

In vaginal candidosis:

**TRADEMARK**

ketoconazole

*The elegant way  
to treat an inelegant problem*

2 oral tablets  
once daily for 5 days  
is all it takes today  
to cure vaginal candidosis

**Indications:** Vaginal candidosis. Each tablet contains 150 mg of ketoconazole, a broad spectrum antifungal agent. For maximal absorption Nizoral should be taken on an empty stomach. The use of agents which reduce gastric acidity is contraindicated. If such drugs should be taken not less than 2 hours after Nizoral. Cyclosporin A results in increased blood levels of ketoconazole. If both drugs are given concomitantly, the dose of ketoconazole should be reduced. **Side-effects:** nausea, skin rash, headache, dizziness, taste disturbances. Liver function tests have occurred in patients on ketoconazole; however, these have been reported with an incidence of about 1 per 10,000 patients. Some of these patients have had a reaction to the drug. This should be borne in mind in patients on long-term therapy. In patients with symptoms suggestive of hepatitis, treatment with ketoconazole should be stopped. Mild symptoms, such as elevated liver enzymes, on the other hand, do not necessitate discontinuation of the treatment.

## International Medical Courses

### Scientific advances in medical virology

3-9 September 1989, London

This course is intended to update experienced clinical virologists on recent advances in molecular biological and other scientific advances in the field.

The course will be directed by **Dr P D Griffiths**, Reader in Virology, The Royal Free Hospital School of Medicine, University of London.

The course will be suitable for senior registrars or consultants who wish to be updated on recent advances. The participants should be qualified scientifically or medically, or preferably both.

Fee: £870 residential, £465 non-residential.

### Recent trends in ophthalmic surgery

10-23 September 1989, Bristol

This course will provide an up-to-date review of the latest advances in ophthalmic surgery with emphasis on the technical aspects and the complications which can ensure.

The course will be directed by **Professor D L Easty**, Department of Ophthalmology, University of Bristol. The course is designed for senior ophthalmologists.

Course fee: £565.

Accommodation charge: £505.

### Seminars in trauma management

24-29 September 1989, Belfast

This seminar will cover a different aspect of trauma surgery daily, with didactic presentations in the mornings and clinics, pathological conferences and videos in the afternoons.

The seminar will be directed by **Professor Brian Rowlands**, Professor of Surgery, The Queen's University, Belfast.

The seminar is designed for experienced surgeons with responsibility for trauma management and the planning of services.

Fee: to be announced.

Further information and application forms can be obtained from your local overseas Representative of the British Council or from Courses Department, The British Council, 65 Davies Street, London W1Y 2AA.

### Frontiers in gastroenterology: colorectal disease

1-10 October 1989, Birmingham

The aim of this course is to review the recent advances in aetiology and management of inflammatory bowel disease, diverticular disease and colorectal cancer.

The course will be under the direction of **Dr R N Allan**, Consultant Physician, General Hospital Birmingham, **Professor M R B Keighley**, Professor of Surgery, University of Birmingham and **Mr J Fielding**, Consultant Surgeon, Queen Elizabeth Hospital, Birmingham.

The course is intended for physicians and surgeons with some years' experience in gastroenterology.

Course fee: £475.

Accommodation charge: £420.

### Surgery of the pancreas, liver and biliary system

15-21 October 1989, Edinburgh

This seminar is designed to bring participants up to date with recent advances in the diagnosis and management of patients with hepato-biliary and pancreatic disease. It will also deal with developments in our understanding of the pathogenesis of both benign and malignant disorders of the liver, biliary system and pancreas.

The seminar will be directed by **Professor D C Carter**, Regius Professor of Clinical Surgery, University of Edinburgh with the assistance of **Mr O J Garden**, Senior Lecturer in Surgery.

The seminar is open to experienced surgeons interested in new developments in the diagnosis and management of benign and malignant disease of the liver, biliary system and pancreas.

Fee: £775 residential, £460 non-residential.

The  
British  
Council

**Second Edition**

# ABC OF HYPERTENSION

A short guide to a complex and rapidly developing topic, the second, revised edition of *ABC of Hypertension* reviews up to date information from all recent clinical trials on hypertension and includes the latest recommendations of the British Hypertension Society. With its comprehensive survey of drug treatment – including advice on treating hypertension in pregnancy and in the elderly – this is an invaluable source of facts and guidance for practising doctors and medical students.

**Chapters include**

- Blood pressure measurement in infancy and childhood
- Drug treatment
- Blood pressure reduction in the elderly
- Hypertension in pregnancy
- Detecting hypertensive patients
- Management of hypertension in general practice

**Q: *Where can non-specialists obtain expert advice and information on important medical problems?***

**A: In the *British Medical Journal's* ABC series of practical guides.**

Compiled and written by experts, these short, fully illustrated texts present the essential facts and principles for busy general medical readers who want to be better informed.

# Books from the British M

## ABC OF DERMATOLOGY

**P K Buxton**

Non-specialists overwhelmed by too many systematic descriptions of individual disease will welcome the new approach of *ABC of Dermatology*. Here the history, clinical appearance, and pathology of a few common key conditions are discussed and then used as a basis for comparison with other skin diseases. Also dealing in detail with allergic reactions, autoimmunity, acne, and infections, this handbook is **fully illustrated in colour**, providing a clear guide to assessment and treatment as well as an understanding of the histological changes underlying the clinical presentations.

Price: Inland £10.95; Abroad £13.00; USA\$22.00 BMA members: Inland £9.95; Abroad £12.00; USA\$20.00

## ABC OF EAR, NOSE AND THROAT *Second edition*

**H Ludman**

As any general practitioner knows, diseases of the ear, nose and throat are some of the most common complaints that bring patients to the surgery – children suffering misery and discomfort and adults having to take time off work. In the second, revised edition of *ABC of Ear, Nose and Throat* Harold Ludman gives busy clinicians expert, up to date advice on assessing and managing these conditions.

Price: Inland £5.95; Abroad £7.50; USA\$14.00 BMA members: Inland £5.45; Abroad £7.00; USA\$13.00

## ABC OF AIDS

**Edited by Michael W Adler**

The *ABC of AIDS* provides essential details on the development of the epidemic, management of early HIV infection, tumours, and the respiratory, neurological, and gastrointestinal manifestations. It discusses the treatment of infections and the prospects for vaccines and prevention as well as outlining programmes for counselling, nursing, and the control of infection. Edited by Michael Adler, a leading authority on the topic, the *ABC of AIDS* is a vital guide that no medical practitioner can afford to be without.

Price: Inland £9.95; Abroad £12.50; USA\$21.00 BMA members: Inland £8.95; Abroad £11.50; USA\$19.00

## ABC OF DIABETES *Second edition*

**Peter J Watkins**

Many advances in the treatment of diabetes have been made in the past decade; the outlook for diabetic pregnancy has been transformed; photocoagulation for retinopathy is reducing blindness; and at last diabetic renal disease is receiving some attention. Dr Peter Watkins's articles provide a practical guide to the management of diabetes for non-specialist doctors and nurses. There have recently been several more developments both in understanding the causes of diabetes and improving its management, and this second, revised, edition incorporates the most important of these latest innovations.

Price: Inland £4.95; Abroad £6.50; USA\$11.00 BMA members: Inland £4.45; Abroad £6.00; USA\$10.00

## ABC OF ALCOHOL *Second edition*

**Alex Paton**

One of today's most pressing medical and social problems is comprehensively reviewed in the *ABC of Alcohol*. With an extended introduction by Richard Smith, assistant editor of the *BMJ*, this second, revised and expanded edition brings readers up to date on current approaches to the diagnosis and treatment of alcoholism. Essential reading for all doctors who need to understand the appalling difficulties that this condition creates for patients and their families – and indeed for doctors themselves.

Price: Inland £5.95; Abroad £7.50; USA\$13.00 BMA members: Inland £5.45; Abroad £7.00; USA\$12.00

## ABC OF RESUSCITATION

**Edited by T R Evans**

"... cannot be recommended highly enough ... Do yourself and your patients a great favour – buy it."  
*S A Med J* 1986; 70 x

The emergency treatment of any condition in which the brain fails to receive oxygen is literally a matter of life and death; the sooner it can be started the greater the chance of survival. Prompt action by witnesses of a cardiac arrest or at the scene of an accident can save lives by saving time, but hospital staff often do not possess the skills even in basic resuscitation that might be expected. In this authoritative guide members of the Resuscitation Council (UK) and other invited experts explain the techniques and consider some of the problems that surround this vital aspect of health care.

Price: Inland £4.95; Abroad £6.50; USA\$10.50 BMA members: Inland £4.45; Abroad £6.00; USA\$9.50

## ABC OF 1 TO 7 *Second edition*

**H B Valman**

Practice rather than theory is the keynote of the *ABC of 1 to 7* in its straightforward advice on the diseases, emotional problems, and development disorders of early childhood. This has now been amplified in a second edition which contains new chapters on recurrent headache and child abuse as well as extensive revisions of chapters on sleep problems, bronchial asthma, and primary and community care. The *ABC of 1 to 7* has already become the standard guide for general practitioners, medical students, vocational trainees, and clinical medical officers. The second, revised and expanded, edition brings it fully up to date.

Price: Inland £8.95; Abroad £11.00; USA\$19.00 BMA members: Inland £7.95; Abroad £10.00; USA\$17.50

# Medical Journal – ABC Series

## ABC OF SPINAL CORD INJURY

David Grundy, John Russell, Andrew Swain

In spinal cord injury correct management from the outset is vital to prevent further damage. But what is the correct management? The *ABC of Spinal Cord Injury* sets it out step by step: how the injured patient should be moved from the scene of the accident; the assessment of his injuries; transfer to a spinal treatment centre; immediate medical problems and later complications; and the specialised nursing, physiotherapy, and occupational therapy that are essential in helping the patient and his family adjust to what may be a lifetime of disability. A valuable introduction to a topic that non-specialists need to know more about.

Price: Inland £5.95; Abroad £8.00; USA\$14.00 BMA members: Inland £5.45; Abroad £7.50; USA\$13.00

## ABC OF HYPERTENSION *Second edition*

A short guide to a complex and rapidly developing topic, the second, revised, edition of *ABC of Hypertension* reviews up to date information from all recent clinical trials on hypertension and includes the latest recommendations of the British Hypertension Society. With its comprehensive survey of drug treatment – including advice on treating hypertension in pregnancy and in the elderly – this is an invaluable source of facts and guidance for practising doctors and medical students.

## ABC OF NUTRITION

A Stewart Truswell

"Would that all writers who currently pontificate on nutritional matters could adopt such a style or show a fraction of the intellectual analysis that has gone into this publication."

*Nutrition Bulletin* (The British Nutrition Foundation) January 1987

"Truswell . . . has written the introductory textbook for students of nutrition at any level . . . All physicians, medical students, nurses, nursing students, dieticians, dietician students, and those interested in nutrition education should have a copy of this book."

*Am J Clin Nutr* 1986; 44: 431-2

" . . . it offers . . . an authoritative and down-to-earth review of most aspects of nutrition . . . the ABC . . . is head and shoulders above any other short synopsis of up-to-date advice on nutrition."

*Br Dent J* 1986; 161: 128-9

"I for one will recommend this excellent book for medical undergraduates and . . . any general practitioner . . ."

*Irish Medical Journal* 1986; 79: 203

Price: Inland £5.95; Abroad £6.95; USA\$11.00 BMA members: Inland £5.45; Abroad £6.45; USA\$10.00

## THE FIRST YEAR OF LIFE *Second edition*

H B Valman

Bernard Valman's articles on the first year of life, first published in the *BMJ* in 1979 and then reproduced as a book, have proved invaluable to many doctors and others concerned in the care of children. The second edition of *The First Year of Life* includes changes to bring the book up-to-date and incorporates a much fuller section on whopping cough. The section on contraindications to immunisation has also been revised to take account of the latest guidance.

Price: Inland £6.95; Abroad £8.00; USA\$14.00 BMA members: Inland £6.45; Abroad £7.50; USA\$13.00

## ABC OF SEXUALLY TRANSMITTED DISEASES

Michael W Adler

"This book is recommended for anyone wishing to bring himself up to date with an increasingly expanding speciality . . ."

*J roy nav med Serv* 1984; 70: 187-188

" . . . Professor Adler has successfully provided a clear concise and up to date textbook on sexually transmitted disease . . . His approach, refreshingly positively orientated, deals with the patient rather than the disease, and emphasises the psychological impact on the patient of a diagnosis to which much stigma is still attached."

Price: Inland £4.95; Abroad £6.50; USA\$10.50 BMA members: Inland £4.45; Abroad £6.00; USA\$9.50

## ABC OF PLASTIC AND RECONSTRUCTIVE SURGERY

Dai Davies

With improved illustrations to show the surgical procedures used and the results that can be achieved, this book includes chapters on cleft lip and palate; burns, scars; benign and malignant skin conditions; cosmetic and reconstructive surgery of the breast; and craniofacial and microvascular surgery.

Price: Inland £6.95; Abroad £9.00; USA\$15.00 BMA members: Inland £6.45; Abroad £8.50; USA\$14.00

## APPROPRIATE TECHNOLOGY

Many of the difficulties of Third World medicine – the effects of poverty, starvation, overpopulation, and political unrest – are beyond the individual doctor's control; but what the Western trained doctor practising in the developing world can and must do is to adapt his practice to compensate for the absence of sophisticated equipment, trained staff, and expensive drugs. Written by doctors and technicians with first hand experience of the problems, *Appropriate Technology* is a guide to the sensible choice and use of resources.

Price: Inland £3.50; Abroad £5.00; USA\$8.00 BMA members: Inland £3.00; Abroad £4.50; USA\$7.00

# Books from the British Medical Journal – ABC Series

## ABC OF POISONING Part 1 – Drugs

**John Henry, Glyn Volans**

In this first part of a comprehensive manual Dr John Henry and Dr Glyn Volans deal mainly with poisoning from drugs, but also discuss the management of poisoning in general, giving practical information on diagnosis, laboratory tests, and means of elimination. The book also contains a complete up to date list of all drugs used in the treatment of poisoning.

Price: Inland £5.95; Abroad £8.00; USA\$11.50 BMA members: Inland £5.45; Abroad £7.50; USA\$10.50

## ABC OF COMPUTING

**A J Asbury**

This book aimed at the non-expert, describes some of the uses of computers in medicine; because most doctors' involvement will be indirect, liaising with computer experts rather than designing systems themselves, the book concentrates on concepts rather than detailed descriptions of how computers work.

Price: Inland £6.95; Abroad £8.00; USA\$14.00 BMA members: Inland £6.45; Abroad £7.50; USA\$13.00

## ABC OF HEALTHY TRAVEL Second edition

**Eric Walker, Glyn Williams**

The ABC of Healthy Travel provides the busy practitioner with a concise guide to advising travellers and managing their illnesses. This second, revised edition, reviews the most recent advice about malaria prophylaxis.

Price: Inland £4.95; Abroad £6.75; USA\$11.50 BMA members: Inland £4.45; Abroad £6.25; USA\$10.50

## ABC OF BRAIN STEM DEATH

**Christopher Pallis**

Dr Christopher Pallis has dispelled some of the misconceptions, examined the concepts underlying our ideas of death, and describes the practical aspects of diagnosing brain stem death. The book includes material on the wider aspects of the subject, including some of the neurological controversies.

Price: Inland £6.00; Abroad £7.50; USA\$13.00 BMA members: Inland £5.50; Abroad £7.00; USA\$12.00

## STATISTICS IN PRACTICE

**Sheila M Gore, Douglas G Altman**

This important and authoritative book provides clear information on designing studies, applying statistical techniques, and interpreting studies that use statistics. It can be easily understood by those with no statistical training and should be read by all those who want to keep abreast of new developments.

Price: Inland £8.95; Abroad £11.00; USA\$19.00 BMA members: Inland £7.45; Abroad £10.00; USA\$17.50

**Adalat retard:**  
**comprehensive with**  
**selective effect**

**ADALAT  
RETARD**

**Composition:** 1 sustained release tablet of Adalat retard contains 20 mg nifedipine. **Indications:** 1. Coronary heart disease: Chronic stable angina pectoris (exercise angina), angina pectoris following infarction (except in the first 8 days following an acute myocardial infarction). 2. Hypertension. **Contraindications:** Hypersensitivity to Adalat retard and the whole period of pregnancy. There are no findings on use during lactation. Caution should be exercised in the presence of pronounced low blood pressure (severe hypotension: systolic blood pressure < 90 mmHg). Cardiovascular shock. **Side-effects:** Side-effects generally occur at the start of therapy and are often of a slight and transient nature: facial flush, heat sensation, headache. In isolated cases particularly at higher doses: nausea, dizziness, tiredness, skin reactions, paraesthesia, hypotensive reaction, palpitations and increased pulse rate. Occasionally leg oedema due to dilatation of the blood vessels. Extremely rare: during long-term therapy, gingival hyperplasia which regresses completely once therapy is discontinued; chest pain (which may be angina pectoris-like pain) - where this occurs and a causal connection with Adalat is suspected, therapy should be discontinued. Caution should be exercised with dialysis patients with malignant hypertension and irreversible renal failure with hypovolaemia, since vasodilatation can result in a reduction in blood pressure. Treatment of hypertension with this drug requires regular medical supervision. Individuals may react differently to this drug and some patient's ability to drive and to operate machinery may

be impaired. This applies particularly at the start of treatment, when changing from one preparation to another and if alcohol is consumed. **Mode of action:** Adalat retard is a calcium antagonist and is classified as a coronary therapeutic agent/antihypertensive agent. **Dosage:** Treatment should be adapted to the individual as much as possible according to the severity of the disease and the patient's response to therapy. Dosage guidelines for: Coronary heart disease: Chronic stable angina pectoris (exercise angina), angina pectoris following infarction; hypertension: 2 x daily 1 sustained release tablet Adalat retard. In some cases it may be necessary to increase the dose further to 2 x 2 sustained release tablets (2 x 40 mg). If sufficient therapeutic success is not observed in angina pectoris patients after approximately 14 days of therapy, this treatment should be replaced by the fast-acting (10 mg) Adalat capsule where this is advised by the physician. The tablets should be swallowed whole with a small amount of liquid independently of meals. **Dosage interval:** 12 hours, but in any case not less than 4 hours. **Interactions with other drugs:** Adalat retard/antihypertensive agents: concomitant administration may enhance the antihypertensive effect of nifedipine. Adalat retard/beta receptor blockers: the patient must be monitored carefully during concomitant administration since severe hypotension may occur; development of heart failure has been reported occasionally. Adalat retard/cimetidine: possible enhancement of antihypertensive effect. **Note:** If a particularly rapid onset of action is required for the

treatment of spasms of the coronary vessels (coronary spasm: Prinzmetal's angina, angina at rest) and particularly marked clinical pictures or impending angina pectoris attacks or acute hypertensive crisis, the fast-acting (10 mg) Adalat capsules should be used. Once the situation has improved, an attempt may be made to transfer to Adalat retard tablets. The light-sensitive active substance in the sustained release tablet is protected from light both inside and outside the packaging; nonetheless the tablets should only be removed from the foil immediately before use and should not be broken. **Presentations:** Adalat retard: packs with 30, 50 and 100 sustained release tablets containing 20 mg nifedipine. Hospital packs. Bayer AG, Leverkusen, West-Germany.

his head

**Hismanal** TRADEMARK  
astemizole

**The antihistamine of exceptional strength from the first  
to the last day of therapy.**

**JANSSEN**  
PHARMACEUTICAL  
2340 Beerse, Belgium

**Prescribing information**

**Uses:** Hismanal<sup>®</sup> is a potent and non-sedative antihistamine indicated for the treatment of seasonal and perennial allergic rhinitis, allergic conjunctivitis, chronic urticaria and other allergic conditions.  
**Dosage and administration:** adults and children over 12 years: 10 mg daily. Children 6-12 years: 5 mg once daily. Children younger than 6 years: 2 mg per 10 kg daily. Hismanal should be taken on an empty stomach. **Precautions:** Hismanal should be used in pregnant women only when, in the judgement of the physician, the potential benefits outweigh the possible hazards. **Adverse reactions:** weight gain may occur during prolonged treatment. **Overdose:** in case of overdose, gastric lavage should be followed by close observation and ECG monitoring as arrhythmias have occasionally occurred after intake of doses in excess of 200 mg.
