Dr. Dobell's Annual Reports ON DISEASES OF THE CHEST.

Towards the close of 1875, will be published a com-
plete *précis* of the work of the year in that DEPARTMENT
OF PRACTICAL AND SCIENTIFIC MEDICINE which
includes the Anatomy, Physiology, Etiology, and Thera-
peutics of the THORACIC ORGANS and their immediate
associates.

"Dr. Dobell's Reports on the Progress of Practical
and Scientific Medicine in different parts of the world,"
having been discontinued, in consequence of the scope
of the work making it impossible to confine its extent
and expenses within reasonable limits, the original
design, as announced in 1868, of a DEPARTMENTAL
REPORT has now been resumed, with some modifications
of detail, and arrangements made for a COMPLETE
ANNUAL REPORT ON CHEST DISEASE. Although the
department selected is the widest and most important in
medicine, it will be practicable, by keeping within its
boundaries, to produce such a complete *précis* of all
important work as shall give the reader the whole pith
of the original papers, treatises, etc., etc. Thus, these
Reports, when collected from year to year, will constitute
a most comprehensive, concise, and reliable book of
reference on Chest Disease, and will enable the MEDICAL
PRACTITIONER readily to compare the works of
different authors, instead of relying upon those of any
one, and to see at a glance the latest improvements in
treatment; while to the SCIENTIFIC STUDENT they will
present an epitome of modern discovery and research.

Authors are requested to send abstracts of such parts
of their works as refer to CHEST DISEASE to Dr. Dobell,
84, Harley Street, to whom all Letters, Books, etc.,
should be addressed.

These Reports will be sent by post to SUBSCRIBERS
OF FIVE SHILLINGS per annum (a larger price being
charged to non-subscribers). Subscriptions will not
become due till the Report of the year is ready; but
intending subscribers are requested to send their names
and addresses as early as possible (in the following
form: "I request that you will enter my name as a
subscriber to Dr. Dobell's Annual Reports on Chest
Disease") to Lewis's Medical and Scientific Library,
136, Gower Street, London, W.C.

..... One of the most valuable treatises hitherto pub-
lished on Diseases of the Chest."—*Dub. Med. Journal.*

"We are glad to welcome a second edition of the
thoughtful and practical lectures and papers which are
collected in Dr. Waters's volume. Comprising the
result of many years' careful observation on the subjects
to which they refer, they have a special value to the
pathologist and to the practitioner."—*The Lancet.*
