# In vaginal candidosis:

TRADEMARK

# The elegant way to treat an inelegant problem ketoconazole

B-2340 Beerse, Belgium

hypertension with this drug requires regular medical supervision. Individuals may react differently to this drug and some patients' ability to drive and to operate machinery may be impaired. This applies particularly at the start of treatment, when changing from one preparation to another and if alcohol is consumed. Mode of action: Adalat is a calcium antagonist and is classified as a coronary therapeutic agent/antihypertensive agent. Dosage; Treatment should be adapted to the individual as much as possible according to the severity of the disease and the patient's response to therapy. Coronary beart disease; Long-term therapy, generally with a daily dose of 3 x 1 capsule Adalat. In some cases the dose can be increased in stages to 60 mg tarsus leaded and the stages of a consultation of 120 mg (between 4 x 2 and 6 x 2 capsules Adalat) in individual as a rest) the daily dose can be temporarily increased to between 80 and a maximum of 120 mg (between 4 x 2 and 6 x 2 capsules Adalat) in individual cases. Hypertension: Daily dose: 3 x 1010 a maximum of 3 x 20 mg (3x 1 to 3 x 2 capsules) Adalat. If particularly rapid onset of action is required in cases of acute high blood pressure (hypertensive crisis) or impending angina pectoris attack, the individual dose is 1 - 2 capsules Adalat (10 - 20 mg) administered sublingually (the capsule should be bitten). In exceptional cases up to 3 capsules Adalat (30 mg). Dosage interval; Where the individual dose is 20 mg, the capsules should be taken at intervals of not less than 2 hours. Interactions with other drugs; Adalat/Antihypertensive cross agents.

concomitant administration may enhance the antihypertensive effect of nifedipine. Adalat/beta receptor blockers: the patient must be monitored carefully during concomitant administration since severe hypotension may occur; development of heart failure has been reported occasionally. Adalat/cimetidine; possible enhancement of antihypertensive effect. Presentations: Adalat: packs with 30, 50 and 100 capsules each containing 10 mg nifedipine.

nifedipine. Bayer AG, Leverkusen, West-Germany.

Co.-No.: 2 w

Do you read its books?

The BMJ regularly publishes collections of articles that have appeared as popular series in the journal, thus providing doctors with books that are comprehensive and handy guides to particular medical – and some non-medical – topics.

### **BMJ** Books

"Wise, witty, readable, full of information, and written by an expert"

ISCO Careers Bulletin, 1984; No 178:62

Learning Medicine is about just that: why, how, and what it is like. Peter Richards, dean of a London medical school, sets out the facts about the entry requirements, selection procedure, and different curriculums offered by British medical schools. Now in a second, revised edition, Learning Medicine gives a clear picture of the life of a medical student and outlines the choices to be made when it comes to later postgraduate training and employment. For sixth formers thinking about a medical career or houseman planning future specialisation, this handbook explains what to look for and how to go about it.

Price: Inland £4.00; Abroad £5.50; USA\$9.50 BMA members: Inland £3.50; Abroad £5.00; USA\$8.50

This book is published as a memorial to Dr Elston Grey-Turner, former secretary of the BMA, profits from its sale going to BMA charities.

A collection of specially commissioned reminiscences by doctors from their experiences in the second world war and their feelings as it came to an end. For some VE Day was a time for celebration, but others were too busy to notice or, as prisoners of war, did not even know it had happned. Often moving, occasionally horrific, sometimes hilarious, these highly personal memories reflect the many aspects of war from a medical viewpoint.

Price: Inland £6.00; Abroad £8.75; USA\$12.50 BMA members: Inland £5.50; Abroad £8.25; USA\$11.50

"...John Mills and Richard Harding...have succeeded admirably in compressing several gallons into a pint pot, and have managed to make their work interesting...and eminently readable... It is highly recommended, and essential reading for all those associated, however slightly, with flying."

SA Med J 1984; 65: 786

"It is an interesting and concise introduction to aviation medicine for all of us who travel by air or who give advice to those who do . . . Through being written for the broad spectrum of the medical profession, it fills a long neglected need."

NZ Med J 1984; 97: 705

Price: Inland £6.50; Abroad £7.50; USA\$13.00 BMA members: Inland £6.00; Abroad £7.00; USA\$12.00

Why are medical journals so dull? Richard Asher, who asked the question, was never dull: good sense, pungent wit, and lively humour were his hallmarks, while his writings on clinical matters, with their combination of lucidity, sympathy, and insight, remain models for all aspiring medical authors. A Sense of Asher, a selection of his writings, was first published in a Keynes Press limited edition and quickly sold out. This paperback version, now in its third reprinting, contains the complete text of the original – commended by critics as a marvellous gift for a doctor's bedside table and enjoyable light reading for anyone in medicine.

Children from ethnic minorities in Britain may suffer from conditions unknown in the general population – diseases of genetic or nutritional origin and tropical or subtropical infestations – and their problems are exacerbated by differences of culture and language. Proper treatment is not only vital for the individual child, but also has a wider effect; it is often through their children that immigrant families first come into contact with medical services, and their subsequent attitude to medical care may be determined by the amount of tolerance and understanding they receive over their children from doctors, nurses, and non-medical staff.

Price: Inland £4.50; Abroad £6.00; USA\$8.50 BMA members: Inland £4.00; Abroad £5.50; USA\$7.50

"... one of the few postwar medical monographs to bear comparison with the pamphlets by doctor writers such as Thomas Parkinson and Thomas Wakley.

Listener 16 Aug 1984: 25.

". . . an admirably well informed, fair minded, and constructive commentary."

Lancet 1984, ii: 438.

". . . superbly researched. . ." World Medicine 1984; 19: 40

'The author describes with clarity and depth conditions in British prisons and the viewpoints of those who provide security and those who provide health care. . . The chapters on prison doctors, ethics, and women in prison are helpful and stimulating to anyone with and interest in improving health services for the incarcerated." NY State J Med 1985: 85: 169-70.

### BMJ Books

If you are intending to prescribe drugs to a woman in pregnancy or the puerperium you must balance risks against benefits: no harm should be allowed to befall the baby because of the drug, but equally no harm must come to the mother and baby because a disease is being inadequately treated. Prescribing in Pregnancy gives you the information on which a clinical decision can be made. Essential reading for doctors who prescribe for women who are, or who may become, pregnant.

This second, revised edition of Medicine in Old Age brings the general medical reader up to date on recent advances in geriatrics. It includes accounts of the management of dementia, gastrointestinal problems, anaemia, and urinary tract diseases as well as guidance on drug treatment and the specific problems of interpreting laboratory findings in the old. Chapters on rehabilitation and the role of the general practitioner and day hospitals - which have helped to convert mere existence into a full life for many elderly patients - complete a useful introduction to this important subject.

The first edition of How To Do It proved a useful and popular guide to those things a doctor needs to know but is rarely taught: how to take an examination, how to interview and be interviewed, how to plan and write up research, how to behave at an inquest. In the second edition the original chapters have been expanded and updated, and there are several more chapters on new challenges - choosing a computer, flying, holding a press conference - and on some older ones not included in the first edition - assessing a job, dealing with a publisher.

PIDEMIOLOGY OR THE JNINITIATED

Reviews of the first edition

. . . all physicians [should] ensure that their hospital library has this book, and that they themselves read it."

Med J Aust 1981; 1: 665

"A reading of this book . . . should provide a sound basis in epidemiological techniques for any intending researcher."

NZ Med 7 1980; 91: 73

The second edition of this popular BM7 handbook has been revised to include further details of epidemiological methods and some of their more dramatic applications, such as the investigations on the Spanish cooking oil epidemic, and AIDS.

Reviews of the first edition. . .

"A very easy to read and understandable book, written for general practitioners, essential for all practice managers, and general practitioners without a practice manager.'

"This is a very comprehensive book, which covers most aspects of all you need to know as an employer, in layman's language."

Practice Outlook January 1985: page 19

"The book guides GPs through all the stages of achieving good staff relations and avoiding management problems.

Medeconomics May 1985: page 93

"The book is easy to read, concise, and extremely good value. It is a must for every practice bookshelf."

J R Coll Gen Pract 1985; 35: 261

The statistical testing of data is indispensable in many types of medical investigation and a help on countless occasions inb clinical practice. This book provides step by step instruction. Subjects covered include standard deviation,  $\chi^2$  tests, t tests, non-parametric tests, and correlation. The book includes sections on Fisher's exact probability test and rank correlation not published in the original BMJ series. Methods specially adapted to pocket calculators.

## **BMJ Books**

#### PRACTISING PREVENTION

How exactly can general practitioners find time in their busy surgeries to start preventive activities? This practical and authoritative book, written mostly by general practitioners, not only tells doctors of all the preventive activities that they and the rest of the practice team might undertake but also spells out which will produce the richest rewards.

Price: Inland £5.95; Abroad £7.50; USA\$13.00 BMA members: Inland £5.45; Abroad £7.00; USA\$12.00

#### **ORGANISING A PRACTICE**

One of the many things that they didn't teach at medical school was how to organise a general practice. Yet good organisation is almost as important as clinical knowledge, particularly for important activities like prevention and audit. This book, written almost entirely by practising GPs, covers most aspects of organisation.

Price: Inland £5.95; Abroad £7.50; USA\$13.00 BMA members: Inland £5.45; Abroad £7.00; USA\$12.00

#### **BRITISH NATIONAL FORMULARY No 13**

Price: Inland £7.10; Abroad £10.10; USA \$17.00

#### **EMERGENCIES IN THE HOME**

General practitioners are often the first doctors to see acutely ill patients, and often in difficult circumstances. This book tells general practitioners straightforwardly what they need to know to deal with such emergencies – both the common and the less common. A specialist and a general practitioner have coopted on each chapter, making each both authoritative and practical.

Price: Inland £5.50; Abroad £7.50; USA \$13.00 BMA members: Inland £5.00; Abroad £7.00; USA \$12.00

#### **BLOOD PRESSURE MEASUREMENT**

J C PETRIE, E T O'BRIEN, W A LITTLER, M de SWIET

Simple guidelines prepared by a working party of the British Hypertension Society set out exactly what must be done to ensure that indirect blood pressure measurement is accurate.

Price: £1.00

#### HISTORY OF THE BRITISH MEDICAL ASSOCIATION (1982) Volume II 1932-1981

By Elston Grey-Turner, CBE, MC, TD, MD, MRCS, LRCP (Secretary, BMA 1976-1979) and F M Sutherland, MA, FLA (Librarian, BMA 1961-1981).

A companion volume to the history of the BMA's first hundred years published in 1932, The History of the BMA Volume II covers the next 50 years. The authors describe the change in the BMA's role overseas, the baffling new ethical problems, and the expansion of the BMA's publishing activities. Their book is packed with fascinating information. Why did the BMA threaten the Sunday Pictorial at the beginning of the second world war? What did the presidents of the royal colleges say in their famous letter to Aneurin Bevan? What was the biggest award ever made to doctors by a Review Body? All these questions, and many more, are answered in this book.

## LOGIC IN MEDICINE

**EDITED BY CALBERT PHILLIPS** 

**BMI** 

You make a clinical diagnosis. Do you ever consider the thought processes by which you arrived at it? Medical students and practitioners are often concerned with examples of diagnostic logic, but seldom consider them in the context of a general philosophy. Is diagnostic logic out on a limb, or is it based on the same principles as logic in general? In Logic in Medicine doctors and philosophers combine to provide a coherent system of diagnostic logic with a broader view of the science and art of reasoning.

The abstract theory of theories has highly practical applications, and the authors explore the uses of computer technology and artificial intelligence systems as well as "fuzzy logic," "relevant logic," and the logic of economics and ethics. A book for all who wish to clear their minds of cant.

Price: Inland £5.95; Abroad £7.50; USA \$11.50 BMA members: Inland £5.45; Abroad £7.00; USA \$10.50 (including postage, by air abroad)

Non-specialists overwhelmed by too many systematic descriptions of individual disease will welcome the new approach of ABC of Dermatology. Here the history, clinical appearance, and pathology of a few common key conditions are discussed and then used as a basis for comparison with other skin diseases. Also dealing in detail with allergic reactions, autoimmunity, acne, and infections, this handbook is fully illustrated in colour, providing a clear guide to assessment and treatment as well as an understanding of the histological changes underlying the clinical presentations.

# Hismanal aster

The antihistamine of exceptional strength Effective from the first to the last day of therapy

Prescribing information

Uses: Hismanal\* is a potent and non-sedative antihistamine indicated for the treatment of seasonal and perennial allergic conjunctivitis, chronic urticaria and other allergic conditions. Dosage and administration: adults and children over 12 years. 10 mg daily Children 612 years 5 mg once daily Children younger than 6 years. 2 mg per 10 kg daily. Hismanal should be taken on an empty stomach Precautions: Hismanal should be used in pregnant women only when in the judgement of the physician the potential benefits outweigh the possible hazards.

Adverse reactions: weight gain may occur during prolonged treatment. Overdose: in case of overdose gastric lavage should be followed by close observation and ECG monitoring as arrhythmias have occasionally occurred after intake of doses in excess of 200 mg.

Full prescribing information available on request
