TODAY'S TREATMENT/4

The drugs that we use today are increasingly potent, dangerous, and expensive, and every doctor should have some understanding of clinical pharmacology and drug-induced diseases. Both these subjects, which have been badly taught in medical schools, are covered comprehensively in this new book, which consists of articles taken from the *BMJ*. Also included are articles that provide a clear and up-to-the-minute introduction to anaesthetics.

ABC OF EAR NOSE AND THROAT

Diseases of the ear, nose and throat account for a substantial proportion of all consultations in general practice; they cause time off work and, particularly in children, a great deal of misery and discomfort.

Mr. Harold Ludman's illustrated articles on the common problems of ENT provide the busy clinician with a practical and reliable guide to their assessment and management.

These articles have been collected together in book form in the same format as they appeared in the BMJ.
