MANCHESTER UNIVERSITY

CONFERENCE ON PUERPERAL MENTAL DISORDERS

On the 19th and 20th of June, 1980, the Department of Psychiatry of Manchester University will be holding a conference on the mental disorders associated with child-birth. The Department hopes to bring together as many as possible of those actively engaged in research in this field. Among the speakers will be Dr. J. Hamilton, Professor R. Paffenbager, Professor R. E. Kendall, Professor M. Sandler and Dr. R. Kumar.

An invitation to attend the Conference is extended to all those with a special interest in this aspect of mental health; applications for registration should be addressed to Dr. I. F. Brockington, at Department of Psychiatry, University Hospital of South Manchester, West Didsbury, Manchester M20 8LR.

One of the sponsors of the Conference, The Boots Company of Nottingham, have donated a number of places for which no registration fee is required. An early application may receive one of these free places.

DON'T FORGET

As a fast acting diuretic

Burinex^{*} K

bumetanide and slow-release potassium chloride

is unbeatable...

as a potassium
supplement it's
unforgettable

Your patients rarely forget to take their 'water pill' but all too frequently fail to take their potassium supplement if you prescribe it separately.¹

Burinex K solves this problem because Burinex the 'most effective natriuretic agent'² 'coats' the potassium core - to make it truly unforgettable.

In addition - because of the shape and size - it's easier to swallow than the most commonly used potassium supplement alone.³

Burinex K in CCF right from the start

1. Brit. Med. J., 618, 2, 1977

2. Acta med. scand., 119, 193, 1973

3. J. Int. Res., 104, 3, 1975

Burinex (bumetanide) is a potent short-acting diuretic indicated in the treatment of congestive heart failure. Burinex K (0.5 mg bumetanide and 7.5 mmol slow-release KCl) Injection (4 ml and 25 ml ampoules; each ml contains 0.25 mg bumetanide) and Burinex K (0.5 mg bumetanide and 7.5 mmol slow-release KCl) Tablets (250 mg KCl).
Dosage: oral and parenteral normally 1 mg. Higher doses may be used in resistant oedema, for long-term maintenance therapy of CCF. Burinex K is usually given as 2 tablets O.M. **Contra-indications:** Hepatic coma and severe electrolyte disturbances. Burinex K should not be used with potassium sparing agents. **Adverse reactions:** Occasional skin rashes and minor gastric upset. **Precautions:** Burinex may potentiate antihypertensive therapy and rarely, may affect carbohydrate metabolism. Periodic electrolyte checks are advisable on long-term therapy. Burinex K should be stopped immediately if signs or symptoms of bowel ulceration appear. Product Licence No: 0043/0027B
