applications are invited for a new part-time post of Registrar in Obstetrics and Gynaecology, Dundee Teaching Hospitals, for duties associated with the development of the Ultrasonic Service in the Area. The appointment will be for five notional half-days per week initially and may be extended later to seven or eight notional days per week.
Ultrasonics is a diagnostic and investigatory procedure now being provided in the Maternity Unit of the Dundee Royal Infirmary for use in maternity and gynaecology patients. (General surgical application has also been developed). The development has been the responsibility of a senior physician who will continue to be responsible for training and all developmental work.
The appointee will, after training, be responsible for routine uses of ultrasound in obstetrics and gynaecology and will be expected to take part in and design applications of the technique of ultrasound to research projects within the specialty. It is expected that it might take up to six months' training before the new appointee can take on a substantial part of the routine service. It is hoped that the appointee will continue to develop the service over the years. Further information may be obtained from Professor James Walker, Department of Obstetrics & Gynaecology, 10 Dudhope Terrace, Dundee DD3 6HG.
Application forms may be obtained from the Secretary to the Board, Vernonholme, Riverside Drive, Dundee, and should be lodged not later than 12th May, 1973. (H11649) 75-6

SERVICES

Are you in your Pre-Registration Year —or recently fully registered?

The RAF hospital at Akrotiri, Cyprus. It has 120 beds and can be adapted to accommodate up to 250. Here are a few figures for 1971: outpatients, 19,846; admissions, 4,984; X-Rays, 11,438; path lab tests, 62,432; anaesthetics, 2,193. The hospital has specialist departments of surgery, orthopaedic surgery, medicine, gynaecology and obstetrics, pathology, dentistry, neuropsychiatry, radiology, anaesthetics, otorhinolaryngology and ophthalmology; and, in the tamarisk trees by Dreamers' Bay, perhaps the most beautiful location of any hospital.

Before you commit yourself to your permanent pattern of life, consider what the RAF has to offer

The chance to practise total medical care, as a GP

Your first job would probably be a Junior Medical Officer on a large RAF Station. There would be at least one other doctor. Between you, you would have a 'list' of 2000 to 3000 people—servicemen and their families. You would meet all the usual clinical problems of a GP—and get plenty of experience in paediatrics. As well as this, you would be actively involved in the practice of aviation medicine and gain experience in the preventive, occupational and social fields.

Conditions of work are extremely good. You would have a consulting room in a specially built *Medical Centre*—like a small hospital with its own treatment room, theatre and resuscitation room, and wards for a dozen or so short-stay patients. There is a full secretarial and nursing staff. Your clinical freedom would be absolute.

The chance to specialise, too

Because General Practice is so highly developed in the RAF, this does not mean you have no chance to specialise. The contrary is true. 47% of all RAF doctors are now working in specialist departments. On a 'full career' contract you have every opportunity to reach consultant status in your late or middle thirties; perhaps earlier.

The chance to study for higher qualifications

Any RAF doctor, whether specialist or GP (as long as he is not on the very shortest of contracts) can apply for six months study leave on full salary. On a permanent commission, he may have up to two years' external study leave.

The chance to travel

The RAF operates in many different conditions and climates. Abroad, the RAF doctor looks after RAF personnel and their families and, very often, the local population as well. Your gain in clinical experience would be marked.

The chance of a good social and family life

The RAF is a young community, with a full and active social life. There are facilities for almost every kind of sport and, which is most important, the time to enjoy your family while you are still a young man. Living conditions are excellent. If you are single you live in the Officers' Mess, which has all the amenities of a good hotel. If you are married, you will nearly always have a furnished house that goes with the job; rent for this is very modest; and it can save a large financial outlay at the beginning of your career.

A realistic pay scale

Pay is based on the average earnings of a civilian GP. Immediately after full registration, the present basic salary is £3942; after 5 years it rises to £4767; after 13 years to £5898. There are various other allowances; for instance, with children at boarding school the figures are £363 (net) for one child, £795 (net) for two children, £1314 (net) for three children. There are tax-free gratuities of £1500 after 3 years, or £3000 after 5 years. After service of 16 years or more there is a pension, payable for life, and a generous terminal grant.

For full information please write, giving your age, nationality, and date of full registration, to Group Captain D. G. M. Hills, OBE, MB, BS, DPH, RAF, Ministry of Defence, 1-6 Tavistock Square (724 KJ3), London, WC1H 9NL. Or visit your nearest RAF Careers Information Office.

The Future General Practitioner

Learning and Teaching

General or family practice is a special subject. This book is written by six experienced teachers selected by the Council of the Royal College of General Practitioners. It is intended chiefly for teachers, but it will also be valuable to those who are learning and to all who are concerned about the place of family practice within a country's medical services.

A syllabus is developed in five main parts:

Health and Diseases

Human Development

Human Behaviour

Medicine and Society

The Practice

Throughout the book the authors have tried to indicate ways in which the teacher may approach the task of passing on what he had learned by his own experience. The theme is the search for objectives which will satisfy the needs of learner and teacher. The belief is that this search will benefit the future family practitioner and through him the community of his patients.

ROYAL SOUTH SYDNEY HOSPITAL
Sydney, New South Wales, Australia. 2017

Hospital: The Board of the Royal South Sydney Hospital has accepted a new role to establish a Regional Rehabilitation Service for the Sydney Metropolitan Southern Region.

A modern building is now in the process of construction for this purpose. It will be the first service of its kind, specially designed for the care of injured workers as well as other adult physically handicapped persons.

This hospital is situated in a heavily industrialized area, three miles from the City centre. It is an associated hospital of the University of New South Wales Medical School.

There are 103 beds and out-patient attendances of 78,000 per year; 38 minimum care beds are also planned in the new building. The daily attendance in the Rehabilitation Unit will be 150.

Applications are invited from suitably qualified persons, registrable in New South Wales for the undermentioned positions.

DIRECTOR OF MEDICAL SERVICES

Qualifications: This is a prestige position. The applicant should have a Higher Degree in either Medicine, Surgery or Orthopaedics and hold a recognized Diploma of Physical and Rehabilitation Medicine or other equivalent qualifications.

Experience: The applicant is responsible to the Hospital Board for directing all the services of the hospital and in particular should have had experience in the management of a Rehabilitation Unit and the direction of Paramedical Staff and have achieved senior status in this field. Administrative and teaching duties in the hospital are part of this position as well as the ability to promote rehabilitation services within the medical profession and the community.

Salary: Present salary \$18,260 per annum plus an administrative allowance of \$476.00 per annum, plus private practice in accordance with the determination of the Health Commission of N.S.W.

Commencing date: 1st November, 1973.

Closing date for applications: 30th June, 1973.

DEPUTY DIRECTOR OF MEDICAL SERVICES

The applicant should be able to assist the Director in his work and would be required to direct the inpatients and outpatients services of the Hospital and be responsible to the Director of Medical Services for the integration of the facilities of the general medical service with the whole Rehabilitation concept.

Qualifications: The applicant should have a qualification in Physical and Rehabilitation Medicine and have had experience or hold a qualification in health administration.

Salary: Range \$13,180—\$16,600.

Commencing date: 1st November, 1973.

Closing date for applications: 30th June, 1973.

Application forms and schedule of duties attached to positions are available on request from the Chief Executive Officer, Royal South Sydney Hospital, Joynton Avenue, Zetland, New South Wales, Australia 2017. (H11587) 118

DIAGNOSTIC RADIOLOGIST

Applications are invited from suitably qualified medical practitioners for appointment to the position of Diagnostic Radiologist.

Applicants should have a specialist qualification in diagnostic radiology (e.g. M.R.A.C.R., F.F.R.).

The Sir Charles Gairdner Hospital is a 450 bed general hospital and a teaching hospital associated with the University of Western Australia. The hospital is the nucleus of the Perth Medical Centre which will be developed over the next few years to provide approximately 1,000 patients beds. The Medical School of the University of Western Australia is located on the site.

Duties of the position are of a general nature within the field of Radiology, and the appointee will have the opportunity to practice in all branches of Radiology except Cardiology. A degree of sub-specialisation is acceptable. The appointee will be expected to take his place on the on-call roster, and to take part in undergraduate and registrar teaching. Responsibility will be directly to the Head of the Department.

The position may be filled in either of two ways. Geographically full-time on an 8/10 salary basis plus 15% loading in lieu of superannuation and long service leave. There is a right to private practice within the Hospital. The full-time salary scale within the range of \$A11,380—\$A18,750 in ten increments is payable depending upon qualifications and experience. Alternatively a part-time appointment with a minimum of five sessions again with the right to private practice within the Hospital could be made. Applicants should state which of these two methods of appointment they are interested in. A departmental Trust Fund provides some support for research and postgraduate study.

Further information regarding condition of service, provision of travel expenses and details of the Hospital is available on request from the Head of Department.

Applicants should address to the Administrator, should include full details of marital status, age, particulars of qualifications and experience, the names and addresses of three referees, plus a recent photograph. (23136) 118

Hazard Ahead...

but with care, one that is readily overcome.

The 'Hazards' facing you and your family are not so easily tackled, but with the same care you can provide for yourself and your dependants with the right type of insurance.

Understandably, you may not know where to start, but the Medical Insurance Agency, with its knowledge of the insurance market and of the needs of the medical and dental professions, will help you to find the policy that is exactly right for you.

for effective bronchodilatation without cardiac stimulation

Ventolin is available in a wide range of preparations, all of which contain salbutamol BP. This compound has a highly selective action on bronchial muscle, causing maximal dilatation with low dosage. Therapeutic doses of salbutamol are virtually devoid of effects on heart or blood pressure; this is now so well established that Ventolin is the only adrenergic bronchodilator that is indicated for the treatment of bronchospasm in patients with concomitant heart disease or hypertension.

Ventolin Inhaler for rapid, effective relief of asthmatic attacks.

Ventolin Tablets 2 mg and 4 mg for routine oral bronchodilator therapy.

Ventolin Syrup fruit flavoured for ready acceptability by children.

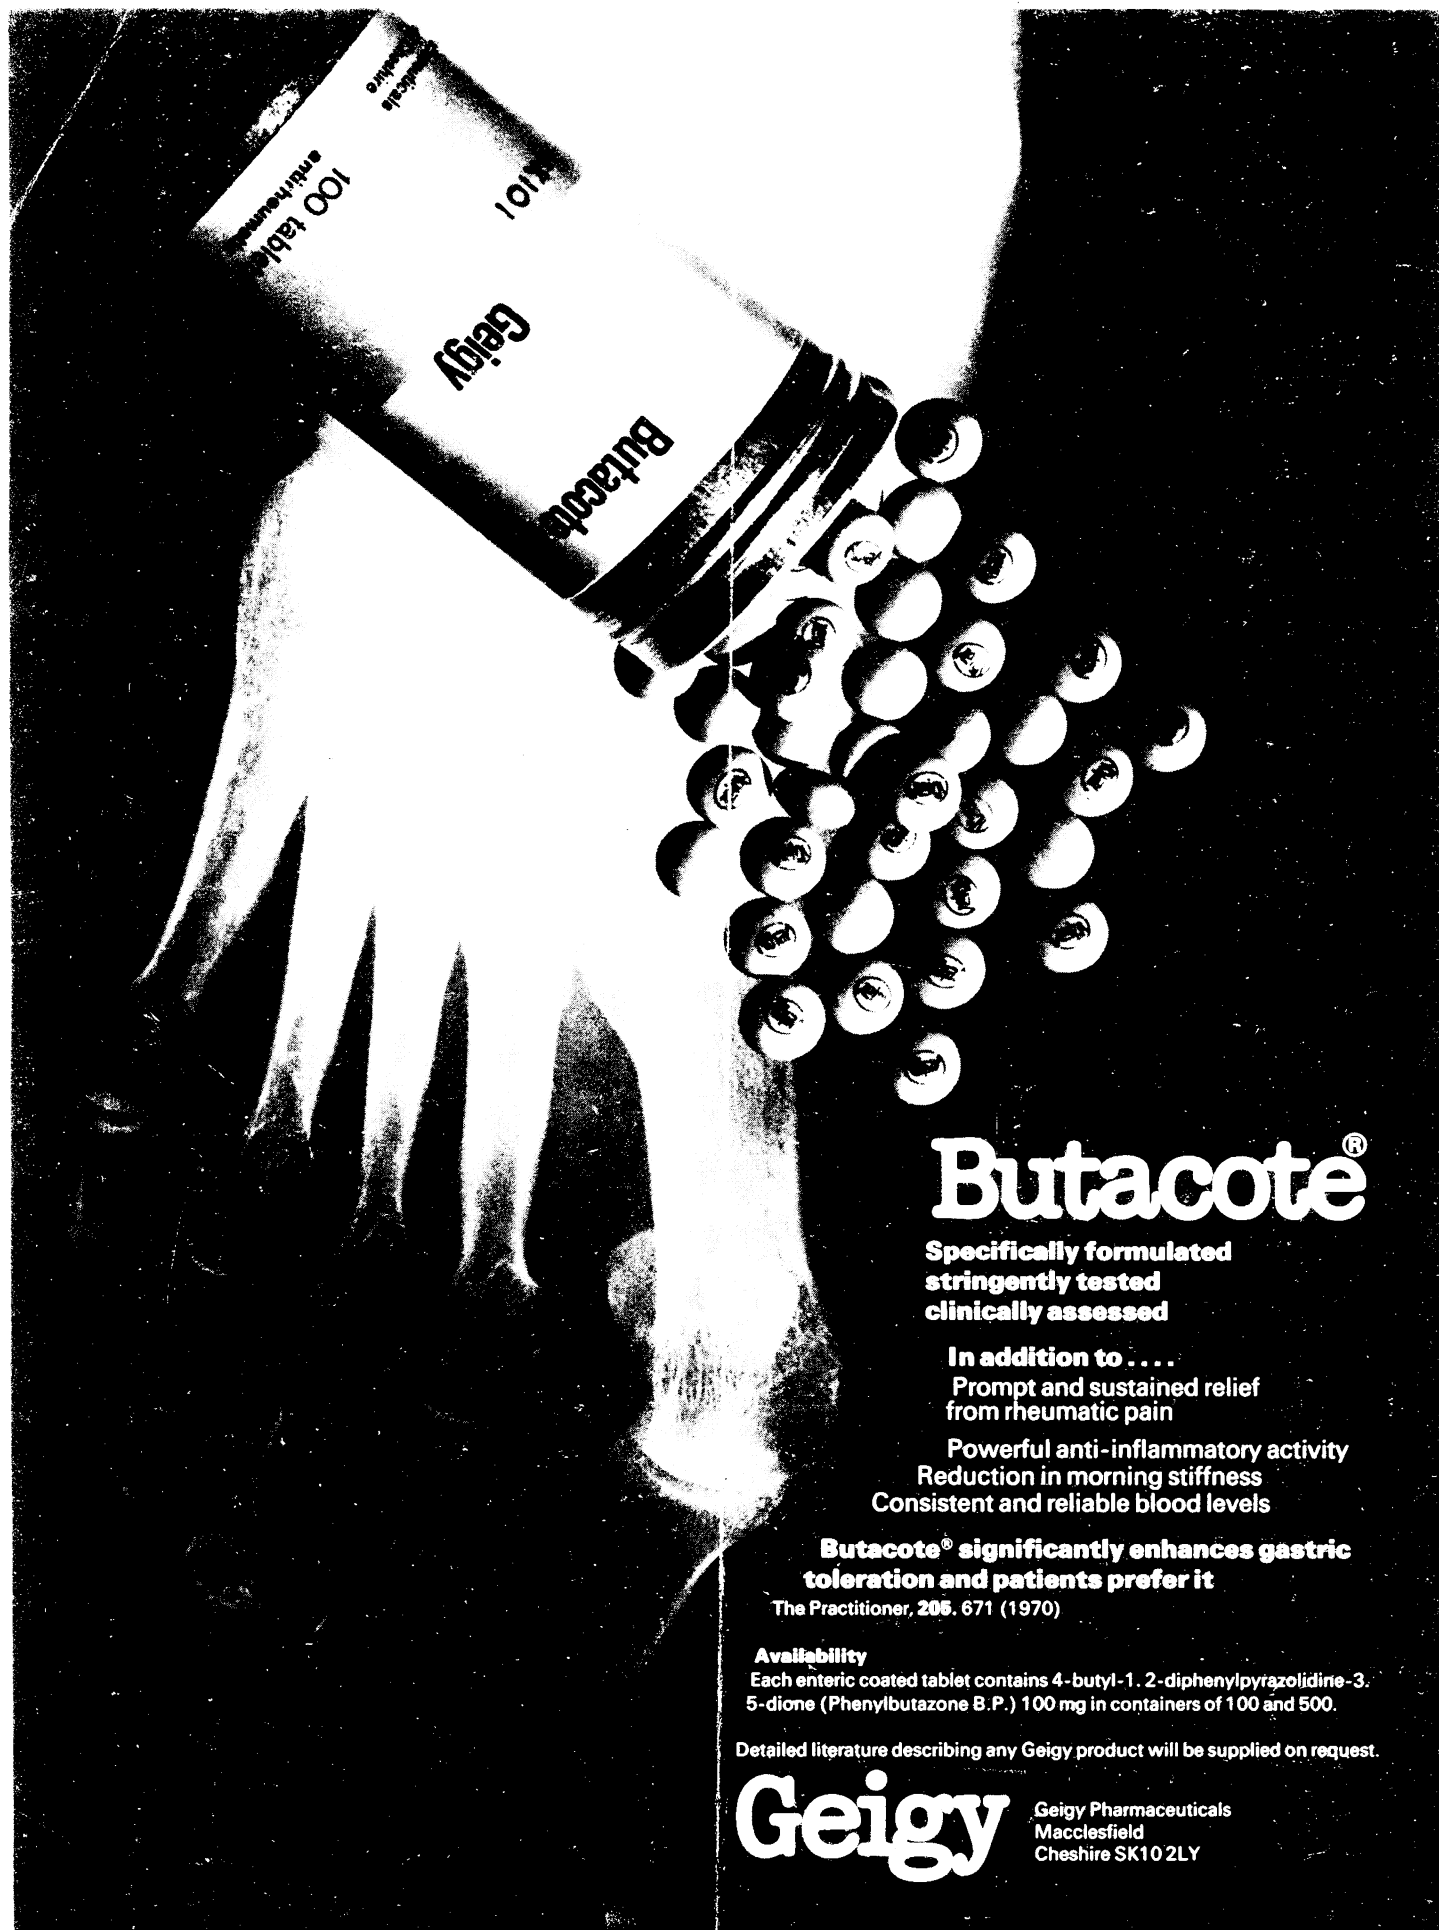

Ventolin Spandets sustained-action tablets, particularly suitable where nocturnal bronchospasm is a problem.

Ventolin sets a higher standard in bronchodilator therapy
