over3 million prescriptions world-wide:

the new beginning in antifungal therapy.

can now be treated effectively *and* conveniently. Typically, in recurrent *Candida* vaginitis, 2 oral tablets once daily for 5 days is all it takes today to effectively cure the problem.

Full prescribing information available on request:

the drug discovery company

B-2340 Beerse, Belgium

Prescribing Information

Presentation: white, flat, half scored uncoated tablets marked. Janssen: on one side and K/200 on the reverse. Each tablet contains

Uses: Neoral is an orally active antimycotic for the treatment in adults of vaginal candidosis, superficial and systemic mycoses including derimatophytic and cysts infections of the skin, hair annalis, veast infections of the mouth and G. I-tract. Along maintenance treatment of systemic mycoses and chronic mucoutaneous candidosis and prophylaxis in a trisk. Pattents in children: systemic mycoses and

Side-effects, precautions, contra-indications: contra-indicated in pregnancy. For maximal absorption Nitorial should be taken with meals. The use of agents which reduce astrict acidity faint cholinergic drugs, antacks 4, p-lobckers should be taken not indicated such drugs should be taken not less than two hours after Nitorial Nussea, skin rash, headache and printus may occasionally be observed alterations into liver function tests have occurred in patients on sete too naziote, there changes may be transient. Case of nepart its nave been reported with an incidence of about 1 per 10,000 patients. Some of these may represent an idiosyncratic adverse reaction to the drug. This should be borner in mind in patients on long-term therapy, if a patient develops alundace or any symptoms subgestive of nepartics treatment with tectoonazoles should be stopped. Mild asymptomatic increases of liver enzyme levels, on the other hand, do not necessitate discontinuation of the treatment. Recognized, when given together with cyclosporn a results in increase of lood levels of cyclosporn in a remaining of the product of the two drugs are given concomitantly. Recognized 200 mg once daily produces a transient discrease in plasma levels of gestosterone. During long term therapy at this dose, testosterone levels are usually, not significantly different, John controls, water in manners, symptoms that have been reported.

Prescribing Information

Presentation Vials containing 500mg, 1g or 2g of cefotaxime sodium. Indications Infections before identification of the organism. Infections caused by bacteria of established sensitivity, including chest infections, septicaemia, urinary tract infections, soft tissue infections, obstetric and gynaecological infections, bone and joint infections, meningitis, gonorrhoea. Dosage Claforan is administered i.m. or i.v. Adults: Usually 2-6g daily (see full prescribing information). For infections caused by sensitive Pseudomonas spp., doses of more than 6g daily are usually required. Children: 100-150mg/kg/day in 2 to 4 divided doses. Up to 200mg/kg/day may be given in very severe infections. Neonates: 50mg/kg body weight daily in 2 to 4 equally divided doses. In cases of severe infection, divided daily doses of 150-200mg/kg have been given. Dosage in renal impairment Reduced dosage is only required in severe renal failure (GFR<5ml/min = serum creatinine approx. 751 µmol/l) when, after an initial loading dose of 1g, the daily dose is halved without change in frequency of dosing. Contra-Indications Known allergy to cephalosporins. Precautions Cephalosporin antibiotics may usually be given safely to patients who

are hypersensitive to penicillins, although cross reactions have been reported. Special care is indicated in patients who have had an anaphylactic response to penicillin. Patients with severe renal dysfunction — see previous. Cephalosporin antibiotics at high dosage should be given with caution to patients receiving aminoglycoside antibiotics or potent diuretics such as frusemide. At recommended doses, enhancement of nephrotoxicity is unlikely with Claforan. A false-positive reaction to glucose may occur with reducing substances. Claforan should not be mixed in the syringe with aminoglycoside antibiotics. The safety of Claforan in human pregnancy has not been established. Side effects Adverse reactions are rare and generally mild and transient, but include diarrhoea (pseudomembraneous colitis has been rarely reported), candidiasis, rashes, fever, eosinophilla, leukopenia, transient rises in liver transaminase and alkaline phosphatase, transient pain at the site of injection and phlebitis. Product licence holder and number Roussel Laboratories Ltd., Broadwater Park, North Orbital Road, Uxbridge, Middlesex UB9 5HP, 0109/0074. Package quantities and basic N.H.S. price Vials of 500mg, 1g and 2g in packs of 10. One gram vial £4.95. Date of preparation November 1984.

BRITISH MEDICAL JOURNAL VOLUME 291

Computer Assisted Radiology/ Computergestützte Radiologie

Proceedings of the International Symposium CAR

Edited by H.U.Lemke, Berlin; M.L.Rhodes, Torrance; C.C.Jaffee, New Haven; R.Felix, Berlin Organized by AMK Berlin

Organized by **AMK Berlin** 1985. 322 figures. XVIII, 724 pages (122 pages in German). Hard cover DM 110,– ISBN 3-540-15520-1

The international symposium CAR '85 – Computer Assisted Radiology – focuses on the fundamental principles of applying computer assisted radiology in diagnoses, therapy and treatment. In addition to discussion of the latest theoretical findings, the papers concentrate in particular on examples of applications in the processing, analysis, visualization, and handling of images in computer assisted radiology.

Computer-Assisted Medical Decision Making

Edited by J.A. Reggia, S. Tuhrim, University of Maryland

Volume 1

1985. 68 figures, 42 tables. XIX, 288 pages (Computers and Medicine) Hard cover DM 92,-. ISBN 3-540-96104-6

Volume 2

1985. 84 figures, 13 tables. XIX, 296 pages (Computers and Medicine) Hard cover DM 98,-. ISBN 3-540-96136-4

These two volumes form a collection of articles on Computer-Assisted Medical Decision Making (CMD) systems. While Volume I concentrates on algorithmic and statistical approaches to building CMD-systems, Volume II focuses on artificial intelligence (AI) techniques and general issues relating to the development of the systems.

Iatrogenic Disorders of the Fetus, Infant, and Child

Edited by E.G. Kassner, State University of New York

Volume

1985. 461 halftone, 20 line figures. XXIV, 401 pages. (Radiology of latrogenic Disorders) Hard cover DM 440,-. ISBN 3-540-90930-3

Volume 2

1985. 651 halftone, 69 line illustrations. XXIII, 500 pages. (Radiology of Iatrogenic Disorders) Hard cover DM 560,-. ISBN 3-540-96005-8

Written for both pediatricians and radiologists, Volume I covers the complications of routine and invasive radiologic diagnosis, trauma, intensive care, and non-surgical modes of treatment. Volume II covers the early and late complications of surgery, focusing on operative treatment of congenital malformations and the "surgical" diseases of childhood.

Diagnostic Imaging in Hemophilia

Musculoskeletal and Other Hemorrhagic Complications

By H. Pettersson, University of Lund; M.S. Gilbert, University of New York 1985. 102 figures. XV, 147 pages Hard cover DM 145,-. ISBN 3-540-13991-5

This book provides a description for both clinicians and radiologists of modern radiology in hemophilia, demonstrating the clinical and pathologic correlation to radiological findings. It covers all organ systems, with particular emphasis on the musculoskeletal and neurological. The authors discuss the possibilities and limitations of all modern modalities of diagnostic radiology, including ultrasound, scintimetry, CT and MRI.

Doctor's Office Computer Prep Kit

By **F.R.Jelovsek**, University of Arkansas 1985. 29 figures. IX, 104 pages Soft cover DM 64,-. ISBN 3-540-96127-5

This book is for the doctor or office assistant who wishes to learn about and prepare for automating a medical practice. It presents a very organized approach to examining current patient data flow and explains what those findings mean in terms of choosing software for both medical and financial functions.

Anaesthesia Essays on Its History

Edited by J. Rupreht, M. J. van Lieburg, J. A. Lee, W. Erdmann

Foreword by T. E. Keys 1985. 76 figures, 28 tables. XXI, 409 pages Soft cover DM 118,-. ISBN 3-540-13255-4

Contents: Introductory Essays. - Pioneers in Anaesthesia. - Development of Techniques. -Regional Developments in Anaesthesia. - The World Organization. - Humanism in Anaesthesia.

Pediatric and Adolescent Obstetrics and Gynecology

Edited by J.P.Lavery, J.S.Sanfilippo, University of Louisville

1985. 106 figures. XIV, 362 pages. (Clinical Perspectives in Obstetrics and Gynecology). Hard cover DM 168,-. ISBN 3-540-96073-2

This comprehensive text provides an understanding of a wide range of diverse material dealing with female development from the moment of delivery in terms of sex differentiation, congenital malformations and possible operative procedures during childhood to physical, endocrine and psychological maturation during adolescence.

Pediatric Ultrasonography

Edited by **G. Kalifa**, Paris 1985. 413 figures in 749 separate illustrations, 17 tables. Approx. 260 pages Hard cover DM 148,–. ISBN 3-540-13085-3

The author's examinations of children, ranging from the newborn upwards, are placed in clinical context and cover the fundamental areas of pediatric ultrasonography. The technique described has already proven effective in the supervision of percutaneous biopsy and drainage and in the management of various diseases such as pancreatitis and urinary abnormalities.

Double Contrast Examination of the Colon

Principles and Practice

By A. Weissman, M. Clot, J. Grellet, Paris Foreword by I. Laufer Translated from the French by R. Chambers 1985. 172 figures. Approx. 170 pages Hard cover DM 115,-. ISBN 3-540-15334-9

The book is unique in its emphasis on the basics of image formation and interpretation. The authors pay particular attention to the importance of the anteroposterior relationships of the colon in determining the distribution of barium and air, as well as to the influence of location on the radiologic appearance of the lesion.

Bladder Cancer

Edited by **E.Zingg**, Berne; **D.M.A.Wallace**, London

1985. 50 figures. XII, 301 pages. (Clinical Practice in Urology). Hard cover DM 170,-ISBN 3-540-13239-2

This book has been written as a practical up-todate guide to the management of all aspects of bladder cancer and is intended primarily for practising urologists and trainees. However, the increasing importance of the multidisciplinary approach to these tumours will make this a useful reference for oncologists, radiotherapists and general surgeons.

Atlas of Positron Emission Tomography of the Brain/Atlas der Positronen-Emissions-Tomographie des Gehirns

By W.-D. Heiss, C. Beil, K. Herholz, R. Wagner, G. Pawlik, K. Wienhard, Cologne 1985. 232 figures. IX, 130 pages. (Text in English and German). Hard cover DM 148,—ISBN 3-540-15636-4

This bilingual and abundantly illustrated atlas of positron emission tomography (PET) of the brain gives an overall impression of the efficiency of this method in demonstrating physiologic and pathologic changes in the central nervous system. Attention has been focused on those methods which are already in widespread clinical use.

Radiology Today

Volume 3

Edited by M.W.Donner, Baltimore; F.H.W.Heuck, Stuttgart 1985. 196 figures, 45 tables. XV, 203 pages Hard cover DM 156,-. ISBN 3-540-13438-7

Disorders of the gastrointestinal and genitourinary tracts are covered in this third volume of the *Radiology Today* series. The use of up-to-date imaging modalities, available in most community hospitals and private practices, in the diagnosis and treatment of such disorders are discussed.

THE KEYNES PRESS

THE PORTRAITURE OF WILLIAM HARVEY

The Thomas Vicary Lecture 1948

器

SIR GEOFFREY KEYNES

WITH AN INTRODUCTION BY

D GERAINT JAMES

THE KEYNES PRESS
BRITISH MEDICAL ASSOCIATION

"Most of us are profoundly interested in knowing what our heroes looked like . . ." In his search for the true likeness of his own hero, William Harvey, Geoffrey Keynes used all his considerable powers of observation and deduction as well as his knowledge of the art of portraiture (he was chairman of the trustees of the National Portrait Gallery) and of the history of medical science. The Portriature of William Harvey is the result of painstaking research combined with intuition, which led to Keynes's discovery of a previously unknown portrait of Harvey as a young man—the Rolls Park portrait.

Originally published in 1948, the complete text is now reissued in a superbly printed and bound edition by the Keynes Press, with new high quality reproduction of the illustrations and a specially commissioned introduction by Dr Geraint James. This edition also includes a catalogue of the portraits, amended and brought up to date by Dr Milo Keynes and Dr Malcolm Rogers, director of the National Portrait Gallery, and appendices in which the fascinating story of the illegal export of the Rolls Park portrait to the United States and its eventual return to the National Portrait Gallery is told by Keynes himself and by Dr William Gibson, who was largely instrumental in its recovery.

Publication date 7 November 1985.

Crown quarto, printed in Fournier on Fineblade cartridge (text) and smooth (plates); xix + 51pp + 32pp plates. Limited edition of 300 copies, price £40 each, including postage.

Order from the Publishing Manager (Keynes Press), BMA House, Tavistock Square, London WC1H 9JR. Please make your cheque payable to the British Medical Journal.

Gynaecology by Ten teachers

Fourteenth Edition

SGCLAYTON, TLTLEWIS and GDPINKER with eleven contributors.

The revision provided in this new edition brings the whole of the current gynaecological practice up-to-date and explains lucidly to students all that they require to know about methods of investigation and treatment against the background of our current knowledge of the physiology, pathology and diagnosis of gynaecological disorders.

ISBN 0713144602 paper 384 pages £9.50 net

Obstetrics by Ten Teachers

Fourteenth Edition

SGCLAYTON, TLT LEWIS and GDPINKER This well-known textbook has been substantially revised to include many new developments in the field of obstetrics, which have taken place over the last few years. The medical student will find there lucid explanations of current management, new techniques and scientific investigation, against a background of basic physiology and anatomy.

ISBN 0713144785 paper 480 pages £11.75 net

A Manual of Neonatal Intensive Care

Second Edition

NRCROBERTON

"The Manual covers all the important aspects of intensive baby care . . . The advice given is clear and precise . . . The layout and production of the book are good, the print is clear, the headings stand out well . . . the topics are easy to find. The figures are clear . . . I can see this manual replacing the more general paediatric pocketbooks carried currently by house staff on neonatal wards, and it could serve as a useful addition to any paediatric ward library." British Medical Journal (Review of previous edition)

ISBN 071314484 X paper 352 pages £12.50 net approx

Muir's Textbook of Pathology

Twelfth Edition

Edited by J R ANDERSON with 24 contributors

... an excellent source of the basic information that all doctors will need as the foundation to their understanding of disease."

The Journal of Clinical Pathology (Review of the eleventh edition)

Substantial revision has been undertaken in the preparation of this new edition.

- Entirely new chapter on the genetic causes
- Two expanded chapters on host-parasite relationships and various types of microbial infection
- Radical revision of the tumour section including an account of the exciting new developments on the role of oncogenes
- Extensive rewriting in evey chapter of the systematic pathology section with an additional chapter on diseases caused by protozoan and metazoan parasites
- Considerable attention given to disease affecting developing countries

ISBN 0713144580 boards 1288 pages 1100 illustrations £29.50 net

Pathology in Surgical Practice

Edited on behalf of The Royal College of Surgeons of England and The Royal College of Pathologists by G J HADFIELD, M HOBSLEY and B C MORSON with 76 contributors

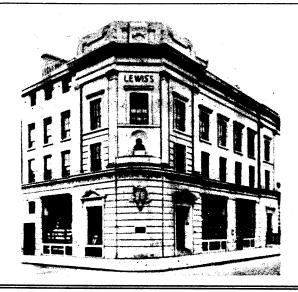

Each chapter in this unique book has been written jointly by a Surgeon and Pathologist and presents their combined approach to the management and treatment of patients. It shows how a knowledge of pathology adds to clinical management in primary treatment, planning of treatment and aftercare. It demonstrates how the surgeon can use the data given by the pathologist and how the therapeutic team. Surgeon and Pathologist, can work together in patient management.

A MAJOR NEW ATLAS

Atlas of Skeletal Dysplasias

Ruth Wynne-Davies, Christine M. Hall and A. Graham Apley

576 pages 1845 illus hardback £95.00

This atlas provides much needed comprehensive information on all the rare but important developmental skeletal disorders. The culmination of approximately ten years' study, it covers patients' clinical and genetic history and progress with complications, together with some indications for treatment. A fresh and up-to-date look at the subject which will be an indispensable reference for orthopaedic surgeons, radiologists, paediatricians, clinical geneticists and others involved in the diagnosis and care of these patients.

Child Health

A Textbook for the DCH

Edited by D. Harvey and I. Kovar

384 pages 58 illus hardback £22.00

A textbook for doctors taking the Diploma in Child Health examination, which provides comprehensive information about children's illnesses, and the prevention of childhood diseases. Special attention has been paid to paediatric problems in general practice, to growth and development, and to developmental problems.

Due in December 1985

A major new text:

Diagnostic Radiology

An Anglo-American Textbook of Imaging

Edited by Ronald G. Grainger and David J. Allison

3 volumes 2304 pages 4500 illus hardback £250.00

A completely new integrated textbook of radiological, and other, methods of organ imaging of *all* body systems, edited by two leading radiologists, with contributions from 85 distinguished radiologists from the UK, USA and Europe. The text is fully comprehensive and discusses *all* the more recently introduced techniques of organ-imaging. It is fully illustrated with high quality facsimile reproductions of radiological and alternative technology.

Lymph Node Biopsy Interpretation

Edited by A. G. Stansfeld

464 pages 510 illus hardback £60.00

This definitive work on the interpretation of lymph node biopsy will be indispensable for histopathologists and those involved in the diagnosis and treatment of lymphomas and other lymph node disorders. The comprehensive text discusses clinical background, aetiology and other relevant information and is illustrated with the highest quality photomicrographs.

Basic Histopathology

A Colour Atlas and Text

Paul R. Wheater, H. George Burkitt, Alan Stevens and James S. Lowe

232 pages extensively illustrated in colour paperback £17.50

A unique atlas and textbook of histopathology by the authors of the highly successful textbook, Functional Histology. It is superbly illustrated with colour photo-micrographs which are linked to concise and informative text.

CONTEMPORARY ISSUES IN INFECTION-4

Septic Shock

Edited by Richard K. Root and Merle A. Sande

281 pages 23 illus hardback £42.00

A practical and clinically orientated volume which discusses topics ranging from pathogenetic mechanisms and newer diagnostic modalities, to rational treatment with both antimicrobial agents and supportive care.

Current Topics in the Management of Respiratory Diseases Volume 2

Edited by Jerome S. Brody and Gordon L. Snider

303 pages 51 illus paperback £27.00

Provides up-to-date and detailed coverage of a range of selected topics of importance in the diagnosis and treatment of respiratory diseases. Subjects covered include: aspects of respiratory failure, patient evaluation, immunology, lung cancer and emphysema.

Monitoring in Anesthesia and Critical Care Medicine

Edited by Casey D. Blitt

748 pages 200 illus hardback £79.00

A major new reference which encompasses the entire field of health monitoring for anaesthetized and critically ill patients. The text covers monitoring of the cardiovascular, respiratory, and central nervous systems, as well as monitoring of the kidneys and urine, temperature, anaesthetic and non-anaesthetic gases and miscellaneous blood measurements.

Essentials of Medical Mycology

E. Glyn V. Evans and James C. Gentles

208 pages illus paperback £14.95

This concise text covers the basic facts in medical mycology and describes the broad spectrum of mycoses which affect man world-wide. Grouping the mycoses into superficial, subcutaneous and systemic infections, it describes the clinical features, epidemiology, mycology, diagnosis and treatment of each individual mycosis.

Recent Advances in Surgery-12

Edited by R. C. G. Russell

288 pages 97 illus paperback £12.95

An up-to-date and wide-ranging survey of current trends in surgery. Each topic is discussed by a leading specialist in the field and the book will be of great interest to all general surgeons, and to candidates for advanced examinations.

ABC OF SPINAL CORD INJURY DAVID GRUNDY JOHN RUSSELL ANDREW SWAIN

In spinal cord injury correct management from the outset is vital to prevent further damage. But what is the correct management? The ABC of Spinal Cord Injury sets it out step by step: how the injured patient should be moved from the scene of the accident; the assessment of his injuries; transfer to a spinal treatment centre; immediate medical problems and later complications; and the specialised nursing, physiotherapy and occupational therapy that are essential in helping the patient and his family adjust to what may be a lifetime of disability. Written by Andrew Swain, of the accident and emergency department, Charing Cross Hospital, and David Grundy and John Russell, of the Duke of Cornwall Spinal Treatment Centre, Salisbury, these articles from the BMJ provide a valuable introduction to a topic that non-specialists need to know more about.

Organic complaints are often the perceptible expression of concealed anxiety.

(Lexotan) helps pinpoint the cause.

Composition: 7-Bromo-1,3-dihydro-5-(2-pyridyl)-2 H-1,4 benzodiazepin-2-one (bromazepam). Indications: Anxiety neurosis as well as tension states and somatic complaints associated with it. Dosage: Average dose for ambulant patients: 1,5-3 mg up to three times daily. It is often an advantage to give the total daily dose as a single dose in the evening. Severe cases, especially in hospital: 6-12 mg two or three times daily. Side effects: With high dosage, fatigue, drowsiness and, more rarely, muscular weakness may occur. Please consult the package insert for fuller details on indications, contraindications and precautions. (Lexotan) is a Trade Mark.
