

# When waking hours stretch far into the night...

## **‘Surmontil’**

provides complete treatment to make sleep easy again

In the many patients whose sleep problem stems from depression, ‘Surmontil’ offers significant advantages over other forms of therapy.

- **Causal as well as symptomatic relief**  
Unlike hypnotics, ‘Surmontil’ does more than just rapidly relieve sleeplessness. It gets to the root of the problem by acting on the underlying depression.
- **Preservation of normal sleep patterns**  
‘Surmontil’ acts without reducing REM sleep time. Because of this the sleep which it promotes is both sound and natural.
- **Reduced daytime anxiety**  
Besides its immediate sleep-inducing and gradual mood-elevating actions ‘Surmontil’ also has a rapid effect on the anxiety which invariably accompanies depression.
- **Conveniently taken in a single nightly dose**  
The good tolerance of ‘Surmontil’ means that the total daily requirement for effective relief of depression may be conveniently taken in a single night-time dose.

# Intal doesn't relieve asthmatic attacks

## It prevents them

Since more than 2,000,000 working days are lost in this country every year through asthma it makes so much more sense to *prevent* attacks with INTAL. Over 150 clinical trials have shown that regular treatment with this revolutionary drug is not only effective in providing continuous and troublefree prophylaxis but justified because, for many patients, the asthmatic attack could become a thing of the past.

Sodium Cromoglycate BP

# for effective bronchodilatation without cardiac stimulation

Ventolin is available in a wide range of preparations, all of which contain salbutamol BP. This compound has a highly selective action on bronchial muscle, causing maximal dilatation with low dosage. Therapeutic doses of salbutamol are virtually devoid of effects on heart or blood pressure; this is now so well established that Ventolin is the only adrenergic bronchodilator that is indicated for the treatment of bronchospasm in patients with concomitant heart disease or hypertension.

# 24 hours in the life of an asthmatic treated with Bricanyl Inhaler—the longer-acting bronchodilator

Time is vitally important, particularly to the patient who suffers from Asthma. An attack of Bronchospasm is not only distressing but can be embarrassing on occasions and detrimental to normal everyday activities. The patient treated with Bricanyl Inhaler will enjoy greater confidence because reliability can be placed upon its long duration of action. This will facilitate planning of the days' activities with the knowledge that the risk of an attack is minimal. A simple 4 times daily dosage is the key to this freedom.

## Thirty-fifth Edition

■ The essential factual content of **GRAY'S ANATOMY** has been maintained and indeed increased in all sections; but the functional and experimental aspects have received much greater emphasis.

■ The references now over 3,000 are not only grouped at the end of the book where they are shown in full detail, but they are also shown concisely as footnotes on the appropriate text pages.

■ 600 specially prepared illustrations have been introduced, and 200 old ones discarded.

■ The new illustrations include about 200 pieces of commissioned artwork and 235 photographs—almost all in colour, about 80 electron micrographs and 65 radiographs.

■ The addition of the new illustrations, overall revision, and much new writing, has increased the volume's size by some 30%.

■ **GRAY'S ANATOMY** continues to be a useful book for undergraduates and its use to postgraduates has been increased.

1488 pages 298 mm x 232 mm new format in double column fully illustrated with line drawings, colour photographs, electron micrographs and radiographs which now number over 1,600.

## Flatulent dyspepsia. And the wind of change

A change to Maxolon brings you effective treatment of the *underlying problem* in many cases of dyspepsia—disturbed motility.

For your regular flatulent dyspeptic patients, a change to Maxolon will mean a break in the routine of frequent visits, recurrent symptoms and bulky liquids. Maxolon prevents symptoms in 4 out of 5 patients. In a month, normal motility may be re-established.

Prescribing a month's course of Maxolon will be a change you and your patients will appreciate.

**Prove Maxolon for yourself.** Use Maxolon on your regular flatulent dyspepsia patients. For a 7 day starter pack write to Beecham Research, Freepost, Brentford, Middlesex—post-free in the United Kingdom. *Full information is available on request.*

# Name these IUCDs

Answers at bottom of page

The drawbacks to the initial and continued acceptance of the IUCD by the patient are only too familiar. They include spotting after insertion, and heavy bleeding and prolongation of the menstrual period, which result in removal in 7-15% of cases<sup>1, 2</sup>. The majority who stay with the coil have periods heavier by as much as half or more<sup>3</sup>, and the problem of excessive menstrual bleeding may manifest itself *for the first time* a year or so after insertion<sup>2</sup>.

Epsikapron® (aminocaproic acid) provides control of IUCD bleeding. It has been shown, for instance, to reduce the severity of menstrual blood loss in IUCD patients by an average of 52%<sup>4</sup>.

With Epsikapron, more patients accept the IUCD—and more happily.

Epsikapron, the leading preparation in its field, is a product of pioneer work carried out by Kabi, the fibrinolysis specialists.

P. L. Nos. 0022/5004 and 0022/5005.

**Contraindication:**

Renal insufficiency.

**Side effects:**

Occasional gastrointestinal disturbance or orthostatic reaction when treatment starts.

**Dosage:**

3g of aminocaproic acid (1 sachet of Epsikapron effervescent powder or 10ml syrup) 4-6 times daily during menstruation. To minimise IUCD "spotting", 3g 4 times per day for 7 days following insertion of the coil.

# A good friend in

Cystitis, or indeed any infection of the urinary tract, needs immediate attention. In all cases you can depend on Amoxil for routine treatment. Its broad spectrum activity and high urine concentrations deal decisively with the principal urinary pathogens while its outstanding oral absorption ensures that bactericidal serum levels are available to combat potential ascending infection into renal tissue.

Amoxil can be prescribed with confidence in women of child-bearing age – and especially in pregnancy where choice of treatments is limited. Having the safety of a penicillin, Amoxil is equally suitable for children, the elderly and those patients requiring long-term therapy.

In addition Amoxil has highly acceptable oral presentations, a convenient t.d.s. dosage and is one of the most economic treatments available in this indication.

Amoxil is indeed a good friend in urinary tract infections. To both you and your patients.

Further information on Amoxil (regd) is available from: Bencard, Freepost, Great West Road, Brentford, Middlesex.

## PHENERGAN ELIXIR

In young patients with infections or allergic conditions of the upper respiratory tract – from winter colds to hay-fever – ‘Phenergan’ Elixir brings rapid relief of uncomfortable symptoms:

### **dries up secretions**

The anticholinergic action of ‘Phenergan’ Elixir effectively reduces secretion in the swollen upper respiratory passages. This helps end the misery of running eyes and nose and restores the comfort of easy breathing.

### **reduces irritation**

The drying and central sedative actions of ‘Phenergan’, together with the demulcent effect of the elixir, all combine to provide soothing relief of nose and throat irritation.

### **combats restlessness**

By relieving distressing symptoms ‘Phenergan’

Elixir does much to ease the irritability of the young patient during the day. And at night its well-known sedative properties are of particular value in ensuring undisturbed sleep – for both child and parents.

# Do teen-agers want the facts on menstruation from you?

**Your requests  
for 350,000  
booklets  
indicate they do.**

Ignorance isn't bliss for many young girls when the changes of puberty occur. They want facts – and they're very likely to ask you for them.

To help you give them the facts about menstruation, we provide free booklets and charts. The booklets – one for beginning menstruants and one for older girls – also answer their social questions on menstruation.

The coloured charts, prepared by R. L. Dickinson, M.D., depict the physiology of menstruation. Laminated in plastic for permanence, they are suitable for grease pencil marking and erasure.

Do they help? Your response indicates they do. In five years, we've received over 26,500 requests for the charts – and we've sent you more than 350,000 booklets. Many of these are reorders – a good indication that you and your young patients appreciate them.

Users appreciate the distinctive features of the Tampax tampon, too. Designed for intravaginal use, it is softly compressed for efficient absorption and maximum comfort. It's placed in correct position hygienically by means of a satin-smooth container-applicator, prelubricated to facilitate insertion. It expands in three dimensions for complete protection. Its removal cord is chain stitched, for safety, to the entire length of the tampon. Both tampon and applicator are readily disposable in the toilet.

Because Tampax tampons are worn internally, there's no irritation, no chafing, no embarrassing menstrual odour. And for sports-active girls, particularly swimmers, tampons are a must.

Tampax tampons are available in Regular and Super absorbencies, with explicit directions for insertion and use enclosed in each package.

Please order your charts and booklets by writing to the address below.

### THE UNIVERSITY OF LEEDS

#### POSTGRADUATE DIPLOMA IN HEALTH SERVICES ADMINISTRATION

The Diploma Course, which lasts for one academic year, is an academic course with a vocational orientation. It offers an opportunity to study the fundamental issues in health care in depth, whilst at the same time providing links between theory and practice.

In a period of great change in health and welfare it is desirable to encourage practitioners of all disciplines to re-think their ideas and scrutinise the new developments, within the University setting. To this end the Nuffield Trust has endowed a small number of bursaries of £720 each to be awarded to N.H.S. candidates who have been given leave of absence with pay — which all employing authorities are entitled to give. Applicants should hold a good university degree or high professional qualifications.

Enquiries should be addressed to Mr. M. L. Johnson at the Nuffield Centre for Health Services Studies, Clarendon Road, Leeds LS2 9PL, who will also be glad to provide further information to interested persons. (24625) 4

#### WESTERN REGIONAL COMMITTEE FOR POSTGRADUATE MEDICAL EDUCATION HALF DAY RELEASE COURSE IN OBSTETRICS AND GYNAECOLOGY

A half day release course in Obstetrics and Gynaecology for candidates who are about to sit the M.R.C.O.G. examination will be held in Glasgow hospitals between 11th September, 1973 and 14th May, 1974.

Meetings will be held in six of the city hospitals on alternate Tuesdays from 2 p.m. to 5 p.m. and each meeting will include a case presentation and discussion, which students will be invited to conduct, a ward round and a formal lecture.

The course will be in two parts, September to December and February to May. Candidates sitting the examination in January, 1974 may enrol for Part I only and those sitting in June, 1974 may take either or both parts.

The course fee will be: Full Course £20.00; Part I or Part II only £10.00.

For applicants employed in hospitals in the Western Region, the Regional Hospital Board will pay the course fee direct to the Western Regional Committee in respect of those doctors who are attending with the prior approval of their Head of Department or Unit. Further particulars and application forms may be obtained from the Dean of Postgraduate Medicine, The University of Glasgow, Glasgow G12 8QQ. (24503) 4

## TRAINING IN COMMUNITY MEDICINE INTER-REGIONAL SCHEME

A two year programme of in-post training is planned to begin in September 1973 to assist doctors to prepare for a career in community medicine and for the membership examination of the Faculty of Community Medicine of the Royal College of Physicians. It is being offered jointly by the Universities of Birmingham, Bristol, Exeter, Oxford, Reading, Southampton and the Welsh National School of Medicine in collaboration with health service authorities. Each University will contribute instruction in the subjects of its special experience and interest.

The Universities will provide a coordinated series of nine, two or three week modules of academic tuition, amounting to a total of 20 weeks over a period of two years; studies between modules will be supervised by university staff. During the two years doctors will be expected to gain appropriate in-service experience in training posts in health service authorities. For this purpose training posts will usually be offered in the five Regions with which the universities are associated (Birmingham, Oxford, South-Western, Wales and Wessex) but additional posts may sometimes be available in other Regions. For those entering the course in September 1973 posts are offered by the Birmingham, East Anglian, Oxford, South-Western and Wessex Regional Hospital Boards and by the Welsh Hospital Board. Although Trainees will be in contract with the Hospital Boards, the in-service training experience may be provided at various levels within the health services, including (to 1st April, 1974) local authorities.

The training posts established will be equivalent to registrar in the clinical specialties (salary £2,634 x £162/4) — £3,282; where doctors currently earning higher salaries are appointed it will be at the discretion of Boards to allow protection of salary. Doctors on the course will have their contracts transferred automatically to the appropriate health authority on 1st April, 1974.

Applications are invited from registered Medical Practitioners who have had at least one year's post-registration experience; they should be addressed to the Secretary of the Hospital Board of the Region — which is the applicant's first choice, but should also indicate any other Regions for which he would wish to be considered. Applications should be received not later than 30th June, 1973.

Applicants should send details of age, qualifications and previous experience, a brief statement of future career intentions, and names and addresses of three referees. Further details of the course can be obtained from Professor Thomas McKeown, Department of Social Medicine, The Medical School, University of Birmingham, Birmingham, B15 2TJ.

The addresses of the Boards participating in the scheme are:

## EXECUTIVE COUNCIL FOR BUCKINGHAMSHIRE

### MILTON KEYNES HEALTH SERVICES LIAISON COMMITTEE

#### GENERAL MEDICAL SERVICES

#### WOUGHTON, MILTON KEYNES

Milton Keynes marks a new approach to the planning and provision of health care. From the beginning an integrated service will be provided, based on health centres supported by a district general hospital, of which the first phase (planned to start in 1974) will be a community hospital. It is hoped that general practitioners will be able to act as family doctors and in addition have the opportunity, if they wish, to develop their own particular specialist interests.

A general practitioner is now required to establish the first new practice in the city, in the Woughton area, adjacent to the site of the new district general hospital. A health centre serving an ultimate population of 42,000 is at present being planned and should open in 1974. Temporary facilities will be available in the meantime.

The post presents opportunities for developing general practice along modern lines, and includes a commitment to help with the planning and development of health services in the new city it is also hoped that the general practitioner appointed might assume some teaching responsibilities.

A Type D Initial Practice Allowance, which takes the form of a guarantee that the doctor's income will be made up to an amount agreed with the Executive Council, will be payable, provided that the successful applicant has been qualified for about ten years, of which two have been in hospital appointments, and five in a busy general practice in this country. He should be experienced in maternity work and be acceptable for the obstetric list.

Application forms and further information may be obtained from the Clerk, Executive Council for Buckinghamshire, Paterson House, Oxford Road, Aylesbury, Bucks. HP19 3EH.

The closing date for receipt of completed forms is 18th June, 1973. (H12171) 5

## **Prescribe Penbritin with Confidence for infections in children**

Confidence is born of experience. And experience with Penbritin in the treatment of ear, nose and throat infections has established an outstanding record of safety and effectiveness.

Penbritin gives you broader cover than penicillin V—yet retains all the benefits of penicillin safety.

And Penbritin has none of the tooth-staining problems associated with the use of tetracyclines in young children.

STIFFNESS**

Brufen has the powerful analgesic and anti-inflammatory properties needed to relieve the pain, stiffness and swelling of arthritis. There is now little doubt that Brufen is the best tolerated of the available antirheumatic drugs.

Experience has shown that at least 7 out of every 10 arthritic patients on Brufen improve as judged by both subjective and objective criteria. It has been well demonstrated that patients prefer Brufen to other drugs.

Given at the recommended dosage, Brufen can do much for those who suffer with arthritis.

Brufen is ibuprofen, available as tablets containing 200 mg and as a Suspension containing 100 mg in each 5 ml. Full information from  The Boots Company Ltd., Nottingham.

**BRUFEN**

## Infections in the elderly

# Prescribe Penbritin with Confidence for infections in elderly patients.

Penbritin offers established effectiveness with proven penicillin-safety for the treatment of infections in elderly patients.

In contrast to co-trimoxazole and the tetracyclines, Penbritin can be prescribed with confidence even in cases where your patient may have impaired renal function.

# Andursil<sup>®</sup> and the antacid connoisseur

Whatever walk of life they're from, patients with a recurring dyspepsia problem will probably have at least one thing in common. They will all have developed quite a discerning attitude to the various types of antacid they are prescribed. Andursil is the antacid for the connoisseur — for two reasons.

First, Andursil gives rapid and sustained relief of all symptoms of acid indigestion. Secondly, Andursil has a pleasant buttermint flavour which ensures the long-sufferer's cooperation and thereby his comfort.

The best antacid is often the one the patient prefers.  
Andursil.

A buttermint flavoured suspension containing in each 5 ml.  
Aluminium Hydroxide Gel  $\equiv$  Al<sub>2</sub>O<sub>3</sub> 200 mg. Magnesium Hydroxide 200 mg. Aluminium Hydroxide/Magnesium  
Carbonate Co-Dried Gel 200 mg. Activated Polymethylsiloxane 150 mg.
