PHENERGAN ELIXIR

In young patients with infections or allergic conditions of the upper respiratory tract - from winter colds to hay-fever - 'Phenergan' Elixir brings rapid relief of uncomfortable symptoms:

dries up secretions

The anticholinergic action of 'Phenergan' Elixir effectively reduces secretion in the swollen upper respiratory passages. This helps end the misery of running eyes and nose and restores the comfort of easy breathing.

reduces irritation

The drying and central sedative actions of "Phenergan", together with the demulcent effect of the elixir, all combine to provide soothing relief of nose and throat irritation.

combats restlessness

By relieving distressing symptoms 'Phenergan'

Elixir does much to ease the irritability of the young patient during the day. And at night its well-known sedative properties are of particular value in ensuring undisturbed sleep - for both child and parents.

'Phenergan' Elixir soon "makes it all better" again

Now, an even more powerful difference.

Even greater engine power. Same unique Citroen comfort.

This is the new Citroen DS23. A car designed, pre-eminently, for the new era of motorways. More motorways opened means greater mileages driven, and a greater-than-ever need for DS comfort, power and safety.

The new 2,347cc DS23 engine combined with the aerodynamic DS shape delivers effortless power, and an Electronic Fuel Injection option is available if you want more power still. With EFI, top speed is 116.8mph and 0-50 takes a brief 7.5 seconds.

You can choose semi-automatic transmission or a 5-speed manual gearbox. The fifth forward gear extracts optimum performance from the new engine as well as giving you quieter, more economical high-speed cruising.

The 5-speed gearbox is also standard on Citroen's

second new DS model for '73, the DSUPER 5-21—introduced to give you all the DS qualities at a surprisingly low price.

The DS differences include the uniquely smooth ride and comfort you get with Hydropneumatic suspension. Front wheel drive. Front wheel discs and self-compensating dual circuit braking system. Extras available as options or standard include power-assisted steering, unique 'swivelling' headlamps, super Pallas finish.

DS prices begin at £1581.67 plus VAT for the D Special, D Estates start at £1945.67 plus VAT. See your Citroen Dealer. A test drive will prove the powerful difference a DS will make to your driving pleasure, safety and comfort.

THE HISTAMINE CHALLENGE:

Can any single antihistamine tablet fight off attacks for 24 hours?

In a study† designed to test the duration of protection afforded by PRO-ACTIDIL*, human volunteers were given intradermal injections of histamine and the areas of flare and weal response were measured.

After the responses had completely disappeared one PRO-ACTIDIL tablet was administered to each volunteer and the histamine challenge was repeated.

By measuring the reduction in areas of flares and weals the protective effect of PRO-ACTIDIL could be plotted for the 24 hours following administration.

After 24 hours the weals still showed a reduction of 65 per cent and the flares a reduction of 83 per cent. The authors concluded that the antihistaminic effect of PRO-ACTIDIL lasts for 24 hours.

Effective anti-inflammatory and analgesic action—without the gastric irritation that so often complicates therapy with aspirin and other anti-arthritic agents. This is the principal advantage that Benoral Suspension now brings to the treatment of acute and chronic arthritic conditions—including osteo-arthritis and rheumatoid arthritis—and many forms of soft-tissue (non-articular) rheumatism.

Moreover, because Benoral has a long duration of effect it allows a simple twice-daily dosage regimen which controls swelling and pain and affords significant relief from night discomfort and early morning stiffness. Can any other anti-arthritic offer so much?

new pack presentation of glyceryl trinitrate tablets BP 500mcg for increased product safety

Recent reports indicate that Glyceryl Trinitrate tablets BP are unstable, especially when in contact with plastic and other organic materials.

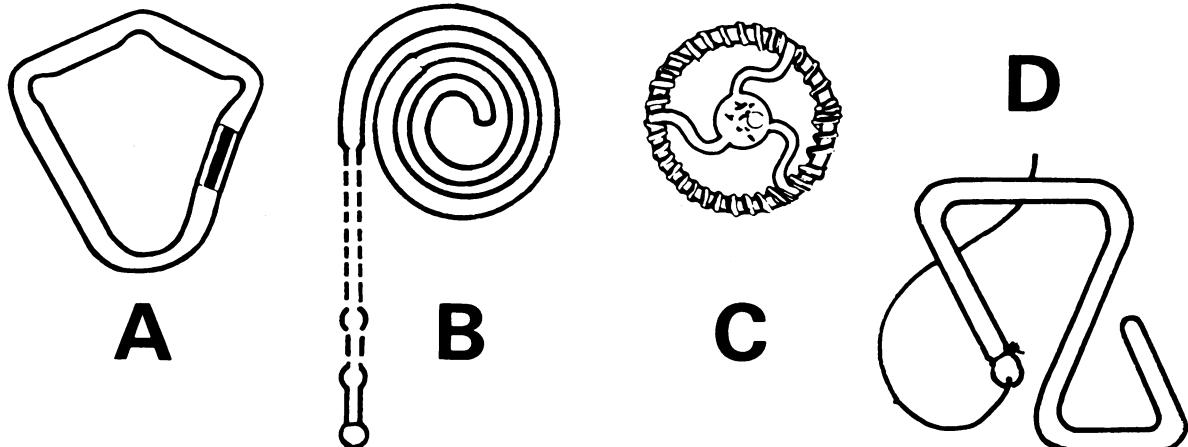

The Pharmaceutical Society has accordingly advised its members to dispense in small amber glass bottles sealed by a stopper with a metal-faced liner, and not to include any organic wadding.

3 dram amber glass bottles of 100 TABLETS BP 500 mcg with metal caps and no organic packing material are now available to the pharmacist, and it would be helpful if prescriptions were issued in multiples of 100 tablets.

Pharmacies have been advised of this availability, are now beginning to stock.

Name these IUCDs

Answers at bottom of page

The drawbacks to the initial and continued acceptance of the IUCD by the patient are only too familiar. They include spotting after insertion, and heavy bleeding and prolongation of the menstrual period, which result in removal in 7-15% of cases^{1,2}. The majority who stay with the coil have periods heavier by as much as half or more³, and the problem of excessive menstrual bleeding may manifest itself *for the first time* a year or so after insertion².

Epsikpron® (aminocaproic acid) provides control of IUCD bleeding. It has been shown, for instance, to reduce the severity of menstrual blood loss in IUCD patients by an average of 52%⁴.

With Epsikpron, more patients accept the IUCD—and more happily.

Surgical hosiery provides venous support, but PAROVEN is a kind of 'physiological elastic stocking' for the capillaries.

"The most obvious effect of treatment with HR (Paroven) is the very constant relief of night cramps, with an improvement exceeding 90 per cent."

Brit J Clin Pract (1970) 23, 161

"The degree of relief in chronic aching pain in the legs was not so marked (compared with 90% improvement in night cramps and 70% improvement in heaviness of the legs), but still amounted to 54 per cent."

Brit J Clin Pract (1970) 23, 161

"Symptoms of heavy legs are improved in 70 per cent, and it was generally agreed that not only did legs feel lighter but the patients were more agile."

Brit J Clin Pract (1970) 23, 161

"The improved venous blood oxygenation and the reduced tissue oxygen extraction indicated better tissue perfusion with less blood oxygen having been taken from the increased capillary blood flow."

Relief of symptoms in varicose disorders

Varicose veins, post-phlebitic syndrome, superficial thrombophlebitis, varicose ulcers, varicose eczema, ankle oedema, restless legs, paraesthesia, haemorrhoids.

Dosage Initial treatment: 4 capsules a day, preferably with meals. In most cases, at least four weeks treatment with PAROVEN is required before significant benefit is felt. At the point where the patient experiences benefit, the dosage may be adjusted to a maintenance level. Maintenance treatment: 1-2 capsules a day.

Side effects and Precautions In a few patients, slight gastro-intestinal disorders, flushes and headaches have been reported. These are usually overcome by taking the capsules with meals or by slight adjustment of dosage. There are no known contraindications to PAROVEN; it is virtually non-toxic and has no teratogenic effects. In keeping with current teaching and practice its use during the first trimester should, however, be avoided.

Availability Capsules, each containing 250 mg of O-(β -hydroxyethyl)-rutosides (not less than 45% troxerutin) in bottles of 20 and 100 capsules.

COMMERCIAL APPOINTMENTS

Medical Research & Communication up to £6500+car

Our client, one of the world's leading ethical pharmaceutical companies, is currently expanding its medical research programme in the UK. The Company has long enjoyed an outstanding reputation for the quality and scale of its research, which has been reflected in the development of a wide range of major therapeutic products and an unusually successful record of medical achievement.

There are currently opportunities for two registered medical practitioners. One—the Clinical Research Physician—will be very largely concerned with clinical evaluation of the Company's potential new medicines and, to a lesser extent, established products. The work entails organising, controlling and reporting on clinical trials designed to investigate, in considerable detail, the therapeutic efficacy and safety for use of the preparations for which he is responsible.

The other—the Medical Adviser—will be much more concerned with maintaining and providing an informed, authoritative and up-to-date medical advisory service. The scope of the work is far-ranging and varied: it covers all medical aspects of the Company's products for which he is responsible, and embraces the whole field of medical communication.

The candidates we seek may currently be:
already in the pharmaceutical industry
or in hospital medicine
or in an academic appointment
or in an efficiently run general practice

Applicants (male or female) should be within the approximate age range 28-35 and possess a broad clinical and therapeutic knowledge, an alert mind, a flair for lucid expression, a positive attitude towards responsibility, challenge and hard work, and a successful career record to date.

The positions carry a starting salary of up to £6000, or £6500 for candidates with previous experience in the pharmaceutical industry or an otherwise exceptionally suitable background. Other benefits include a good Company car, attractive pension and life assurance schemes, 4 weeks holiday per year rising to 5 weeks, and generous financial assistance with relocation.

The successful candidates will be based at the Company's modern headquarters which are located in pleasant countryside within easy reach of London.

INDUSTRIAL APPOINTMENTS (See also Page xxviii)

NATIONAL COAL BOARD
MEDICAL SERVICE

DEPUTY AREA MEDICAL OFFICER

The Board are seeking able young doctors who are interested in making a career in occupational medicine. Candidates should preferably be under thirty-five years of age and have some experience in one or more of the following specialties — chest diseases, casualty surgery, dermatology, community or occupational medicine.

The range of occupational hazards in the coal industry is wide. It is therefore the Board's firm policy progressively to improve the working environment. The doctor's role in this work is a challenging one calling for competence both in clinical and preventive medicine. The Board's Medical Service is closely associated with the Institute of Occupational Medicine in Edinburgh, in the setting up of which the Board played the leading part.

Full training in occupational medicine will be given. In addition to close personal supervision of training within the mining industry programmed to meet individual needs, the Board will arrange for short study periods in other industries totalling one month in each of the first three years. It would be expected that candidates should obtain the Diploma in Industrial Health or some higher qualification in two years from appointment.

There are three vacancies in the Yorkshire, Nottingham/Leicester and Lancashire/Staffs coalfields. The salary on appointment would probably be between £4,000 and £4,500 depending on age and experience, but the range extends up to £5,550. Promotion is based on ability.

Please reply in writing to the Director of Staff Administration, Room 202, Hobart House, Grosvenor Place, London SW1X 7AE.

CONSULTANT PHYSICIAN
IN GENERAL MEDICINE

with an interest in Geriatrics.

Applications are invited for the joint appointment of a consultant physician in general medicine with an interest in geriatrics (whole-time or maximum part-time).

This new post includes four sessions in general medicine and is designed to further the integration of the geriatric and general medical services of the United Cambridge Hospitals.

The geriatric service is at present based at Chesterton Hospital but will move to the new Addenbrooke's Hospital (probably by 1980). The proportion of the geriatric emergencies will, however, be admitted to the new Addenbrooke's Hospital when the medical wards are commissioned later this year. The successful candidate will be expected to take part in the teaching programme of the new Clinical School.

The applicants should have appropriate higher medical qualifications as well as special experience and training in geriatrics.

Applications (twelve copies), including the names of three referees, should be sent to the House Governor, Addenbrooke's Hospital, Hills Road, Cambridge CB2 2QQ, from whom further detailed particulars may be obtained. (Mr. E. Walker, Consultant 45151, Ext. 7514). The closing date for applications is Saturday, 16th June, 1973. (50538) 67-1

Health Education Council
A NEW MEDICAL APPOINTMENT

The Health Education Council is responsible for developing and promoting health education activities in England, Wales and Northern Ireland.

As part of its plans to increase the public's awareness of the role played by health education in promoting community health, the Council now requires a medical practitioner with an interest in this work, and preferably with a public health background. He will join an executive team engaged on specific projects, and his main responsibilities will be to assist the Chief Medical Officer over a wide range of duties including:

- building up a scientific intelligence service
- advising on the medical content of the Council's programmes
- bibliographical research and contact with relevant research institutions
- editing the Council's journal
- maintaining and promoting professional contacts.

The Medical Officer will also be required to undertake a certain amount of lecturing to professional groups on the medical and scientific basis of health education. An additional feature of this appointment is that the successful candidate will deputise for the Chief Medical Officer in the latter's absence.

The starting salary is negotiable within the scale £4,041-£4,557 (Medical Whitley 'C') depending on qualifications and experience. Superannuation under the N.H.S. scheme.

Please write for an application form, quoting reference AM.38, to:

Wembley, Middlesex HA0 1NH.

SERVICES

Are you in your Pre-Registration Year —or recently fully registered?

**Before you commit
yourself to your
permanent pattern
of life, consider what
the RAF has to offer**

The chance to practise total medical care, as a GP

Your first job would probably be a Junior Medical Officer on a large RAF Station. There would be at least one other doctor. Between you, you would have a 'list' of 2000 to 3000 people—servicemen and their families. You would meet all the usual clinical problems of a GP—and get plenty of experience in paediatrics. As well as this, you would be actively involved in the practice of aviation medicine and gain experience in the preventive, occupational and social fields.

Conditions of work are extremely good. You would have a consulting room in a specially built *Medical Centre*—like a small hospital with its own treatment room, theatre and resuscitation room, and wards for a dozen or so short-stay patients. There is a full secretarial and nursing staff. Your clinical freedom would be absolute.

The chance to specialise, too

Because General Practice is so highly developed in the RAF, this does not mean you have no chance to specialise. The contrary is true. 47% of all RAF doctors are now working in specialist departments. On a 'full career' contract you have every opportunity to reach consultant status in your late or middle thirties; perhaps earlier.

The chance to study for higher qualifications

Any RAF doctor, whether specialist or GP (as long as he is not on the very shortest of contracts) can apply for six months study leave on full salary. On a permanent commission, he may have up to two years' external study leave.

The chance to travel

The RAF operates in many different conditions and climates. Abroad, the RAF doctor looks after RAF personnel and their families and, very often, the local population as well. Your gain in clinical experience would be marked.

The chance of a good social and family life

The RAF is a young community, with a full and active social life. There are facilities for almost every kind of sport and, which is most important, the time to enjoy your family while you are still a young man. Living conditions are excellent. If you are single you live in the Officers' Mess, which has all the amenities of a good hotel. If you are married, you will nearly always have a furnished house that goes with the job; rent for this is very modest; and it can save a large financial outlay at the beginning of your career.

Flying. As well as being responsible for the medical care of aircrew, RAF doctors are encouraged to fly and thereby gain first-hand knowledge of the operational environments. Their responsibilities can also include aero-medical evacuation, by the RAF's remarkable long-range airborne ambulance service, using Britannias and VC 10s of Strike Command. In 1971, 2431 patients were flown back to the United Kingdom. Equipment on the aircraft is most elaborate, and can include Radcliffe ventilators, dialysis machines, air-conditioned oxygen cots and a number of items specially designed by RAF consultants. A doctor—say a physician, a surgeon or an anaesthetist—may often be needed as part of the team to 'special' a patient.

A realistic pay scale

Pay is based on the average earnings of a civilian GP. Immediately after full registration, the present basic salary is £3942; after 5 years it rises to £4767; after 13 years to £5898. There are various other allowances; for instance, with children at boarding school the figures are £363 (net) for one child, £795 (net) for two children, £1314 (net) for three children. There are tax-free gratuities of £1500 after 3 years, or £3000 after 5 years. After service of 16 years or more there is a pension, payable for life, and a generous terminal grant.

For full information please write, giving your age, nationality, and date of full registration, to Group Captain D. G. M. Hills, OBE, MB, BS, DPH, RAF, Ministry of Defence, 1-6 Tavistock Square (724 KN3) London, WC1H 9NL. Or visit your nearest RAF Careers Information Office.

postgraduate experience in medical practise following full
registration as a medical practitioner. Serving district medical
officers including permanent officers, are eligible to apply.
Permanent district medical officers, if successful, would carry
with them the guarantees negotiated with the medical
organisations. A medical practitioner (other than a serving district
medical officer), if selected, would be remunerated on a
fee-per-item-of-service basis (details of which will be supplied on
application) but the Health Board will be prepared to guarantee
him a minimum salary of £2,685 for a period up to 12 months. He
would, of course, in addition, be paid all earnings in excess of this
on the fee-per-item-of-service basis.

Dispensary residences are available in the Ballingarry and
Kilcooley areas and in the case of Tullaroan the successful
applicant may live in the West side of Kilkenny and in the case of
Kilcooley the successful candidate may live in the North side of
Kilkenny.

A rural allowance of £500 is payable in respect of Ballingarry and
Kilcooley areas.

Application forms from the Personnel Officer, South-Eastern
Health Board, 11 Patrick Street, Kilkenny. The latest date for
receipt of completed applications is Wednesday, 6th June, 1973.

**Medical
Officers**

Zambia £5,340+ p.a.

You are offered the prospect of a tour of duty — for as little as one year — in Zambia, one which will give you both a wide range of professional experience and early responsibility (all in addition to a wide extension of your personal horizons). It is with the nation's major mining organisation, Nchanga Consolidated Copper Mines Ltd., with an international staff of technical specialists.

The company is responsible for providing full medical care to its employees — over 30,000 — and their families; the total of persons to be looked after is about 150,000.

There is a senior doctor staff of over 40, including a full complement of specialists and 150 fully qualified nurses. The modern facilities include 5 well-equipped hospitals (814 beds), 16 clinics and 8 main first aid dressing stations.

General Duty Medical Officers will be involved in preventive and curative medicine, surgery, anaesthetics, gynaecology/obstetrics, public health and nutrition; and although the mines have a strict safety code an amount of accident work can be expected.

Contracts may be negotiated for periods of one to three years. Locums can also often be arranged.

Salaries will depend on experience, but the minimum is £9060 (£5,345) gross per annum. In addition there is a cash settling-in allowance; subsidised company private primary schools; a detached, furnished house with garden is provided for £1.50 per week; and children receiving secondary education overseas are granted up to £500 per child per year towards school fees and two free return passages to visit their parents during holidays; interest free car loan available.

Exchange Control Regulations allow for the annual externalisation of up to 33½% of gross income.

Intal doesn't relieve asthmatic attacks

It prevents them

Since more than 2,000,000 working days are lost in this country every year through asthma it makes so much more sense to *prevent* attacks with INTAL. Over 150 clinical trials have shown that regular treatment with this revolutionary drug is not only effective in providing continuous and troublefree prophylaxis but justified because, for many patients, the asthmatic attack could become a thing of the past.

Prescribe Penbritin with Confidence for infections in children

Confidence is born of experience. And experience with Penbritin in the treatment of ear, nose and throat infections has established an outstanding record of safety and effectiveness.

Penbritin gives you broader cover than penicillin V—yet retains all the benefits of penicillin safety.

And Penbritin has none of the tooth-staining problems associated with the use of tetracyclines in young children.

IN ASTHMA

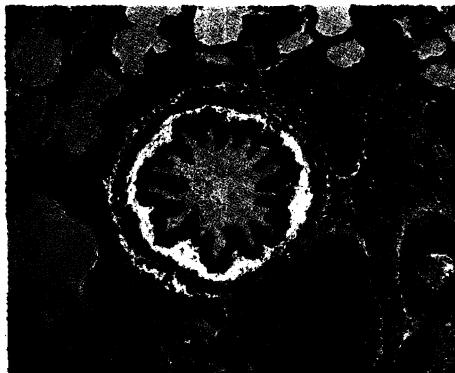

Becotide INHALER *puts steroid therapy in its place*

Becotide Inhaler contains beclomethasone dipropionate BP, a steroid which differs from those previously administered to asthmatics by aerosol in that it is highly active within the lungs in doses which are not systemically active. Used as an aerosol it provides remarkable control of asthma without causing significant systemic effects. This result is attributable to the intrinsic properties of the compound and to its localisation at the intended site of action.

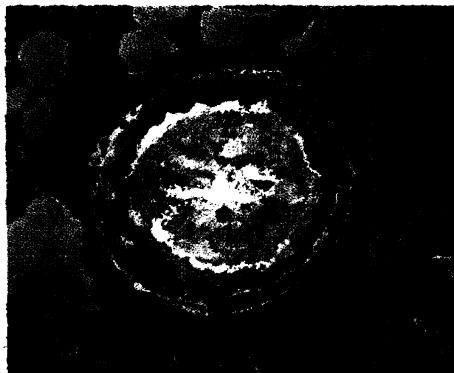

Becotide effectively controls the three pathological processes of asthma — bronchospasm, bronchial mucosal oedema and hypersecretion of mucus.

Cross section of a bronchiole showing BRONCHOSPASM.

Cross section of a bronchiole showing the effect of BRONCHIAL MUCOSAL OEDEMA.

Cross section of a bronchiole showing the effect of HYPERSECRETION OF MUCUS.

SELECTIVE STEROID THERAPY IN ASTHMA

Extensive clinical trials of Becotide Inhaler have shown that it gives effective control of asthmatic symptoms in patients who are no longer obtaining adequate relief from bronchodilators or sodium cromoglycate.

In addition it has been shown that Becotide Inhaler therapy can be used successfully to replace systemic steroids even in asthmatic patients who have become steroid dependent.

In a double-blind controlled trial involving asthmatic patients, Becotide Inhaler provided control which was at least as effective as that obtained from oral prednisolone; the only significant difference was that plasma cortisol levels were *not* depressed with Becotide Inhaler therapy.

(*Brit. med. J.*, 1972, 3, 314)

IMPORTANT

Clinical trials have highlighted the need to pay particular attention to the selection and clinical management of patients.

It is also important that the patient uses the Inhaler correctly and regularly and that it is not confused with bronchodilator aerosols.

A full information leaflet and full prescribing information, which includes details of clinical management, is available on request.

Becotide Inhaler ensures for your asthmatic patients:

- Highly effective treatment controlling the three main pathophysiological processes involved in asthma—bronchospasm, oedema of bronchial mucosa, and hypersecretion of mucus.
- Freedom from steroid side effects including adrenal suppression.
- A fuller and less restricted life as the advantages of steroid therapy can be introduced at an earlier stage of the disease.

PRESENTATION

Becotide Inhaler is a metered aerosol which delivers 50 mcg beclomethasone dipropionate BP per inhalation. Each container of Becotide Inhaler provides 200 inhalations.
