

## When diarrhoea disturbs the natural rhythm

Normal bowel movements are controlled through the rhythmic process of peristalsis. Increased intestinal activity disturbs the normal rhythm and frequently results in diarrhoea and extreme discomfort. Most treatments act on gut content by soaking up excess fluid; they do not control hyperperistalsis. Abdominal pain and spasms may persist.

**Specific Action—faster relief of symptoms.**  
New Imodium works quite differently. It acts specifically and locally to slow down hyperactive gut muscle, restoring normal peristaltic tone. Diarrhoea is controlled and patient comfort restored. For all patients with acute diarrhoea or gastroenteritis, Imodium provides a fast, simple, modern treatment.

**New Imodium\***  
(loperamide hydrochloride.)

**restores normal peristalsis.**

### General Information

**Registration.** For members, other than Representatives and overseas visitors, registration for the symposia and clinical visits will take place at the Registration Bureau, foyer, University Refectory.

#### Postgraduate Training Allowance and Seniority Payments

The Department of Health and Social Security and the Scottish Home and Health Department have recognised the **two symposia** for the purposes of the Postgraduate Training Allowance and Seniority Payments for N.H.S. general practitioners. The value of each afternoon's attendance will count as *one session*. Certificates of attendance will be available at the meetings.

Approval of sessions for these purposes does *not* entitle the doctor to claim either subsistence, travel costs or locum fees.

*Further details on the above sessions may be obtained from:*

The Executive Officer (Leeds Meeting),

B.M.A. House, Tavistock Square, London WC1H 9JP (Tel: 01-387 4499)

(For information on Social Timetable and other functions, please consult the *British Medical Journal* of 22 March 1975.)

#### Travelling and Subsistence Allowance

The **Clinical Visits** ( $\frac{1}{2}$  session each) have been approved by the Regional Postgraduate Committee under Section 63 of the Health Services and Public Health Act 1968 for payment of fees and expenses to general practitioners subject to satisfaction of the usual conditions. As the meeting is of less than one week's duration, payment will be made to doctors practising in England and Wales only. The appropriate claim forms will be available at the meeting.

**Your caring**  
**isn't enough.**  
**We need some**  
**giving too.**

If caring for Barnardo's children only took love and Christian charity, there'd be no problem. Unfortunately, it takes money too. And there's not nearly enough of that around.

There are all kinds of Barnardo's children. Some are handicapped, some are deprived. A few are orphaned, many simply deserted. The one thing they all have in common when they come to us is a desperate need for somebody to do something for them.

Unfortunately, we find ourselves in much the same position. Without help from you, and people like you, we cannot go on feeding, clothing and educating our children. We cannot go on running Dr. Barnardo's homes, schools and Day Care centres. Or finding foster homes. Or struggling to keep families together.

You've cared enough to read this far, so go a little further. Make a donation or a Deed of Covenant. Or start a local fund raising group.

We desperately need people who care that much.

**We can't give unless you do.**

## The Retreat, York

For the Treatment of Psychiatric Illnesses

This long established Private Registered Nursing Home of 275 beds is a non-profit making Quaker charity.

It has separate departments for the admission of all types of acute and short stay patients and for long-stay and psycho-geriatric disorders. The Hospital is able to offer a combination of psychological and physical methods of treatment for most types of psychiatric illness, including alcohol dependence in a sympathetic and friendly atmosphere where religious convictions are understood and problems can be given individual specialist consideration.

The Hospital stands within its own grounds on the outskirts of the City of York and is able to offer a wide range of occupational activities.

The Hospital is recognised by the main private patient schemes and fees which are inclusive start from £9.30 per day.

For further particulars apply to:- The Medical Director, The Retreat, York YO1 5BN (Tel. No. 54551).

# VIVALAN

## IN THE TREATMENT OF DEPRESSION

### The unique antidepressant from ICI.

#### **Non-sedative.**

'Vivalan' has little or no sedative effect<sup>1</sup>. This means that patients remain alert and active and can continue with their normal daily activities.

#### **Rapid acting.**

Controlled studies<sup>2</sup> have demonstrated that patients can show a marked improvement in as little as 3 days from the start of 'Vivalan' therapy.

#### **Widely effective.**

'Vivalan' is effective in all types of depression including mixed anxiety - depressive states<sup>3</sup>.

Clinical trials have shown that as many as 70% of patients respond favourably to 'Vivalan' therapy<sup>2,4</sup>.

'Vivalan' is chemically unrelated to any antidepressant currently available, and is a product of original ICI research.

# VIVALAN

'Vivalan' is a trade mark for viloxazine.

4. *Current Medical Research and Opinion*, (1974), **2**, 455.

Further information is available on request.

# Prescribing Information

## Presentation

'Vivalan' tablets, each containing viloxazine hydrochloride equivalent to 50 mg of viloxazine, are round, biconvex, yellow, film-coated and imprinted with the name 'Vivalan'.

## Use

Antidepressant.

## Depression

'Vivalan' is effective in all types and severities of depression, including those cases with a marked anxiety component, and may be used concurrently with ECT. It is able to control all the symptoms of depression. As 'Vivalan' has no sedative properties, patients remain alert during the daytime. 'Vivalan' has no hypnotic effect.

## Depression in Epileptics

'Vivalan', unlike the tricyclic antidepressants, has anti-convulsant properties, and is, therefore, of value in the treatment of depression in epileptic patients.

## Depression in the Elderly

Because of its lack of sedative and anticholinergic effects, 'Vivalan' is well tolerated in the elderly.

## Dosage and Administration

### Adults

Most patients respond to between 150–300 mg/day. Therapy may be started with either one tablet three times a day, or two tablets twice a day with meals. The onset of antidepressive effect is usually seen in the first 5–10 days of treatment, and, if no effect has been seen in a fortnight, the dose should be increased. The maximum daily dose should not exceed eight tablets.

### Children

Due to absence of clinical experience in children under the age of 14 years, 'Vivalan' is not recommended in such patients.

## Contraindications, Warnings, etc.

There are no specific contraindications to the use of 'Vivalan'. Epileptic patients established on phenytoin may become liable to develop phenytoin toxicity if 'Vivalan' is added, and caution is, therefore, advised in their co-administration. Patients being treated with antihypertensive agents such as debrisoquine,

guanethidine and bethanidine may require restabilising when 'Vivalan' is introduced into the therapeutic regimen. No marked interaction with alcohol occurs.

## Pregnancy

No adverse effects have been seen in teratogenic studies in animals. There is no clinical experience of using 'Vivalan' in pregnancy. On basic principles, its use in the first trimester is to be avoided.

## Side Effects

'Vivalan' is generally well tolerated and side effects are mild and transient. An upper gastrointestinal disturbance with, e.g. nausea, loss of appetite, may be seen, but this usually disappears in a few days. As 'Vivalan' is not a tricyclic antidepressant, it does not produce the anticholinergic, sedative and hypnotic side effects of those drugs, neither does it produce excessive weight gain. 'Vivalan' is not a monoamine oxidase inhibitor and dietary restrictions are not required.

## Overdosage

Overdosage should be treated on general principles; there is no specific antidote. An unsuccessful suicidal attempt with 5g viloxazine together with a quantity of oxazepam and trimeprazine produced 24 hour coma. Cardiovascular system and respiration were unaffected. Treatment-lavage.

## Pharmaceutical Precautions

Nil.

**PL/0029/0074**

## Legal Category

There is no legal restriction on sale or supply. It is available only on the prescription of a medical practitioner.

## Package Quantities

50 mg 'Vivalan' tablets are presented in blister strips each containing 10 tablets packed in cartons of 100 or 500 tablets.

# Ostermilk Complete Formula for contented doctors, nurses and mothers.

Ostermilk Complete Formula, our new low-solute milk-food for babies, has now become the fastest growing baby milk-food in the country.

Clinical trials have clearly shown that babies on this Ostermilk are 'more contented'; they get more prolonged satisfaction between feeds, suffer less from regurgitation and severe wind and are less likely to have loose stools. Also, there is a considerable decrease in napkin rash.

Doctors have been quick to recognise the advantages of the new formula. The lower phosphorus content virtually eliminates the risk of hypocalcaemia and possible neonatal tetany. The low solute content reduces the chance of hypernatraemic dehydration. And the inclusion of carbohydrate as maltodextrin helps to overcome the problems of lactose intolerance.

Nurses, too, benefit from the new formula as it is available for hospital use in its ready-prepared form.

Ostermilk Ready-to-Feed milk-food for babies. This system provides individual sterilized feeds in disposable glass bottles. So nursing staff spend less time with preparation and are more free to care for mothers and babies.

Out of hospital, mother finds Ostermilk Complete Formula, in its powder form, very quick and easy to prepare as it can be mixed in the bottle. She doesn't even have to add sugar. It really is complete.

We're sure that the increasing number of hospitals and mothers now using our new Ostermilk will lead to many more contented babies. And a great deal of satisfaction, too, among all those concerned with infant feeding and care.

# Why advertise the most widely prescribed antihypertensive?

Because 'Aldomet' is the most frequently prescribed modern antihypertensive and because it generally reduces elevated blood pressure smoothly, without undue fuss or bother for the patient, we believe that its other features are sometimes taken for granted.

So our advertising is intended to demonstrate to physicians the less obvious but vitally important benefits that 'Aldomet' can bring to the patient—control of all grades of hypertension in both lying and standing positions and a unique physiological action which helps protect normal heart and kidney function whilst reducing blood pressure.

**Aldomet**<sup>®</sup>

# Heart Attacks—can they be predicted?

"The conclusion seems inescapable that the occurrence of a cardiovascular catastrophe in the hypertensive patient constitutes a medical failure rather than the first indication for treatment. Apparent medical trivia such as asymptomatic hypertension when accompanied by hypercholesterolaemia, impaired glucose tolerance, the cigarette habit or ECG abnormalities are responsible for the bulk of cardiovascular mortality. We must learn to diagnose cardiovascular disease on its way to happening, to recognise the hallmarks of increased vulnerability and to synthesize them into a composite risk estimate, and also how to deal with the cardiovascular disease precursors effectively."<sup>1</sup>

"With a casual blood test for cholesterol and sugar, blood pressure determination, cigarette history and ECG examination, it is possible to identify a tenth of the asymptomatic population from which 25% of the coronary heart disease, 40% of the occlusive peripheral arterial disease, and 50% of the strokes and congestive failure will evolve."<sup>1</sup>

"The Tell-Tale Heart", the title of Edgar Allan Poe's story has a second meaning for the general practitioner. The patient at risk to heart disease will often reveal this unwittingly by "Tell-Tale" signs.

First suspicions may be aroused by tobacco stained fingers, obesity, dyspnoea, raised blood pressure or a family history of heart disease. Glucose intolerance or an ECG abnormality may show at closer examination. Furthermore, a raised serum cholesterol level may also be found.

Each of the above factors significantly increases likelihood of C.H.D., the risk rising with the number of factors present.<sup>1,2</sup>

A recent study proved the predictive use of these risk factors in a group of 5000 men. C.H.D. was twenty-nine times more common in the high risk group than in controls – smoking, raised cholesterol and raised blood pressure being the best predictors of C.H.D.<sup>2</sup>

Since medical opinion at present recommends reduction of these risk factors, moderation of smoking and eating habits may be advantageous. However, reduction of a major risk factor – raised serum cholesterol – is of prime importance and here therapy may be indicated with Secholex, a new palatable ion exchange gel. Taken alone, or with clofibrate, marked reductions in serum cholesterol are obtained.<sup>3,4,5</sup>

# A word in your ear!

Too often the elderly accept deafness as part of growing old – too often their deafness is simply excessive ear wax. Ear wax is still the commonest cause of deafness.<sup>1</sup>

A course of Cerumol will quickly loosen the wax, allowing it to be syringed away, if necessary, easily and safely.<sup>2</sup>

# For the patient with ischaemic heart disease the recommendation of Flora margarine is logical, clinical advice.

Many authorities throughout the world are in no doubt that a causative relationship exists between a raised blood cholesterol level and coronary atherosclerosis.<sup>1,2</sup>

Therefore, to lower blood cholesterol is a sound objective in the management of the patient. This can be achieved by reducing the intake of saturated fats in the diet and by partial substitution by polyunsaturated fats.<sup>3,4,5</sup>

Flora is higher in polyunsaturated fats than any other leading margarine\*, and is low

in saturated fats. It is an effective, easy and palatable component of a lipid lowering diet.<sup>6,7,8,9,10</sup>

# This is what we call practising medicine.

A career in Naval medicine can be a rewarding experience. Opportunities to specialise abound. And perhaps above all else, there is an immense satisfaction to be gained from the wide variety of work you will be involved in.

At sea, for instance, you could be anywhere from the Mediterranean to the Pacific Ocean. Looking after the health and well being of the company of a modern warship.

And though you could spend as long as the first eighteen months of your five year Short Service Commission on board different ships, you need have no fear of losing contact with mainstream medicine. For no matter where you are, you will be kept informed of current medical opinion.

After this, the choice is yours. Post graduate medical training and a career in the clinical disciplines at one of our naval district general hospitals. Haslar or Plymouth, for instance, with their wide spectrum of clinical material drawn from naval personnel, their dependants and the local civilian population as well. There are also naval hospitals in Malta, Gibraltar and Mauritius, with opportunities for exchange appointments elsewhere.

Or you might prefer occupational medicine in our research orientated naval dockyards. Aviation medicine with its accent on rotary wing support of the Fleet. And for those with an administrative turn of mind, community medicine.

Royal Naval expertise in maritime medicine is recognised world wide and research into underwater medicine, nuclear medicine and the closed submarine environment is centred

at the Institute of Naval Medicine at Alverstoke.

Naval general practice in well staffed and equipped medical centres extend as far afield as Hong Kong and Singapore. And new training schemes are now under way in the United Kingdom.

Should you be moved or sent abroad at any time, all expenses will be paid by us. We will help you with accommodation (at very reasonable rents) and provide allowances for the education of your children, if you have a family.

If you enter the Royal Navy immediately after registration you will be given the rank of Surgeon Lieutenant and a salary of £4,776, rising to £4,929 after four years.

On the other hand, if you are older (up to the age of forty) and more experienced, we can offer you a number of opportunities in general practice and the specialities. And, depending on your post-registration experience, you could enter as a Surgeon Lieutenant Commander at a salary of £5,780, rising to £6,375 after five years.

Then, at the end of your five year Short Service Commission you could leave with a tax free gratuity of £3,000.

But if it is mutually agreeable, you could apply for a Full Career Commission or a 16 year pensionable commission. The choice is yours.

In the meantime if you would like further information, write giving details of your age and qualifications to Surgeon Commander L.C. Banks, R.N., (724 BU23) Department of the Medical Director General (Naval), Empress State Building, Fulham, London SW6.

# APPOINTMENTS

Applicants for medical appointments are advised to check whether the post advertised is included in the Important Notice and to scrutinize carefully the remuneration and terms of service offered. Any member who is in doubt about these terms in relation to B.M.A. agreements should consult the Secretary of the Association.

Advertisers are reminded that the Race Relations Board insists that no descriptive term implying racial, national, or ethnic characteristics may be used in any advertisement. Further, readers are advised not to apply for any appointment which discriminates between applicants on grounds of creed or sex.

## HOSPITAL APPOINTMENTS

Applicants should state names, address, age, nationality, and qualifications, and enclose (unless otherwise specified) one copy of each of three recent testimonials, with a short statement of experience and appointments held. Applications should be sent at once if no closing date is given: Canvassing disqualifies (Statutory Instrument, 1974, No. 361).

All National Health Service hospital appointments are in accordance with the Terms and Conditions of Service of Hospital Medical Staff.

Further details concerning standards of residential accommodation, telephone charges, removal allowances, study leave and other matters should be obtained from the Hospital Secretary; or by B.M.A. members from the Secretary, British Medical Association.

In particular, they will find full details of facilities provided in most hospitals in the United Kingdom in the current edition of the *Hospital Gazetteer*. If such details are not included members are advised to consult the Secretary of the B.M.A.

Applicants requiring hospital married accommodation are strongly advised to obtain, prior to interview, clarification in writing from the employing authority as to whether such accommodation will be available on appointment.

No advertisement may stipulate that a non-resident must live less than 10 miles from a hospital. Advertisements for post-registration house officers, senior house officers and registrars should state clearly whether the post is resident, i.e. compulsorily resident.

In all advertisements grade should be clearly indicated. Normally a consultant vacancy must be advertised as (a) part-time with the number of sessions clearly stated, or (b) whole-time with the option of maximum part-time.

In the view of the BMA, an advertiser should not insist on possession of English higher qualifications in preference to Scottish or Irish qualifications (or vice versa).

## SALARY SCALES OF HOSPITAL MEDICAL STAFF

**HOUSE OFFICER:** Each post in this grade shall be tenable for six months. £2,859 per annum for the posts held during the first year; £3,075 per annum for posts held during the second year; £3,294 per annum for posts held during the third and subsequent years, subject to full registration.

Deductions of £177 per annum in respect of lodging only for voluntary residence.

**SENIOR HOUSE OFFICER:** £3,663 per annum x £243(1) — £3,906 x £246(1) — £4,152

Deductions of £210 per annum in respect of lodging only for voluntary residence.

**REGISTRAR:** £4,152 per annum x £222(3) — £4,818 x £291(1) — £5,109.

Deductions of £210 per annum for those with remuneration at the first incremental point on the scale and £234 per annum for those on the second and subsequent points will be made in respect of lodging only for voluntary residence.

On assimilation to the scale for Registrars, one increment and one only shall be given for any year or part of a year in excess of two spent previously in the senior house officer grade.

Allowances at rates up to £204 per annum shall be payable to house officers, senior house officers and registrars occupying posts approved for such allowances in peripheral hospitals.

**SENIOR REGISTRAR:** £4,818 x £291(1) — £5,109 x £294(1) — £5,403 x £291(2) — £5,985 x £294(1) — £6,279.

Deductions of £270 per annum in respect of lodging only for voluntary residence.

On assimilation to the salary scale for senior registrars, increments to a maximum of two shall be given for each year or part of a year in excess of three spent previously in the registrar grade.

**MEDICAL ASSISTANT:** £4,548 x £258(4) x £234(1) x £222(9) — £7,812.

Deductions of £270 per annum in respect of lodging only for voluntary residence.

**CONSULTANT:** £7,536 x £786(1) x £789(3) — £10,689.

Deductions of £420 per annum in respect of lodging only for voluntary residence.

**COMPULSORY RESIDENCE:** The Terms and Conditions of Service of Hospital Medical and Dental Staff state:

173. A practitioner who is required as a condition of his appointment to reside in a hospital shall be provided with lodging without charge, except where the practitioner elects to occupy a house, flat or apartment for which a rent is appropriate.

## COMMUNITY MEDICINE

National Scale. Specialist in Community Medicine/District Community Physician/District Medical Officers: £7,536 x £786(1) x £789(3) — £10,689 p.a. National scales for Regional and Area Medical Officers/Chief Administrative Medical Officers vary according to authority. Information available from the Secretary of the B.M.A.

## PUBLIC APPOINTMENTS ON WHITLEY SCALES

New appointments on these scales are intended solely in respect of clinical posts.

The national scales are —

Clinical Medical Officer: £4,422-£6,273 p.a.

Senior Clinical Medical Officer: £6,450-£8,307 p.a.

## WOMEN DOCTORS

Women doctors in the United Kingdom intending to take on N.H.S. work when circumstances allow may be eligible for the Women Doctors' Retainer Scheme. Details are available from the Medical Women's Federation, Tavistock House North, Tavistock Square, London WC1 9HX.

# for Neuropathological Project

A position exists for a young medically qualified applicant, preferably with some experience in pathology, to work with a group on studies of human post-mortem brain tissues. The research programme involves the measurement of neurotransmitter substances and related enzymes in various areas of normal and abnormal brain, with attention focused on neurological or psychiatric disorders. Further correlation of biochemical findings with histopathology at the light or electron microscope level is to be undertaken.

Responsibilities would include directing the collection of post-mortem brain tissue from various hospitals, the dissection and storage of fresh brain, and management of a brain-bank frozen tissue storage system for dissemination of tissues to other investigators. The laboratories are modern and well equipped, and are situated in the New Addenbrookes Hospital, Cambridge. The candidate would be expected to spend periods of training with Dr. J. A. N. Corsellis, Runwell Hospital, Essex, for collaborative work, and to acquire expertise in neuropathological techniques. Ample opportunity for original research will be given, and work for a further degree (M.D.) would be encouraged.

Apply to Dr. L. L. Iversen, Director M.R.C. Neurochemical Pharmacology Unit, Department of Pharmacology, Medical School, Hills Road, Cambridge. (42680) 72

## Careers in Community Medicine NORTHERN CONSORTIUM

*of Mersey, Northern, North Western, Trent and Yorkshire Regional Health Authorities and the Department of Health and Social Services, Northern Ireland*

A further intake to a two-year programme of in-post training is planned to begin in the Autumn for doctors who wish to prepare for a career in community medicine and the first part of the Membership examination of the Faculty of Community Medicine of the Royal College of Physicians.

The training programme is sponsored by the above authorities in conjunction with the appropriate departments of the Universities of Leeds, Leicester, Liverpool, Manchester, Newcastle, Nottingham and Sheffield and the Queen's University of Belfast.

The two-year appointment will offer a planned programme of experience and training at District, Area and Regional levels in the same locality. This in-service training will be integrated with a modular academic course provided jointly by the participating university departments. There will be one module of two or three weeks duration for each of the six terms of the training programme. In addition, trainees will be attached for tutorial purposes to the university department closest to their place of work and between modules will normally spend the equivalent of one day a week in academic studies under the guidance of a tutor covering parts of the syllabus agreed by all the teaching departments.

Some doctors may already have acquired substantial in-service experience allied to community medicine and for these, special arrangements may be possible to enable them to benefit from the academic modules.

Applications are invited from registered medical practitioners with post-registration clinical experience. The training posts established will be equivalent to registrar in the clinical specialties (salary £4152 to £5109).

This is a non-resident appointment but some Authorities may be able to help with the provision of accommodation on a voluntary basis for which an appropriate charge would be made.

**Application forms and further details may be obtained from Mr K N Holland, Co-ordinator, Room 510, Fulwood House, Old Fulwood Road, Sheffield S10 3TH. Application forms should be returned by 23rd June 1975.**

Applicants will be free to express in order of preference their choice of participating authorities. If applicants require further advice or details of local regional arrangements they may contact the Regional Medical Officer's Department at the following addresses:-
