

# Nizoral<sup>TRADEMARK</sup>

(ketoconazole) (tablets)

over 3 million  
prescriptions  
world-wide:

the new beginning  
in antifungal therapy.

Doctors and patients around the world are discovering the modern simplicity of Nizoral oral therapy. Common but problematic fungal infections

can now be treated effectively and conveniently. Typically, in recurrent *Candida* vaginitis, 2 oral tablets once daily for 5 days is all it takes today to effectively cure the problem.

 **JANSSEN**  
PHARMACEUTICA

the drug discovery company

**Prescribing Information**

**Presentation:** white, flat, half scored uncoated tablets marked "Janssen" on one side and K/200 on the reverse. Each tablet contains 200 mg ketoconazole.

**Uses:** Nizoral is an orally active antimycotic for the treatment in adults of vaginal candidosis, superficial and systemic mycoses including dermatophyte and yeast infections of the skin, hair and nails, yeast infections of the mouth and G.I. tract. Also maintenance treatment of systemic mycoses and chronic mucocutaneous candidosis and prophylaxis in "at risk" patients. In children, systemic mycoses and severe local infections where previous topical treatment has failed.

**Side-effects, precautions, contra-indications:** contra-indicated in pregnancy. For maximal absorption Nizoral should be taken with meals. The use of agents which reduce gastric acidity (anti-cholinergic drugs, antacids, H<sub>2</sub> blockers) should be avoided and, if indicated, such drugs should be taken not less than two hours after Nizoral. Nausea, skin rash, headache and pruritus may occasionally be observed. Alterations in liver function tests have occurred in patients on ketoconazole; these changes may be transient. Cases of hepatitis have been reported with an incidence of about 1 per 10,000 patients. Some of these may represent an idiosyncratic adverse reaction to the drug. This should be borne in mind in patients on long-term therapy. If a patient develops jaundice or any symptoms suggestive of hepatitis, treatment with ketoconazole should be stopped. Mild asymptomatic increases of liver enzyme levels, on the other hand, do not necessitate discontinuation of the treatment. Ketoconazole, when given together with cyclosporin A results in increased blood levels of cyclosporin A. It is important that blood levels of cyclosporin A are monitored if the two drugs are given concomitantly. Ketoconazole 200 mg once daily produces a transient decrease in plasma levels of testosterone. During long term therapy at this dose, testosterone levels are usually not significantly different from controls. In rare instances, gynecomastia has been reported.

# Lister writes again.

"A delight to read, as if one were scanning a letter from a good friend . . . enjoyable and edifying . . ."

—C. Rollins Hanlon, M.D., F.A.C.S.  
Director, American College of Surgeons

Dr. John Lister is one of England's best-loved medical exports. In the 28 years that he served as London correspondent for *the New England Journal of Medicine*, he won thousands of admirers through his monthly column, *By The London Post*.

Now the *Journal* serves up a generous helping of Lister's best: 35 spirited essays drawn from Post columns and more recent writings, and collected in a single, highly-readable volume.

The subjects range widely, from medicine and literacy to

the National Health Service in its formative years.

From "Elephants Galore" and "The Royal Touch" to "Reflections of an Honorary Medical Bureaucrat," the essays overflow with witty, insightful reflections on life, medicine, and politics in Great Britain and the United States.

For Lister faithfuls, it's a rare treat. For newcomers to Lister, a spirited introduction.

*By The London Post*, by John Lister, M.D., 264 pages, softcover. £9.95

# ALCOHOL PROBLEMS

In recent years alcohol problems have increased dramatically and the thinking on them has undergone a revolution. Alcohol Problems brings together two series of articles published in the *BMJ*—the ABC of Alcohol, with its emphasis on straightforward advice for the clinician, and Alcohol and Alcoholism, Dr Richard Smith's more discursive survey of current thinking and controversies. Together they cover both the clinical aspects of managing alcohol problems and the social and political factors that surround them.

## APPROPRIATE TECHNOLOGY

Many of the difficulties of Third World medicine—the effects of poverty, starvation, overpopulation, and political unrest—are beyond the individual doctor's control; but what the Western trained doctor practising in the developing world can and must do is to adapt his practice to compensate for the absence of sophisticated equipment, trained staff, and expensive drugs. Written by doctors and technicians with first hand experience of the problems, *Appropriate Technology* is a guide to the sensible choice and use of resources.

*The British Medical Journal has subsidised this title to make this information widely available at as low cost as possible.*

International Medical Course

## Recent Trends in Ophthalmic Surgery: An International Seminar

13–25 July 1986 in Bristol

The aim of this seminar is to provide an up-to-date review of the advances that have occurred in ophthalmic surgery in recent years, with emphasis on the technical aspects and the complications which ensue.

Modern developments in plastic surgery and tumours of the lid, the surgical management of strabismus, orbital disease, trauma, corneal surgery, retinal disease, glaucoma surgery and ocular tumours will be covered, and there will be live surgical demonstrations and video recordings.

The seminar will be directed by Professor D L Easty of the Department of Ophthalmology, University of Bristol.

The following have agreed to contribute to this seminar

Mr E Arnott, Charing Cross Hospital  
Mr J R O Collin, Moorfields Eye Hospital  
Professor W Foulds, University of Glasgow  
Mr J Kanski, King Edward VII Hospital  
Professor J Rootman, University of British  
Columbia  
Mr J Scott, Addenbrooke's Hospital, Cambridge

The seminar is open to senior practising ophthalmologists.

There are vacancies for 35 members.

Fee £795 Residential

Participants will be accommodated at a hotel within easy walking distance of the newly constructed Bristol Eye Hospital where the sessions will be based.

Applicants are advised to apply before 25 March 1986.

*Further information and application forms can be obtained from your local overseas representative of the British Council or from Courses Department, 65 Davies Street, London W1Y 2AA.*

Council

# WHAT'S A GOOD DOCTOR WITHOUT GOOD DRUGS ?

*Good doctors treat patients, not just diseases or symptoms. Diagnosis is their key to selecting the most appropriate treatment, always weighing risks against benefits.*

*And when it comes to drug treatment, they like to rely on the best products from innovative drug research.*

*They know that ever more effective and safer drugs are indispensable to progress in medicine.*
