The brand of iron which provides a good haematinic response in iron-deficiency anaemia—a considerably reduced incidence of side effects and the least toxic form of iron

A double-blind comparison of Ferrodic with ferrous sulphate, both preparations containing 50 mg of ferrous iron + 12.5 mg ascorbic acid, in the treatment of iron-deficiency anaemia, showed that exactly equivalent haematinic effects were obtained with the two drugs. However, 'not only did Ferrodic cause side effects in a significantly smaller proportion of patients than ferrous sulphate, but the severity of such side-effects was also significantly less with Ferrodic.'

(*Practitioner*, 1967, 198, 848)

A very similar double-blind, clinical comparison of Ferrodic and ferrous sulphate has recently been published. The Author's purpose was to confirm the haematinic effectiveness and low incidence of side effects of Ferrodic, in view of its palatability and relative freedom from toxicity. The results again showed Ferrodic to have an equivalent haematinic effect to that of ferrous sulphate but 'side-effects occurred in a significantly higher proportion of subjects who received ferrous sulphate.'

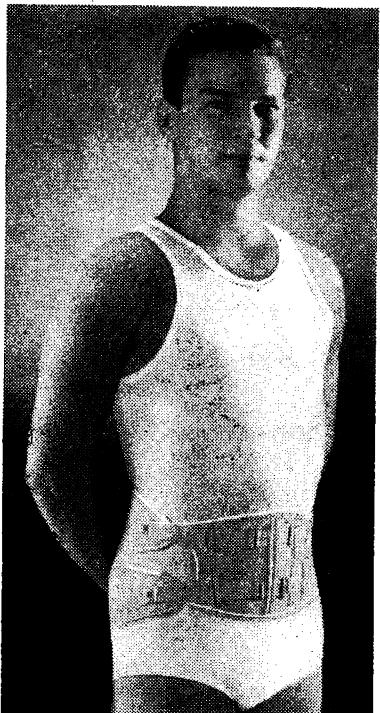

(*J. Therap. and Clin. Res.*, 1967, 1, 4)

FERRODIC TABLETS each contain ferrous iron (as ferrous carbonate) 50 mg and ascorbic acid 12.5 mg and are supplied in bottles of 100 tablets.

The SPENCERFLEX for Men

- ★ Co-relates back and abdominal support
- ★ Allows complete freedom of action
- ★ Protects scar following upper abdominal surgery

Individually designed, cut and made for each patient, this support provides pelvic control, abdominal uplift, freedom for muscular action. Thus, at work or play, or during convalescence, the Spencerflex favourably influences better posture and body mechanics.

Safe because it is made in non-elastic material that will not yield or slip under strain. *Comfortable* because it is individually designed according to the prescribed needs of each patient.

The extra width at back gives exceptional back support. It is light and flexible, with no pressure on prominent part of hip bones.

Designed as an adjunct to treatment following upper abdominal surgery. Especially helpful in early ambulation and where drainage has been maintained for a considerable period. Completely covers and protects the scar without "digging-in" at lower ribs. Relieves fatigue and strain—even that caused by deep breathing and coughing—on tissue and muscles of the wound area. *We know of no other abdominal support for men* which provides these benefits.

Travelling Fellowships

offered by the
Medical Research Council
for the
Academic Year
1968-69

M
R
C

MEDICAL AND SCIENCE GRADUATES, aged 28-40, with several years' postgraduate experience either in clinical medicine or another branch of medical science, are invited to apply for a number of Travelling Fellowships for the academic year 1968/69. The Fellowships include:-

- 6 Medical Research Council Travelling Fellowships
- 5 Sir Henry Wellcome Travelling Fellowships
- 6 United States Public Health Service Fellowships
- 1 Dorothy Temple Cross Research Fellowship
(for research in tuberculosis and diseases of the lung)
- 2 Alexander Pigott Wernher Memorial Trust Fellowships (in ophthalmology and otology)
- 1 Lilly International Fellowship

Successful applicants will be those who are likely to profit from a period of work at an overseas research centre before taking up appointments for higher teaching or research in the United Kingdom.

TENURE

All Fellowships are normally tenable for 12 months but applications for a lesser period will be considered in the case of Alexander Pigott Wernher Fellowships.

STIPEND

Fellowships held in the United States provide basic maintenance allowances of \$4800 to \$6000 a year. In addition certain dependants' allowances are paid. Comparable stipends are paid in other parts of the world. All Fellowships include a travel allowance for the Fellow and a travel allowance for dependants is provided with some of the Fellowships.

LOCATION

United States Public Health Service Fellows and Lilly International Fellows must work in the United States and on the continent of North America respectively. All other Fellows may work at research centres anywhere in the world.

ELIGIBILITY

Candidates must be:

- * normally aged 28-40
- * medical or science graduates with several years' postgraduate experience
- * British Subjects who are normally resident in the United Kingdom
BUT Alexander Pigott Wernher Fellowships are also open to British Commonwealth graduates who wish to study in the U.K.

APPLICATION

If you are interested in any of the above Fellowships please write to Miss F. M. Taylor for further particulars and an application form quoting reference TF B. Telephone enquiries may be made to 01-636 5422, Ext. 107. One application only need be completed as each candidate will be automatically considered for all Fellowships for which he or she is eligible. Completed forms should be returned no later than 1st October 1967 to:

Single-dose Pripsen breaks the threadworm life cycle

Threadworms often infect families, one child can infect the others.

A single dose of Pripsen, taken by each member of the family, can eradicate threadworm infection. Pripsen treats the affected child and protects others against infection. As a precaution against possible re-infection a second dose of Pripsen should be repeated after two weeks.

Pripsen (piperazine phosphate and standardized senna) is also effective against roundworms.

With a once-daily dosage of only 150 mg. ferrous sulphate, 'Feospan' can produce a rise in haemoglobin level of up to one per cent. or more a day. Low dosage once a day and minimal release of iron in the stomach make side effects unlikely to occur. So it's easy to understand why patients—and their doctors—so seldom abandon 'Feospan' therapy.

Triptafen-DA

antidepressant and tranquilliser

“...Triptafen-DA gave significantly better results than amitriptyline.”¹

“After three weeks' treatment, 79 per cent of patients receiving Triptafen-DA were improved or greatly improved as compared with 30 per cent receiving placebo.”²

“...the success rate with “Triptafen-DA” in the present study compares favourably with that reported for imipramine in the M.R.C. trial.”³

“Despite the substantial placebo response discussed, Triptafen-DA brought about an additional improvement which was significantly greater than that obtained in the control group.”⁴

These quotations are taken from four recently published papers which confirm the value of Triptafen-DA in the treatment of depression.

1 This paper (*Brit. J. Psychiat.*, 1967, **113**, 201) is a retrospective study of depressed patients treated with Triptafen-DA or with amitriptyline alone. The response rate for amitriptyline alone, 63.4 per cent, is in agreement with reports from other investigators; the rate for Triptafen-DA, 95.2 per cent, is by any standards exceptionally high.

2 This paper (*Brit. J. Psychiat.*, 1967, **113**, 195) describes a double-blind controlled trial of Triptafen-DA against placebo in the treatment of 129 patients suffering from depressive illness. After 3 weeks' treatment 79 per cent of patients treated with Triptafen-DA showed moderate to marked improvement, compared with 30 per cent of patients treated with placebo.

3 This is a report (*J. Irish med. Ass.*, 1966, **59**, 129) of a preliminary trial, in various types of depressive illness, of Triptafen-DA. Many of the patients needed treatment for only two weeks, and the results reported are those obtained at that time. Moderate improvement, marked improvement and clinical remission are grouped and show that 17 of 26 patients with endogenous depression, 12 of 15 patients with endogenous depression and agitation, and 5 of 8 patients with neurotic depression were improved or cured.

4 The final paper (*Medical Digest*, 1967, **12**, 71), by the G.P. Field Research Unit, describes a double-blind investigation of Triptafen-DA in 70 patients with depressive illness accompanied by anxiety. The results were assessed on improvement observed in 5 main symptoms: depression, anxiety, lack of energy, difficulty in concentration and insomnia. Improvement took place with both preparations but was significantly greater in patients receiving Triptafen-DA, particularly when this was given after a course of placebo treatment.

Indications

DEPRESSION
ANXIETY

PSYCHONEUROSES
PSYCHOSOMATIC ILLNESS

A combined antidepressant-tranquillising action, such as that provided by Triptafen-DA, is established as the treatment of first choice in depressive illness and in psychoneurotic conditions such as anxiety states and menopausal disorders associated with anxiety and depression; also for the relief of the withdrawal syndrome in chronic alcoholism. Most psychoneurotic patients encountered in general practice exhibit symptoms of both depression and anxiety or agitation. The same is usually true of patients suffering from depressive illness regarded as endogenous in origin. In the treatment of such patients it has been stated that “if either the tranquilliser or the antidepressant is used alone, the possibility that the opposite symptom will be exacerbated is a definite risk of treatment” (*Curr. ther. Res.*, 1963, **5**, 310).

Contraindications

Glaucoma; urinary retention; severely-impaired liver function; the concurrent administration of other antidepressant drugs, particularly MAO inhibitors.

Precautions

Triptafen-DA should not be used in conjunction with MAO inhibitors and because of the persistent action of the latter at least 7 days should intervene between their withdrawal and the introduction of Triptafen-DA. Although Triptafen-DA has been shown to be free from teratogenic effects in laboratory animals, it should be used in pregnancy only after consideration of the risks involved in giving any drug to the pregnant patient.

Side effects

Side effects with Triptafen-DA are mild and of the type to be expected of the atropine-like action of amitriptyline (e.g. drowsiness, dizziness or blurred vision, tachycardia and insomnia) or characteristic of the safest of the phenothiazine derivatives (e.g. slight fall in blood pressure, mild tremor or elevated dosage, Parkinsonian symptoms). In most cases these side effects disappear on continued therapy or reduction of the dosage. Idiosyncratic side effects (e.g. pruritus, nausea, diarrhoea and indigestion) have also been reported on rare occasions.

Dosage

In most cases a dose of one Triptafen-DA Tablet or two teaspoonfuls (10 ml) of Triptafen-DA Suspension 3 times a day is recommended. If necessary a fourth similar dose may be prescribed at night.

Presentation

Triptafen-DA Tablets each contain amitriptyline hydrochloride BP 25 mg and perphenazine BP 2 mg; they are available in bottles of 50 and 500. The basic NHS cost of treatment with Triptafen-DA is 4/8d. per week. Triptafen-DA Suspension contains 37.5 mg amitriptyline embonate (equivalent to 25 mg amitriptyline hydrochloride BP) and 2 mg perphenazine BP in each 10 ml. It is available in bottles of 142 ml (5 fl. oz) and 500 ml. Basic NHS cost for a bottle of 142 ml suspension is 7/6d.

Steroids in asthma?

**Give
your asthmatics 'breathing time'
— provide the
benefits of betamethasone . . .**

The efficiency of betamethasone in breaking the vicious cycle of asthma and giving the patient 'breathing time' is well known. A short (usually six day) course produces a rapid and often prolonged remission of symptoms without causing

salt and water retention or affecting potassium balance. Studies have shown that such a course can safely be repeated as often as fifteen times a year*. There can't be many of your patients who would require steroids so frequently.

**... enhanced by
the advantages of solubility**

Betnesol Tablets can be given dissolved in water as a drink—thus there are no solid steroid particles to irritate the stomach and absorption is more consistent. A popular daily dosage for a six day

course is 6,5,4,3,2,1 tablets per day. Just as soluble aspirin is the modern way to prescribe aspirin, so Betnesol is the modern way to prescribe systemic steroids.

guanethidine sulphate B.P.

Prolongs the hypertensive's life expectancy

80-90% of patients respond satisfactorily

Simple, convenient regime for milder hypertension

True drug tolerance or resistance not a problem

Ismelin in milder hypertension

The long duration of action of Ismelin makes possible continuous 24-hour control of hypertension at minimal dosage frequency (once daily if required). The simple, convenient regime is ideal for long-term control in milder states of hypertension, affording steady symptomatic relief with a minimum of side effects.

Dosage

Initial dosage—two 10 mg tablets daily. Frequent adjustment is unnecessary during stabilisation; depending upon individual assessment, intervals between consultations may be up to one month. Should 20 mg daily prove insufficient, increase daily dosage by one 10 mg tablet. As the action of Ismelin is gradual and prolonged, allow at least one week before any increase, to observe full effect. The majority of patients will be symptom-free and adequately controlled on 40 mg daily or less.

Prescribing notes

Ismelin is contra-indicated in the presence of phaeochromocytoma. Side effects attributable to postural hypotension normally reflect overdosage. Patients should be advised to avoid sudden changes of posture or violent exertion, and if morning faintness persists, to reduce the daily dosage by one 10 mg tablet until the next consultation. If diarrhoea is troublesome, reduce or divide dose, or add $\frac{1}{2}$ gr codeine phosphate t.d.s.

Failure of ejaculation has been reported and, rarely, exertional dyspnoea, nasal congestion, shivering, muscle weakness, paraesthesiae (due to latent cerebral arterial insufficiency), aggravation of intermittent claudication, and exacerbation of peptic ulcer. In heart failure, any tendency to fluid retention may be increased. As with any antihypertensive, prescribe cautiously for patients with renal failure and urea retention. Allowance should be made for the antagonistic action of some antidepressants (MAOI), appetite suppressants and stimulants of the amphetamine class if administered concurrently.

PENBRITIN KS

3 way action stops Bacterial Diarrhoea

Penbritin KS contains Penbritin, Kaolin and Sulphadimidine, and has been specifically formulated to provide both symptomatic and bacterial treatment for gastro-intestinal infections.

PENBRITIN KS

eradicates infection in the wall of the intestine

kills organisms in the lumen

consolidates stools, adsorbs toxins and exerts a demulcent effect on inflamed mucosa.

Indications

Bacterial Diarrhoea
Bacterial Food Poisoning
Bacillary Dysentery
Intestinal infections due to sensitive organisms.

Wide Bacterial Cover

Penbritin KS is active against: Salmonellae, Shigellae, E.coli, Strep. faecalis (enterococci), Clostridia, Staphylococci (other than penicillinase-producing strains).

Accepted Antibacterial Agents

Penbritin and Sulphadimidine are well-established B.P. preparations. Both are well absorbed and provide antibacterial activity not only in the lumen but also in the gut wall, the most important site of infection.

Rapid Action

Clinical experience has shown that relief is given often within 24 hours.

Dosage : Adults 20 ml. 6-hourly;
Children 10 ml. 6-hourly.

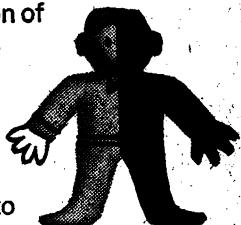

Availability : Bottles of 60 ml.
(Basic N.H.S. cost 8/9 per bottle)

Side-Effects Unlikely

Penbritin KS combines ampicillin and sulphadimidine, two of the safest and most widely used antibiotics. Side effects are unlikely, due to the short duration of treatment.

Contra- indications :

Allergy to penicillin or intolerance to sulphonamides.

Penbritin KS (regd.) is a product of

than meets the eye?

How many cases of obesity have emotional stress as a major underlying factor? Many authorities hold that in *most* cases, overeating is rooted in anxiety, boredom, frustration or similar emotional tensions^{1,2,3,4,5}. Merely curbing the appetite in these cases is unlikely to be of more than limited value^{1,2}—treatment of the obese patient must also compensate for the solace formerly obtained from eating. *Durophet-M* provides this treatment.

Durophet-M contains two constituents—a calmative, methaqualone, to counter underlying tensions, and a highly effective appetite depressant, laevo- and dextro-amphetamine, ratio 1:3. *Durophet-M* provides better treatment for the compulsive overeater than simple appetite depressants because it both controls the appetite and combats the emotional factors present in nearly all cases of obesity^{1,2}.

Genticin is the new bactericidal antibiotic whose unique spectrum and degree of activity includes those organisms hitherto regarded as problem pathogens: *Ps. pyocyanea*, *Proteus* spp., *E. coli*, "Hospital strains" of *Staph. aureus*. Resistant strains have proved to be rare and resistance develops rarely in the presence of adequate concentrations of the antibiotic. Genticin topicals have a low index of sensitisation and are odourless and non-staining in use. They are, therefore, clearly indicated for all bacterial skin infections, particularly when due to single or mixed strains whose identity and sensitivity to antibiotics are unknown.

Dosage should be reduced gradually as hormonal equilibrium is restored.

Formula and Packs

Each tablet contains: Ethinyloestradiol B.P. 0.0044 mg
Methyltestosterone B.P. 3.6 mg
in bottles of 25, 100 and 250 tablets.

The woman who uses an oral contraceptive during her later potential child-bearing years need not fear menopausal problems. But for those not 'on The Pill' when reaching the menopause, a hormone problem remains. *At the menopause three out of four women require hormone replacement.*

Mixogen fulfils their need. The preparation, a finely balanced combination of oestrogen and androgen, acts synergistically to ensure complete relief of all menopausal symptoms. And it does so without recourse to sedatives which—apart from other considerations—fail to deal with the underlying cause of the symptoms.

Codis

when pain is severe

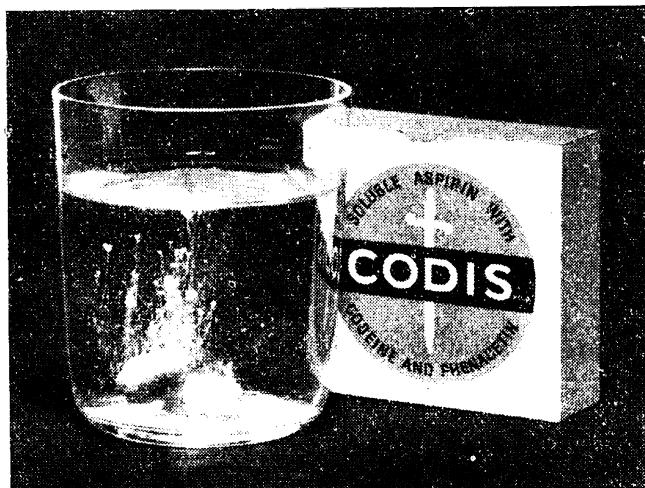

Codis tablets provide soluble aspirin together with codeine and phenacetin. Absorption is rapid and there is less likelihood of gastric irritation during prolonged periods of administration.

In addition to the rapid analgesic and anti-inflammatory action of soluble aspirin and phenacetin, the codeine component exerts a gentle sedative effect often helpful in those cases of mild insomnia associated with pain.

Codis tablets are pleasant to take and, being administered in water, are particularly suitable for invalids and the elderly.

Codis tablets are stable over long periods of time and are presented in protective moisture-proof foil.

Erythroped proved a logical choice

Erythroped deals decisively with the majority of common bacterial infections of children. For instance, against the 'cocci', its potency is considerably greater than that of the tetracyclines or chloramphenicol. Just as important, Erythroped combines this potency with a remarkable record of safety. Additional factors which work for you in the patient's home include: twenty-four 100 mg. doses from a single 60 ml. bottle—the bottle label draws attention to the need to complete the full course of treatment, so helping to avoid the dangers of sub-clinical treatment—Erythroped's flavour is liked, even by the very young—a simple dosage measure is included in every pack. With Erythroped you make 'assurance double sure'.

THIS IS WHAT YOU WILL FIND IN THE

NEW MARTINDALE

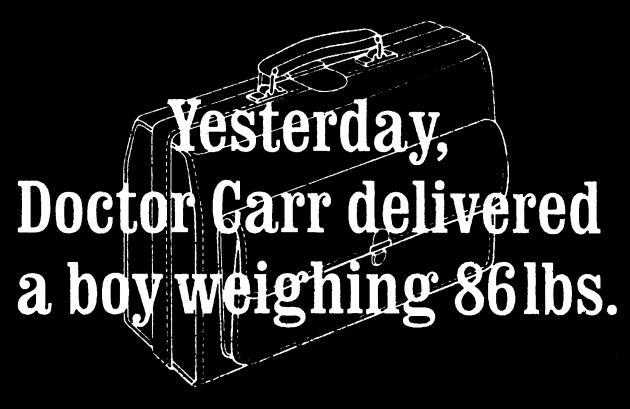

- 1 Descriptions of virtually every drug and medicine in use today, including 1,200 new drugs and 2,400 proprietary products introduced since the publication of the previous edition. The descriptions of drugs deal with dosage, toxic effects, antidotes, contraindications, uses, references to the literature and preparations. Of the more than 10,000 references and abstracts of published papers, the majority have appeared since 1958, and for the prescriber they provide a unique appraisal entirely free from commercial bias.
- 2 Detailed formulae for some 1,600 proprietary medicines available for sale over the counter.
- 3 Directory of manufacturers of prescription products and "over-the-counter" proprietaries.
- 4 Index to clinical uses—an alphabetical list of diseases, noting for each disease all drugs referred to as being used in its treatment.
- 5 Master index of over 32,000 entries, enabling the reference to any drug to be traced instantly from its official name, chemical name, proprietary name or synonym.

Yesterday was when Dr. Carr took time off to accompany his eleven-year-old son David to his first boarding school. It was also the day when Dr. Carr had a celebration drink with his bank manager. Because, from now on, David's going to be far less of a financial burden. There'll be plenty of money for his school fees, his books, even his clothing. And enough left over to start him on a career or send him to university.

Dr. Carr asked to see one of our representatives a few days after the boy was born. And, acting upon our advice, he took out an Educational Policy to cover the most expensive years in his son's future. He invested a modest sum annually but, with accumulated profits, it will ensure David a first-class schooling for the next eight years.

This is just one example of the many policies we have designed specially for doctors and dentists. And since the Society is wholly owned by the policy holders all the profits belong to them and are distributed by bonus declaration every three years.

If you are eligible to join the Society you should be sharing these profits. So why not write to us now without any obligation, of course, for further details? There are separate brochures for Sickness and Accident; Educational; Life; Personal Pension; Family Income; Provision for Estate Duty; Car Hire Purchase. A card giving your name, address, date of birth and quoting Reference No. 001 and listing the policies that interest you, will receive prompt attention.

portrait of a neurotic depressive

She is far from inadequate - in fact she could be described as a patient of 'previously good personality'. But her present symptoms - anxiety, tension, insomnia, lack of interest, inability to concentrate, psycho-somatic pains - all suggest reactive atypical depression. In cases like this, Nardil succeeds where other drugs fail.

Nardil, phenelzine, is available as 15 mg. orange-coloured tablets. William R Warner & Co Ltd Eastleigh Hampshire Telephone Eastleigh 3131

PRACTICES
(Executive Councils)

For vacancies (except those in Scotland) apply on Form E.C.16A, obtainable from the Executive Council. Mark envelope "Vacancy."

BARBICAN REDEVELOPMENT (CITY OF LONDON)

Applications are invited from practitioners for appointment to a new medical practice in the Barbican redevelopment.

It is scheduled that by 1972 the area will be redeveloped to include residential accommodation for approximately 7,000 people at the rate of approximately 2,500 in each of 1968 and 1969, 1,000 in 1970 and the remainder in 1972.

Residence and surgery premises in B'ock XIII (situated in Wood Street) to be provided by the Corporation of London are likely to be ready for occupation about December, 1967, when the first of the residents are expected to be in occupation.

The surgery premises will include surgery, examination room, reception and waiting room. Both the Corporation of London and the Executive Council hope that the doctor appointed to the practice will be willing to live in the Barbican and for this purpose a three-bedroom flat and garage will be made available.

The appointment will carry an initial practice allowance if the practitioner selected is eligible thereafter.

Application forms E.C.16A obtainable from the Clerk, Inner London Executive Council, Insurance House, Insurance Street, W.C.1. Completed applications to be received by the Council not later than 12 noon, Tuesday, August 29, 1967. (H.4148)

Applications invited for vacancy—chiefly urban. Area classified as "open." List at present approximately 3,022. Surgery available (attached to residence). Residence may be available later. Apply on E.C.16A before August 21, 1967, to the undersigned.—N. Greenwood, Clerk of the Bury Executive Council, 12 Tithebarn Street, Bury, Lancs. (H.4143)

BOLTON-ON-DEARNE,
NR. ROTHERHAM

Applications are invited from doctors interested in starting an entirely new practice from premises which must be at Bolton-on-Deerne which is a "designated" area located in the Dearne Urban District. Seven doctors are at present practising in the urban district. The average list exceeds 3,800. There is no existing residential or surgery accommodation, but the local housing authority (The Dearne U.D.C.) is prepared to make available residential and surgery accommodation on a temporary basis and later to assist, if necessary, with permanent accommodation. Attachment of local health authority staff can be arranged with Medical Officer of Health. Initial practice allowance payable to suitably qualified successful applicant. Applications, on Form E.C.16A (obtainable from the undersigned), should be submitted to B. England, Clerk, West Riding Executive Council, 5 St. John's North, Wakefield, by not later than September 2, 1967. (H.4088)

COMMERCIAL APPOINTMENTS

The Wellcome Research Laboratories

Medical Virologist

Applications are invited from medical graduates for a post in the department of virology. The principle responsibility of the successful applicant will be to supervise the production of a number of human vaccines, and there will be also opportunities to take part in research. Although a sound knowledge of laboratory techniques will be a considerable advantage and will influence the point of entry into the salary scale, graduates without previous experience who are willing to be trained may be considered. The successful applicant will have the prospect of a permanent career in a large department with excellent laboratory facilities in which research and production programmes covering a wide field of human virology are being prosecuted. There is considerable scope for personal initiative, and publication of results is encouraged.

Further details and an application form may be obtained from the Senior Personnel Officer, The Wellcome Research Laboratories, Langley Court, Beckenham, Kent. Please quote reference AM.329.

NATIONAL COAL BOARD

MEDICAL SERVICE

There is a vacancy for a doctor in the Board's radiological service who will be based at the Yorkshire centre initially, but who may be required to assist from time to time at any one of five similar centres sited in other coalfields. The Yorkshire x-ray centre comprises a base and two mobile units and deals with over 30,000 full-size chest films annually. This post offers considerable experience in chest radiology with special emphasis on pneumoconiosis, as well as an opportunity to develop a general interest in industrial medicine. Previous experience in chest diseases would be an advantage, but is not essential. Appropriate training will be given and reasonable facilities for postgraduate study made available.

The starting salary will depend upon experience and ability, but will not be less than £2,500. For a suitable candidate prospects of promotion to a senior post are good.

If you are interested in this post please write to

MEDICAL
DIRECTOR

An International Ethical Pharmaceutical Company wishes to recruit a well qualified British doctor as Medical Director. He will be responsible for a group of overseas countries but will be based in the London area. His duties will include the organizing of clinical trials of pharmaceutical products in these countries, maintaining high-level medical contacts and providing medical advice throughout his area. Age is not critical as this appointment could be a beginning in the industry or, equally, could appeal to a doctor who has had previous industrial experience or a career overseas. Considerable travel is involved in visits of short duration. There is a company pension and benefit scheme, a car is provided and the starting salary will be around £3,000. (Ref. PF14/2402/MJB.)

The identity of candidates will not be revealed to our client without prior permission. Applicants should forward brief details, quoting the reference number, to :

MERCK SHARP & DOHME

Assistant to the Medical Director

Because of continuing expansion our Medical Division requires an additional registered Medical Practitioner, male or female, as an Assistant to the Medical Director to be based at our Hoddesdon head office, eighteen miles north of London.

The person appointed will assist his or her colleagues in providing a service to the Profession and to the Company. There are three main aspects of the post:

- providing skilled advice on all technical and promotional literature
- dealing with medical queries posed by the profession
- participating in the training of medical representatives.

Because we place considerable importance on the accuracy and integrity of our professional literature and the quality of our representation, a doctor with an interest in writing or teaching would find this post of particular interest. Although initially this is a junior vacancy there is considerable scope for development in an international Company with an impressive background in therapeutic medicine.

The conditions of employment are competitive and the starting salary will take full account of experience and qualifications although no previous first-hand knowledge of the pharmaceutical industry is necessary.

Applications, which will be treated in strict confidence, should be addressed to the Personnel Manager, Merck Sharp & Dohme Limited, Hoddesdon, Hertfordshire.

Cedilanid

**speed
safety
versatility**

speed

Cedilanid is only weakly bound to the serum albumin, and passes rapidly to the various tissues giving rapid onset and relatively short duration of action.

safety

Because Cedilanid is so rapidly eliminated from the body, the toxic effects of overdosage are short-lived.

versatility

Cedilanid is an all-purpose cardiac glycoside, as valuable for rapid control of supra-ventricular paroxysmal tachycardia as for routine use in congestive heart failure.

Cedilanid: particularly for patients who cannot tolerate digoxin or other digitalis preparations

Tablets of 0.25 mg. lanatoside C; oral solution containing 1 mg. lanatoside C per ml.; ampoules containing 0.4 mg. deslanoside in 2 ml.
