Schiller's minis have acquired a bigger brother: The MSG-1 Compact ECG Printer and Monitor

Schiller's two minis, the Miniscope MS-2 and Minigraph MG-1, have conquered the big wide world. Tens of thousands are on duty in hospitals, doctors' practices, ambulances and other emergency vehicles, where they are performing yeoman service day after day. Their integrated electrode tripod permits instant diagnostics, while all classical derivations are made possible in addition by a five-core cable. The robust design of all electronic elements makes for easy and safe handling of the instrument.

Thanks to its batteries it can also operate independently of a mains outlet.

The MSG-1 combines all the advantages of the two original minis: ECG printer and ECG monitor, electrode tripod and extremity leads, battery and mains operation, digital pulse rate display, simplicity of handling and operational safety. With its modest weight of 74 ounces (2100 grammes) it produces a performance similar to that of large cardiac diagnostic stations. And at a price which no other instrument of its kind can match.

Cyprus

WINTER WITH THE GODS

Your Winter break is precious. So go to Cyprus for certain sunshine in January or February. Cyprus is one of the warmest spots in the Mediterranean, Aphrodite's birthplace, a magical island where everybody pampers visitors.

Send for the special Winter brochure. See why Cyprus is your best choice for '81 with its legendary beaches, lively nightlife, good hotels where hospitality is a way of life, and low cost of living. You'll find that car hire rates are among the lowest in the world, that English is spoken everywhere and that wine and food are cheap – and delicious. Book early for your 7, 10 or 14 days with the gods.

FREE new Winter brochure.

Please send me my copy and show me how much Cyprus has to offer this Winter.

THE FIRST YEAR OF LIFE

Recent research has vastly improved our understanding of a child's development in the first year of life. In particular, assessment of normal progress is now much more systematic, so that deviations from the normal are recognised earlier

Dr. Bernard Valman's illustrated account of current methods of examination, assessment and management of the medical problems of early infancy will prove invaluable to all concerned with small babies.

The articles have now been collected into book form in exactly the same format as they appeared in the BMJ.
Price: Inland £5.00;
Overseas US\$12.50
(Inland £4.50;
Overseas US\$11.25 for BMA members)

MARITAL PATHOLOGY

Divorce is becoming increasingly common:
at current rates about six million people in Britain
will divorce before the end of the century.

Every doctor and health worker will have to deal
with the diverse effects of marital unhappiness.

This book discusses clearly and concisely reasons
for marital misery, its effects on the health of
the family, and how counsellors can help. This
book will benefit all who have to deal with these
problems.

Price: Inland £1.75
Abroad US\$5.00

Payment must be enclosed with order or a surcharge
of 50p will be made for rendering invoices and
statements.

MARITAL PATHOLOGY

J DOMINIAN

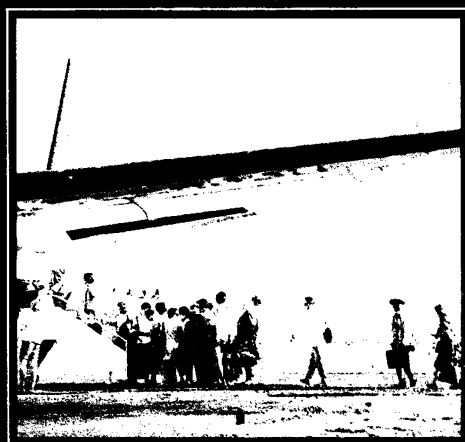

From the British Medical Journal

The Question: Reliable Blood Glucose Values. Anywhere, Anytime.

Reliable blood glucose values
are a fundamental part of
diabetes control.

The Answer: Haemo-Glukotest® 20-800*

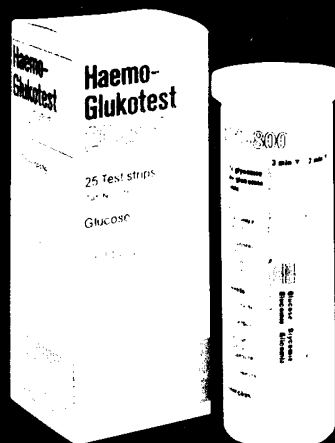

*marketed in some countries as **BM-Test-Glycemie 20-800** or **Chemstrip® bG**

- Simplest possible test procedure
- No meter required
- Larger range than any other blood glucose test strip (20-800 mg/100 ml, 1-44 mmol/l)
- No need to rinse with water
- Stable reaction colour
- Long shelf-life – even after vial has been opened

DON'T FORGET

As a fast acting diuretic

Burinex^{*} K

bumetanide and slow-release potassium chloride

is unbeatable...

as a potassium
supplement it's
unforgettable

Your patients rarely forget to take their 'water pill' but all too frequently fail to take their potassium supplement if you prescribe it separately.¹ Burinex K solves this problem because Burinex the 'most effective natriuretic agent'² 'coats' the potassium core - to make it truly unforgettable. In addition - because of the shape and size - it's easier to swallow than the most commonly used potassium supplement alone.³

Burinex K in CCF right from the start

1. Brit. Med. J., 618, 2, 1977
2. Acta med. scand., 119, 193, 1973
3. J. Int. Res., 104, 3, 1975

Burinex (bumetanide) is a potent short-acting diuretic indicated in the treatment of oedema. Available as Burinex Tablets (1mg and 5 mg), Burinex Injection (4 ml and 25 ml ampoules; each ml contains 0.25 mg bumetanide) and Burinex K (0.5 mg bumetanide and 7.7 mmol slow release KCl).

Dosage: oral and parenteral normally 1 mg. Higher doses may be used in resistant oedema, for long-term maintenance therapy of CCF. Burinex K is usually given as 2 tablets O.M. **Contra-indications:** Hepatic coma and severe electrolyte disturbances. Burinex K should not be used with potassium sparing agents. **Adverse reactions:** Occasional skin rashes and minor gastric upset. **Precautions:** Burinex may potentiate antihypertensive therapy and rarely, may affect carbohydrate metabolism. Periodic electrolyte checks are advisable on long-term therapy. Burinex K should be stopped immediately if signs or symptoms of bowel ulceration appear. Product Licence No: 0043 0027B
