Otitis media isn't child's play

It needs effective treatment –and quickly.

Otherwise chronic otitis media, with deafness and continual discharge, can be the legacy in later life.

Ceporex Syrup containing cephalexin, a broad spectrum antibiotic with a success rate of 94% in acute otitis media,* is the treatment to choose.

Cephalexin destroys most of the organisms which cause otitis media, including *H. influenzae,* the pathogen most commonly encountered in young children.

And children experience the very minimum of distressing side effects with Ceporex Syrup– the safe answer to a troublesome condition.

Ceporex Syrup overcomes otitis media

Intal doesn't relieve asthmatic attacks

It prevents them

Steroids, bronchodilators and antihistamines, whether in aerosol or tablet form, are only symptomatic treatments. Whereas INTAL actually *protects* the patient from asthmatic attacks—day in, day out.

By preventing the release of spasmogens INTAL affords daily prophylaxis for as long as any challenge exists. More than 150 clinical trials have proved its effectiveness, safety and ease of administration.

But only an asthmatic can really appreciate the difference it makes.

When an infection causes concern

Chest infections. Sinusitis, tonsillitis and quinsy. Infected wounds and abscesses. In treating worrying or severe cases you can be more certain of first time success when you prescribe Magnapen.

Magnapen is effective against virtually all bacteria encountered in General Practice. So in severe infections you can rely on Magnapen even when there are no laboratory reports to guide you.

Magnapen's greater certainty means that the patient is more likely to respond quickly. And Magnapen can save you the time which you might otherwise have to spend on repeat visits, second consultations, or night calls to patients who may fail to respond to other antibiotics.

Full information on Magnapen is available on request.

Presenting new *Lergoban* and the ten-hour disappearing trick

What makes *Lergoban* the antihistamine that suits most patients?

Lergoban is highly effective whenever allergic reactions occur. It is equally valuable in skin conditions and in hay fever [1,2,3]

Lergoban reduces the dosage needed to control allergic reactions—two doses can give protection all day and all night.

Lergoban keeps most patients active—clinical trials have shown marked absence of drowsiness or interference with normal activity.

1. *Acta Allergologica* (1971) 26: 454
2. *Ars Medici* (1969) 24: 1069
3. *Svenska Läkartidningen* (1961) 58: 1245

Composition
Each tablet contains 5 mg. diphenylpyraline hydrochloride in a porous plastic matrix.
Indications
Allergic skin conditions and irritation; urticaria, hay fever; allergic rhinitis; allergic conjunctivitis; angioneurotic oedema.
Dosage
Adults: One or two tablets every twelve hours, or as indicated by the physician.
Children: Older children may be given one tablet every twelve hours.
Caution
Like all antihistamines, *Lergoban* may cause drowsiness. If affected, the patient should not drive or operate machinery.
Side-effects
Although side-effects are less likely with this sustained release tablet, slight drowsiness, dizziness, flushing, headache, anorexia or dryness of the mouth may occur.
Contra-indications
Antihistamines should not be given to epileptics.

A doctor without insurance must have nerves of steel.

Just think about the number of times you've seen patients struck down by a serious illness.

Just think about the tragic consequences when they haven't got adequate insurance cover. It's a rather unhappy story.

And as a doctor you're in a better position than most to realise that the chances of this happening are greater than the majority of people think.

So if you haven't adequate insurance yourself, that's something you should be feeling rather nervous about.

Luckily there's a simple answer. A policy with the Medical Sickness Society. The mutual society founded to take care of the insurance needs of doctors and dentists.

The Medical Sickness Society understands the problems of your profession.

It can advise on the type of insurance a doctor needs.

Be it life cover, a pension plan, sickness and accident insurance, an equity-linked savings plan or just plain advice about your insurance problems.

But contact us now.

Effective anti-inflammatory *and* analgesic action—without the gastric irritation that so often complicates therapy with aspirin and other anti-arthritic agents. This is the principal advantage that Benoral Suspension now brings to the treatment of acute and chronic arthritic conditions—including osteo-arthritis and rheumatoid arthritis—and many forms of soft-tissue (non-articular) rheumatism.

Moreover, because Benoral has a long duration of effect it allows a simple twice-daily dosage regimen which controls swelling and pain and affords significant relief from night discomfort and early morning stiffness. Can any other anti-arthritic offer so much ?

How much tax relief are you turning down?

If your annual life insurance premiums don't at present add up to one-sixth of your income, you aren't getting as much tax relief as you're entitled to.

Why not take out a Nest Egg Plan for the difference? You will not only get tax relief on every pound you put in, but also a healthy tax-paid gain.

For example, assuming that present rates of interest and tax law continue, a man of 39 earning £7,000 and putting in £30 a month would get back £4,687 in 10 years – tax paid. That's a profit of £1,087 plus £540 tax relief. This could mean a gross return of 14.9% a year over 10 years.

Nest Egg Plans run for 10 years, but cancellation is possible without penalty after the first two years. You can also dip into your Nest Egg if you need cash at any time.

Nest Egg Plans are designed to allow you to use your full quota of tax relief on life insurance to maximum profit and without tying your money up.

It's the only scheme of its kind devised and operated by a clearing bank. Call in at any branch of Williams & Glyn's Bank, or post the coupon for further details.

Please send me details of your Nest Egg Plan.

ANOTHER BRUFEN BENEFIT

IT REDUCES INFLAMMATION

Brufen has the powerful analgesic and anti-inflammatory properties needed to relieve the pain, stiffness and swelling of arthritis. There is now little doubt that Brufen is the best tolerated of the available antirheumatic drugs.
Experience has shown that at least 7 out of every 10 arthritic patients on Brufen improve as judged by both subjective and objective criteria. It has been well demonstrated that patients prefer Brufen to other drugs.
Given at the recommended dosage, Brufen can do much for those who suffer with arthritis.

PRACTICES (Executive Councils)

EXECUTIVE COUNCIL FOR BUCKINGHAMSHIRE

MILTON KEYNES HEALTH SERVICES LIAISON COMMITTEE

GENERAL MEDICAL SERVICES

WOUGHTON, MILTON KEYNES

Milton Keynes marks a new approach to the planning and provision of health care. From the beginning an integrated service will be provided, based on health centres supported by a district general hospital, of which the first phase (planned to start in 1974) will be a community hospital. It is hoped that general practitioners will be able to act as family doctors and in addition have the opportunity, if they wish, to develop their own particular specialist interests.

A general practitioner is now required to establish the first new practice in the city, in the Woughton area, adjacent to the site of the new district general hospital. A health centre serving an ultimate population of 42,000 is at present being planned and should open in 1974. Temporary facilities will be available in the meantime.

The post presents opportunities for developing general practice along modern lines, and includes a commitment to help with the planning and development of health services in the new city it is also hoped that the general practitioner appointed might assume some teaching responsibilities.

A Type D Initial Practice Allowance, which takes the form of a guarantee that the doctor's income will be made up to an amount agreed with the Executive Council, will be payable, provided that the successful applicant has been qualified for about ten years, of which two have been in hospital appointments, and five in a busy general practice in this country. He should be experienced in maternity work and be acceptable for the obstetric list.

Application forms and further information may be obtained from the **Clerk, Executive Council for Buckinghamshire, Paterson House, Oxford Road, Aylesbury, Bucks. HP19 3EH.**

The closing date for receipt of completed forms is **18th June, 1973.** (H12171) 5

The Future General Practitioner

Learning and Teaching

General or family practice is a special subject. This book is written by six experienced teachers selected by the Council of the Royal College of General Practitioners. It is intended chiefly for teachers, but it will also be valuable to those who are learning and to all who are concerned about the place of family practice within a country's medical services.

A syllabus is developed in five main parts:

Health and Diseases

Human Development

Human Behaviour

Medicine and Society

The Practice

Throughout the book the authors have tried to indicate ways in which the teacher may approach the task of passing on what he had learned by his own experience. The theme is the search for objectives which will satisfy the needs of learner and teacher. The belief is that this search will benefit the future family practitioner and through him the community of his patients.

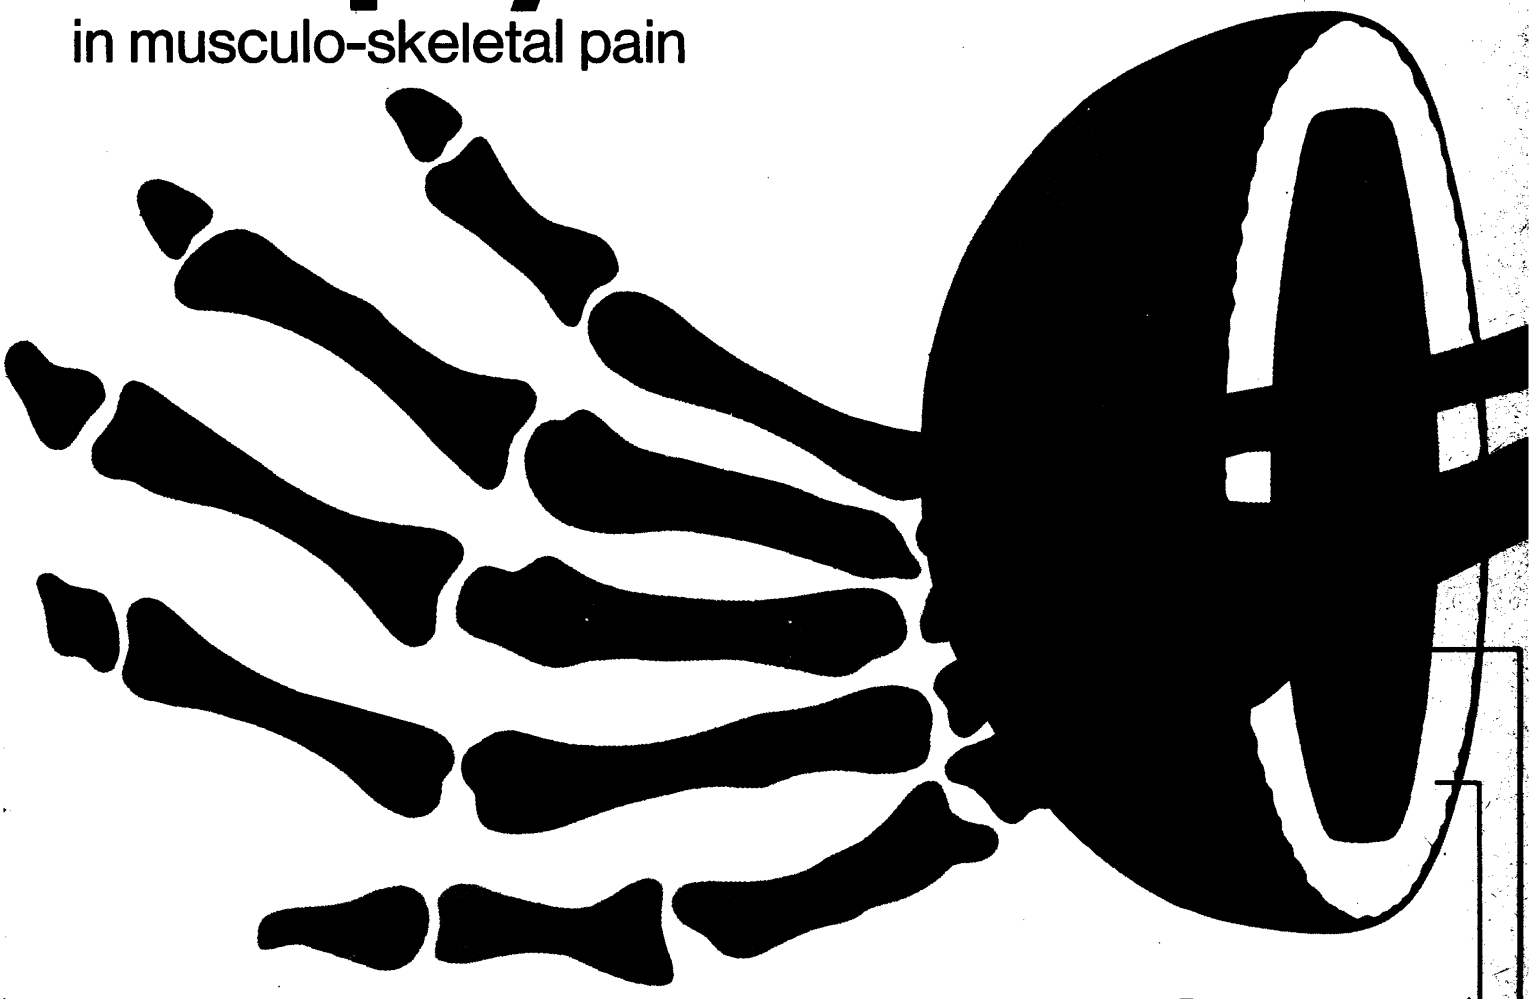
Aspirin as you like it— well tolerated in high doses Safapryn*

in musculo-skeletal pain



In a recent double-blind trial[1] involving 40 patients with arthritic and rheumatoid conditions, treatment with Safapryn resulted in rapid relief of pain, improvement of joint movement, and alleviation of tenderness.

Better tolerated than standard aspirin [2,3]

"...the really important result of the trial [with Safapryn] was its freedom from clinical evidence of gastric irritation and from overt or occult bleeding."[2]

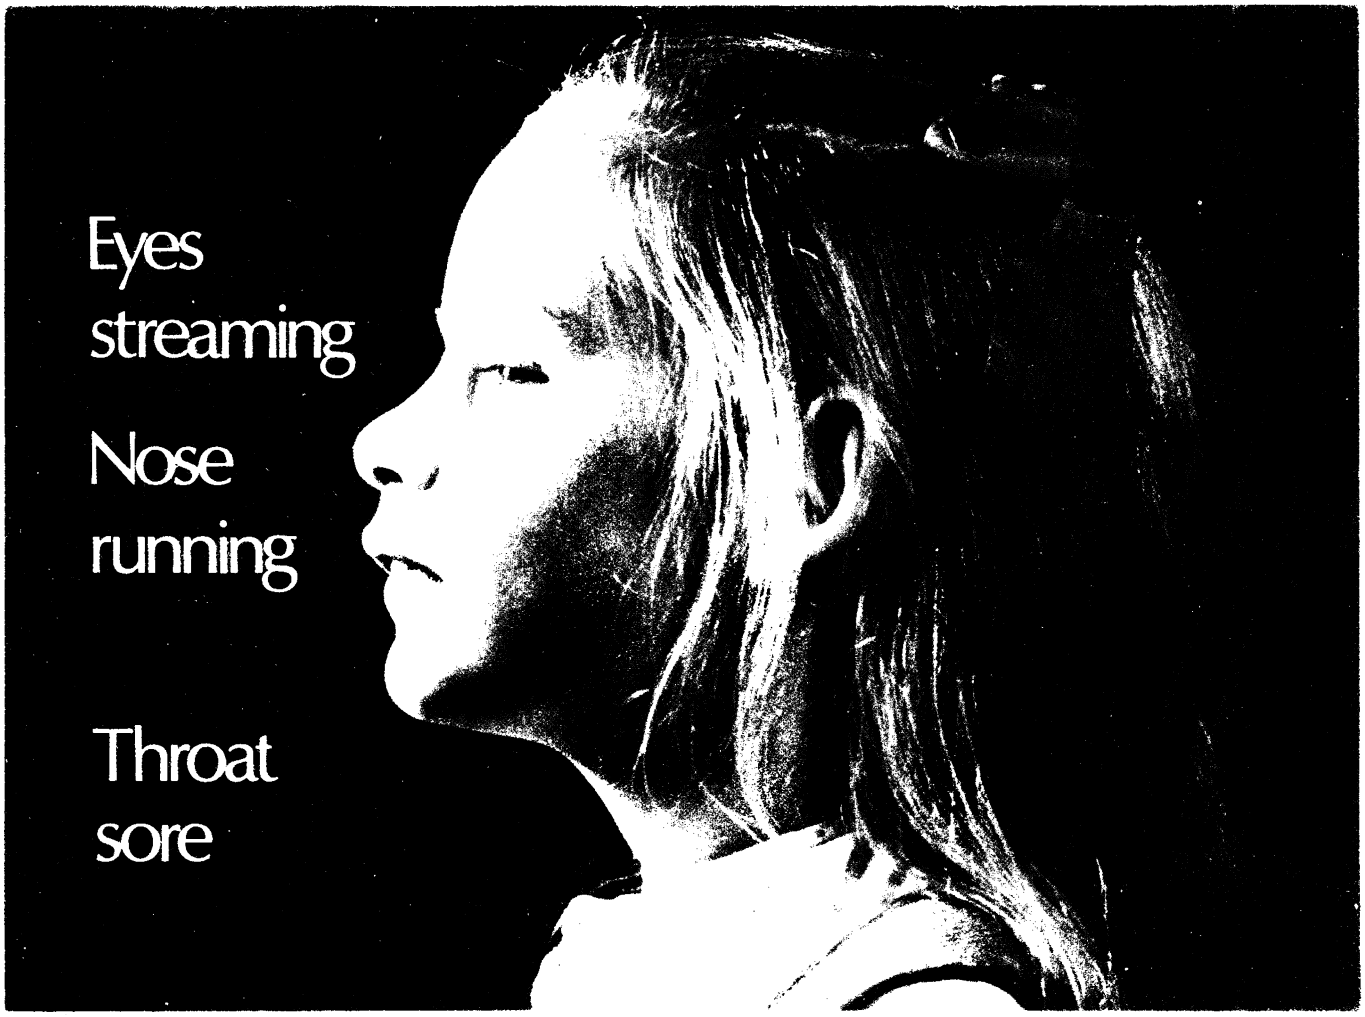
When patients like this, have symptoms like these...



"a teaspoonful or two can work wonders"[1]

there's a lot to be said for

PHENERGAN ELIXIR

In young patients with infections or allergic conditions of the upper respiratory tract – from winter colds to hay-fever – 'Phenergan' Elixir brings rapid relief of uncomfortable symptoms:

dries up secretions
The anticholinergic action of 'Phenergan' Elixir effectively reduces secretion in the swollen upper respiratory passages. This helps end the misery of running eyes and nose and restores the comfort of easy breathing.

reduces irritation
The drying and central sedative actions of "Phenergan', together with the demulcent effect of the elixir, all combine to provide soothing relief of nose and throat irritation.

combats restlessness
By relieving distressing symptoms 'Phenergan' Elixir does much to ease the irritability of the young patient during the day. And at night its well-known sedative properties are of particular value in ensuring undisturbed sleep – for both child and parents.

'Phenergan' Elixir soon "makes it all better" again

VENTOLIN

for effective bronchodilatation without cardiac stimulation

Ventolin is available in a wide range of preparations, all of which contain salbutamol BP. This compound has a highly selective action on bronchial muscle, causing maximal dilatation with low dosage. Therapeutic doses of salbutamol are virtually devoid of effects on heart or blood pressure; this is now so well established that Ventolin is the only adrenergic bronchodilator that is indicated for the treatment of bronchospasm in patients with concomitant heart disease or hypertension.

Ventolin Inhaler for rapid, effective relief of asthmatic attacks.
Ventolin Tablets 2 mg and 4 mg for routine oral bronchodilator therapy.
Ventolin Syrup fruit flavoured for ready acceptability by children.
Ventolin Spandets sustained-action tablets, particularly suitable where nocturnal bronchospasm is a problem.

Ventolin sets a higher standard in bronchodilator therapy

When pollen returns

As surely as birds come back in spring your hay fever patients will be returning to the surgery with streaming eyes and running noses.

Rynacrom offers a completely new means of dealing with the problem.

It doesn't merely provide symptomatic relief from hay fever but actually prevents the release of the spasmogens which trigger off this distressing condition.

Regular insufflation of Rynacrom means permanent protection—and your patients will be able to enjoy life to the full.
