

In vaginal candidosis:

TRADEMARK  
**Nizoral**

ketoconazole

*the elegant way  
to treat an inelegant problem*

**2 oral tablets  
once daily  
for 5 days  
is all it takes  
today  
to effectively  
cure  
the problem**

© JANSSEN PHARMACEUTICA 1986

**Remember:**

**oral convenience improves patient compliance and so reduces the chance of relapse.**

**Presentation:** white, flat, half-scored uncoated tablets marked Janssen on one side and K. 200 on the reverse. Each tablet contains 200 mg ketoconazole. **Dosage** (for vaginal candidosis only): two tablets (400 mg) once daily for 5 days. For maximal absorption Nizoral should be taken with meals. **Nizoral is contra-indicated in pregnancy.** **Precautions:** the use of agents which reduce gastric acidity (anti-cholinergic drugs, antacids, H<sub>2</sub>-blockers) should be avoided and, if indicated, such drugs should be taken not less than 2 hours after Nizoral. Ketoconazole, when given together with cyclosporin A results in increased blood levels of cyclosporin A. It is important that blood levels of cyclosporin A are monitored if the two drugs are given concomitantly. **Side-effects:** nausea, skin rash, headache and pruritus may occasionally be observed. Alterations in liver function tests have occurred in patients on ketoconazole; these changes may be transient. Cases of hepatitis have been reported with an incidence of about 1 per 10,000 patients. Some of these may represent an idiosyncratic adverse reaction to the drug. This should be borne in mind in patients on long-term therapy. If a patient develops jaundice or any symptoms suggestive of hepatitis, treatment with ketoconazole should be stopped. Mild asymptomatic increases of liver enzyme levels, on the other hand, do not necessitate discontinuation of the treatment. Full prescribing information available on request.

# AVIATION MEDICINE

RICHARD M HARDING & F JOHN MILLS

This authoritative and highly readable account of the little known specialty of aviation medicine will interest both general readers and those interested in it as a career.

Comprehensive information on the management of airline passengers with particular medical conditions before, during, and after flight will help doctors faced with deciding whether or not their patient is fit to fly and with coping with a medical emergency in the air while themselves passengers on board an aircraft.

The chapters on the problems of altitude, acceleration, the function of the special senses in flight, special forms of flight, and aviation psychology describe clearly and precisely the physiological and behavioural effects that flight imposes on man.

"... John Mills and Richard Harding ... have succeeded admirably in compressing several gallons into a pint pot, and have managed to make their work interesting ... and eminently readable ... It is highly recommended, and essential reading for all those associated, however slightly, with flying."

*SA Med J* 1984; 65: 786

"It is an interesting and concise introduction to aviation medicine for all of us who travel by air or who give advice to those who do ... Through being written for the broad spectrum of the medical profession, it fills a long neglected need."

*NZ Med J* 1984; 97: 705

# ABC OF ASTHMA

JOHN REES

Though both common and potentially dangerous – sometimes even fatal – asthma continues to be underdiagnosed and undertreated. Yet, as this *ABC* shows, it can be treated effectively with drugs and patients themselves can learn to monitor and control their own disease with a simple peak flow meter.

The *ABC of Asthma* provides a straightforward guide to the recognition, management, and treatment of asthma in adults and children.

Price: Inland £4.00;  
Overseas £5.25/USA\$8.60  
(BMA members: Inland £3.50;  
Overseas £4.75/USA\$7.60)

"This excellent series was specifically designed for the general practitioner to provide an update on our current understanding and management of asthma, and succeeds admirably in this goal . . . The authors have not been afraid to tackle controversial areas, and the discussion on the allergic aspects of asthma is well-balanced."

*Med J Aust* 1984; 141: 756

"This is a very useful and commonsense guide to a condition whose management sometimes leaves much to be desired."

*South African Journal of Continuing Medical Education*  
1984; 2: 155

International Medical Course

## Recent advances in pancreaticobiliary surgery

18 - 24 October 1987  
Glasgow

The Seminar is designed to bring participants up to date with recent advances in the diagnosis and management of patients with pancreatic and biliary disease.

The seminar will deal with recent developments in our understanding of the pathogenesis of both benign and malignant disorders of the biliary system and pancreas.

The seminar will be directed by **Professor D C Carter**, St Mungo Professor of Surgery, University of Glasgow at Glasgow Royal Infirmary.

The Seminar is designed for experienced surgeons interested in new developments in the diagnosis and management of benign and malignant disease of the pancreas and of the biliary system.

There are vacancies for 30 participants.

Fee: £700 residential, £455 non-residential.

The course sessions will take place in the University Department of Surgery in Glasgow Royal Infirmary. Resident participants will be accommodated at a nearby hotel.

Further information and application forms are available from British Council Representatives overseas or from Courses Department, The British Council, 65 Davies Street, London W1Y 2AA.

Council

International Medical Course

## Cutaneous malignancy

28 June - 4 July 1987 in Glasgow

The aim of this course is to provide an update on basic research, clinical recognition and new methods of managing all types of cutaneous malignancy.

The course will be under the direction of **Professor Rona Mackie**, Department of Dermatology, University of Glasgow, who has extensive clinical and research experience in the fields of malignant melanoma and cutaneous lymphoma.

The seminar should be of value to epidemiologists, pathologists, dermatologists, surgeons, plastic surgeons, radiotherapists, oncologists and all others with an interest in skin malignancy. Those with a particular interest in the pathology of cutaneous lymphoid malignancy will have the option of an additional two evening sessions of individual microscopy of the rarer skin tumours.

There are vacancies for 40 participants.

Fee £510 Residential, £360 Non-residential.

The working sessions of the seminar will be held at Anderson College, University of Glasgow. Resident participants will be accommodated at a nearby hotel.

Further information and application forms are available from British Council Representatives overseas or from Courses Department, The British Council, 65 Davies Street, London W1Y 2AA.

# MEDICINE IN OLD AGE

*Second Edition*

## A new look at old age . . .

The need to provide proper health care for elderly patients is an increasing challenge to modern medicine. This second, revised edition of *Medicine in Old Age* brings the general medical reader up to date on recent advances in geriatrics. It includes accounts of the management of dementia, gastrointestinal problems, anaemia, and urinary tract diseases as well as guidance on drug treatment and the specific problems of interpreting laboratory findings in the old. Chapters on rehabilitation and the role of the general practitioner and day hospitals – which have helped to convert mere existence into a full life for many elderly patients – complete a useful introduction to this important subject.

# GOOD DRUGS DON'T GROW ON TREES

*In the prehistoric days of medicine  
some drugs could be found  
growing on trees.  
Today that's a bit different.*

*The therapeutic drugs of our times  
are being unmasked from nature  
rather more scientifically.*

*By thorough bio-medical research  
into the fundamental processes of life.  
By studying exactly why and how  
these processes sometimes go wrong.*

*And so nature shows man where and how  
he can intervene and defend himself.  
With precision drugs that will selectively  
and safely correct what went wrong.  
Today's drugs grow from man's scientific  
knowledge of nature —  
but no longer on trees.*
