Surgical hosiery provides venous support, but PAROVEN is a kind of 'physiological elastic stocking' for the capillaries.

"The most obvious effect of treatment with HR (Paroven) is the very constant relief of night cramps, with an improvement exceeding 90 per cent."
Brit J Clin Pract (1970) *23*, 161

"The degree of relief in chronic aching pain in the legs was not so marked (compared with 90% improvement in night cramps and 70% improvement in heaviness of the legs), but still amounted to 54 per cent."
Brit J Clin Pract (1970) *23*, 161

"Symptoms of heavy legs are improved in 70 per cent, and it was generally agreed that not only did legs feel lighter but the patients were more agile."
Brit J Clin Pract (1970) *23*, 161

"The improved venous blood oxygenation and the reduced tissue oxygen extraction indicated better tissue perfusion with less blood oxygen having been taken from the increased capillary blood flow."
Brit med J (1971) *2*, 138

PAROVEN®

improves capillary flow

Relief of symptoms in varicose disorders

Varicose veins, post-phlebitic syndrome, superficial thrombophlebitis, varicose ulcers, varicose eczema, ankle oedema, restless legs, paraesthesia, haemorrhoids.

Dosage Initial treatment: 4 capsules a day, preferably with meals. In most cases, at least four weeks treatment with PAROVEN is required before significant benefit is felt. At the point where the patient experiences benefit, the dosage may be adjusted to a maintenance level. Maintenance treatment: 1-2 capsules a day.

Side effects and Precautions In a few patients, slight gastro-intestinal disorders, flushes and headaches have been reported. These are usually overcome by taking the capsules with meals or by slight adjustment of dosage. There are no known contra-indications to PAROVEN; it is virtually non-toxic and has no teratogenic effects. In keeping with current teaching and practice its use during the first trimester should, however, be avoided.

Availability Capsules, each containing 250 mg of O—(β-hydroxyethyl)—rutosides (not less than 45% troxerutin) in bottles of 20 and 100 capsules.

Results with Bextasol inhaler in a double-blind, cross-over clinical trial involving children who "... all had fairly severe asthma interfering with their daily lives ... indicate a good clinical response in terms of daily assessment of symptoms, improvement in lung function, and reduction in additional drug usage in all 20 children in the trial."*

Archives of Disease in Childhood*, 1973, **48. 862

Bextasol can establish effective prophylactic control of frequently recurring extrinsic and intrinsic asthma in patients of all ages.

Moreover, many of your patients will enjoy greater, better-sustained breathing capacity than on previous therapy. And it is often the only maintenance therapy they will require.

Bextasol inhaler delivers metered micro-doses of betamethasone valerate, a corticosteroid known for its high [illegible] relatively low

Presentation
Bextasol inhaler is a pressurised aerosol containing a suspension of micronised Betamethasone Valerate BP with propellants. The container supplies 200 metered inhalations, each providing 100 micrograms of betamethasone valerate.

Erythroped is the easy antibiotic. Easy for you to prescribe. Easy for parents to give. Easy for children–and old people–to take.

Erythroped is made in 3 strengths for 3 different age groups–the only children's antibiotic that is. We've increased the three strengths, so now Erythroped is even more effective. Simply prescribe them by name, according to the age of the child, q.i.d.

And the delicious cherry taste of Erythroped will ensure that all the treatment you prescribe gets taken.

You know exactly where you are with Erythroped. It's the antibiotic that makes life easier for everyone.

ADVANCES IN GASTROINTESTINAL ENDOSCOPY

Proceedings of the 2nd World Congress of Gastrointestinal Endoscopy—Rome and Copenhagen. Bound volume of 960 pages, richly illustrated. Lit. 30.000. Editors: G. Marcozzi and M. Crespi.

"This book contains the contributed papers presented at the symposium involving gastrointestinal endoscopy. Part 1, occurring in Rome, contains papers divided into 11 general categories. The 1st section includes contributions involving clinical experiences in endoscopy in relation to the evaluation of endoscopic techniques in comparison with other methods of investigation. The next topic covers limits between the normal and the pathological in endoscopic biopsies, followed by new developments in instrumentation. The next several topics include papers on new methods of investigation with the help of endoscopy, cytology of the digestive system, endoscopy in the diagnosis of hemorrhages, emergencies and sequels to gastric surgery and modern aspects of gastrointestinal endoscopy. The final topics covered in part 1 include the value of endoscopic and related procedures, recent advances in gastrointestinal tract electron microscopy, and new frontiers in endoscopy—the study of the colon and the duodenum. Part 2, occurring in Copenhagen, includes contributed papers under the following 7 topical sections: esophagoscopy, gastrocamera, gastroscopy, gastrobiopsy and cytology, duodenoscopy, colonoscopy and peritoneoscopy. The book will be of interest to physicians and medical researchers involved in the area of gastrointestinal disorders."

SEPTRIN TACTICS

first

SEPTRIN ensures coverage against all likely bacterial pathogens.

fast

SEPTRIN rapidly obtains effective blood, urine and kidney tissue levels with simple twice daily dosage.

decisive

SEPTRIN crushes bacterial resistance with a bactericidal action which differs essentially from that of the antibiotics.

"Clearly superior" to ampicillin.[1]

Rated top oral treatment in major British survey of urinary pathogen sensitivities.[2]

"Of the easily administered primary treatments for urinary tract infection, this combination is probably the best."[3]

"...spironolactone was more effective both as a diuretic and in conserving potassium"

"The effects of amiloride (5mg. daily) (as "Moduretic") and spironolactone (25mg. twice daily) were compared in hypertensive patients with thiazide-induced hypokalaemia. On spironolactone, mean plasma-potassium rose from 3.08 to 3.52 meq. per litre ($P < 0.01$) and the effect was sustained throughout the 6 months of treatment. Mean plasma-potassium rose from 3.01 to 3.46 meq. per litre after 1 month on moduretic but thereafter declined, averaging 3.27 meq. per litre over the 6 months. Although both treatments produced a further reduction in blood-pressure, spironolactone caused a greater fall in mean weight and plasma-sodium. **It is concluded that, in the doses used, spironolactone was more effective both as a diuretic and in conserving potassium."**

There's now considerable evidence to show that Amoxil is more effective than other broad spectrum antibiotics in the treatment of chest infections.[1,2,3,4]

There are some good reasons for this:

Firstly, Amoxil is extremely well absorbed by the oral route,[5] attaining high bactericidal concentrations.

And secondly, the overall absorption is unaffected by the presence of food[5] which means your patient doesn't have to remember to take Amoxil half an hour or whatever before meals.

Couple this with Amoxil's apparently excellent ability to penetrate into bronchial secretions[3,6], and you've probably explained why Amoxil out-performs other broad spectrums.[1,2,3,4]

Are your asthmatic patients still at risk?

Asthma may appear to be a fairly straightforward condition.

With several alternative treatments.

But what are the snags?

Bronchodilator aerosols are normally used only during the attack and may leave the lungs open to damage before they take effect.

Moreover, they don't always work and there is a possibility of misuse and overdosage.

Steroids always present the danger of side effects and should probably be reserved for those patients for whom there is no alternative.

Only Intal prevents the attack and eliminates these problems.

With Intal, there is no danger of side effects, no risk of misuse and no diminution of therapeutic effect.

Put them on Intal.
Give them a fighting chance.

- More comprehensive relief.

Mucodyne creates conditions conducive to the removal of sticky mucus, by acting upon the fibrillar protein-polysaccharide network basic to pathologically viscous mucus. In so doing Mucodyne brings about a reduction in the size and number of mucus producing cells.

- More effective relief.

By restoring more normal conditions, Mucodyne removes sticky mucus without the problem of rebound secretion seen with expectorants.

- More rapid relief

Mucodyne removes sticky mucus fast–response is seen often within 48 hours.*

A MULTI-PURPOSE DIURETIC

'Moduretic' owes its versatility to the complementary actions of its active constituents:

Hydrochlorothiazide—the well-established thiazide diuretic.

Training in Community Medicine

MIDLANDS AND SOUTH WESTERN INTER-REGIONAL SCHEME

A two-year programme of in-post training is planned to begin in September, 1974 to assist doctors to prepare for a career in community medicine and for the Membership examination of the Faculty of Community Medicine of the Royal Colleges of Physicians. It is being offered jointly by the Universities of Birmingham, Bristol, Exeter, Oxford, Reading, Southampton and the Welsh National School of Medicine in collaboration with health service authorities. Each University will contribute instruction in the subjects of special experience and knowledge.

The Universities will provide a co-ordinated series of two-week modules of academic tuition, amounting to a total of 20 weeks over a period of two years; studies between modules will be supervised by university staff. During the two years doctors will be expected to gain appropriate in-service experience in training posts in health service authorities. For this purpose training posts will be offered in the five Regions with which the universities are associated (West Midlands, Oxford, South Western, Wales and Wessex). Although trainees will be in contract with Regional Health Authorities, the in-service training experience may be provided at various levels within the health service.

The training posts established will be equivalent to registrar in the clinical specialties (salary £2,850-£3,531): where doctors currently earning higher salaries are appointed it will be at the discretion of Regional Health Authorities to allow protection of salary.

Applications are invited from registered Medical Practitioners who have had at least one year's post-registration experience; they should be addressed to the **Regional Administrator of the Regional Health Authority** which is the applicant's first choice, but should also indicate any other Regions for which he would wish to be considered. Applications should be received not later than **31st May, 1974.**

Applicants should send brief details of age, qualifications, and previous experience, a brief statement of future career intentions, and names and addresses of three referees.

Further details of the course can be obtained from Professor A. G. W. Whitfield, Director, Board of Graduate Studies, The Medical School, Birmingham B15 2TJ, who is the co-ordinator of the scheme.

GOOD NEWS FOR CHRONIC BRONCHITICS

In April 1973 an article[1] in The Practitioner showed that Bactrim Roche – already an established treatment for acute exacerbations of chronic bronchitis superior to ampicillin,[2] the tetracyclines[3,4] and cephalexin[5] – can also play a valuable role in the long-term management of that condition.

BACTRIM ROCHE

Dr. A retired in 1970

and is now living comfortably in Gloucestershire with his family. With an adequate assured income he is able to indulge his various hobbies and enjoy exploring the surrounding countryside, without financial worry.

He admits that this is entirely due to his foresight when in practice; then he consulted the Medical Insurance Agency about his finances and arranged a suitable pension policy with them.

If your future is not similarly secure, you cannot do better than follow his example.

Free and unbiased advice on how best to protect savings against inflation and provide a capital sum or additional income for retirement is yours without obligation. Let us tell you about the plan most suited to you, personally.
