

"Whenever possible,
narrow range antibiotics should be used
in preference to broad-spectrum drugs"

Antibiotics at Risk, Leading Article, Brit. Med. J. 1975, 2, 582

The vast majority of common
bacterial infections seen
in general practice can be
attributed to just five major
pathogens—Staphylococcus, Streptococcus,
Pneumococcus, H. influenzae and
Mycoplasma pneumoniae.

The spectrum of Erythrocin 500
covers these pathogens decisively, with
virtually no 'overspill' and, consequently,
less risk of resistance developing.

More specific spectrum prescribing
is the responsible attitude to
antibiotic therapy.

TODAY'S TREATMENT

Faced with a succession of new drugs, doctors need authoritative advice on the selection of the most effective remedies for common disorders; and that is the aim of *Today's Treatment*. This first volume contains articles published in the *BMJ* in 1974-75 on disorders of the skin and blood and on psychiatric and neurological diseases. These simple clear accounts of assessment and management provide all the information needed for a rational choice of the best treatment for each individual patient.

Control of use of Dangerous Pathogens

The Working Party on Laboratory Use of Dangerous Pathogens whose report was published in 1975 (Cmnd 6054, HMSO) recommended a new scheme for control of work with very dangerous "Category A" pathogens. These are now listed as:—

Lassa Fever virus, Marburg virus, Rabies virus, Simian Herpes B virus, Smallpox virus, Crimean haemorrhagic fever virus (Congo), Machupo haemorrhagic fever virus, Junin haemorrhagic fever virus and Venezuelan equine encephalitis virus.

All laboratories holding any pathogens dangerous to humans even if they are not in the "Category A" list, should know about this control scheme.

Please write for details by returning the coupon below (Freepost).

If your laboratory is associated with a Government Department (i.e. within the Health, Education or Agriculture Services or managed by Research Councils) you should receive a copy without request.

Uticillin (carfecillin sodium) is indicated for the treatment of acute and chronic urinary tract infections caused by sensitive organisms including *E. coli*, *Proteus* spp., *Strep. faecalis*, and particularly *Pseudomonas*. Following oral administration, Uticillin is rapidly absorbed and hydrolysed to carbenicillin, achieving high concentrations in the urine.

APPOINTMENTS

Applicants for medical appointments are advised to check whether the post advertised is included in the Important Notice and to scrutinize carefully the remuneration and terms of service offered. Any member who is in doubt about these terms in relation to B.M.A. agreements should consult the Secretary of the Association.

Advertisers are reminded that the Race Relations Board insists that no descriptive term implying racial, national, or ethnic characteristics may be used in any advertisement. Further, readers are advised not to apply for any appointment which discriminates between applicants on grounds of creed or unreasonably on grounds of sex.

HOSPITAL APPOINTMENTS

Applicants should state names, address, age, nationality, and qualifications, and enclose (unless otherwise specified) one copy of each of three recent testimonials, with a short statement of experience and appointments held. Applications should be sent at once if no closing date is given: Canvassing disqualifies (Statutory Instrument, 1974, No. 361).

All National Health Service hospital appointments are in accordance with the Terms and Conditions of Service of Hospital Medical Staff.

Further details concerning standards of residential accommodation, telephone charges, removal allowances, study leave and other matters should be obtained from the Hospital Secretary; or by B.M.A. members from the Secretary, British Medical Association.

In particular, they will find full details of facilities provided in most hospitals in the United Kingdom in the current edition of the Hospital Gazetteer. If such details are not included members are advised to consult the Secretary of the B.M.A.

Applicants requiring hospital married accommodation are strongly advised to obtain, prior to interview, clarification in writing from the employing authority as to whether such accommodation will be available on appointment.

No advertisement may stipulate that a non-resident must live less than 10 miles from a hospital. Advertisements for post-registration house officers, senior house officers and registrars should state clearly whether the post is resident, i.e. compulsorily resident.

In all advertisements grade should be clearly indicated. Normally a consultant vacancy must be advertised as (a) part-time with the number of sessions clearly stated, or (b) whole-time with the option of maximum part-time.

In the view of the B.M.A. an advertiser should not insist on possession of English higher qualifications in preference to Scottish or Irish qualifications (or vice versa).

Full-Time Medical Staff

**DIRECTOR OF
RADIOLOGY**

Applications are invited for the position of Director of Radiology, The Prince Charles Hospital. The appointee must be either registered or eligible for registration as a Specialist Radiologist with the Medical Board of Queensland. It would be an advantage if any applicant for this position did already have some specialised experience in cardiac radiological techniques, including those requiring cardiac catheterisation, but this specialised training is not a necessary requirement of the position.

The Director of Radiology will be required to supervise work within the Department of Radiology.

The Prince Charles Hospital provides the specialised cardiothoracic services for the State of Queensland, and there is also an elective orthopaedic surgical unit at this Hospital. The radiology establishment provides for a Director of Radiology, two Part-time Radiologists, one Radiology Registrar and six Radiographers.

Salary \$A30,525 per annum

Liberal conference leave conditions apply. In addition, after the completion of each seven years' continuous service, a Specialist Medical Officer is entitled to up to six months' study leave on full salary without expenses, or alternatively, such an Officer may apply for up to three months' leave on full salary, with an around-the-world economy air ticket, plus actual expenses and a personal allowance.

Annual leave: 5 weeks

Long Service Leave: 13 weeks after 10 years' continuous service.
