

Nizoral

TRADEMARK

(ketoconazole)

tablets

over 5 million prescriptions world-wide.

Oral medication in antifungal therapy:

Doctors and patients around the world are discovering the modern simplicity of Nizoral oral therapy. Common but often problematic fungal infections can now be treated effectively and elegantly.

Typically, in *Candida* vaginitis, 2 oral tablets once daily for 5 days is all it takes today to effectively cure the problem.

JANSSEN
PHARMACEUTICA

the drug discovery company

Prescribing Information

Presentation: white, flat, half scored uncoated tablets marked "Janssen" on one side and K/200 on the reverse. Each tablet contains 200 mg ketoconazole. **Uses:** Nizoral is an orally active antimycotic for the treatment in adults of vaginal candidosis, superficial and systemic mycoses including dermatophyte and yeast infections of the skin, hair and nails, yeast infections of the mouth and G.I. tract. Also maintenance treatment of systemic mycoses and chronic mucocutaneous candidosis and prophylaxis in "at risk" patients. In children: systemic mycoses and severe local infections where previous topical treatment has failed. **Side effects, precautions, contra-indications:** contra-indicated in pregnancy. For maximal absorption Nizoral should be taken with meals. The use of agents which reduce gastric acidity (anti-cholinergic drugs, antacids, H₂-blockers) should be avoided and, if indicated, such drugs should be taken not less than two hours after Nizoral. Nausea, skin rash, headache and pruritus may occasionally be observed. Alterations in liver function tests have occurred in patients on ketoconazole, these changes may be transient. Cases of hepatitis have been reported with an incidence of about 1 per 10,000 patients. Some of these may represent an idiosyncratic adverse reaction to the drug. This should be borne in mind in patients on long-term therapy. If a patient develops jaundice or any symptoms suggestive of hepatitis, treatment with ketoconazole should be stopped. Mild asymptomatic increases of liver enzyme levels, on the other hand, do not necessitate discontinuation of the treatment. Ketoconazole, when given together with cyclosporin A results in increased blood levels of cyclosporin A. It is important that blood levels of cyclosporin A are monitored if the two drugs are given concomitantly. Ketoconazole 200 mg once daily produces a transient decrease in plasma levels of testosterone. During long-term therapy at this dose, testosterone levels are usually not significantly different from controls. In rare instances, gynecomastia has been reported.

Pathways in Surgical Management

Second Edition

Michael Hobsley

This unique book, employing a systematic approach to diagnosis, has proved invaluable both to students of surgery and their teachers. In this revised edition improved investigative techniques have been included throughout. 'This is an extremely well-written book which provides clear exposition of the operational policies adopted by clinicians.' *British Journal of Surgery* of the last edition.

Pathology for the Primary FRCS

D.L. Gardner and D.E.F. Tweedle

The authors have provided an invaluable book which provides candidates with answers to those questions most likely to be asked during the oral (*viva voce*) examination in pathology for the primary FRCS examination, covering the subjects which have been raised in recent years. Although there is no published syllabus for the examination this volume comes close to providing one in listing approximately five hundred subjects.

NEW BOOKS FROM CHAPMAN AND HALL

Cardiopulmonary Bypass

Edited by K. M. TAYLOR

Written by a team of leading international authorities, this book is an up-to-date account of the principles and practice of cardiopulmonary bypass techniques. The main sections of the book deal with cannulation techniques, perfusion, oxygenation, and circuit priming. There are specialist chapters on anaesthesia, paediatric perfusion, intra-aortic balloon counter-pulsation, extra-corporeal membrane oxygenation, gaseous microemboli, and blood biomaterial compatibility.

August 1986 Hb 0 412 24790 9 440pp £37.50

Surgery of Coronary Artery Disease

Edited by D. J. WHEATLEY

Reviews the current practice and role of coronary surgery, giving an outline of the background in anatomy, physiology and pathology, together with a review of medical management of coronary disease and the indications for surgery. The techniques of coronary surgery are covered from a theoretical viewpoint, as well as with a practical illustration of the techniques and instrumentation.

August 1986 Hb 0 412 27010 2 676pp £47.50

Minor Surgery

A text and atlas

JOHN STUART BROWN

A textbook for doctors who wish to undertake their own minor operations. There is now a renewed interest in minor surgery, with more doctors working in purpose-built health centres. This highly illustrated book covers all types of procedures carried out by the author over a period of 25 years.

October 1986 Hb 0 412 27190 7 240pp £45.00

Sports Injuries and their Treatment

Edited by BASIL HELAL,
JOHN B. KING
and WILLIAM J. GRANGE

The separate chapters in this book deal with injuries to specific parts of the body, with examples drawn from a wide selection of sporting activities. The scope of this book is wide, covering the psychological aspects, prevention, emergency treatment and longer term management of the injured athlete. The Foreword has been written by Lord Porritt, Surgeon to H. M. The Queen and to H. M. Household.

November 1986 Hb 0 412 23950 7 c. 500pp £45.00

Encyclopedic Dictionary of Sports Medicine

DAVID F. TVER
and HOWARD F. HUNT

This book is an examination of many of the injuries and illnesses which can occur in physical activities and sports of many kinds. It also describes certain parts of the body that receive a greater proportion of injuries, and gives explanations of an injury and its related symptoms for over 500 definitions.

New from Hodder & Stoughton

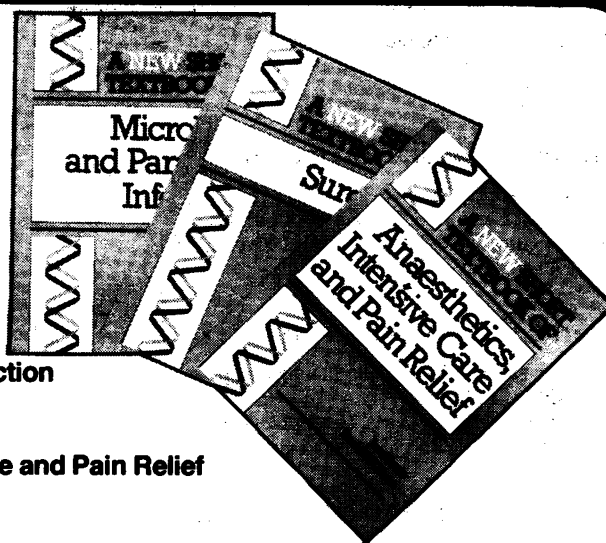

New Short Textbook Series

This series is a new generation of the successful **Short Textbooks** which have been substantially revised and rewritten. Distinctive in an enlarged and more flexible double column format, they are still primarily concise textbooks tailored to the needs of the hard-pressed medical undergraduate.

A New Short Textbook of Surgery
Leonard Cotton and Kevin Lafferty
0 340 37683 X 368pp. Illus. £12.95

A New Short Textbook of Microbial and Parasitic Infection
B I Duerden, T M S Reid, J M Jewsbury and D C Turk
0 340 40178 8 414pp. Illus. February. £14.95

A New Short Textbook of Anaesthetics, Intensive Care and Pain Relief
J C Ponte and D Green
0 340 37681 3 160pp. Illus. November. £8.95

Catechism Series Clinical Guides for Medical Undergraduates

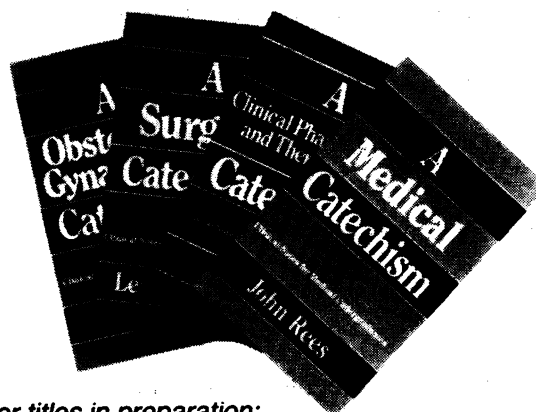

Written in concise, mostly memorisable, note form this series is designed to help medical undergraduates develop a reliable and systematic approach to history taking and physical examination of patients and the subsequent presentation of their findings.

A Surgical Catechism
Leonard Cotton
0 340 36996 5 64pp. Illus. £2.25

An Obstetrics and Gynaecology Catechism
Donald Gibb
0 340 37677 5 80pp. Illus. £2.25

A Clinical Pharmacology and Therapeutics Catechism
Howard Rogers and Roy Spector
0 340 40147 8 80pp. December. £1.95

A Medical Catechism
John Rees
0 340 37676 7 64pp. Illus. December. £2.25

Further titles in preparation:

A Psychiatric Catechism
A Paediatric Catechism

An Orthopaedic Catechism
A Neurological Catechism

A Textbook of Clinical Ophthalmology

R Pitts Crick and R Trimble, Foreword by Peter Wright

Designed as a standard all-embracing source of information on everyday practice for medical students, trainee ophthalmologists and GPs, this important new book presents a wealth of detail on eye care and treatment. The text is profusely illustrated, including three sections of diagnostic colour plates, and is clearly set out in logical sections for private study or for clinical reference.

586pp. Illus. November.
0 340 37678 3 Boards. £29.50.
0 340 37680 5 £15.00.

A Textbook of Clinical Pharmacology

Second edition

H C Gillies, H J Rogers, R G Spector and J R Trounce
Since this successful book was first published there have been inevitable advances in theory and practice and a large part of the text has therefore been completely rewritten for this edition. The whole book has been brought up-to-date, the index expanded and new diagrams added. Although primarily designed for medical undergraduates, it will be invaluable to the postgraduate and the clinician working towards professional examinations.

0 340 37674 0 928pp. Illus. £19.95

Lecturers are invited to write for inspection copies stating teaching address. For further information about these and other titles, please write for our Medical Catalogue at the address below (no stamp required): **Hodder & Stoughton**

Pathology for Surgeons

By **P C H Watt** MD FRCS Senior Registrar, Department of Histopathology, Queen's University of Belfast and **R A J Spence** MD FRCS Consultant Surgeon, Belfast City Hospital

A comprehensive and systematic account of pathology as related to surgical practice. Ideal for those preparing for the pathology section of the final examination for admission to one of the Royal Colleges of Surgeons.

Oct 1986 234 x 156mm 720 pages 58 line and 220 halftone illus hard 0 7236 0808 3 UK net price £35.00

A Synopsis of Endocrinology and Metabolism, 3rd Edition

By **I Ramsay** MD(Edin) FRCP(Edin), Consultant Physician and Endocrinologist, North Middlesex Hospital, London

Now in its third edition, this clear handbook of the tests and expertise employed by the practising clinical endocrinologist today describes in detail tests in routine clinical use in Britain and gives normal values in both S.I. and conventional units of measurement.

July 1986 234 x 156mm 208 pages 13 line and 10 halftone illus soft 0 7236 0852 0 UK net price £15.00

Clinical Paediatric Nephrology

Edited by **R J Postlethwaite** MB ChB MRCP, Consultant Paediatric Nephrologist, Royal Manchester Children's Hospital and Booth Hall Children's Hospital

An up to date resumé of the essentials of paediatric nephrology. Written especially for the non-specialist, this book contains the most up to date details of the current practices and theories from both sides of the Atlantic.

Sept 1986 234 x 156mm 512 pages 27 line and 71 halftone illustrations cased 0 7236 0784 2 UK net price £35.00

The Medical Annual 1986: The Yearbook of General Practice

Edited by **D J Pereira Gray** OBE MA FRCP, General Practitioner, Exeter, Senior Lecturer in Charge, Department of General Practice, University of Exeter

A resumé of the year in general practice.

"... specifically a general practice year-book — though it is much more. In addition to the obvious medico-political update, it contains chapters on themes as various as computerisation, the medical care of prisoners, factors affecting workload, cot-death, the topical AIDS and Reye's syndrome, the Warwick report, 'nakedness in medicine' and ... the therapeutic value of exercise."

RCGP Wessex News, of this edition

"... a splendidly relevant and clearly written book that I can unreservedly recommend ... A stimulating and valuable read."

The Physician, of an earlier edition

March 1986 234 x 156mm 312 pages cased 0 7236 0884 9 UK net price £19.50

Immunocytochemistry: Modern Methods and Applications, 2nd Edition

Edited by **J M Polak** DSc MD FRCP, Professor of Endocrine Pathology, and **S Van Noorden** MA, Senior Scientific Officer, Histochemistry Unit, Royal Postgraduate Medical School, London

The second edition of this comprehensive multi-author account records and reflects the recent rapid advances in the expanding discipline of immunocytochemistry.

May 1986 234 x 156mm 736 pages 61 line, 221 halftone and 68 colour illus cased 0 7236 0870 9 UK net price £65.00

QUANTITATIVE OBSTETRICAL ULTRASONOGRAPHY

by **R.L. Deter**, Baylor University College of Medicine,
R.B. Harrist, University of Texas, **J.C. Birnholz**, St Luke's
Medical Center and **F.P. Hadlock**, Jefferson Davis Hospital

Introducing basic concepts of quantitative methods and their application in obstetrical ultrasound, this book covers techniques for evaluating fetal growth, size, weight and other measurements. Mathematical models for dating, growth curve generation, and weight estimation are provided together with tables of normal values, along with a review of the principal statistical methods used in the field.

0471 79994 7 394pp September '86 £43.25

HEALTH: The Foundations for Achievement

by **D. Seedhouse**, Wolverhampton Polytechnic,
Wolverhampton

A provocative and often controversial discussion of the philosophy of health care, the book clarifies the foundations for health promotion and education, and puts forward a more precise and comprehensive theory of health than has ever been offered before. It should be read by all health professionals, from medical students and nurses to health visitors, medical sociologists and philosophers.

0471 91035 X 120pp September '86 (paper only) £5.95

THE MATHEMATICS OF COMPUTERIZED TOMOGRAPHY

by **F. Natterer**, University of Munster, West Germany

The central subject of this book is the reconstruction of a function from line or plane integrals, with special emphasis on applications in science, radiology and engineering. It not only covers the relevant mathematical theory of the Radon transform and related transforms, but also studies more practical questions such as sampling, resolution, stability and accuracy. Much of the book is devoted to the derivation, analysis and practical examination of reconstruction algorithms, both for standard problems and problems with incomplete data.

COMPUTED TOMOGRAPHY: Assessment Criteria, CT System Technology, Clinical Applications

by **J. Alexander**, **W. Kalender** and **G. Linke**

This book was written to meet the specific needs of radiologists, other medical personnel, and engineers who are frequently confronted with questions regarding medical and technical aspects of computed tomography. It is divided into four areas of interest: Assessment criteria for CT systems, CT system technology, Clinical applications, Cost-effectiveness.

Rheumatic Diseases An Introduction for Medical Students

T. Gibson, MD, FRCP

Consultant Physician, Department of Rheumatology,
Guy's Hospital

Rheumatic Diseases has been written specifically to give medical students a sound basis for future practice, whether in hospital or in the community. The subject is presented as it might be on the ward round and for each disease the history, clinical findings, differential diagnosis, investigations, pathogenesis and treatment are given.

1200 Multiple Choice Questions in Pharmacology Second Edition

Edited by **R. W. Foster**, Department of Pharmacology,
Materials and Therapeutics, University of Manchester

The questions in this book have been drawn from those developed at the University of Manchester over the past twelve years and are designed to test knowledge of every aspect of pharmacology. A comparison volume to Basic Pharmacology.

Softcover 224 pages 0 407 01450 0 September £6.95

Basic Pharmacology Second Edition

Edited by **R. W. Foster**, Department of Pharmacology,
Materials and Therapeutics, University of Manchester

Basic Pharmacology is a textbook designed to give students at the beginning of their study of pharmacology a comprehensive yet simple and concise introduction to the subject. The book has been fully revised and updated for this new edition.

Softcover 416 pages 0 407 00416 5 September £9.95

AUGMENTIN

clavulanate-potentiated amoxycillin

A MAJOR DEVELOPMENT IN ANTIBIOTIC THERAPY

In recent years, the treatment of infection has been complicated by the increasing prevalence of β -lactamase producing strains of bacteria. β -lactamase destroys many oral cephalosporins and penicillins,^{1,2} resulting in treatment failure.

AUGMENTIN is the first antibiotic to utilise Beecham's discovery of the powerful β -lactamase inhibitor, clavulanic acid. This neutralises the bacterial defence, bringing more strains and species within the scope of oral therapy.

- **AUGMENTIN – Broader in spectrum** than oral cephalosporins, co-trimoxazole, ampicillin, tetracycline or erythromycin.
- **AUGMENTIN – Outstanding success** against today's infections.

| Adult infections | No. of patients assessed | Clinically cured/improved | Clinical success |
|--------------------------------------|--------------------------|---------------------------|------------------|
| Upper respiratory tract ³ | 146 | 141 | 97% |
| Lower respiratory tract ³ | 98 | 89 | 91% |
| Urinary tract ³ | 175 | 167 | 95% |
| Skin & soft tissue ^{3,4} | 81 | 75 | 93% |

| Paediatric infections | No. of patients assessed | Clinically cured/improved | Clinical success |
|--|--------------------------|---------------------------|------------------|
| Upper respiratory tract ^{5,6} | 70 | 70 | 100% |
| Lower respiratory tract ⁷ | 28 | 27 | 96% |
| Urinary tract ^{6,7,8} | 61 | 57 | 93% |

PRESCRIBING INFORMATION

INDICATIONS: Chest, ear, nose, throat, genito-urinary, skin and soft tissue infections including those caused by β -lactamase producing organisms.

DOSAGE: Adults and children over 12 years one AUGMENTIN tablet (375mg) three times daily. Children 7-12 years 10ml AUGMENTIN syrup (312mg) three times daily. Children 2-7 years 5ml AUGMENTIN syrup (156mg) three times daily. Children 9 months – 2 years 2.5ml AUGMENTIN syrup (78mg) three times daily. In severe infections these dosages may be doubled. Treatment should not be extended beyond 14 days without review.

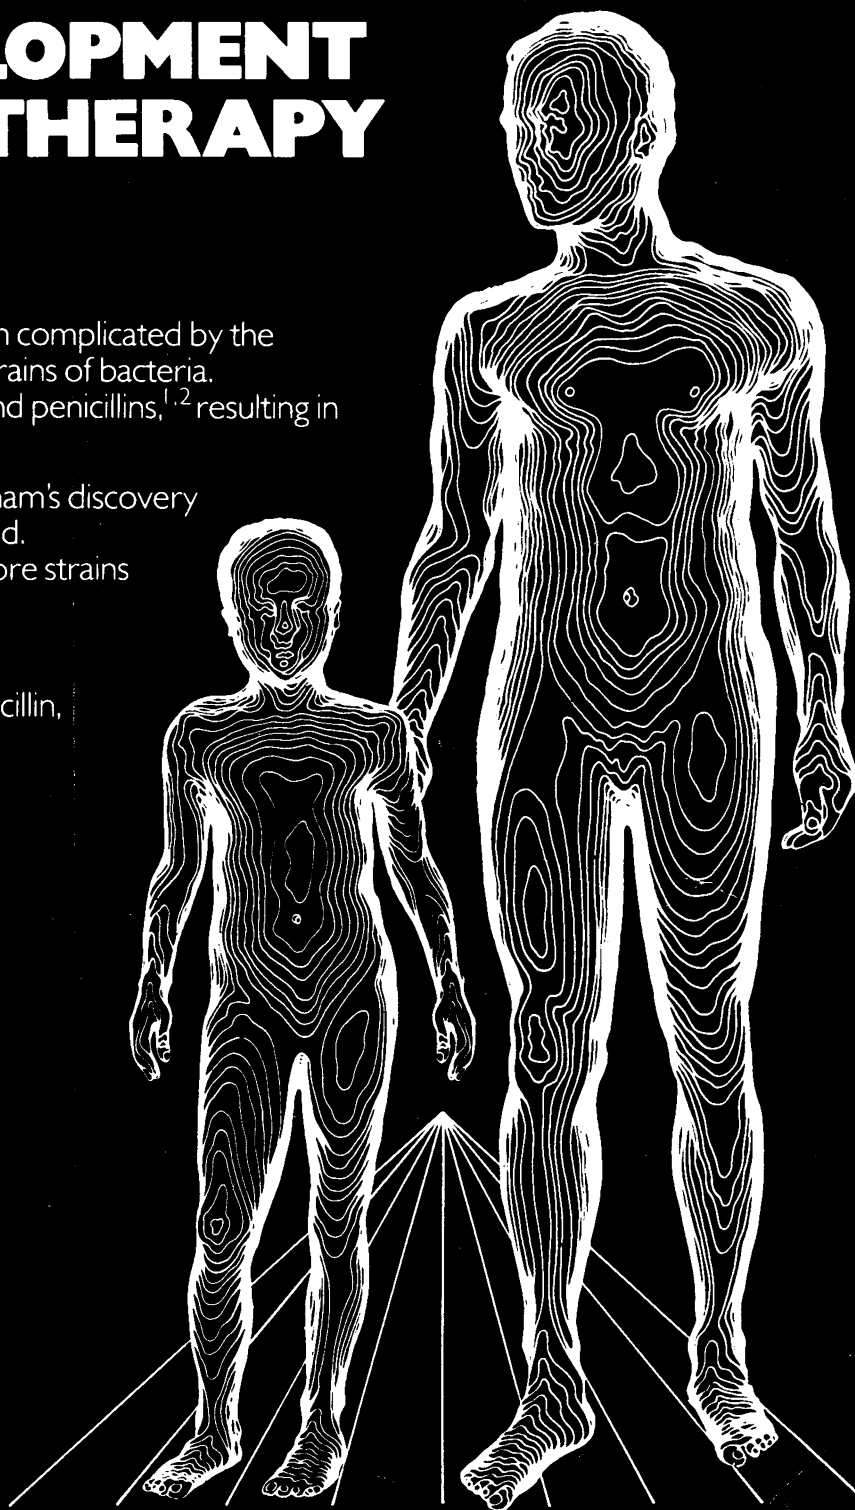

CONTRA-INDICATION: Penicillin hypersensitivity. **PRECAUTIONS:** Safety in human pregnancy is yet to be established. Oral dosage need not be reduced in patients with renal impairment unless dialysis is required. **SIDE-EFFECTS:** Uncommon, mainly mild and transitory, eg diarrhoea, indigestion,

nausea, vomiting, candidiasis, urticarial and morbilliform rashes. If gastrointestinal side-effects do occur they may be reduced by taking AUGMENTIN at the start of meals. **PRESENTATIONS:** 375mg AUGMENTIN tablets each containing 250mg amoxycillin (1) and 125mg Clavulanic acid. (2) 156.25mg AUGMENTIN syrup. Powder for preparing fruit flavoured syrup. When dispensed each 5ml contains 125mg amoxycillin (1) and 31.25mg clavulanic acid. (2) (1) as the trihydrate, (2) as the potassium salt. Not all presentations are available in every country.

GOOD DRUGS DON'T GROW ON TREES

*In the prehistoric days of medicine
some drugs could be found
growing on trees.
Today that's a bit different.*

*The therapeutic drugs of our times
are being unmasked from nature
rather more scientifically.*

*By thorough bio-medical research
into the fundamental processes of life.
By studying exactly why and how
these processes sometimes go wrong.*

*And so nature shows man where and how
he can intervene and defend himself.*

*With precision drugs that will selectively
and safely correct what went wrong.
Today's drugs grow from man's scientific
knowledge of nature —
but no longer on trees.*
