NEW WORK BY DR. DOBELL.

Consulting Physician (late Senior Physician) to the Royal Hospital for Diseases of the Chest, etc.

On Loss of Weight, Blood-Spitting, and LUNG DISEASE.

"We should be at a loss to name any one in Great Britain whose writings on diseases of the lungs and heart repay earnest study more richly than those of Dr. Dobell. Whatever comes from his pen has that happy combination of personal clinical observation with the 'tradition of learning' which Lord Verulam laid down as the highest quality of medical teaching. This is again admirably illustrated in the work before us."—*Medical and Surgical Reporter* (Philadelphia).
