Imodium

JANSSEN

stops diarrhoea safely and rapidly

unique chemical entity... loperamide (R 18 553) is an entirely new molecule, first synthesized by Janssen Research; the compound specifically inhibits hypermotility by a direct effect on the intestinal wall.

highly effective in acute diarrhoea... quickly relieves spasms and cramps; stops diarrhoea due to gastroenteritis, diet, functional causes, etc.; even more effective than diphenoxylate in double-blind studies.^{1,2}

no incompatibility... no incompatibility with other therapies has been reported.

remarkably safe... contains no atropine, devoid of CNS activity; no adverse effects noted in long-term safety studies.³

patient-controlled dosage schedule... in adults, two capsules to start, one capsule after each unformed stool until bowel function is normalized.

Summary of Prescribing Information

Indications : Imodium is indicated for the control of acute diarrhoea regardless of origin.

Side-effects : no specific drug related side-effects have been reported to date.

Precautions : overdosage may lead to constipation. Safety of use in pregnancy has not been established. Imodium should not be used in patients with a known hypersensitivity to the drug and in those in whom inhibition of peristalsis must be avoided (e.g. subobstruction due to a tumour).

Availability : Capsules containing 2 mg of loperamide.

Dosage :

| | | |
|-------------------------------------|---------|-----------------|
| Acute diarrhoea | Adults | Children over 5 |
| Initial dose | 2 caps. | 1 caps. |
| Subsequently after each loose stool | 1 caps. | 1 caps. |

In acute diarrhoea a 5-day period of treatment should be adequate.

CUT CHOLESTEROL

**Polyunsaturated cod liver oil
reduces blood cholesterol by 15.8%**

The recently published Report of the Joint Working Party of the Royal College of Physicians of London and the British Cardiac Society (1) makes general dietary recommendations considered desirable to counter the risk of Coronary Heart Disease. These recommendations emphasise the need to reduce the intake of hard saturated fats and replace with oils rich in polyunsaturates.

There are limited opportunities for substitution with polyunsaturated oils in the modern diet, but modern Cod Liver Oil offers a valuable nutritional supplement rich in polyunsaturates which have been shown to be effective in reducing serum cholesterol levels, (2) (3).

The polyunsaturates of Cod Liver Oil are unique to marine products and help supplement the linoleic acid polyunsaturates specific to vegetable oils.

In addition, of course, Cod Liver Oil supplies the important Vitamins A and D, and energy, making it an important nutritional supplement, particularly for the older patients.

For the patient with ischaemic heart disease the recommendation of Flora margarine is logical, clinical advice.

Many authorities throughout the world are in no doubt that a causative relationship exists between a raised blood cholesterol level and coronary atherosclerosis.^{1,2}

Therefore, to lower blood cholesterol is a sound objective in the management of the patient. This can be achieved by reducing the intake of saturated fats in the diet and by partial substitution by polyunsaturated fats.^{3,4,5}

Flora is higher in polyunsaturated fats than any other leading margarine,* and is low

in saturated fats. It is an effective, easy and palatable component of a lipid lowering diet.^{6,7,8,9,10}

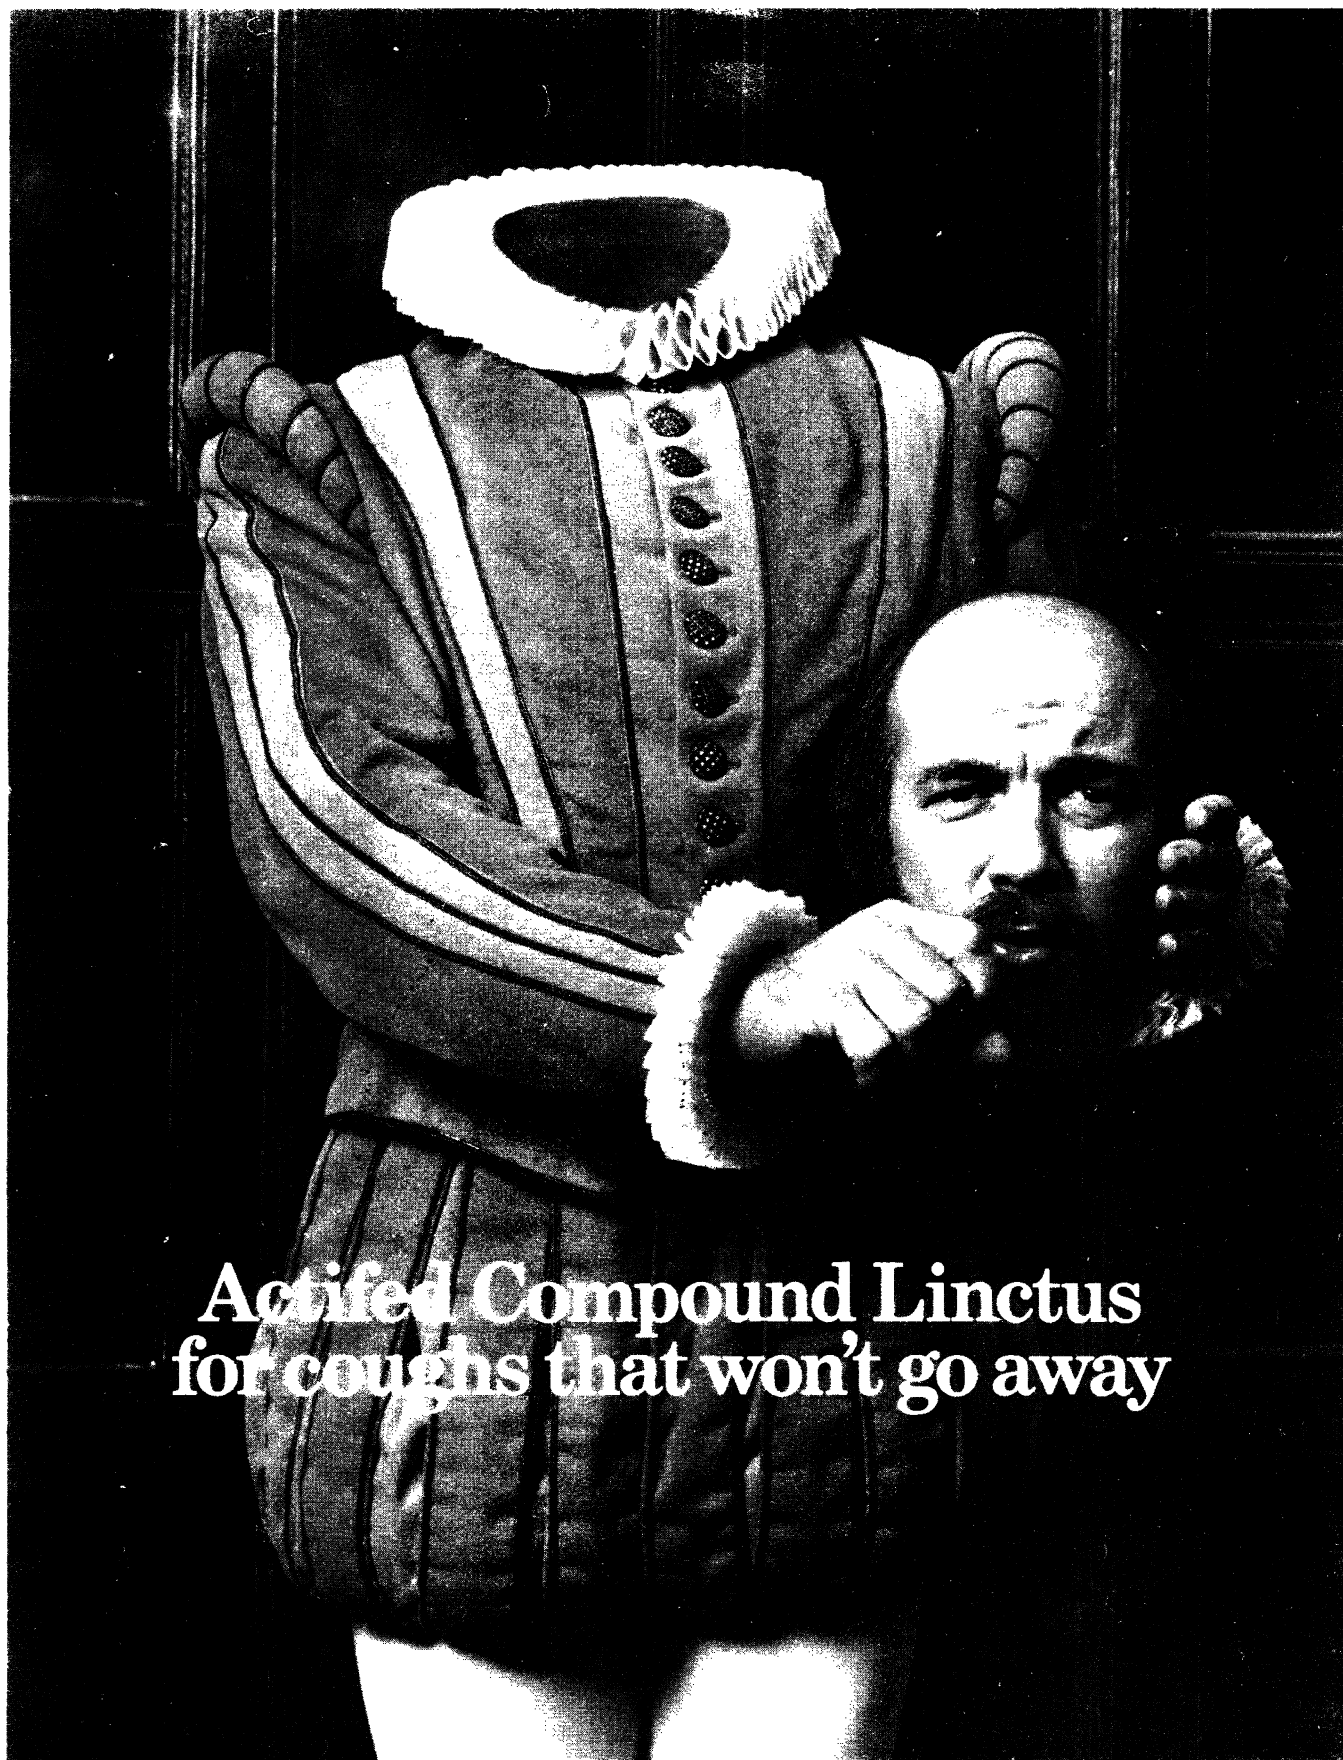

If you would like further information about Flora margarine and recipes in which it may be used by your patients with coronary heart disease, please write to: Flora Information Service, 25 North Row, London W1.

A doctor can gain a lot from 5 years in the Royal Navy.

As a qualified doctor, you can join the Royal Navy for 3 or 5 years on a Short Service Commission.

In that time, you'll spend up to a year practising medicine in a Naval ship.

You could have the chance of working and living overseas for a time.

And you'll be able to do your General Professional Training in one of the clinical and medical scientific disciplines at a Naval hospital or an RN establishment.

At sea.

After a short Officers course at the Royal Naval College, Dartmouth, and a basic course in maritime medicine at the Institute of Naval Medicine, Alverstoke, you'll normally go to sea for about 12 months.

You'll be responsible for the medical care of some 250 to 500 men in your ship (and advise the Captain on health and environmental problems).

You won't lose touch with modern medicine, as you can visit local hospitals in ports of call and use the teaching aids provided by your Naval tutor.

Postgraduate training and specialisation.

After your sea-time, career counselling will determine your postgraduate training programme.

There are opportunities for General Professional Training in preparation for a clinical career in general practice, the hospital specialities, or the medical scientific disciplines such as Aviation, Underwater, Submarine and Nuclear Medicine; or in Occupational and Community Medicine.

If you decide to transfer to a 16-year pensionable Commission, or a permanent Commission, you could move on to recognised higher training programmes which include research training and higher training posts in civilian units.

At Alverstoke, the Dean of Naval Medicine co-ordinates postgraduate medical training and research.

Naval hospitals.

The two largest are at Haslar (near Portsmouth) and Plymouth.

They undertake the care of Naval personnel, their families and NHS civilians, providing a broad spectrum of clinical material. Both hospitals are recognised for higher training in the major specialities.

There is a full range of modern, technical equipment, and the nursing and paramedical staff are highly skilled.

There are smaller hospitals in Malta and Gibraltar.

Salary.

If you join us immediately after registration, your salary will be £5,997 as a Surgeon Lieutenant.

You can, however, join at any age up to 39. In that case, your postgraduate experience is taken into account, and you could join as a Surgeon Lieutenant Commander, earning £8,016 a year.

If you leave at the end of your 3 year Commission, you'll receive a tax-free gratuity of £1,500, or, after 5 years, £3,000.

If you decide to stay on, you can apply for a 16-year pensionable Commission or a permanent Commission.

The salary structure is based on an analogue computed from the average earnings of general practitioners in the NHS, with an additional X factor. There is extra pay for recognised postgraduate qualifications and Senior Specialist or Consultant status.

If you're posted overseas, you can, of course, take your family with you. There are, too, generous boarding school allowances for your children, starting at £807 for your first child.

For more information, write to Surgeon Commander H.B. Blackstone, MRCS, LRCP, MRCP, RN, (724 FM18), Medical Directorate General (Navy), Ministry of Defence Empress State Building, London SW6 1TR.

POSTGRADUATE COURSES IN PAEDIATRICS

A series of one-week courses covering various specialties within paediatrics will be held at the Institute of Child Health from 4th January to 4th March, 1977. The topics which will be covered are: Cardiology, Endocrine Disorders/Growth & Development, Genetics/Metabolic Disorders, Developmental Assessment, Nephrology, Neonatal Medicine, Immunology & Infectious Diseases, Psychiatry, Gastroenterology. The courses are intended for junior medical staff who have completed at least one year of full-time clinical paediatrics, or have the equivalent experience in the relevant specialty. Each course will be complete in itself, and applicants may enrol for more than one course. The number of participants will be limited. The course fee will be £26 each week.

Details and application forms available from the Sub-Dean, Institute of Child Health, 30 Guilford Street, London WC1 (Tel: 01-242 9789). Closing date for receipt of application 22nd November, 1976. (24693) 4

OVERSEAS MEDICAL LABORATORY TUTORS COURSE

at the Royal Free Hospital, London and the Bromley College of Technology, 4th April 1977 to 25th November, 1977. The aim of the course is to train qualified medical laboratory technicians in teaching methods for medical laboratory subjects to enable them to establish new teaching schemes or improve existing schemes in their own countries. The studies at the Bromley College of Technology are designed to raise background technical knowledge to the standards required by the Technician Education Council. Associated studies are followed in laboratory management, instrumentation and teaching training. At the Royal Free Hospital the students learn the special techniques required for teaching in a laboratory environment. Further studies include personnel management, work study, interpersonal relationships concerned in teaching and first aid and laboratory hazards. The use of visual aids will be a basic part of the course.

GENERAL PRACTICE TRAINING POSTS

SOMERSET AREA HEALTH AUTHORITY East Somerset District VOCATIONAL TRAINING FOR GENERAL PRACTICE

Applications are invited from Medical Graduates who wish to train for a career in General Practice, to participate in this approved three year course commencing 1st March, 1977. The trainee will spend the first two years in Hospital Service posts at Senior House Officer grade in the new Yeovil District Hospital. The post will rotate in General Medicine, Paediatrics, Geriatrics, Obstetrics and Gynaecology and Casualty. The third year will be spent as an assistant in a local training practice. Throughout the three years a half day a week release scheme will be operated to allow the trainee to attend a course in General Practice at Taunton. Those wishing to be considered should be fully registered by the date of commencement of the course.

Application form from Administrator, Personnel Services, Yeovil District Hospital, Higher Kingston, Yeovil, Somerset BA21 4AT. Completed form to be returned by 25th October, 1976. (24595) 21

Nottinghamshire Area Health Authority (Teaching) NOTTINGHAM VOCATIONAL TRAINING PROGRAMMES FOR GENERAL PRACTICE

Applications are invited from fully Registered doctors to join this established Scheme in February 1977. All those interested in a career in General Practice are invited to apply as the aim is to provide a "custom built" programme for each successful applicant. Candidates are likely to fit into one of the following:-

Basic 3-Year Programme

An introductory period of 3-6 months in General Practice is followed by a choice from the following six month jobs at S.H.O. level:

General Medicine, Psychiatry, Obstetrics and Gynaecology, Paediatrics, Geriatrics and Accident and Emergency (with release to E.N.T., Ophthalmology, Venereology and Dermatology). The balance of one year in General Practice to complete the programme.

Modified Programme

For those with previous hospital experience at S.H.O. level or in a training General Practice, a purpose-built programme based upon the above pool of jobs is available. This is usually followed by a period in a Teaching General Practice for those who require it.

There is also a one-year rotation in Psychiatry and Dermatology with release to Ear, Nose and Throat, Venereology, Ophthalmology and Geriatric Departments. If required a period in a Teaching General Practice can usually be provided.

A weekly seminar based on "The Family Life Cycle" is run for all Trainees and Trainers who also participate in the planning of the programme. All the resources of the Medical School are available and are used.

Past Trainees have taken and passed the M.R.C.G.P., D.C.H., Dip.Obst., and M.R.C.P. Recognition for these examinations still exists.

Accommodation is available during the introductory period in General Practice, hospital posts, and sometimes during the final period in General Practice.

Letters of application containing full details and Curriculum Vitae should be addressed to: District Administrator, North Nottingham Health District, Administrative Headquarters, Sherwood Hospital, Hucknall Road, Nottingham, NG5 1PD, together with the names and addresses of two referees by 25th October 1976. Full details of the Scheme will be issued on application. (H13034) 21

A Revolution in Medicine?

Well hardly, but it could certainly be *your* chance to give your career a turn for the better! Ask yourself — how does your present position score on the following:

- ☐ Intellectual interest & satisfaction?
- ☐ Worthwhile medical goals to strive for?
- ☐ Professional working environment with stimulating colleagues?
- ☐ Opportunity to probe unusual medical problems in depth?
- ☐ Opportunity for advanced medical study and specialist training?
- ☐ Regular hours of work with weekends off?
- ☐ Travel and internationality of outlook?
- ☐ Meaningful opportunities for rewarding initiative and merit?
- ☐ A salary ladder that reaches to £20,000 + even in the UK?
- ☐ A varied career with exciting prospects?

If you haven't scored 10 out of 10, a medical career in the pharmaceutical industry could provide you with *all* these advantages.

We are a completely independent organisation with wide experience of the international pharmaceutical industry. We act as professional recruitment advisers to a sizeable number of the larger pharmaceutical companies in the UK, Continental Europe and North America, and we handle a wide range of medical appointments on their behalf.

Accordingly, we are always interested to hear from successful physicians within the age range 28-38 who have a good British medical qualification; several years' general medical experience; a lively mind and an outgoing personality; and an active or potential interest in making a career in this increasingly important — and professionally-demanding — medical speciality.

If you fit this general picture and would like to know more about the sorts of opportunity available to you within the pharmaceutical industry, please write or phone for further information in complete confidence and without obligation, quoting reference JB7.

Institute of Hearing Research

Appointment of

DEPUTY DIRECTOR

Applications are invited for the post of Deputy Director of the Institute of Hearing Research. Applicants should be medically qualified with experience of research into hearing or deafness as well as of clinical practice. The post will initially have three main areas of responsibility as defined by the Council and the Director, but the successful candidate will have a large measure of independence within each area. The areas are:

(a) epidemiology of deafness on which pilot studies for a medium-term questionnaire project are already under way;

(b) definition of the clinical states causing sensorineural deafness with a view to clarifying the nature of the pathological processes and extending chances of successful treatment following early diagnosis;

(c) advising and collaborating with scientific staff of the Institute on studies involving patients or animal models of deafness.

The applicant should be prepared to travel; arrangements are being made for hospital outstations to augment the numbers of patients for the above research

and for rehabilitation studies. If the Deputy Director is not permanently located at the headquarters, he may be provided with staffing for his own outstation.

There is no special application form; applicants should enclose a curriculum vitae and publication list together with an outline in less than 2,000 words of the contribution they would expect to make in the main areas of responsibility.

Further particulars are available from Mrs Ann Horn, Medical Research Council, 20 Park Crescent, London W1N 4AL. Applications should reach the Council not later than 20th October.

A part-time appointment may be considered for which applicants should detail the number of sessions they would devote to the post (which must in any case be four or more) and how their clinical and research commitments would complement one another. Salary will be on the NHS Consultant scale.

APPOINTMENTS

Applicants for medical appointments are advised to check whether the post advertised is included in the Important Notice and to scrutinize carefully the remuneration and terms of service offered. Any member who is in doubt about these terms in relation to B.M.A. agreements should consult the Secretary of the Association.

Advertisers are reminded that the Race Relations Board insists that no descriptive term implying racial, national, or ethnic characteristics may be used in any advertisement. Further, readers are advised not to apply for any appointment which discriminates between applicants on grounds of creed or unreasonably on grounds of sex.

HOSPITAL APPOINTMENTS

Applicants should state names, address, age, nationality, and qualifications, and enclose (unless otherwise specified) one copy of each of three recent testimonials, with a short statement of experience and appointments held. Applications should be sent at once if no closing date is given: Canvassing disqualifies (Statutory Instrument, 1974, No. 361).

All National Health Service hospital appointments are in accordance with the Terms and Conditions of Service of Hospital Medical Staff.

Further details concerning standards of residential accommodation, telephone charges, removal allowances, study leave and other matters should be obtained from the Hospital Secretary, or by B.M.A. members from the Secretary, British Medical Association.

In particular, they will find full details of facilities provided in most hospitals in the United Kingdom in the current edition of the Hospital Gazetteer. If such details are not included members are advised to consult the Secretary of the B.M.A.

Applicants requiring hospital married accommodation are strongly advised to obtain, prior to interview, clarification in writing from the employing authority as to whether such accommodation will be available on appointment.

Advertisements for post-registration house officers, senior house officers and registrars should state clearly whether the post is resident, i.e. compulsorily resident.

In all advertisements grade should be clearly indicated. Normally a consultant vacancy must be advertised as (a) part-time with the number of sessions clearly stated, or (b) whole-time with the option of maximum part-time.

In the view of the B.M.A., an advertiser should not insist on possession of English higher qualifications in preference to Scottish or Irish qualifications (or vice versa).

TARANAKI HOSPITAL BOARD
New Zealand

DIAGNOSTIC RADIOLOGIST

Applications are invited for the position of whole-time Diagnostic Radiologist based at the Raranaki Base Hospital in New Plymouth, New Zealand. Applicant should possess a post-graduate diploma, be experienced in all aspects of diagnostic radiology and be eligible for specialist status in New Zealand.

The Radiology Department was commissioned in November 1972 and is well planned with four examination rooms. The equipment which is largely new includes a Kombi Catheterisation table with image intensifier, TV link and a Puck film changer; the only Orbiscope in the southern hemisphere (this is a specialised screening unit with a high speed 0.3mm under-couch focus and a 100mm camera capable of taking two films per second); a Schonander skull unit, a Kombi Tomographic unit together with a standby Philips screening table; a versatile and universal Odeca camera. Video tape facilities are available and there is a Philips Auto Alternator for viewing. The Department has an establishment of two whole-time radiologists, a visiting specialist on a 7/10ths basis and a registrar.

Conditions of employment will be in accordance with the New Zealand Hospital Services Determination for specialist medical officers. The salary will be within a ten step scale of N.Z. \$14,256/\$18,365 plus C.O.L. allowance of \$7 a week and the commencing salary within the scale will be determined by the Medical Officers' Salaries Grading Committee.
