She'd like the answer to a burning problem

And you, doctor, can supply that answer. By prescribing Ceporex.

Ceporex swiftly and reliably puts out the fires of cystitis. Because Ceporex (cephalexin from Glaxo) destroys most of the gram-negative pathogens, particularly *E. coli* and *Klebsiella* spp, responsible for most urinary tract infections.

High urine levels are rapidly

reached by Ceporex, and between 80 and 100% of the dose can be recovered from the urine in 24 hours, most of it in the first six hours. This, coupled with high blood and tissue levels, helps promote swift remission of both symptoms and disease.

That's why Ceporex has achieved a 92% success rate in acute cystitis.*

Behind this great product for oedema...

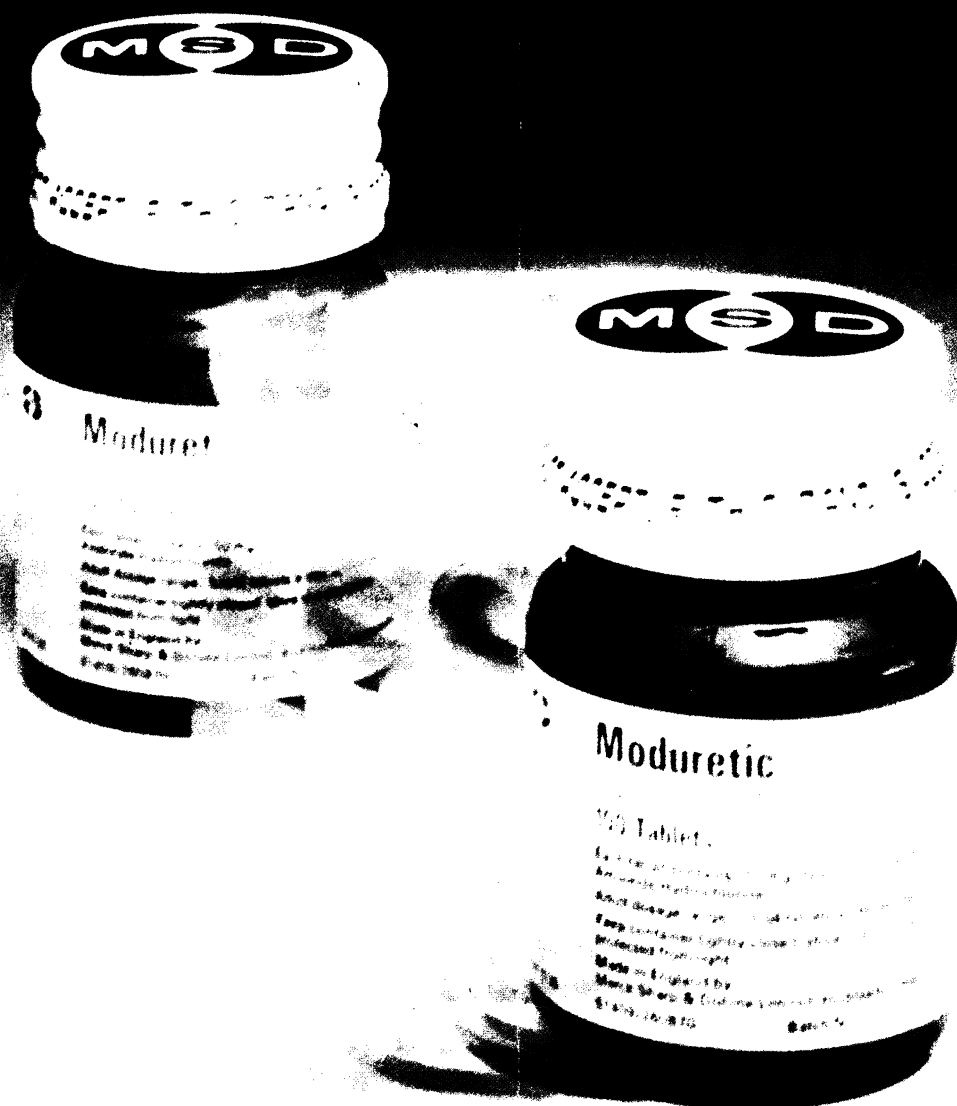

'... in the management of hypertension the major clinical advantage to be obtained from combination thiazide-amiloride therapy (in comparison with thiazide drug alone) is the occurrence of moderate antikaliuresis and diuretic-antihypertensive efficiency.'

J. clin. Pharmacol., 1969, 9, 217 (Jul-Aug)

'Moduretic' provides thiazide antihypertensive therapy – alone or as

...is a great product for hypertension

adjunctive therapy – whilst conserving body potassium. In fact, potassium supplements should not be given concurrently.

'Moduretic' combines amiloride hydrochloride, a potassium-conserving agent, with hydrochlorothiazide, the well established thiazide antihypertensive.

Many physicians are already recognising the advantages of 'Moduretic' in the treatment of thiazide-responsive hypertension.

MODURETIC[®]

Amiloride hydrochloride and hydrochlorothiazide

a highly effective diuretic/antihypertensive that entirely obviates the need for potassium supplements.

'Moduretic' is available as peach-coloured, diamond-shaped tablets containing 5 mg amiloride hydrochloride and 50 mg hydrochlorothiazide. Detailed information is available to physicians on request. ® denotes registered trademark.

GRAY'S ANATOMY

Thirty-Fifth Edition

■ The essential factual content of **GRAY'S ANATOMY** has been maintained and indeed increased in all sections; but the functional and experimental aspects have received much greater emphasis.

■ The references now over 3,000 are not only grouped at the end of the book where they are shown in full detail; but they are also shown concisely as footnotes on the appropriate text pages.

■ 600 specially prepared illustrations have been introduced, and 200 old ones discarded.

■ The new illustrations include about 200 pieces of commissioned artwork and 235 photographs—almost all in colour about 80 electron micrographs and 65 radiographs.

■ The addition of the new illustrations, overall revision, and much new writing, has increased the volume's size by some 30%.

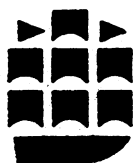

■ **GRAY'S ANATOMY** continues to be a useful book for undergraduates and its use to postgraduates has been increased.

1,488 pages 298 mm x 232 mm new format in double column fully illustrated with line drawings, colour photographs, electron micrographs and radiographs which now number over 1,600.

'Surmontil'

provides complete treatment to make sleep easy again

In the many patients whose sleep problem stems from depression, 'Surmontil' offers significant advantages over other forms of therapy.

- **Causal as well as symptomatic relief**
Unlike hypnotics, 'Surmontil' does more than just rapidly relieve sleeplessness. It gets to the root of the problem by acting on the underlying depression.
- **Preservation of normal sleep patterns**
'Surmontil' acts without reducing REM sleep time. Because of this the sleep which it promotes is both sound and natural.
- **Reduced daytime anxiety**
Besides its immediate sleep-inducing and gradual mood-elevating actions 'Surmontil' also has a rapid effect on the anxiety which invariably accompanies depression.
- **Conveniently taken in a single nightly dose**
The good tolerance of 'Surmontil' means that the total daily requirement for effective relief of depression may be conveniently taken in a single night-time dose.

'Surmontil' helps worried, dejected patients sleep easy again

A good friend in

Cystitis, or indeed any infection of the urinary tract, needs immediate attention. In all cases you can depend on Amoxil for routine treatment. Its broad spectrum activity and high urine concentrations deal decisively with the principal urinary pathogens while its outstanding oral absorption ensures that bactericidal serum levels are available to combat potential ascending infection into renal tissue.

Amoxil can be prescribed with confidence in women of child-bearing age – and especially in pregnancy where choice of treatments is limited. Having the safety of a penicillin, Amoxil is equally suitable for children, the elderly and those patients requiring long-term therapy.

In addition Amoxil has highly acceptable oral presentations, a convenient t.d.s. dosage and is one of the most economic treatments available in this indication.

Amoxil is indeed a good friend in urinary tract infections. To both you and your patients.

Further information on Amoxil (regd) is available from: Bencard, Freepost, Great West Road, Brentford, Middlesex.

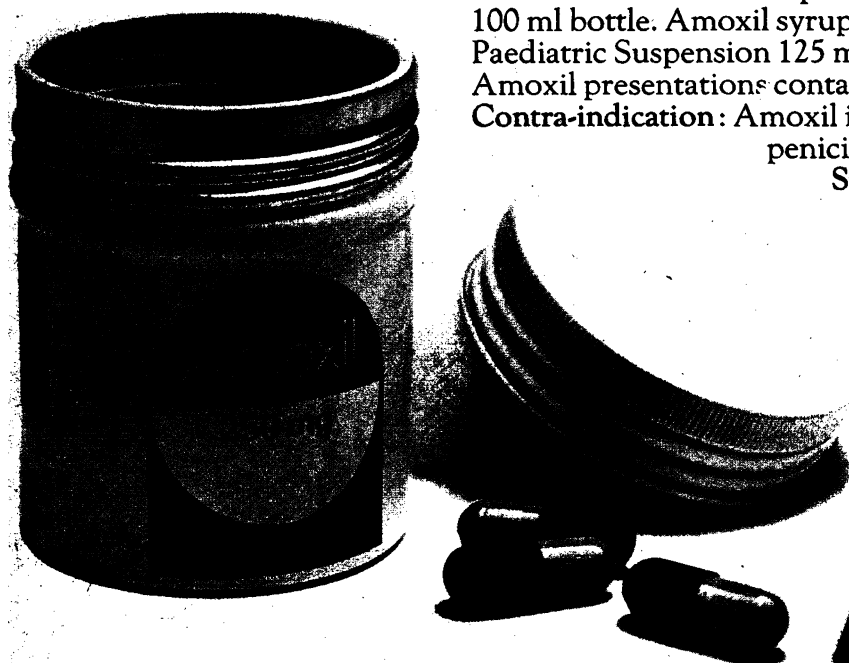

Prescribing Information.

Dosage: Adults 250 mg three times a day. Children – up to 10 years: 125 mg three times a day. In the case of severe infections the dosage should be doubled.

Presentation: Amoxil capsules 250 mg. Amoxil syrup 250 mg/5 ml, 100 ml bottle. Amoxil syrup 125 mg/5 ml, 100 ml bottle. Amoxil Paediatric Suspension 125 mg/1.25 ml, 20 ml bottle with pipette. Amoxil presentations contain amoxycillin as the trihydrate.

Contra-indication: Amoxil is a penicillin and should not be given to penicillin-hypersensitive patients.

Side effects: No serious side effects have been reported in extensive clinical trials. Those side effects which were encountered were mild and of a transitory nature.

What use are computers to hospitals?

If you've ever asked this question and thought the answer was 'none', then why not attend our course and find out what is meant by 'on-line applications', 'time-sharing', 'hardware', 'software' and 'languages' and how they can be of use to you in your hospital work.

The course will teach you computer 'jargon' and help you appreciate the potential and limitations of the smaller computer in biochemistry, pathology, clinical measurement, medical physics, and anaesthetics. This two-day course will be held on Thursday, 28th and Friday, 29th June, 1973 at the Polytechnic of Central London.

Course fee: £15.00.

COMMERCIAL APPOINTMENTS

Head of Clinical Pharmacology

at the May & Baker Research Laboratories

Applications are invited for a senior post in this important aspect of drug development. The responsibilities will include directing and organising clinical pharmacological studies with new compounds emanating from the May & Baker Research Laboratories and collaborative research organisations.

Studies will include the demonstration of pharmacological activity of new compounds in man, drug interaction studies, and studies on the relationship between pharmacological activity and plasma levels. In addition, the successful applicant will be expected to spend an average of one day per week carrying out personal clinical pharmacological work in an academic department of clinical pharmacology.

He should be in his thirties and in addition to appropriate medical qualifications have relevant experience and preferably a Ph.D. degree. He will be expected to work in close collaboration with pre-clinical pharmacologists, biochemists, and medical colleagues supervising therapeutic trials. He will be encouraged to initiate new ideas at both the laboratory and clinical level. This is an important and challenging appointment with considerable potential for the right man.

Salary will be attractive and will be commensurate with D.H.S.S. scales for a consultant if qualifications are appropriate.

Applications will be considered in complete confidence and should be sent to the Personnel Manager, May & Baker Ltd, Dagenham, Essex, RM10 7XS, quoting reference number 51/BMJ/73.

Intal doesn't relieve asthmatic attacks

It prevents them

Steroids, bronchodilators and antihistamines, whether in aerosol or tablet form, are only symptomatic treatments. Whereas INTAL actually *protects* the patient from asthmatic attacks—day in, day out.

By preventing the release of spasmogens INTAL affords daily prophylaxis for as long as any challenge exists. More than 150 clinical trials have proved its effectiveness, safety and ease of administration.

But only an asthmatic can really appreciate the difference it makes.

Additional information is available from
FISONS LIMITED—PHARMACEUTICAL DIVISION
Loughborough, Leicestershire, England.

When did you last use one of these?

Paraffin heated sterilizers are past history in the health service.

In some developing countries paraffin is the only available power source and these sterilizers are urgently needed. The Joint Mission Hospital Equipment Board supplies them.

Many of your colleagues in the emergent nations in mission hospitals and medical relief programmes work in primitive conditions and with outmoded equipment. Will you help them a little by helping the Joint Mission Hospital Equipment Board to supply them with up-to-date equipment very cheaply?

All it needs is a money gift which will be carefully spent.

Please send what you think you can spare to:
Sir John Richardson, B.T., M.V.O., M.D., F.R.C.P.,
Joint Mission Hospital Equipment Board, 5 Robin Hood Lane, Sutton, Surrey.

The Joint Mission Hospital Equipment Board is a registered charity and benefits from income tax rebates on covenanted gifts.

Please write for details of how to take out a personal covenant or banker's order. All gifts will be personally acknowledged. Thank you.

Prothiaden quickly breaks the web of depressive illness

Rarely does one encounter a depressed patient who does not also show definite signs of anxiety. A common problem for the prescriber.

Tranquillizer? Anti-depressant? Or both?

Prothiaden is the anti-depressant that not only treats depression, but also quickly relieves the anxiety so often a feature of depressive illness.

Fast-acting, exceptionally well tolerated, with Prothiaden your depressed patient is soon having a lot more 'good' days than bad ones.

Prothiaden the better anti-depressant

IN ASTHMA

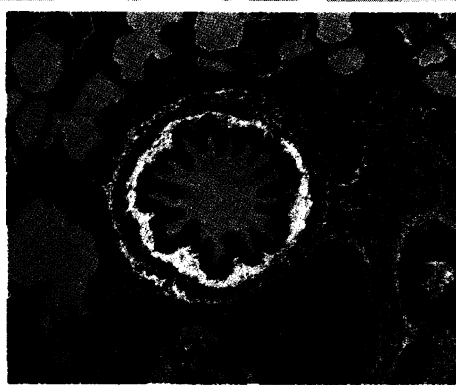

Becotide INHALER *puts steroid therapy in its place*

Becotide Inhaler contains beclomethasone dipropionate BP, a steroid which differs from those previously administered to asthmatics by aerosol in that it is highly active within the lungs in doses which are not systemically active. Used as an aerosol it provides remarkable control of asthma without causing significant systemic effects. This result is attributable to the intrinsic properties of the compound and to its localisation at the intended site of action.

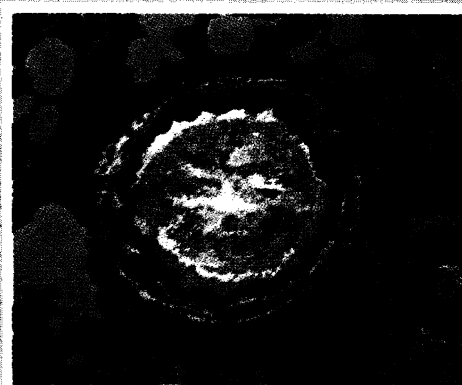

Becotide effectively controls the three pathological processes of asthma — bronchospasm, bronchial mucosal oedema and hypersecretion of mucus.

SELECTIVE STEROID THERAPY IN ASTHMA

Extensive clinical trials of Becotide Inhaler have shown that it gives effective control of asthmatic symptoms in patients who are no longer obtaining adequate relief from bronchodilators or sodium cromoglycate.

In addition it has been shown that Becotide Inhaler therapy can be used successfully to replace systemic steroids even in asthmatic patients who have become steroid dependent.

In a double-blind controlled trial involving asthmatic patients, Becotide Inhaler provided control which was at least as effective as that obtained from oral prednisolone; the only significant difference was that plasma cortisol levels were *not* depressed with Becotide Inhaler therapy.

(*Brit. med. J.*, 1972, 3, 314)

IMPORTANT

Clinical trials have highlighted the need for particular attention to the selection and clinical management of patients.

It is also important that the patient uses Becotide Inhaler correctly and regularly and that it is not confused with bronchodilator aerosols.

For full prescribing information, including details of clinical management, is available on request.

Becotide Inhaler ensures for your asthmatic patients:

- ☐ Highly effective treatment controlling the three main pathological processes involved in asthma—bronchospasm, oedema of bronchial mucosa, and hypersecretion of mucus.
- ☐ Freedom from steroid side effects including adrenal suppression.
- ☐ A fuller and less restricted life as the advantages of steroid therapy can be introduced at an earlier stage of the disease.

PRESENTATION

Becotide Inhaler is a metered aerosol which delivers 50 mcg beclomethasone dipropionate BP per inhalation. Each container of Becotide Inhaler provides 200 inhalations.
