Notice to Subscribers

"BMJ"—Issues Published out of Sequence

Owing to recent industrial action taken by a section of the printing industry subscribers will have experienced problems in receiving their *British Medical Journal*.

Unfortunately the issue dated 5 April 1980 has not yet been published, but it is hoped to produce this by mid-June. The issues dated April 12 to May 31, 1980 were published outside the United Kingdom and therefore considerable delay and irregularity in despatch occurred. The June 7 issue was unaffected by delays.

We are pleased to announce that the dispute is now settled and normal despatch has been resumed.

We apologise for the trouble and inconvenience you have been caused.

The combination of
simple language and straightforward
line drawings has made the

ABC OF OPHTHALMOLOGY

one of the most popular series
of articles in the Medical Practice section
of the British Medical Journal.

All the common problems are covered -
visual defects, squints, glaucoma and
cataracts - together with detailed
instruction on examination, diagnosis
and management.

The articles
have now been
collected into book
form - in exactly
the same format
as they appeared in
the BMJ -
price: Inland £2.50;
Overseas US\$6.25
(Inland £2.00;
Overseas US\$5.00
for BMA members).

FIGHT BACK AGAINST CANCER

It is good to remember that most people live their lives untouched by any form of cancer.

But as all too many are aware, cancer is something that casts its shadow far beyond those it directly affects. That is why so many people think it right to help the urgent work of the Imperial Cancer Research Fund.

From our discoveries in the past has come much of today's hope for sufferers. To go forward with our research for future alleviation, we ask *your* help in the present.

Halcion[®]

(triazolam)

3010 Patient UK Study

Treatment for Insomnia Under Monitored Release Study Protocol

HALCION PERFORMANCE

Performance

Halcion was shown to be as effective at the end of therapy as at the beginning with an 85% level of efficacy, thus demonstrating no significant development of tolerance. 90% of 'new' patients found Halcion effective. Dosage recommendation was 0.25mg (normal adult dose) or 0.125mg (geriatric patients) taken at bedtime.

HALCION PREFERENCE

Preference

Of 1299 patients who took a hypnotic previously, 811 preferred Halcion. Halcion was significantly preferred to nitrazepam, flurazepam, temazepam and diazepam.

HALCION SAFETY

Safety

Halcion was well tolerated and side effects generally were not severe. Most commonly reported side effects included drowsiness 2.2%, headache 1.8% and dizziness 1.7%.

Prescribing Information: Indications: For treatment of insomnia including anxiety-induced insomnia. **Dosage and Administration:** Usual adult dose one 0.25mg tablet at bed-time. For geriatric patients initial dose is 0.125mg which may be increased to 0.25mg if necessary. Prolonged administration is not necessary or recommended. **Contraindication:** Known hypersensitivity to benzodiazepines. **Precautions, Warnings:** Concomitant administration with CNS depressants including alcohol may result in accentuation of their effect. Safety for use during pregnancy has not yet been established. Caution should be exercised in treating depressed patients. **Side Effects:** Drowsiness, dizziness, amnesia and impaired co-ordination may occur. Side effects are usually dose-related. **UK Availability:** 0.25mg powder blue tablets and 0.125mg lavender tablets in bottles of 100. **Product Licence Nos:** 0.25mg 0032/0058. 0.125mg 0032/0063. Information adapted from Triazolam Monitored Release Study (UK) January to September 1979. Data available from Upjohn Limited.

NATRILIX[®]

indapamide

a primary antihypertensive agent

Natrilix offers a simple, effective means of controlling blood pressure both in newly diagnosed and in poorly controlled patients with mild to moderate hypertension

Prescribing information

Presentation

Pink biconvex sugar-coated tablets each containing 2.5 mg indapamide hemihydrate.

Uses

For the treatment of hypertension.

Dosage and administration

Adults

The dosage is one tablet daily to be taken in the morning.

Children

There is no experience of the use of this drug in children.

Contra-indications, warning, etc.

There are no absolute contra-indications to the use of Natrilix but caution should be exercised when prescribing it in cases of severe renal or hepatic impairment. As with all new drugs, the administration of Natrilix should be avoided during pregnancy although no teratological effects have been seen in animals. At doses higher than that recommended, Natrilix has a diuretic effect, therefore it is not recommended to prescribe it with a diuretic agent which may cause hypokalaemia. Also, slight weight loss has been reported in some patients taking Natrilix. Reported side effects have included nausea and headache,

but they are generally uncommon and mild in nature.

Serum urate levels may rise slightly but there is no evidence that glucose tolerance is adversely affected.

Box of 30 tablets.

Product licence number 0093/0022.

NATRILIX is available as:
FLUDEX[®] in Africa, Belgium, France, Holland, Portugal, Switzerland.
NATRILIX[®] in English speaking Countries of Africa, Brazil, Central America, Germany, Ireland, Italy, Middle East, South East Asia, United Kingdom.
TERTENSIF[®] in Spain.
NATRIX[®] in Korea.

Selective

*
'Very few lower gastrointestinal disorders occurred. This, in all probability, reflects its selective antibacterial activity which limits drug disturbance of the normal colonic and vaginal flora.'³

Effective

'In our clinical trials mecillinam achieved a cure-rate of over 90% at 2 weeks in patients with urinary-tract infections.'¹

'The original bacterial strain in the urine was eradicated in 100% of the cases.'²

Low Toxicity

'Mecillinam has a novel mode of action but shares the penicillins' low toxicity.'⁴

'...the data establish that pivmecillinam is a safe and potent drug in the treatment of urinary tract infection.'⁵
