

## Indispensables

Certain things are *basic* . . . The books, for instance. You may not take them down every day, but you *know* them. Sound, fundamental.

You know Aspellin, too. A really effective, economical treatment for rheumatic conditions and muscular trauma—a spirit-based liniment containing Acid Acetylsalicylic to relieve symptomatic pain *rapidly*, and Methyl Salicylate, with Menthol and Camphor, to reduce inflammation and muscle tension.

Rheumatism sufferers can only obtain Aspellin if you prescribe it. Aspellin is *only* obtainable on prescription. Cost: 10½d. per oz.

**ASPELLIN**—indicated in the treatment of acute rheumatic conditions, sciatica, lumbago, fibrositis, muscular trauma.

# PENBRITIN KS

## 3 way action stops Bacterial Diarrhoea

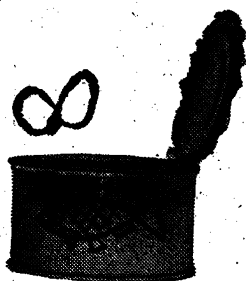

Penbritin KS contains Penbritin, Kaolin and Sulphadimidine, and has been specifically formulated to provide both symptomatic and bacterial treatment for gastro-intestinal infections.

### PENBRITIN KS

eradicates infection in the wall of the intestine  
kills organisms in the lumen  
consolidates stools, adsorbs toxins and exerts a demulcent effect on inflamed mucosa.

#### Indications

Bacterial Diarrhoea  
Bacterial Food Poisoning  
Bacillary Dysentery  
Intestinal infections due to sensitive organisms.

#### Wide Bacterial Cover

Penbritin KS is active against: Salmonellae, Shigellae, E.coli, Strep. faecalis (enterococci), Clostridia, Staphylococci (other than penicillinase-producing strains).

#### Accepted Antibacterial Agents

Penbritin and Sulphadimidine are well-established B.P. preparations. Both are well absorbed and provide antibacterial activity not only in the lumen but also in the gut wall, the most important site of infection.

#### Rapid Action

Clinical experience has shown that relief is given often within 24 hours.

Dosage: Adults 20 ml. 6-hourly;  
Children 10 ml. 6-hourly.

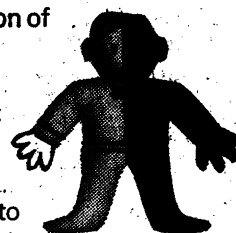

Availability: Bottles of 60 ml.  
(Basic N.H.S. cost 8/9 per bottle)

#### Side-Effects Unlikely

Penbritin KS combines ampicillin and sulphadimidine, two of the safest and most widely used antibacterials. Side effects are unlikely, due to the short duration of treatment.

Contra-indications;  
Allergy to penicillin or intolerance to sulphonamides.

# ARLEF 100 helps the arthritic to get a grip on things

Arlef\* 100 (flufenamic acid, Parke-Davis) is a new non-steroidal anti-inflammatory analgesic. Extensive controlled studies in patients with rheumatoid arthritis, osteoarthritis and other painful rheumatic conditions show that Arlef 100 significantly improves grip strength and relieves joint stiffness and pain. Since Arlef 100

is also generally well tolerated and appears to be free from serious toxic effects, the patient receiving Arlef 100 is more readily able to cope with normal daily activities.

Arlef 100 is available in Kapseals\* containing 100mg. flufenamic acid in containers of 50 & 250. Further information will be supplied on request.

### Erythroped proved a logical choice

Erythroped deals decisively with the majority of common bacterial infections of children. For instance, against the 'cocci', its potency is considerably greater than that of the tetracyclines or chloramphenicol. Just as important, Erythroped combines this potency with a remarkable record of safety. Additional factors which work for you in the patient's home include: twenty-four 100 mg. doses from a single 60 ml. bottle—the bottle label draws attention to the need to complete the full course of treatment, so helping to avoid the dangers of sub-clinical treatment—Erythroped's flavour is liked, even by the very young—a simple dosage measure is included in every pack. With Erythroped you make 'assurance double sure'.

## SCIENTIFIC FOUNDATIONS OF SURGERY

Edited by  
Charles Wells, C.B.E., F.R.C.S., and  
James Kyle, M.Ch., F.R.C.S., F.R.C.S.I.

"The modern surgeon who is not content to be merely a technician must sometimes despair of keeping abreast of applied basic science as it affects his craft. . . . What has hitherto been lacking is a work which brings together current underlying scientific principles in their application to each system of the body. The editors, with the aid of a distinguished group of contributors, have filled the gap with the publication of this work. . . . It is difficult to praise too highly what they have accomplished. Postgraduate students, practising surgeons and clinical teachers can turn to its pages for clear descriptions of such complex subjects as the proteins and electrolytes of blood, immunology, genetics, the physiology of heart and lung as it affects anaesthesia and operations, and lots more; there is even a useful account of statistical principles. . . . All in all, this is a splendid piece of work." *The Lancet*.

"Clinical practice of infectious diseases has lacked a British textbook for some years, so that a new book by two of the few remaining specialists is welcome. . . . The great advantage of the book is that it covers the many recently identified virus infections as well as the classical diseases."

## CERVICAL SPONDYLOSIS and Other Disorders of the Spine

Edited by  
Lord Brain, D.M., F.R.C.P., F.F.R., and  
Marcia Wilkinson, D.M., F.R.C.P.

Eight of the world's foremost specialists have written a clear and concise account of the management of a condition known variously as osteoarthritis, cervical spondylosis, herniated disc, chondroma, etc. A wealth of illustrations enhance the text.

W. G. Edwards, M.A., B.M., F.R.C.S., and H. Ludman, M.A., M.B.,  
F.R.C.S.

This work, by four specialists, is written for the medical student, the house surgeon and the general practitioner. The aim has been to provide a reliable guide book in this rather obscure field of medicine and to include what is essential to the grasping of basic principles and the understanding of cause and effect. The work is profusely illustrated with original drawings, X-rays and photographs.

## PRACTICAL CLINICAL BIOCHEMISTRY

4th Edition

by  
H. Varley, M.Sc., F.R.I.C.

A number of sections which were left unchanged in previous revisions have been brought more into line with current views. A second introductory chapter has been inserted which it is hoped will help to give a clearer understanding of some separate procedures. Chapters which have been given considerable rewriting include those on proteins, enzymes, acid-base regulation, hemoglobin and related compounds, and hormones, and among shorter sections those dealing with quality control, the normal range, hypoglycaemia, amino acid disorders, flame photometry, pyridoxine and folic acid.

**The Basal Ganglia and Posture**

J. Purdon Martin, M.A., M.D., F.R.C.P. (London).

In this book the author presents his clinical and pathological investigations into the function of Basal Ganglia. The guiding principle throughout the research was to discover the functions which were lost or otherwise disturbed in the conditions in which the Basal Ganglia were known to be diseased. The author's conclusion is that the Basal Ganglia as a group are concerned with the reflex control of posture, other than the support of the body against gravity and that the globus pallidus is a major centre for postural reflexes. The book is fully indexed and illustrated throughout with original half tone illustrations.

**A New Look at Industrial Medicine**

R. L. Luffingham, M.B., B.S., D.I.M.

The author's analysis of the present situation makes it clear that the nation cannot now afford a National Health Service concerned almost totally with curing the sick. He believes that medicine is bound up with irrevocable social changes and in particular that medicine in future will have to be practised in an environment tailored to suit the industrialist and the technocrat. This book is the first to look at industrial method as a new way of practising medicine, exploiting, for the benefit of the patient, the unique openings made available by a marriage of medicine and industry.

## Atlas of Human Anatomy

### sixteenth edition

By Werner Spalteholz, revised and re-edited by Rudolf Spanner

This comprehensive work on anatomy is essential to any teaching hospital or school of medicine. It consists mainly of excellent drawings, most of which are in colour. Each picture is accompanied by short annotations and the Latin nomenclature in each case is given with its English equivalent. For the sixteenth edition of this work—the first in this form in English—the number of illustrations has been increased and the text has been extensively revised.

916 pages illustrated £13

# Steroids in asthma?

## Give your asthmatics 'breathing time' — provide the benefits of betamethasone . . .

The efficiency of betamethasone in breaking the vicious cycle of asthma and giving the patient 'breathing time' is well known. A short (usually six day) course produces a rapid and often prolonged remission of symptoms without causing salt and water

retention or affecting potassium balance. Studies have shown that such a course can safely be repeated as often as fifteen times a year\*. There can't be many of your patients who would require steroids so frequently.

\* *Lancet* (1966) ii, 1354.

## . . . enhanced by the advantages of solubility

Betnesol Tablets can be given dissolved in water as a drink—thus there are no solid steroid particles to irritate the stomach and absorption is more consistent. A popular daily dosage for a six day course is 6,5,4,3,2,1

tablets per day. Just as soluble aspirin is the modern way to prescribe aspirin, so Betnesol is the modern way to prescribe systemic steroids.

## Lincocin works...in skin and soft tissue infections

Excellent or adequate response was noted with oral Lincocin therapy in 271 of 315 patients suffering from a variety of dermatoses including pustular or cystic acne, sycosis barbae, infected eczematoid dermatitis, impetigo contagiosa, furunculosis, pustular psoriasis, and miscellaneous pyodermas.

Clin. Med. (1966), 73:80.

After four days of treatment with oral lincomycin (500 mg. every 6 or 8 hours) an excellent or good clinical response was noted in 80% of a group of 50 patients with skin infections caused by Staphylococci and/or Streptococci. Fifteen of 19 patients previously treated with other antibiotics had good or excellent responses to lincomycin. In the two severe cases treated, response to lincomycin was good in a patient with phagedæna of both legs with necrotic areas and bacterial epidermitis, and excellent in a patient with pustular and phlegmonous acne.

though these texts were to be used to exorcise assorted ills. The right nutritional supplements are generally much more effective.

Diagnosis of disease and assessment of nutritional status should be inseparable, particularly in geriatric practice. And with half a G.P.'s patients over the age of 70 needing constant, long-term care, <sup>1</sup>who is *not* in geriatric practice?

From the findings of numerous dietary surveys in the last 20 years it is abundantly clear that many elderly patients are subsisting on sub-optimal nutritional intakes. It has

been shown recently that as many as 6 out of 10 elderly patients admitted to hospital may be vitamin B<sub>1</sub> deficient and 4 out of 10 low in vitamin C.<sup>2</sup> And acute infections, to which the elderly are so prone, make a 'tremendous nutritional impact'.<sup>3</sup> Even after a trivial infection there is a need to restore the balance by an increased intake of food—which must be the *right* food, with vitamins included as a routine addition.<sup>4</sup>

## She will appreciate the convenience of Candeptin Vaginal Tablets, a new extension of the specific treatment for monilial vaginitis

Rapid symptomatic relief<sup>1</sup> and decisive resolution of infection<sup>2</sup> are the proven results of Candeptin vaginal ointment in the treatment of monilial vaginitis caused by *Candida albicans*. Now Candeptin vaginal tablets provide the same effective fungicidal treatment (candicidin), in a more convenient form. They are "... easier to use, and appear more suited to obstetrical patients, in whom an applicator might be contra-indicated".<sup>3</sup>

### IN THE LABORATORY

candicidin has been shown<sup>4</sup> to inhibit *Candida albicans* at 0.05 mcg/ml even after two days' incubation. Under the same circumstances nystatin had to be used at 5 mcg/ml to achieve inhibition.

### IN CLINICAL PRACTICE<sup>1,2,3,5,6</sup>

Candeptin gives equally remarkable results. Out of 312 women treated, both pregnant and non-pregnant, 255 were cured after one course of treatment. A further 33 responded to a second course giving an overall success rate of 93%.

How long

35-year old  
male  
hypertensive?

## Ismelin<sup>®</sup>

guanethidine sulphate B.P.

**Prolongs the hypertensive's  
life expectancy**

**80-90% of patients respond  
satisfactorily**

**Simple, convenient regime  
for milder hypertension**

**True drug tolerance or  
resistance not a problem**

### Ismelin in milder hypertension

The long duration of action of Ismelin makes possible continuous 24-hour control of hypertension at minimal dosage frequency (once daily if required). The simple, convenient regime is ideal for long-term control in milder states of hypertension, affording steady symptomatic relief with a minimum of side effects.

### Dosage

Initial dosage—two 10 mg tablets daily. Frequent adjustment is unnecessary during stabilisation; depending upon individual assessment, intervals between consultations may be up to one month. Should 20 mg daily prove insufficient, increase daily dosage by one 10 mg tablet. As the action of Ismelin is gradual and prolonged, allow at least one week before any increase, to observe full effect. The majority of patients will be symptom-free and adequately controlled on 40 mg daily or less.

### Prescribing notes

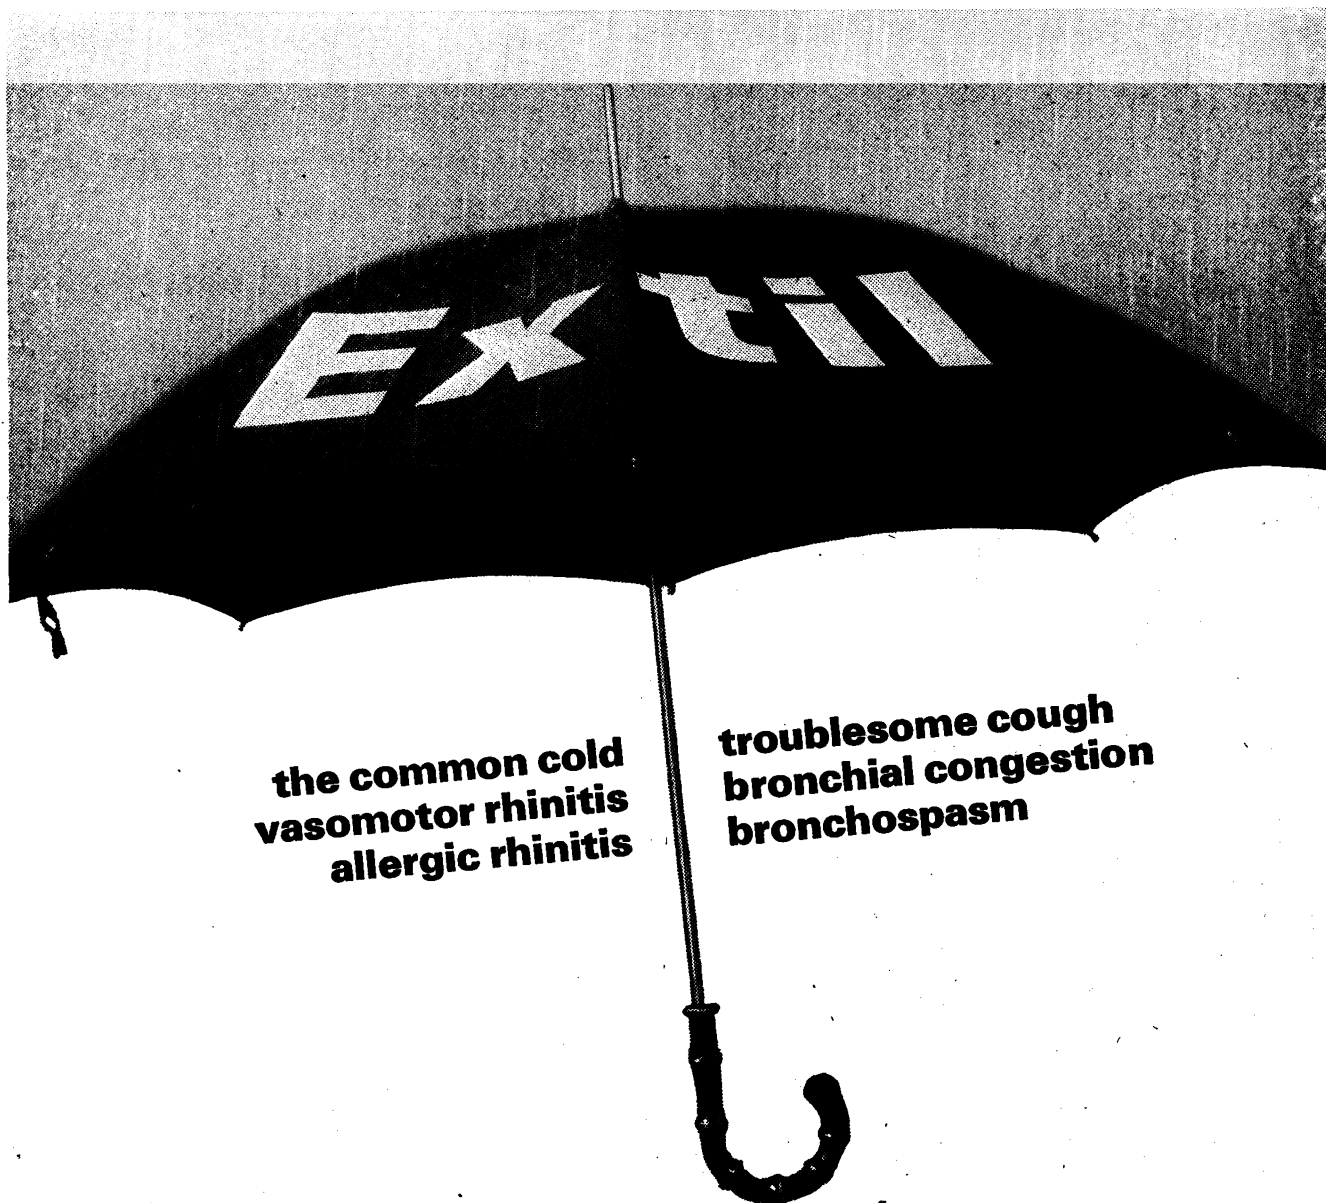

Ismelin is contra-indicated in the presence of phaeochromocytoma. Side effects attributable to postural hypotension normally reflect overdosage. Patients should be advised to avoid sudden changes of posture or violent exertion, and if morning faintness persists, to reduce the daily dosage by one 10 mg tablet until the next consultation. If diarrhoea is troublesome, reduce or divide dose, or add  $\frac{1}{2}$  gr codeine phosphate t.d.s.

Failure of ejaculation has been reported and, rarely, exertional dyspnoea, nasal congestion, shivering, muscle weakness, paraesthesiae (due to latent cerebral arterial insufficiency), aggravation of intermittent claudication, and exacerbation of peptic ulcer. In heart failure, any tendency to fluid retention may be increased. As with any antihypertensive, prescribe cautiously for patients with renal failure and urea retention. Allowance should be made for the antagonistic action of some antidepressants (MAOI), appetite suppressants and stimulants of the amphetamine class if administered concurrently.

## These free coloured charts are time savers

With these 8½" x 11" laminated charts, from the classic anatomical drawings by R. L. Dickinson, M.D., you can answer questions about menstruation easily and quickly. The schematic illustrations clearly label each organ in the female reproductive system, and the plastic finish is suitable for explanatory grease pencil markings you may wish to make.

In addition, we offer two free booklets—one for beginning menstruants and another for older girls. These booklets, designed to answer the questions most frequently asked, are scientific and informative, yet written in simple terms that are easily understood. Along with the charts, you will receive sample copies of the booklets which you may then order in quantity for distribution.

Tampax tampons offer a modern method that is suitable for every age of the menstrual span. They are particularly appropriate for schoolgirls who wish to swim and exercise while menstruating. Since Tampax tampons are worn internally, they eliminate menstrual odour and the danger of infection from the anal

region. What's more, they absorb the flow with no possibility of occlusion.

Tampax tampons are useful for girls in their early years who may feel "different" because of their new-found maturity . . . and for those who are more mature, yet need the security and confidence that bolsters social poise. They will appreciate the assurance of safety and simplicity, as well as the comfort and convenience that come with wearing Tampax tampons.

Available in Regular and Super absorbencies with explicit directions for easy insertion, removal and disposal enclosed in each package.

One 100 mg. capsule in the early evening  
allows the patient to relax in  
the leisure hours – sleep naturally  
–and face up to the  
difficulties of the day

Equipose is not a barbiturate, neither is it a hypnotic. It is a psycho-relaxant with a calming action which is precise and localized. Equipose acts almost exclusively on the hypothalamus where the basic emotions of fear, anger and agitation are mediated. There is little or no 'drug trespass' into the cerebral or spinal cord areas.

**This explains why treatment with Equipose is free from euphoria and habituation,<sup>1,2</sup> withdrawal reactions,<sup>2</sup> and drug-induced depression<sup>3</sup>**

Equipose is rapidly active, and a single dose is effective for up to 12 hours. Full information is available on request.

***The brand of iron which provides a good  
haematinic response in iron-deficiency  
anaemia—a considerably reduced incidence  
of side effects and the least toxic form of iron***

A double-blind comparison of Ferrodic with ferrous sulphate, both preparations containing 50 mg of ferrous iron + 12.5 mg ascorbic acid, in the treatment of iron-deficiency anaemia, showed that exactly equivalent haematinic effects were obtained with the two drugs. However, 'not only did Ferrodic cause side effects in a significantly smaller proportion of patients than ferrous sulphate, but the severity of such side-effects was also significantly less with Ferrodic.'

(*Practitioner*, 1967, 198, 848)

A very similar double-blind, clinical comparison of Ferrodic and ferrous sulphate has recently been published. The Author's purpose was to confirm the haematinic effectiveness and low incidence of side effects of Ferrodic, in view of its palatability and relative freedom from toxicity. The results again showed Ferrodic to have an equivalent haematinic effect to that of ferrous sulphate but 'side-effects occurred in a significantly higher proportion of subjects who received ferrous sulphate.'

(*J. Therap. and Clin. Res.*, 1967, 1, 4)

FERRODIC TABLETS each contain ferrous iron (as ferrous carbonate) 50 mg and ascorbic acid 12.5 mg and are supplied in bottles of 100 tablets.

Full information available on request.

# Obstetrics in General Practice

*Published July 1966*

This book is made up of a series of articles printed in the "Current Practice" section of the BRITISH MEDICAL JOURNAL. It is designed to give a lucid and practical account of obstetrics as it is carried out in the patient's home or in a maternity unit, with special emphasis on the role of the general practitioner and his relationship to the consultant obstetrician and the hospital. The principal authors are consultant obstetricians, but to ensure that the general practitioner's own view and special experience should be represented the consultant contributors were asked to prepare their articles in collaboration with general practitioners. The book as a whole is a product of such co-operative effort. It will prove a useful guide to this important branch of medical practice.

**For efficient conception control  
with minimum physiological disturbance**

The low dosage regimen of Feminor Sequential closely parallels the body's normal pattern of hormone production. To inhibit ovulation it employs an oestrogen alone for the first fifteen days – with the addition of a progestogen for the last five days to establish a normal secretory endometrium. The total amount of hormone taken is limited to that necessary for effective inhibition of ovulation. Thus there is minimum physiological disturbance and a marked reduction in side effects such as breakthrough bleeding, breast discomfort and weight gain.

Feminor Sequential is presented in wallets containing one month's supply of 20 foiled tablets: 15 pink tablets containing mestranol 0.1 mg, 5 white tablets containing mestranol 0.075 mg, norethynodrel 5.0 mg.

## THE INSTITUTE OF LARYNGOLOGY AND OTOTOLOGY

330/332, Gray's Inn Road, London, W.C.1

IN ASSOCIATION WITH THE ROYAL NATIONAL THROAT, NOSE AND EAR HOSPITAL

The Institute is organized to provide instruction in this Specialty for the whole period of training necessary to reach full consultant standard. There are ample clinical and research facilities and teaching is carried on continuously daily throughout the year.

There are full-time courses of lectures and demonstrations suitable for those intending to take the D.L.O.(R.C.P.&S.Eng.), and the Final F.R.C.S. examinations in Otolaryngology. There are also short courses for senior students in aural surgery, pathology, and in the treatment of the deaf child. In addition, there are lectures, demonstrations, and refresher courses suitable for general practitioners.

A number of paid appointments, which are open to postgraduate students in the different stages of training, give opportunities of clinical experience and research.

UNIVERSITY OF ABERDEEN  
FACULTY OF MEDICINE

The Degrees in Medicine granted are: Bachelor of Medicine and Bachelor of Surgery (M.B., Ch.B.), Doctor of Medicine (M.D.), Master of Surgery (Ch.M.), and Doctor of Philosophy (Ph.D.). The Degree of Bachelor of Medical Biology is conferred on candidates who have passed a one-year course which may be taken at any time after the third medical year. Diplomas in Public Health (D.P.H.), Psychotherapy (Dip. Psychother.), and Medical Radio-diagnosis (D.M.R.D.) are also granted, the period of study for which may cover one year of full-time study or fifteen months of full-time and part-time study or eighteen months of part-time study.

The total cost of the curriculum for the Degrees of M.B., Ch.B., including textbooks, class, hospital, matriculation, and Degree fees, is approximately £650. Students are required to begin study in the Winter Term, which starts in October, and the period of study covers six years, unless exemption from the first year is granted.

The University also grants degrees in Arts, Science (Pure, Agriculture, Forestry, and Engineering), Divinity, and Law, particulars of which may be had on application to the undersigned.

W. S. Angus, Secretary.

THE ROTUNDA HOSPITAL  
Dublin

The Rotunda Hospital contains 134 maternity beds, 23 gynaecological beds and 51 paediatric cots. Over 5,000 patients are delivered annually in the hospital, and the External Maternity Service attends many patients in their own homes.

Undergraduate teaching includes the conduct of normal labour, attendance at gynaecological operations and abnormal labour cases, and opportunities for gynaecological examinations. Comprehensive lecture courses are arranged in four ten-week terms each year, and cover clinical obstetrics and gynaecology, pathology, and paediatrics. The large antenatal clinic, which offers comprehensive care, affords excellent opportunities for the study of all aspects of antenatal obstetrical practice.

There are extensive facilities for postgraduate tuition consisting of lecture programmes as listed above, together with opportunities for limited participation in clinical work under supervision. Postgraduate courses cater especially for the D.G.O., M.A.O., and L.M. (Rotunda).

Full particulars of all courses are available from the Master, Rotunda Hospital, Dublin.

ROYAL COLLEGE OF  
SURGEONS OF EDINBURGH

COPIES OF REGULATIONS for the FELLOWSHIP, LICENCE, FELLOWSHIP IN DENTAL SURGERY, and LICENCE IN DENTAL SURGERY, and Dates of Examinations may be had on application to the Clerk to the College, 18 Nicolson Street, Edinburgh 8.

UNIVERSITY OF OXFORD  
MEDICAL SCHOOL

The University grants the degrees of Bachelor of Medicine and Bachelor of Surgery (B.M., B.Ch.), Master of Surgery (M.Ch.), and Doctor of Medicine (D.M.).

A candidate who wishes to read for the degrees of B.M., B.Ch. must be accepted as a member of a college and must subsequently be matriculated as a member of the University. A candidate for these degrees must also take the B.A. degree in some subject (usually the Final Honour School of Animal Physiology). Application for admission should be made to the Oxford Colleges Admissions Office, 58 Banbury Road, Oxford.

**Pre-clinical Course.** The pre-clinical course lasts nine terms. The first five terms are spent preparing for the First B.M. examination in Anatomy and Physiology. After the First B.M. four further terms are spent in the study for a Final Honour School which qualifies for the B.A. degree, and then two terms are spent doing courses in pharmacology and general pathology and bacteriology. These courses are usually taken at Oxford. Then follows the clinical course. For further information apply to the Secretary of the Medical School.

**Clinical Course.** This course lasts for 33 months. The clinical school is based on the Radcliffe Infirmary, the Churchill Hospital and the special hospitals in Oxford. There are seven University Chairs in clinical subjects in the teaching hospital group and several important Research Units.

The United Oxford Hospitals (1,437 beds) serves both as the Area Hospital and also as a Regional Centre. The range of clinical material is exceptional for a teaching hospital and clinical firms are small. The tutorial system continues throughout the clinical course.

Students who are admitted from other universities may read for the medical degree of their own university or may apply to transfer to the Oxford B.M. examinations.

Osler House and its garden adjoin the Radcliffe Infirmary and provide attractive premises for the clinical students' club.

A Prospectus may be obtained on application to the Secretary of the Medical School, Osler House, 43 Woodstock Road, Oxford.

**Higher Degrees.** The degrees of D.M. and M.Ch. are open to those who have taken the degrees of B.M., B.Ch. at Oxford. Further information may be obtained from the Director of Postgraduate Medical Studies.

**Research and Specialist Training.** Enquiries may be addressed to the head of the relevant clinical or laboratory department in one of the teaching hospitals or to the Director of Postgraduate Medical Studies, Osler House, 43 Woodstock Road, Oxford.

UNIVERSITY OF WALES  
THE WELSH NATIONAL SCHOOL OF

Courses of Instruction are conducted for the medical degrees (M.B., B.Ch.) of the University of Wales, and may be attended by students preparing for degrees of other examining bodies. Courses are also provided for the dental degree (B.D.S.) of the University of Wales.

**Fees.**—The composition fee for each year of study is £75. The approximate total cost of the six years' medical course is £580, and for the five years of the dental course is £465, including laboratory fees, students' societies fees, and the matriculation, examination and graduation fees of the University of Wales. (In accordance with Government policy, the annual fee for overseas students for each course will be £250—exclusive of students' Societies' fees.) Certain scholarships, etc., are available.

**Postgraduate Study.**—Facilities are provided for approved research. Postgraduate scholarships are available, ranging in value from £300 to £400 per annum.

**Complete Postgraduate Courses of Instruction** are conducted for the Diploma in Public Health (D.P.H.) and the Diploma in Tuberculosis and Chest Diseases (D.T.C.D.) of the University of Wales. Postgraduate courses for practitioners are arranged. Further particulars may be obtained from the Provost, The Welsh National School of Medicine, 34 Newport Road, Cardiff.

**N.B.**—Application for admission to undergraduate courses of instruction must be made to the Universities Central Council on Admissions, 29 Tavistock Square, London W.C.1, by December 15 in the year immediately preceding that in which admission is sought.

UNIVERSITY OF DUNDEE  
Faculty of Medicine

The University offers courses leading to: (a) **DIPLOMA IN PUBLIC HEALTH**. Instruction will be given in the University of Dundee and extends over one academic year, commencing in October, 1967. Special provision is made for overseas students. The fee for the course is £75 (£250 proposed for overseas students).

(b) **DIPLOMA IN INDUSTRIAL HEALTH**. Instruction will be given in the University of Dundee and extends over one academic year. The first two terms will be similar in content to the course leading to the Diploma in Public Health. The fee for the course is £75 (£250 proposed for overseas students).

(c) **DIPLOMA IN INDUSTRIAL HEALTH (Shortened course)**. Applicants who already possess the Diploma in Public Health may be excused the first two terms of the course leading to the Diploma in Industrial Health. The fee for the shortened D.I.H. course is £25.

(d) **CERTIFICATE IN INDUSTRIAL HEALTH**.

The University will grant a Certificate in Industrial Health (C.I.H.), the period of study for which will be one term, commencing April, 1968. The course offered will consist of systematic clinical and practical instruction in occupational health. The fee for the C.I.H. course will be £25.

**LEVERHULME FELLOWSHIPS**. Applications can now be considered for the award of a number of Leverhulme Fellowships to enable candidates to take the above courses. Fellowships of £300 are available for the C.I.H. course and of £1200 for the whole year D.I.H., but not for the shortened D.I.H. available to candidates with a D.P.H. ## LONDON SCHOOL OF HYGIENE AND TROPICAL MEDICINE

(University of London)  
Incorporating the Ross Institute

The London School of Hygiene and Tropical Medicine provides courses in the following University of London Academic Postgraduate Diplomas: APPLIED PARASITOLOGY; AND ENTOMOLOGY; BACTERIOLOGY; CLINICAL MEDICINE OF THE TROPICS; NUTRITION; OCCUPATIONAL HYGIENE; PUBLIC HEALTH; TROPICAL PUBLIC HEALTH; also for the Conjoint Board's Diplomas in TROPICAL MEDICINE AND HYGIENE (ENGLAND), and INDUSTRIAL HEALTH (ENGLAND), DIPLOMA IN APPLIED PARASITOLOGY AND ENTOMOLOGY (LONDON).

The course, which commences at the beginning of October, lasts for nine months, and is designed mainly for graduates in medicine, veterinary medicine and veterinary science, but graduates in science or persons with approved non-graduate qualifications in medicine and veterinary medicine can be accepted. Applications must be received not later than April 1. The number of places is strictly limited.

### DIPLOMA IN BACTERIOLOGY (LONDON)

The course commences at the beginning of October and lasts for nine months. It is intended to give advanced instruction to graduates in medicine, science (including veterinary science) and pharmacy who intend to follow a career in bacteriology. Applications must be received not later than March 1. The number of places is strictly limited.

### DIPLOMA IN CLINICAL MEDICINE OF THE TROPICS (LONDON)

The course, which commences at the beginning of October, lasts for nine months and is designed particularly for the training of intending specialist physicians and medical research workers in the tropics. Applications must be received by March 1.

### DIPLOMA IN NUTRITION (LONDON)

Commencing at the beginning of October the school will offer a course of lectures and practical instruction in scientific and applied nutrition. It is open to graduates in agriculture, household science, medicine, veterinary medicine or veterinary science and to students who, though not graduates, have satisfied the University that their previous education and experience qualify them to rank on the same level as graduates for this purpose. Applications must be received by April 1.

### DIPLOMA IN OCCUPATIONAL HYGIENE (LONDON)

If numbers permit, a one-week course will be held at the beginning of October and will last nine months. It is open to graduates—particularly in physics, chemistry, engineering, or medicine. In special circumstances noted with the necessary previous education and experience will be accepted. Applications must be received by April 1.

### DIPLOMA IN PUBLIC HEALTH (LONDON)

The course, which commences at the beginning of October, and extends over an academic year of full-time study, is being offered in 1967-8. The nature, length, and content of future courses in public health and medical administration have not been decided. When these details are available appropriate announcements will be made in the medical press.

### DIPLOMA IN TROPICAL PUBLIC HEALTH (LONDON)

The course, which commences at the beginning of October, lasts for nine months, and is intended for medical graduates proposing to work in the fields of preventive and social medicine, including administration, in tropical countries. Applications must be received not later than March 1.

### DIPLOMA IN TROPICAL MEDICINE AND HYGIENE (ENGLAND)

A five months' course for the Conjoint Board's Diploma is held once a year commencing at approximately the beginning of March. It is open to applicants with approved medical qualifications. Applications must be received not later than April 1.

### OCCUPATIONAL HEALTH

A whole-time course will be held from mid-September and will last for three months. It is for registered medical practitioners who desire training or a refresher course in this subject. For those who hold a D.P.H. it will provide the additional requirements for entry to the D.I.H. examination. Applications must be received not later than April 1.

OTHER COURSES not leading to a qualification:

### SHORT COURSE IN MEDICAL STATISTICS

A course will be held annually on two mornings and two afternoons a week, from the beginning of January to the end of April. The course is intended primarily for medically qualified research workers, but those with appropriate scientific qualifications are also eligible. Applications must be received by September 1.

### COMBINED COURSE IN MEDICAL STATISTICS AND EPIDEMIOLOGY

A course will be held annually from the beginning of January to the middle of April, on two full days and two mornings a week. The course is designed for medical practitioners, and only a small number of students will be accepted. Applications must be received by September 1.

### MEDICAL MYCOLOGY

A course lasting a fortnight is offered to graduates in medicine and allied subjects at the beginning of July each year. Applications must be received by May 15.

### HIGHER DEGREES

Facilities are provided for suitable candidates for the degree of M.Phil. and Ph.D. in appropriate subjects.

DETAILS OF FEES CAN BE OBTAINED FROM THE REGISTRAR, LONDON SCHOOL OF HYGIENE AND TROPICAL MEDICINE, KEPPEL STREET (LONDON W.C.1), TO WHOM APPLICATIONS FOR ADMISSION SHOULD BE MADE.

## ROYAL COLLEGE OF SURGEONS IN IRELAND

The Medical School attached to the College offers a complete medical course of six years, including the Pre-registration year in Chemistry, Physics, and Biology. Students may take the M.B. of London University as external students.

The Students' Union includes a social centre, rugby, sailing, cricket, caving, and other clubs.

The College conducts examinations leading to the Fellowship of the College in Surgery, Otolaryngology or Ophthalmology.

Fellowships are also awarded in the Faculties of Anaesthetics, Dentistry and Radiology, following Primary and Final examinations.

The Primary Fellowship of the Faculty of Anaesthetists is reciprocal with the other Royal Colleges.

There are four subjects in the final examination for the Fellowship of the Faculty of Dentistry, Oral Surgery, Orthodontics, Prosthetics, Public Health, Dentistry and Radiology, following Primary and Final examinations.

The Fellowship of the Faculty of Radiology may be taken in either Radiodiagnosis or Radiotherapy, the Primary Fellowships of this Faculty includes Physics, Pathology, Medicine and Surgery. Exemptions are available to those holding the D.M.R.D. and other higher qualifications.

### Postgraduate Education:

1. There are two courses each year for primary fellowship students.
2. There is a postgraduate course in advanced surgery organized with the co-operation of University College and Trinity College. This intensive whole-time course is for candidates preparing for the Fellowship examinations. Early application for places is desirable.

Further particulars may be obtained from the Registrar, Royal College of Surgeons in Ireland, 123 St. Stephen's Green, Dublin 2.

## UNIVERSITY OF CAMBRIDGE SCHOOL OF CLINICAL RESEARCH & POSTGRADUATE MEDICAL TEACHING

Advanced courses on special aspects of medicine and research are held from time to time. A one-day symposium "Old Age and Anaesthesia" will be held on Saturday, October 28, 1967. The annual course on the BIOLOGY OF SKIN, to be held from December 11 to 16, 1967, is intended primarily for Registrars and others who have recently commenced the study of clinical dermatology, but is open to other medical practitioners who are interested. Courses in GERIATRICS and in PAEDIATRICS on April 8, 9, and 10, 1968. The third course on "Progress in the Biological Sciences in Relation to DERMATOLOGY" will be held from September 23 to 28, 1968. Accommodation will be provided in Colleges of the University for each of these courses.

Two one-week refresher courses for GENERAL PRACTITIONERS will be held on July 1 to 6, and July 8 to 13, 1968, accommodation for which will be available in Downing College. One-day symposia on subjects of interest to general practitioners are held at 8-4 week intervals on Saturdays and/or Sundays throughout the academic year.

The Thursday Lunch Club, attended by hospital staff as well as general practitioners, meets at Addenbrooke's Hospital on the first and third Thursdays each month. A buffet lunch is served from 12.30 to 1.15, followed from 1.15 to 2.15 by a discussion or case-conference.

Arrangements can be made for practitioners to attend the practice of the United Cambridge Hospitals for short or long periods.

An advanced medicine course is held on Tuesdays at 2.15 p.m. intended primarily for M.R.C.P. candidates, but open to all who are interested. Surgical tutorials are held on Saturday mornings during term. Special teaching sessions are available in anaesthetics, cardio-thoracic medicine and surgery, dental and oral surgery and orthodontics, dermatology, neurological surgery and neurology, ophthalmology, orthopaedics, psychiatry, radiotherapy, radiological techniques, with clinical, biological and clinicopathological seminars.

## UNIVERSITY OF LONDON

ROYAL POSTGRADUATE  
MEDICAL SCHOOL

A Federated Institute of the British Postgraduate Medical Federation, the School is associated with the Hammersmith Hospital. The postgraduate education provided is designed for the training of specialists. In General Medicine three ten-week courses are offered coinciding with the university terms, during which the basis of the teaching is the clinical investigation of patients expanded by lectures, C.P.C.s, radiological and post-mortem demonstrations. Between terms the staff is engaged in research and the advanced education of selected students.

In the Department of Surgery the teaching plan allows of the attachment of honorary clinical assistants in small groups to the various specialized units usually for periods of five months and includes a general educational programme starting in October and March, and is designed mainly for the post Fellowship education and training of specialists.

In the Department of Pathology a one-year course starting in October is given in preparation for the Diploma in Clinical Pathology.

The Department of Anaesthetics provides an advanced clinical and theoretical course twice yearly in October and April suitable for candidates for the F.F.A.R.C.S.

In the Department of Medical Physics Ph.D. students are accepted and courses run in radioisotope techniques, radiobiology, and in physics for D.M.R.D. and D.M.R.T. students.

In ALL departments encouragement and facilities are given to students wishing to carry out original research and longer attachments than those provided by the course can sometimes be arranged. Some House appointments are available to students of the School.

Applications for admission to any of the courses should normally be made at least six months in advance to the Secretary, Royal Postgraduate Medical School, Du Cane Road, London W.12, from whom a prospectus may be obtained.

INSTITUTE OF DISEASES OF  
THE CHEST

(University of London)

The Institute is associated with the Brompton Hospital, S.W.3, and the London Chest Hospital, E.2.

Instruction is arranged as follows:

## MEDICAL

Full-time: Ten-week courses in Diseases of the Chest are arranged during the Autumn and Spring terms. These are designed for postgraduate students intending to specialize in chest disease or already working in the specialty. Each course consists of attendance at out-patient sessions and ward clinics at the two hospitals, radiological and pathological demonstrations, discussions and formal lectures.

The fee is £50.

Part-time: Part-time courses of study in chest diseases are conducted during the Autumn-Spring terms, each lasting 10 weeks. The course includes lectures and discussions, clinical sessions in the wards of both hospitals, and instruction in the interpretation of chest X-rays. It occupies two whole days each week, with some additional sessions on at least two other days.

The fee is £30 for the whole course and £12 for one month.

During the Summer term short courses are arranged for Consultants, Registrars and general practitioners.

**SURGICAL AND CARDIOLOGICAL.** Training in thoracic surgery and the surgical aspects of cardiology is provided by attachments to the clinical staff for ward rounds and out-patient teaching and sessions in the operating theatre and investigating sessions. Attendance at routine lectures and demonstrations is optional.

**RADIOLOGY** Part-time instruction in radiology of the chest for trainee radiologists is given each term. The fee is £25 per term.

An enrolment fee of £2 (deducted from the fees due, but not returnable) is payable on reserving places in advance in any of these courses.

#### TRAINING IN PSYCHIATRY at MCGILL UNIVERSITY

The department of psychiatry has openings for young physicians, with initiative, in the following courses, effective July 1, 1968.

1. Four-year diploma course—provides basic training in psychiatry suitable for applicants who have completed a general internship. There has been a sizable increase in the salary offered, which begins at approximately \$4,500 per annum, with yearly increases.
2. Master of Science in Psychiatry—students may major in an approved clinical or laboratory research project. Candidates are required to have finished three years in psychiatry before taking this course.
3. Training in psychoanalysis—recognized by the Canadian Psychoanalytic Society leading to graduation as a qualified psychoanalyst, for selected students. Financial support for M.Sc. and psychoanalysis has to be arranged.

Applications for entry to these courses should be made to the Co-ordinator of Postgraduate Education, Department of Psychiatry, McGill University, Montreal 2, Quebec. (12316)

#### UNIVERSITY OF EXETER Postgraduate Medical Institute

A full-time postgraduate course lasting ten weeks will begin on October 2, 1967. These courses are held three times a year starting in October, January and April. Each course includes instruction in general medicine, paediatrics, preventive medicine, pathology, psychiatry, orthopaedics and general surgery. The programme is planned so that students wishing to specialize in a particular clinical subject are given facilities to do so, while other students are taught in each of the main clinical departments. Unpaid clinical attachments can be arranged at the end of the course for students requiring a longer period of training.

It is sometimes possible to accept general practitioners for one or two weeks of a course, and attendance for this period is recognized under Section 48 of the N.H.S. Act (1946). These courses are also recognized under the special scheme for the training for general practice of doctors who have been out of the health service for at least five years.

The fee for this course will be £40/£60 for students from the United Kingdom. Further particulars and application forms for these courses are obtainable from the Director, the Postgraduate Medical Institute, the University, Exeter, Devonshire. (11237)

Applications are invited from men and women aged at least 35 for a new senior post of Chief Social Work Adviser to the Departments of the Secretary of State for Scotland which has been created in connection with the reorganization of local authority social work services foreshadowed in the White Paper "Social Work and the Community." The post will be based in Edinburgh but frequent travelling will be necessary.

The departmental professional advisers concerned with the welfare, child care, probation and approved school services have recently been formed, with the related administrative officers, into an integrated Social Work Services Group. The Chief Adviser will take charge of the professional element of this Group. He will be expected to advise and assist in the professional aspects of reorganization of the local authority social work services and also to make a positive contribution to the development of the social aspects of policy on other matters for which the Secretary of State is responsible; for example, education, housing and planning.

Candidates must have a wide knowledge of the social work services, and must have held a responsible appointment concerned with the administration and practice of social work, welfare or related services, training for social work, social research, or another relevant field. They should normally be graduates, or hold a diploma or certificate in social science or social studies; but candidates without these qualifications will be considered if they are otherwise exceptionally well qualified by training or experience. Professional qualifications in some field of social work would be an advantage. An ability to plan, organize, and develop the services in question and to work with professional and administrative officers on both the national and local levels is essential.

Salary £4,825. Appointment may be either on an established basis (i.e., permanent and pensionable) or on a fixed period contract.

Further information may be obtained from, and applications should be addressed not later than September 22, 1967, to the Establishment Officer, Room 365A, Scottish Home and Health Department, St. Andrew's House, Edinburgh 1. (12261)

## DIRECTOR

### NEW SOUTH WALES INSTITUTE OF PSYCHIATRY

Applications are invited for appointment to the position of Director of the New South Wales Institute of Psychiatry.

Applicants should be registered medical practitioners qualified in psychiatry. The successful applicant will be responsible to the New South Wales Institute of Psychiatry for the administration of the affairs of the Institute, including training and research activities. These duties would occupy only about half of the Director's time and he would be expected to devote the remainder of his time to clinical work or to the conduct of a research project under the aegis of the Institute. For these reasons the Institute is seeking a person who is interested in maintaining an active participation in either a clinical or research field of psychiatry.

The N.S.W. Department of Public Health will co-operate with the Institute by providing, where practicable, access to existing facilities and resources for the Director.

The Director will be entitled with the approval of the Institute to accept an Honorary appointment in a General Hospital in the Metropolitan Area of Sydney.

Salary range: \$10,392 to \$11,452 per annum, plus expense allowance of \$208 per annum. The appointee will be eligible for:

- \* Payment of fares from point of embarkation to Sydney, for himself, wife and dependent children under the age of 18 years;
- \* An allowance of up to £Stg.250 towards removal and establishment expenses;
- \* Financial assistance towards accommodation expenses for up to one month after arrival, if necessary;
- \* Payment of salary from date of embarkation.

Applicants should include in their application the names of at least four referees to whom direct approach may be made.

The position is a full-time appointment under the Public Service Act, 1902, as amended. An excellent superannuation scheme is available.

In special circumstances and for a suitably qualified applicant the Institute would give consideration to a part-time appointment at a reduced salary for a specified number of years.

A brochure for the information of applicants is available on request.

Applications, giving full details of age, training, qualifications and experience, are to be addressed to the Official Secretary, New South Wales Government Offices, 56 Strand, London W.C.2, by September 30, 1967. (12280)

Oversea—contd.

# Cedilanid

speed  
safety  
versatility

## **speed**

Cedilanid is only weakly bound to the serum albumin, and passes rapidly to the various tissues giving rapid onset and relatively short duration of action.

## **safety**

Because Cedilanid is so rapidly eliminated from the body, the toxic effects of overdosage are short-lived.

## **versatility**

Cedilanid is an all-purpose cardiac glycoside, as valuable for rapid control of supra-ventricular paroxysmal tachycardia as for routine use in congestive heart failure.

**Cedilanid: particularly for patients who cannot tolerate digoxin or other digitalis preparations**

Tablets of 0.25 mg. lanatoside C; oral solution containing 1 mg. lanatoside C per ml.; ampoules containing 0.4 mg. deslanoside in 2 ml.
