BONE AND JOINT DISEASES

Arthritis used to be the Cinderella of diseases, but improved diagnostic techniques, advances in joint replacement surgery, and a whole range of non-steroidal drugs have led to a much more active approach to the management of the common bone and joint diseases. Detailed advice on their diagnosis and treatment was given last year in a series of 16 articles in the *BMJ*, and these have now been gathered together in the latest volume based on the popular "Today's Treatment" series.

STATISTICS AT SQUARE ONE

by T. D. V. SWINSCOW

from the British Medical Journal

The statistical testing of data is indispensable in many types of medical investigation and a help on countless occasions in clinical practice. This book provides step-by-step instruction. Subjects covered include standard deviation, χ^2 tests, t tests, non-parametric tests and correlation. Methods specially adapted to pocket calculators.

"The ability to put symbols in sequence may well be one of the greatest advances in man's development. . . . This excellent and attractive volume will give you an idea into which category an article or projected article fits. The ink you save may be your own. It is superb value."

O'Donnell, Barry, *British Medical Journal*, 1977, 1, 451.

"... this gem of a practical booklet squeezes the essence of biostatistics into 75 well-written, well-organized pages. Newcomers to the field will like the way obscure concepts are clarified; experts will find the book valuable as a teaching aid."

de Jong, Rudolph H., *J.A.M.A.*, 1977, 237, 1874

PROBLEMS OF CHILDHOOD

From the British Medical Journal

While in paediatrics the spotlight has, perhaps, swung recently on to behavioural and psychological aspects of child development, much of the clinician's time is still spent with acute and chronic physical disorders. Both these aspects of medical problems in childhood were reviewed in a series of *BMJ* articles published early in 1976, and these have now been collected together after further revision by their authors. We hope the collection will prove useful to doctors at all stages of their careers: for children occupy a great deal of the time of every general practitioner, and confidence in their care demands both experience and knowledge.

MEDICINE IN OLD AGE

The series of twenty two articles published in the *British Medical Journal* have been collected in book form as a convenient source of reference for general practitioners. The emphasis is on remedial mechanisms, and the use that can be made of psychogeriatric and social services in keeping the elderly healthy and relatively independent members of the community.

British Council Medical Courses

for specialists living outside Britain

TUBERCULOSIS

9-21 March 1980 in London

The course will be directed by Dr Wallace Fox of the Medical Research Council Tuberculosis and Chest Diseases Unit, Brompton Hospital, London and Professor D A Mitchison, Honorary Director at the Medical Research Council Unit for Laboratory Studies of Tuberculosis, Royal Postgraduate Medical School, London. The aim of this course is to provide an understanding of the pathogenesis and epidemiology of tuberculosis and other mycobacterial diseases including the three main methods of control of the disease: BCG vaccination, chemoprophylaxis, case-finding and treatment. The course is intended for chest physicians, clinical epidemiologists and public health administrators interested in tuberculosis and leprosy and laboratory workers with a specialist interest in mycobacterial diseases.

Fee including demi-pension accommodation £540.

Please apply by 15 October 1979.

PAEDIATRIC GASTROENTEROLOGY

16-28 March 1980 in Birmingham

The Directors of Studies will be Professor Charlotte M Anderson, Professor of Paediatrics and Child Health, University of Birmingham and Professor A S McNeish, Professor of Child Health, University of Leicester School of Medicine. This course will deal with theoretical and practical aspects of Paediatric Gastroenterology, highlighting recent knowledge, and will include case presentations of particular interest. The course is for those who have a substantial clinical or research interest in paediatric gastroenterology. It will also be relevant to clinicians who have responsibility for establishing or developing paediatric gastroenterology, and to research workers whose major interest is in paediatric gastrointestinal pathophysiology in the broad sense.

Fee including demi-pension accommodation £540.

Please apply by 15 October 1979.

HEAD INJURIES

16-28 March 1980 in Glasgow

Professor Bryan Jennett and Mr Graham Teasdale of the Department of Neurosurgery, University of Glasgow's Institute of Neurological Sciences will direct this course. The course, though primarily for clinicians concerned with the management of head injuries, will cover areas such as epidemiological aspects indicating the method and technique of data collection and analysis used in assessing local needs for the provision of a service for head injuries. This course is intended for neurosurgeons of consultant status but would also be of interest to anaesthetists and accident surgeons who have responsibility for the care of head injured patients.

Fee fully inclusive £530.

Please apply by 1 November 1979.

CALCIUM AND PHOSPHATE METABOLISM

23 March-3 April 1980 in Leeds

The Director of Studies will be Professor B E C Nordin, who is Professor of Mineral Metabolism at the Leeds General Infirmary, in conjunction with Dr M Peacock. The course is designed to provide an understanding of the most important aspects of the clinical physiology of calcium, phosphate, vitamin D and the calcium-regulating hormones as well as a review of the diagnosis and management of metabolic bone and stone disease at the biochemical, physiological and clinical levels. This course is intended primarily for endocrinologists and clinicians with an interest in calcium metabolism and for other scientists entering the field who wish to acquire a broader understanding of its clinical implications.

Fee fully inclusive £410.

Please apply by 1 November 1979.

RADIOISOTOPIC AND LABELLED REAGENT MICROANALYTICAL METHODS

9-28 March in London and Guildford

The course will be directed by Professor E P Ekins, Department of Nuclear Medicine, The Middlesex Hospital Medical School, London. This course is primarily intended to yield a detailed insight into the theoretical basis and practical problems associated with the newer methods of measurement of biologically important substances based on labelled reagents. The course is intended for graduates with some years of experience in laboratory methods preferably including radioactive counting techniques.

Fee including demi-pension accommodation £710.

Please apply by 15 October 1979.

CARDIOVASCULAR AND RESPIRATORY CLINICAL MEASUREMENT

16-28 March 1980 in London and Bristol

The course will be under the direction of Dr P Cliffe, Director of the Department of Clinical Measurement, Westminster Hospital assisted by Dr J P Blackburn, Consultant in the same department. This course is designed to show how modern methods of measurement in medicine are contributing to the improvement of diagnosis and treatment. The course will be related to those branches of the basic sciences which make such measurements possible and will include aspects of the physiology and pathology of systems under discussion. The course is intended for qualified anaesthetists, cardiologists and intensive care clinicians who have more than five years' experience.

Fee including demi-pension accommodation £490.

Please apply by 15 November 1979.

MALIGNANT DISEASE IN CHILDHOOD

11-23 May 1980 in London, Manchester and Oxford

The Director of Studies will be Professor R M Hardisty, Professor of Haematology at the Institute of Child Health. In Oxford, the programme will be organised by Dr G J Draper, Director, Childhood Cancer Research Group, and in Manchester by Dr Patricia Morris Jones, Senior Lecturer in Child Health, University of Manchester. This course in paediatric oncology will be chiefly devoted to recent advances in the subject, including theoretical, experimental and epidemiological aspects, as well as up-to-date information on diagnosis and treatment and the organisation of clinical services. The course is intended for experienced paediatric oncologists and general paediatricians with special interest and experience in malignant disease.

Fee including demi-pension accommodation in London and fully inclusive in Manchester and Oxford £590.

Please apply by 31 December 1979.

ORGANISATION OF TRAINING AND RESEARCH IN ANAESTHESIA

11-23 May 1980 in Cardiff, Sheffield and London

Professor M K Sykes of the Department of Anaesthesia, Royal Postgraduate Medical School, Hammersmith Hospital, London will direct this course. The aim of the course is to introduce course members to British anaesthetists who are endeavouring to improve standards by participating in organisation, teaching or research, and to demonstrate what is being achieved with the available facilities. The course is designed to illustrate the role of the university departments and the various national bodies in the development of anaesthesia within the United Kingdom. This course is intended for Professors, Heads of Departments and others with continuing interest in teaching or research in anaesthesia.

Fee including demi-pension accommodation in London and fully inclusive in Cardiff and Sheffield £560.

Please apply by 15 January 1980.

Further information and application forms are available from local overseas Representatives of the British Council or from the Director, Courses Department, The British Council, 65 Davies Street, London W1Y 2AA, Britain.

DON'T FORGET

As a fast acting diuretic

Burinex^{*} K

bumetanide and slow-release potassium chloride

is unbeatable...

as a potassium
supplement it's
unforgettable

Your patients rarely forget to take their 'water pill' but all too frequently fail to take their potassium supplement if you prescribe it separately.¹ Burinex K solves this problem because Burinex the 'most effective natriuretic agent'² 'coats' the potassium core - to make it truly unforgettable. In addition - because of the shape and size - it's easier to swallow than the most commonly used potassium supplement alone.³

Burinex K in CCF right from the start

1. Brit. Med. J., 618, 2, 1977

2. Acta med. scand., 119, 193, 1973

3. J. Int. Res., 104, 3, 1975

Burinex K is a registered trademark of Lee Laboratories Limited. It is a potent diuretic and should be used with caution. It should be stopped immediately if signs of hypokalaemia or hypotension occur. Patient Leaflet No. 0042/00275
