

The rally bred, hand finished, fully equipped RS 2000

Only Ford could do it for under £3,000[†]

The new RS 2000.

A rare combination of luxury car refinements and rally-bred performance. (0-60 in 8.5 seconds*, top speed 111 mph). It's so precise, so well balanced, you can slot it in and out of traffic like the black knight on a chess board.

It's hand finished off the production line, with a heavy duty body shell and competition proven components. You control it in luxury. The cockpit's got high-back, body hugging seats, an all black low-reflection trim and instantly clear instruments, all designed to

counteract fatigue. Only Ford could do all that for under £3,000.[†]

Car magazine called it "a really genuine fun car if ever there was one". And here's what Motor's Tony Scott said after his RS 2000 achieved 40.93 mpg on the Total Economy Run: "Where the RS scored over every other car in its class was the way it handled and held the road".

So express yourself. Cut the coupon to test drive an RS 2000, and put some fun back into your motoring.

[†]Maximum price £2,983, car tax and VAT included. Delivery, number plates and seat belts at extra cost.

The car illustrated is fitted with the optional thin body side stripes, in place of the 70mm black stripe and RS 2000 side decal.

How long does it take you to check your bank statement—allowing for the occasions when you find you've forgotten to fill in one of the cheque counterfoils?

A Coutts statement puts you to none of this trouble. Every entry is fully spelled out. You know at once where everything has gone, and where it has come from. You get your statement as frequently, or as seldom, as you wish.

It just shows that in the right hands a computer can be an asset to personal service, instead of replacing it.

The Coutts service is one to which the word 'personal' really does apply: it is designed to be able to meet your needs, as an individual, not to cater for a lowest common denominator.

Coutts bank charges do not depend on your balance being kept above some arbitrary minimum, nor on the number or type of entries on your account. We think you should be able to use your account without inhibitions. Instead, our charges—as distinct from interest on any overdraft—depend solely on your average balance over the year. If the average is more than £500 you pay nothing at all. It cannot cost you more than £15 a year.

Quite apart from the current account services Coutts can do other things for you too—helping you with your tax, advising you on insurance, managing your investments, administering your estate—all with the same personal touch.

If you would like to know more about banking with Coutts, write or telephone John Acheson's Management team on 01-836 7701.

Alternative dosage regimen of Caved-S produces impressive results in chronic duodenal ulcer

Endoscopic examination proved chronic duodenal ulceration in 32 male patients, whose clinical histories ranged from 2 to 30 years.¹

ADEQUATE DOSAGE

2 Caved-S tablets 5 times daily for up to 24 weeks

"... the daily dose selected was the median of that advised in a series of patients treated with deglycyrrhizinized liquorice tablets who had failed to respond to other measures and had been referred for surgery ..."¹

THOROUGH CHEWING OF THE TABLETS

mixing Caved-S with the saliva appears to play an important role.

"Saliva may have a role of its own or a synergistic action with constituent of the liquorice extract. Work in India (Malhotra *et al*, 1965) has suggested that eating foods which do not require chewing results in an increased incidence of duodenal ulceration and that saliva exerts a protective action in peptic ulceration (Malhotra 1967; Malhotra, 1967)."¹

SWALLOWING ON AN EMPTY STOMACH

allows the bolus of Caved-S and saliva to reach the prepyloric area of the stomach, where maximum demulcent effect and healing occur.

"The advice that the agent should be taken on an empty stomach in the ambulant patient could be crucial. Simple studies on patients presenting for barium-meal examination have shown that if a small sip of barium is taken while in an upright position when the stomach is empty the bolus of barium rapidly travels down the lesser curve of the stomach and comes to rest in the prepyloric region. This may effectively produce a 'positioned release' preparation, and the bolus of mixed saliva and deglycyrrhizinized liquorice would appear to be strategically placed to exert maximum demulcent or healing effect."¹

RESULTS

Endoscopic examination showed that Caved-S had healed the ulceration in ALL 32 patients and in most the mucosa appeared normal.

APPOINTMENTS

Applicants for medical appointments are advised to check whether the post advertised is included in the Important Notice and to scrutinize carefully the remuneration and terms of service offered. Any member who is in doubt about these terms in relation to B.M.A. agreements should consult the Secretary of the Association.

Advertisers are reminded that the Race Relations Board insists that no descriptive term implying racial, national, or ethnic characteristics may be used in any advertisement. Further, readers are advised not to apply for any appointment which discriminates between applicants on grounds of creed or unreasonably on grounds of sex.

HOSPITAL APPOINTMENTS

Applicants should state names, address, age, nationality, and qualifications, and enclose (unless otherwise specified) one copy of each of three recent testimonials, with a short statement of experience and appointments held. Applications should be sent at once if no closing date is given: Canvassing disqualifies (Statutory Instrument, 1974, No. 361).

All National Health Service hospital appointments are in accordance with the Terms and Conditions of Service of Hospital Medical Staff.

Further details concerning standards of residential accommodation, telephone charges, removal allowances, study leave and other matters should be obtained from the Hospital Secretary; or by B.M.A. members from the Secretary, British Medical Association.

In particular, they will find full details of facilities provided in most hospitals in the United Kingdom in the current edition of the *Hospital Gazetteer*. If such details are not included members are advised to consult the Secretary of the B.M.A.

Applicants requiring hospital married accommodation are strongly advised to obtain, prior to interview, clarification in writing from the employing authority as to whether such accommodation will be available on appointment.

No advertisement may stipulate that a non-resident must live less than 10 miles from a hospital. Advertisements for post-registration house officers, senior house officers and registrars should state clearly whether the post is resident, i.e. compulsorily resident.

In all advertisements grade should be clearly indicated. Normally a consultant vacancy must be advertised as (a) part-time with the number of sessions clearly stated, or (b) whole-time with the option of maximum part-time.

In the view of the BMA, an advertiser should not insist on possession of English higher qualifications in preference to Scottish or Irish qualifications (or vice versa).
