

New protein is essential for the proliferation of invading bacteria. It consists of a chain of amino acids, linked by peptide bonding, and is formed as the ribosome moves from one triplet codon to the next along the mRNA strand.

Erythrocin 500, by locking positively between the codons within the ribosome, prevents any further

movement, bringing protein synthesis to a standstill.

Erythrocin 500 exerts this dramatic effect on those bacteria responsible for the vast majority of infections of the respiratory tract, ENT, skin and soft tissue. And it does it most decisively with one tablet b.d. — a simple convenience your patient will appreciate.

Cardiovascular Diseases in the Tropics (1974)

The book presents the present state of knowledge regarding many conditions previously thought to be peculiar to the temperate and developed countries and also deals with those disorders peculiar to the tropical situation. It provides an up-to-date review suitable both for clinical and epidemiological work and for further research into these disorders.

Price £4.50 (U.S.A. \$13.50)

A New Look at Infectious Diseases (1974)

Infectious diseases remain as much a medical challenge as ever, and the articles collected in book form under the title *A New Look at Infectious Diseases* covers many aspects of diagnosis and treatment. The widespread use of immunization, with its occasional hazards, the use of newer antibiotics, and increased risk of spread by travel are all dealt with, as well as the problems of diagnosis produced by present day doctors' unfamiliarity with many diseases which were formerly so common and widespread.

Sectral

protects...comprehensively

Sectral for angina alone

'Sectral' protects the heart against effort/emotion-induced sympathetic increases in rate and force of contraction, so preventing excessive rises in myocardial oxygen demand and reducing the frequency and severity of acute anginal episodes.

Sectral for angina with cardiac arrhythmia

Disturbances of heart rhythm may seriously impair prognosis in the angina patient by predisposing to cardiac failure or arrest. 'Sectral' by decreasing the excitability and conductivity of cardiac muscle and prolonging the refractory period, effectively corrects most supra-ventricular and ventricular arrhythmias.

Sectral for angina with asthma or bronchospasm

'Sectral' is cardioselective and does not affect the bronchial smooth muscle. It actively relaxes the coronary arteries, thereby increasing the blood flow to the heart muscle, and does not affect the heart rate.

Sectral for angina with heart failure or post-infarction

'Sectral' does not depress cardiac output and does not cause peripheral vasoconstriction. It is subject to the usual caution, both in the following myocardial infarction and in angina with heart failure, that the condition is controlled by digitalis.

and as a further help to your patients

a specially produced booklet 'Living with Angina' provides the patient with the necessary worded information, reassurance and advice on the condition in terms of day-to-day life.

VIVALAN

IN THE TREATMENT OF DEPRESSION

The unique antidepressant from ICI.

Non-sedative.

'Vivalan' has little or no sedative effect¹. This means that patients remain alert and active and can continue with their normal daily activities.

Rapid acting.

Controlled studies² have demonstrated that patients can show a marked improvement in as little as 3 days from the start of 'Vivalan' therapy.

Widely effective.

'Vivalan' is effective in all types of depression including mixed anxiety - depressive states³.

Clinical trials have shown that as many as 70% of patients respond favourably to 'Vivalan' therapy^{2,4}.

'Vivalan' is chemically unrelated to any antidepressant currently available, and is a product of original ICI research.

Prescribing Information

Presentation

'Vivalan' tablets, each containing viloxazine hydrochloride equivalent to 50 mg of viloxazine, are round, biconvex, yellow, film-coated and imprinted with the name 'Vivalan'.

Use

Antidepressant.

Depression

'Vivalan' is effective in all types and severities of depression, including those cases with a marked anxiety component, and may be used concurrently with ECT. It is able to control all the symptoms of depression. As 'Vivalan' has no sedative properties, patients remain alert during the daytime. 'Vivalan' has no hypnotic effect.

Depression in Epileptics

'Vivalan', unlike the tricyclic antidepressants, has anti-convulsant properties, and is, therefore, of value in the treatment of depression in epileptic patients.

Depression in the Elderly

Because of its lack of sedative and anticholinergic effects, 'Vivalan' is well tolerated in the elderly.

Dosage and Administration

Adults

Most patients respond to between 150–300 mg/day. Therapy may be started with either one tablet three times a day, or two tablets twice a day with meals. The onset of antidepressive effect is usually seen in the first 5–10 days of treatment, and, if no effect has been seen in a fortnight, the dose should be increased. The maximum daily dose should not exceed eight tablets.

Children

Due to absence of clinical experience in children under the age of 14 years, 'Vivalan' is not recommended in such patients.

Contraindications, Warnings, etc.

There are no specific contraindications to the use of 'Vivalan'. Epileptic patients established on phenytoin may become liable to develop phenytoin toxicity if 'Vivalan' is added, and caution is, therefore, advised in their co-administration. Patients being treated with antihypertensive agents such as debrisoquine,

guanethidine and bethanidine may require restabilising when 'Vivalan' is introduced into the therapeutic regimen. No marked interaction with alcohol occurs.

Pregnancy

No adverse effects have been seen in teratogenic studies in animals. There is no clinical experience of using 'Vivalan' in pregnancy. On basic principles, its use in the first trimester is to be avoided.

Side Effects

'Vivalan' is generally well tolerated and side effects are mild and transient. An upper gastrointestinal disturbance with, e.g. nausea, loss of appetite, may be seen, but this usually disappears in a few days. As 'Vivalan' is not a tricyclic antidepressant, it does not produce the anticholinergic, sedative and hypnotic side effects of those drugs, neither does it produce excessive weight gain. 'Vivalan' is not a monoamine oxidase inhibitor and dietary restrictions are not required.

Overdosage

Overdosage should be treated on general principles; there is no specific antidote. An unsuccessful suicidal attempt with 5g viloxazine together with a quantity of oxazepam and trimeprazine produced 24 hour coma. Cardiovascular system and respiration were unaffected. Treatment-lavage.

"I Bring
Peace"-73

"It is concluded that maintenance treatment of ulcerative colitis with sulphasalazine (salazopyrin) should be continued indefinitely unless contraindicated by side effects".¹

The results of the above controlled trial carried out at the Nuffield Department of Clinical Medicine, Radcliffe Infirmary, Oxford are all the more welcome as earlier trials of cortisone² and prednisone³ at standard dosages have shown them to be ineffective in reducing the number of recurrences of ulcerative colitis.

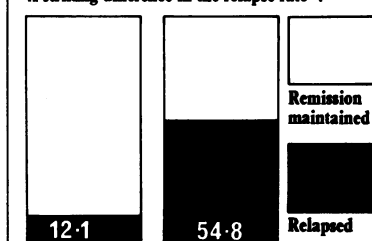

"Fortunately, Sulphasalazine tablets, 0.5 grams 4 times a day will prevent relapses in the majority of patients

with colitis, and only a few patients cannot tolerate this relatively small dose, which can be continued indefinitely since we do not know when, if ever, it can be safely stopped".⁴

Salazopyrin (sulphasalazine) is available as the plain 0.5g. tablet, 0.5g. EN-tab and as an 0.5g. suppository. Literature and detailed information on Salazopyrin are available on request.

Salazopyrin is a registered trade mark.

"A striking difference in the relapse rate".

"The patients who received dummy tablets had more than four times the relapse rate of those receiving sulphasalazine".¹ (Salazopyrin).

Both groups of patients had been satisfactorily maintained for 1-5 years on Salazopyrin prior to the study, in which they took Salazopyrin or placebo for 6 months.

Listen to the difference between Amoxil and other

The difference which has given significantly longer periods of relief from acute exacerbations of chronic bronchitis than tetracyclines, ampicillin and cephalosporin.¹

The difference that makes Amoxil more effective than ampicillin in the treatment of chest infections.^{1,2,3,4}

The difference which takes over where the tetracyclines have done all you can

expect of them in bronchitis—

so that significantly greater relief of all clinical symptoms can be demonstrated.⁵

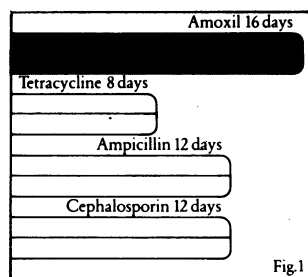

The difference that allows Amoxil to penetrate bronchial membrane barriers regardless of the degree of inflammation.⁴

The difference in absorption that means Amoxil can be taken t.d.s. with or without food—which means it is simpler for patients to take properly. To these differences must be added Amoxil's safety and the fact that it is one of the least expensive therapies for respiratory infections. No wonder doctors everywhere are recognising that Amoxil makes all the difference.

er antibiotics

6 In the cases of our severely sick in-patients, which of course cannot be compared with milder cases of out-patient practice, we found with amoxycillin [Amoxil] a clearly longer relapse rate than with other preparations.¹⁹ (These included various tetracyclines, ampicillin, chloramphenicol and cephalosporin).

6 Amoxycillin [Amoxil] was more effective than oxytetracycline when all the patients treated were considered together. Its superiority, however, was most marked in the case of the less severely affected patients, in whom the differences were highly significant.⁵⁹

6 The demonstration that amoxycillin [Amoxil] penetrates into bronchial secretions as efficiently when the mucosa is uninflamed as when it is inflamed, suggests that clearance of bacteria from the lower respiratory tract should be more easily accomplished with this drug than ampicillin. Further, there is the implication that organisms may be more readily cleared from the upper respiratory tract, which frequently acts as a reservoir of potential pathogens from which relapse of lower respiratory infection may stem.⁴⁹

Amoxil

Makes all the difference in respiratory infections.

ADDED YEARS

All doctors have been circularised regarding the possibility of supplementing their pension by the purchase of added years under the N.H.S. Superannuation Scheme. This operation enables a participant to increase the number of years on which the pension and other benefits are calculated, to the maximum of 40 years, if this is not attained during the course of his/her normal service. Payment for these added years may be by means of a lump sum or, in suitable circumstances, by instalments.

It is important, when considering this matter, that it is not contemplated in isolation, but is looked at in the framework of one's family finances generally, the relative ages and states of health of husband and wife and other factors.

There is no doubt that advice should be sought on this subject and it is vital that the person offering advice is cognisant not only of the various alternatives available but has a good working knowledge of the Superannuation Scheme as well.

The Medical Insurance Agency will in this — as in all matters — give an unbiased opinion and advise on alternatives available, if they should be more attractive, or will recommend purchase of added years where they provide the best answer.

You will incur no obligation by asking for our advice.

The Medical Insurance Agency was established over 60 years ago to act as independent Insurance Brokers to the Medical and Dental professions.

Through our dealings with thousands of your colleagues, we are constantly studying your problems and the vast experience of our experts in all financial fields ensures a competent and unbiased service to you entirely without fee or obligation.

What on earth's a tub of margarine doing in this Medical Journal?

We know that there's a significant link between saturated fats, serum cholesterol levels and coronary heart disease in man.^{1,2}

There are a number of guidelines for reducing the risk of coronary heart disease. One of the most important is the recommendation to reduce the amount of saturated fat intake in the diet.³

The American Heart Association,⁴ the combined Medical Boards of Norway, Sweden and Finland,⁵ and the National Heart Foundations of Australia and New Zealand,^{6,7} all recommend the reduction of saturated fat intake and an increase in the level of polyunsaturated fatty acids.

Many doctors are recommending a modified fat diet for patients at risk

from a heart attack. The change is made easier with Flora.

Flora is an accepted component of a lipid lowering diet.^{8,9} The value of such a diet is indicated by the findings from three first generation clinical trials of primary prevention, which suggested that dietary modifications would reduce the incidence of coronary heart disease.^{10,11,12}

Flora is higher in polyunsaturated fats than any other leading margarine, and is low in saturated fats*. In addition, Flora is a highly acceptable food and so patients will use it if recommended to do so.

Give good advice - recommend Flora.

** At least 50% of Flora's fat content is linoleic essential fatty acid. Flora has a fat content of not less than 80% of the total product and is sold in half pound tubs.*

Trasicor®

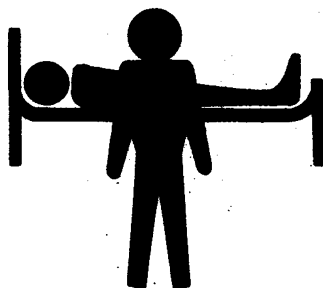

"...there are good reasons for believing that oxprenolol (Trasicor) should become an integral part of all antihypertensive therapy."¹

Highly Effective

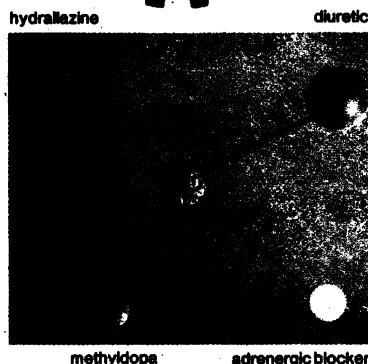

Numerous studies²⁻⁶ have shown that Trasicor, particularly in combination with a diuretic, reduces diastolic BP to near normal levels with high patient acceptability. This is important because it is the quality of control rather than the initial severity of hypertension which influences the prognosis.

No Postural Hypotension

Trasicor gives effective BP control without exercise or postural hypotension⁷ and with 'strikingly few side effects'.⁸

Suitable in any Combination

Trasicor can be combined successfully with other antihypertensive agents such as diuretics (e.g. Navidrex K), hydralazine, adrenergic blockers (e.g. Ismelin) and methyldopa.

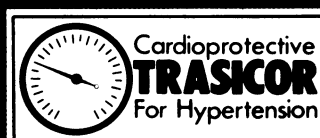

Cardioprotective

A three-year prospective study suggests that beta-blockers significantly reduce the risk of myocardial infarction and sudden death in IHD patients, with or without hypertension.⁹

Trasicor tablets (oxprenolol hydrochloride) 20mg, 40mg, 80mg, 160mg available in Secutainers of 100.

Fast Asleep

Dalmane gets patients to sleep in less than half the time.¹ Reduction in sleep latency has been observed in the home,¹ and the hospital,² as well as the sleep laboratory^{1,3} where objective studies have consistently confirmed the patients' subjective assessments.

Add to this a less disturbed night^{1,4} with Dalmane and you have a powerful treatment for insomnia, remarkably free from the problems of a barbiturate.^{5,6}

COMMERCIAL APPOINTMENTS

GENERAL PRACTICE TRAINING POSTS

Vocational Training for General Practice

In Peterborough

Applications are invited for two posts in this three year scheme commencing in September and October 1975. Full registration is essential.

In Peterborough we are fortunate in having not only a group of enthusiastic General Practitioner trainers, but also a highly co-operative Hospital staff, many of whom take an active part in the organisation of the scheme which is based on the Peterborough District Hospital and the New Postgraduate Medical Centre. The latter was opened in November 1973, has splendid facilities and there is a vigorous educational programme.

The first year the trainee will spend six months in a training general practice and six months as an S.H.O. in general medicine in the District Hospital, then one year in Paediatrics and Obstetrics and Gynaecology, and finally six months with part-time clinical responsibility in Geriatrics and gaining experience in Rheumatology, Ophthalmology, E.N.T., Accident and Emergency and Dermatology, and will spend six months in a training general practice.

A half-day release programme takes place throughout the three years. This is based on recommendations made by the R.C.G.P. and generally takes the form of group discussion. Psychiatry is the most important feature of this portion of the course and a Consultant Psychiatrist takes part in all these sessions.

Accommodation will be available throughout the three years, if required. The course is recognized for the M.R.C.G.P., D.C.H. and D.R.C.O.G.

Further details and application form obtainable from Dr. I. H. Redhead, Course Organiser, Postgraduate Medical Centre, Peterborough District Hospital, Peterborough.

UNIVERSITY AND RESEARCH APPOINTMENTS

ROYAL SUSSEX COUNTY HOSPITAL

and

UNIVERSITY OF SUSSEX

Research Assistant in Obstetrics and Gynaecology/Bio-medical Engineering

This is a joint appointment for a medical graduate between the Regional Health Authority and the University of Sussex. The successful candidate will spend at least two days a week at the University of Sussex as part of a team engaged in bio-medical engineering research. All of the projects include a large clinical component. At present, much of the research relates to cervical dilatation but research would not be limited to this project only. The remainder of the time will be spent in clinical obstetrics and gynaecology in the Brighton hospitals, with an on-call rota of one in three with two other registrars. The person appointed can be considered for registration as a candidate for a higher degree of the University of Sussex, but should already hold, or be about to take the M.R.C.O.G. examination. Married or single accommodation will be provided. The appointment, from a date to be arranged, is for one year in the first instance but is renewable for a second year. The post is super-annuable and the salary will be £3,517.80 p.a. plus Threshold payments. No increments are payable, but any pay awards will be applied.

Application forms (quoting ref.S/6) from the Personnel Department, Brighton Health District, Brighton General Hospital, Elm Grove, Brighton. Telephone Brighton 66155.

Further information can be obtained from Dr. M. M. Black, Chairman, Graduate Division of Biomedical Engineering, University of Sussex, Falmer, Brighton BN1 9OT, or Mr. J. A. H. APPOINTMENTS

Applicants for medical appointments are advised to check whether the post advertised is included in the Important Notice and to scrutinize carefully the remuneration and terms of service offered. Any member who is in doubt about these terms in relation to B.M.A. agreements should consult the Secretary of the Association.

Advertisers are reminded that the Race Relations Board insists that no descriptive term implying racial, national, or ethnic characteristics may be used in any advertisement. Further, readers are advised not to apply for any appointment which discriminates between applicants on grounds of creed or sex.

Applicants should state name, address, age, nationality, and qualifications, and enclose (unless otherwise specified) one copy of each of three recent testimonials, with a short statement of experience and appointments held. Applications should be sent at once if no closing date is given: Canvassing disqualifies (Statutory Instrument, 1974, No. 361).

All National Health Service hospital appointments are in accordance with the Terms and Conditions of Service of Hospital Medical Staff.

Further details concerning standards of residential accommodation, telephone charges, removal allowances, study leave and other matters should be obtained from the Hospital Secretary; or by B.M.A. members from the Secretary, British Medical Association.

In particular, they will find full details of facilities provided in most hospitals in the United Kingdom in the current edition of the *Hospital Gazetteer*. If such details are not included members are advised to consult the Secretary of the B.M.A.

Applicants requiring hospital married accommodation are strongly advised to obtain, prior to interview, clarification in writing from the employing authority as to whether such accommodation will be available on appointment.

No advertisement may stipulate that a non-resident must live less than 10 miles from a hospital. Advertisements for post-registration house officers, senior house officers and registrars should state clearly whether the post is resident, i.e. compulsorily resident.

In all advertisements grade should be clearly indicated. Normally a consultant vacancy must be advertised as (a) part-time with the number of sessions clearly stated, or (b) whole-time with the option of maximum part-time.

In the view of the B.M.A., an advertiser should not insist on possession of English higher qualifications in preference to Scottish or Irish qualifications (or vice versa).

SALARY SCALES OF HOSPITAL MEDICAL STAFF

HOUSE OFFICER: Each post in this grade shall be tenable for six months. £2,202 per annum for the posts held during the first year; £2,370 per annum for posts held during the second year; £2,538 per annum for posts held during the third and subsequent years, subject to full registration.

Deductions of £177 per annum in respect of lodging only for voluntary residence.

SENIOR HOUSE OFFICER: £2,823 per annum x £189(1) x £186(1) — £3,198.

Deductions of £210 per annum in respect of lodging only for voluntary residence.

REGISTRAR: £3,198 per annum x £171(3) x £168(1) — £3,879.

Deductions of £210 per annum for those with remuneration at the first incremental point on the scale and £243 per annum for those on the second and subsequent points will be made in respect of lodging only for voluntary residence.

On assimilation to the scale for Registrars, one increment and one only shall be given for any year or part of a year in excess of two spent previously in the senior house officer grade.

Allowances at rates up to £204 per annum shall be payable to house officers, senior house officers and registrars occupying posts approved for such allowances in peripheral hospitals.

SENIOR REGISTRAR: £3,711 per annum x £168(1) x £216(4) — £4,743.

Deductions of £270 per annum in respect of lodging only for voluntary residence.

On assimilation to the salary scale for senior registrars, increments to a maximum of two shall be given for each year or part of a year in excess of three spent previously in the registrar grade.

MEDICAL ASSISTANT: £3,504 per annum x £183(2) x £180(2) x £168(10) — £5,910.

Deductions of £270 per annum in respect of lodging only for voluntary residence.

CONSULTANT: £5,433 per annum x £279(8) x £282(1) — £7,947.

Deductions of £420 per annum in respect of lodging only for voluntary residence.

COMPULSORY RESIDENCE: The Terms and Conditions of Service of Hospital Medical and Dental Staff state:

173. A practitioner who is required as a condition of his appointment to reside in a hospital shall be provided with lodging without charge, except where the practitioner elects to occupy a house, flat or apartment for which a rent is appropriate.

COMMUNITY MEDICINE

National Scale. Specialist in Community Medicine/District Community Physician/District Medical Officers: £5,433 x £279(8) x £282(1) — £7,947 p.a.

National scales for Regional and Area Medical Officers/Chief Administrative Medical Officers vary according to authority. Information available from the Secretary of the B.M.A.

PUBLIC APPOINTMENTS ON WHITLEY SCALES

New appointments on these scales are intended solely in respect of clinical posts.

The national scales are —

Southern District

Specialist in Community Medicine

(Health Care Planning)

Salary £5433-£7947 per annum
(plus threshold payments)

Applicants are invited from suitably qualified
registered medical practitioners who have trans-
ferred to the Re-organised Health Service in
England and Wales to join our team of Community
Physicians at the Headquarters of Bedfordshire Area
Health Authority.

The successful applicant will play an important part
in tackling a wide range of interesting problems and
projects, these include the co-ordinating and
developing of Health Information Systems;
producing information relating to health care needs
and operational health care services; drawing up
planning guidelines for District Management Teams
based on area operational health care policies;
reviewing district plans for the operational Health
Care Services; and dealing with medical staffing
matters and the medical aspects of capital projects,
particularly those concerning the building of health
clinics and health centres.

In addition, the successful applicant may be required
to "act up" for the Area Medical Officer in his ab-
sence and to attend meetings of various committees
connected with the Area Health Authority, and for
liaison with other bodies. Bedford itself is a historic
town with all modern amenities. It's highly ac-
cessible too, being just 51 miles from London, with
excellent road and rail links with the capital. It is also
well known for its good educational facilities.

Adverse circumstances, such as too many children and too little money, are recognised causes of neurotic depression or anxiety neurosis in persons with a low resistance to stress.

These neuroses usually respond best to therapy with . . .

Triptafen-DA or Triptafen-Minor

Because "Since anxiety and depression are nearly always intermingled, it is often necessary to treat patients with a tranquilliser and antidepressant of proven efficacy."

(Practitioner, 1972, 208, 511)

And Triptafen-DA and Triptafen-Minor provide:

amitriptyline hydrochloride BP – to elevate the mood – plus perphenazine BP – to relieve the anxiety.

For Comprehensive Treatment of Depression and Anxiety

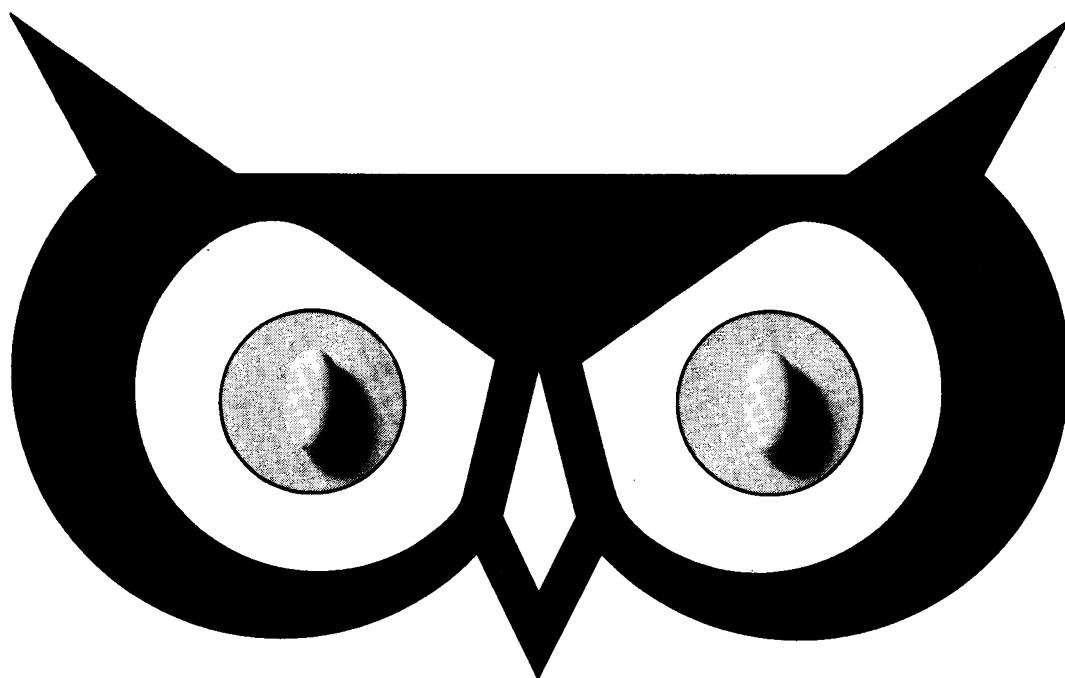

PRESCRIBE TRIPTAFEN-DA WHEN DEPRESSION IS PREDOMINANT

TRIPTAFEN-MINOR WHEN ANXIETY IS MORE OBVIOUS

Full prescribing information is available on request.

Triptafen is a trade mark of ALLEN & HANBURY LTD LONDON E2 6LA
