

In vaginal candidosis: Nizoral

TRADEMARK

ketoconazole

*the elegant way
to treat an inelegant problem*

**2 oral tablets
once daily
for 5 days
is all it takes
today
to effectively
cure
the problem**

© JANSSEN PHARMACEUTICA 1986

Remember:
oral convenience improves patient compliance and so reduces the chance of relapse.

Presentation: white, flat, half-scored uncoated tablets marked "Janssen" on one side and "K 200" on the reverse. Each tablet contains 200 mg ketoconazole. Dosage (for vaginal candidosis only): two tablets (400 mg) once daily for 5 days. For maximal absorption Nizoral should be taken with meals. Nizoral is contra-indicated in pregnancy. Precautions: the use of agents which reduce gastric acidity (anti-cholinergic drugs, antacids, H₂-blockers) should be avoided and, if indicated, such drugs should be taken not less than 2 hours after Nizoral. Ketoconazole, when given together with cyclosporin A results in increased blood levels of cyclosporin A. It is important that blood levels of cyclosporin A are monitored if the two drugs are given concomitantly. Side-effects: nausea, skin rash, headache and pruritus may occasionally be observed. Alterations in liver function tests have occurred in patients on ketoconazole; these changes may be transient. Cases of hepatitis have been reported with an incidence of about 1 per 10,000 patients. Some of these may represent an idiosyncratic adverse reaction to the drug. This should be borne in mind in patients on long-term therapy. If a patient develops jaundice or any symptoms suggestive of hepatitis, treatment with ketoconazole should be stopped. Mild asymptomatic increases of liver enzyme levels, on the other hand, do not necessitate discontinuation of the treatment. Full prescribing information available on request.

TIME'S RUNNING OUT!

The next British Medical Association Clinical Congress is being held in Kuala Lumpur between 12/16 October 1987.

As a member of the BMA you are invited to participate in the Congress and benefit from the price guarantee which is available for all bookings made and paid for in full by 28 February 1987.

Malaysia is a beautiful country situated north of Singapore and south of Thailand, between the Indian Ocean and South China Sea. This location results in a warm tropical climate which offers beautiful resort beaches such as Penang and Kuantan, contrasting with the cool and invigorating resorts of the Cameron and Genting Highlands.

The high quality of the scientific programme is assured as many eminent speakers from the United Kingdom will be participating, along with leading specialists from the Malaysian Medical Association. We are also invited to join with the 21st Malaysia/Singapore Congress of Academic Medicine in Kuala Lumpur in a joint Session on the subject of 'Tropical Medicine' taking place on the last morning of our meeting.

Fishley Sebley Associates, the official travel agency appointed by the BMA, have put together a choice of 9 travel programmes which feature many choices of pre and post congress tours. **PRICES START FROM AS LOW AS £695.00 PER PERSON.**

These tours are featured in a 16 page full colour brochure which is available **FREE OF CHARGE** to you, by sending the coupon below.

The following is a summary of some of the itineraries and prices:

Gateway Kuala Lumpur and Penang

This 17 day itinerary takes you to Kuala Lumpur for the Congress, followed by a relaxing stay in Penang. **From: £925**

Kuala Lumpur and Colonial Malaysia

After the Congress, travel to the cool and peaceful hill resort of Cameron Highlands and a stay at Ye Olde Smoke House, where you can walk, play golf, swim or relax.

From: £875

Malaysia and South East Asia

Either before or after Kuala Lumpur visit Hong Kong and Bangkok.

17 day itineraries from £1295

Malaysia and China

A superb 23 day tour visiting Beijing (Peking), Xian, Guilin and Guangzhou after the Congress.

Inclusive price of £2195

Malaysia and India

Two tours with limited space, featuring the highlights of Moghul India, Delhi, Agra (the Taj Mahal), Jaipur, Udaipur, Fatehpur Sikri, Bombay, before or after the Congress in Kuala Lumpur.

Prices start from only £1335 for 20 days

Malaysia and Australia (or Around-the-World)

This itinerary takes you from Kuala Lumpur to Melbourne and Sydney for a 17 day tour. You have the further option of returning via the South Pacific and United States to complete your Around the World itinerary.

Prices from only £1475

**A clash of personalities,
violent disagreement about
acceptable medical practice . .**

. . . and international mistrust fuelled by press hysteria form the background to *The Fatal Illness of Frederick the Noble* by Sir Morrell Mackenzie, just published in a new edition by the Keynes Press. In the space of eighteen months Mackenzie was knighted, decorated with the Grand Cross of the Hohenzollern Order, vilified threatened, and nearly imprisoned. He wrote this book in his own defence, and was formally censured by the Royal College of Physicians for doing so.

In 1887 Mackenzie, at the time Britain's leading throat specialist, was called in to treat Crown Prince Frederick of Prussia, heir to the German Empire, for a tumour of the larynx. Although it now seems that nothing Mackenzie or the Prince's German doctors could have done would have affected the outcome, their differences of opinion became part of a wider power struggle among various interests at the German court, including supporters of the liberal Crown Prince and his wife (Queen Victoria's beloved daughter "Vicky"), the reactionary Bismarck faction, and the Prince's son, the future Kaiser William II.

Mackenzie's account of the case provides an insight into past medical practice as well as a personal view of a historical tragedy whose consequences for Europe were so disastrous. This Keynes Press edition contains the original illustrations, together with a historical introduction by Jonathan Steinberg, fellow of Trinity Hall, Cambridge, and a medical commentary by Harold Ludman, consultant ear, nose, and throat surgeon, King's College Hospital, London.

Fineblade cartridge (text) and art (plates);
xix + 199 pages + 3 plates; slip case.

Limited edition of 300 copies.

Price: Inland £40.00; Abroad £47.00; USA \$68.00,
including postage (by air abroad).

"Value judgements about food are being made all the time . . .

ABC OF NUTRITION

A STEWART TRUSWELL

. . . they are nearly always subjective and usually wrong."

A Stewart Truswell, Boden professor of human nutrition at the University of Sydney, separates fact from fallacy in the *ABC of Nutrition*, a collection of articles from the *BMJ*. This illustrated guide offers the general medical reader a refreshingly down to earth review of all aspects of nutrition – from anorexia to obesity, infant feeding to dietary guides for the elderly – and will be invaluable for anyone wishing to advise their patients about their eating habits (or even to revise their own).

Chapters include:

- Nutrition for pregnancy
- Enteral and parenteral nutrition
- Vitamins
- Malnutrition in the third world
- Therapeutic diets
- Reducing the risk of coronary heart disease
- Food sensitivity

Price: Inland £4.95; Abroad £6.75/USA\$10.00
BMA members: Inland £4.45; Abroad £6.25/USA\$9.00
(Please quote membership number)
Prices include postage, by air abroad.
Payment must be enclosed with order.

"Truswell . . . has written *the* introductory textbook for students of nutrition at any level. . . . All physicians, medical students, nurses, nursing students, dieticians, dietician students, and those interested in nutrition education should have a copy of this book."

Am J Clin Nutr 1986; 44: 431-2

" . . . it offers . . . an authoritative and down-to-earth review of most aspects of nutrition. . . . the ABC . . . is head and shoulders above any other short synopsis of up-to-date advice on nutrition."

Br Dent J 1986; 161: 128-9

"I for one will recommend this excellent book for medical undergraduates and . . . any general practitioner . . ."

Irish Medical Journal 1986; 79: 203

GOOD DRUGS
DON'T GROW

ON TREES

*In the prehistoric days of medicine
some drugs could be found
growing on trees.
Today that's a bit different.*

*The therapeutic drugs of our times
are being unmasked from nature
rather more scientifically.
By thorough bio-medical research
into the fundamental processes of life.
By studying exactly why and how
these processes sometimes go wrong.*

*And so nature shows man where and how
he can intervene and defend himself.
With precision drugs that will selectively
and safely correct what went wrong.
Today's drugs grow from man's scientific
knowledge of nature —
but no longer on trees.*
