2. An initial practice allowance

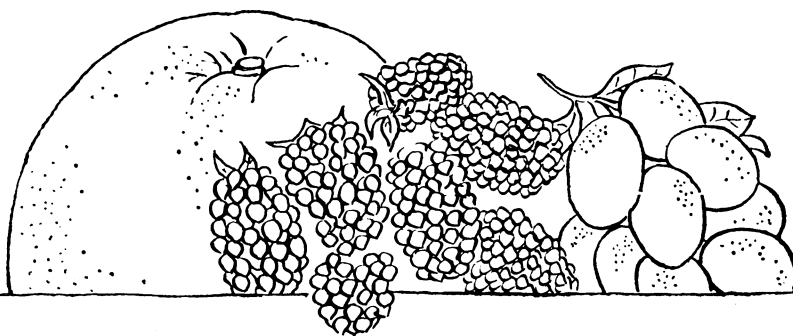

is also payable to a doctor who is

- (a) setting up a new single-handed practice,
- (b) filling a vacancy in a small single-handed practice,
- (c) joining, as an additional partner, an existing practice which has a very large list.

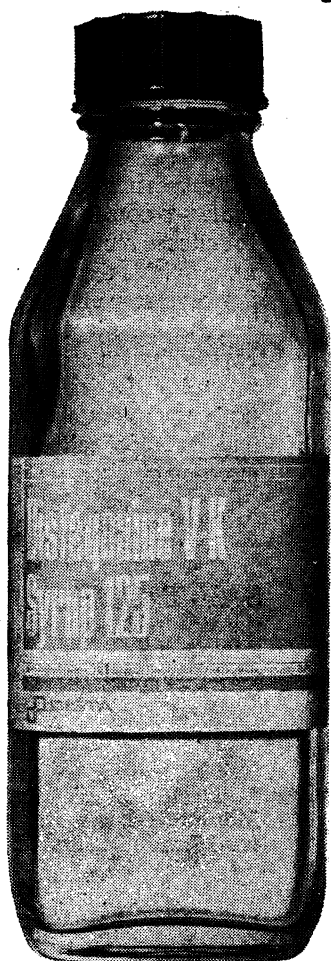

This applies in *all areas* classified by the Medical Practices Committee as 'designated' and not only in those quoted above.

Full details of the circumstances in which these allowances are payable, the extent of the income guaranteed by them, and the latest list of designated areas may be obtained from the Ministry of Health. If you are interested, please write for these details to:

the new 100 ml pack of DQV-K

Now—for the first time—you can prescribe 100 ml of penicillin V-K syrup in a single bottle of DQV-K. Normally this will be enough for five days treatment—the usual course for most penicillin-sensitive infections—and with just one bottle this course is more likely to be completed.

To augment the 125 mg/5 ml strength we are presenting, also for the first time, a 250 mg/5 ml strength for older children and adults.

Need any more reason for prescribing DQV-K 100 ml? Don't forget the unique fruit flavour and the assured quality of Dista penicillin.

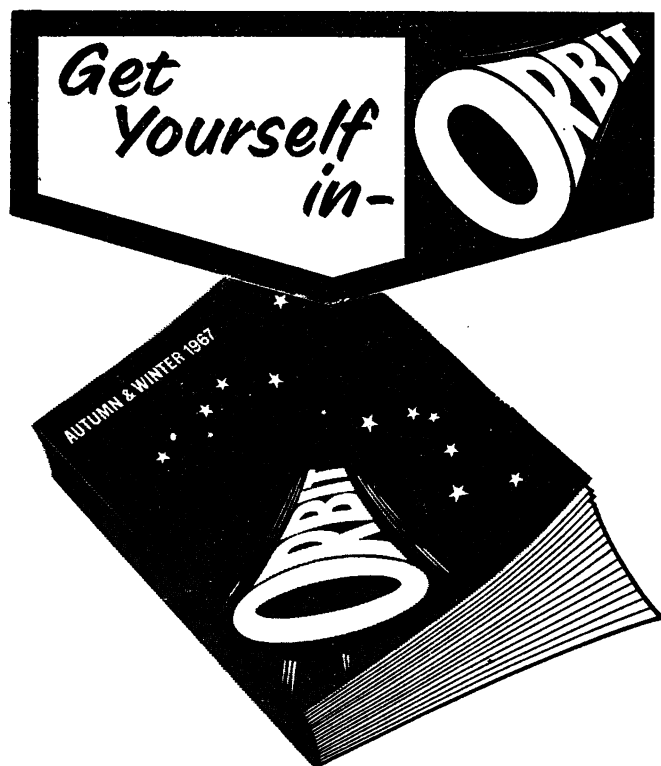

'Distaquin' V-K Syrup containing 125 mg or 250 mg of penicillin V (as potassium salt) BP per 5 ml.

In bottles of 100 ml.

Further information available on request.

There's a very good
reason why this
IUD is being
well accepted

It's not rejected

The crucial word in any talk concerning IUD's is not efficacy, but *acceptance*. A small number of women spontaneously extrude the IUD or have to have it removed. But the unique shape of the SAF-T-COIL ensures maximum *in utero* retention. Once inserted, the SAF-T-COIL assumes its distinctive configuration, conforming closely to the shape of the uterine cavity. Rejection is extremely unlikely.

Because of its presentation the SAF-T-COIL is introduced more easily and more quickly than any other device; placement is smooth and non-irritating. No sterilisation or assembly is required. Each sterile, peel package contains the integral unit of coil and insertion plunger.

ANTIBIOTICS, CORTICOSTEROIDS, PSYCHO-DRUGS, VITAMINS

During the past 50 years, modern pharmacology has given medicine more drugs than in the past 5000 years.

This is the result of scientific research, the yardstick used to measure the importance of a pharmaceutical company. The activity of Lepetit research-workers, starting way back in 1903 with the preparation of Almateine (tetramethylenhematoxylin), which was patented in the United States and other countries, is confirmed by over 1,700 patents granted throughout the world since 1945, by 2,800 pending applications and by over 800 published papers.

In recent years, the Lepetit Research Laboratories discovered and developed a completely new family of natural and semi-synthetic antibiotics, the rifamycins, including rifamycin SV (Rifocin®), rifamide (Rifocin® M) and rifampicin, the first orally active rifamycin.

THE HOSPITAL GAZETTEER 1967

A guide to the Hospitals in the United Kingdom

THE GAZETTEER

The gazetteer occupies 310 pages, and is designed especially to help the doctor seeking a hospital appointment up to Registrar status to choose the one most suited to his needs.

No other publication provides such comprehensive information. It is possible to tell at a glance:

The number of beds;
the establishment of medical staff;
the type of work and nature of special departments;
opportunities for preparation for postgraduate diplomas;
the kind of accommodation provided;
facilities for recreation and other relevant facts.

POSTGRADUATE EDUCATION

A section is specially devoted to information relating to the courses of instruction for higher degrees and diplomas provided by universities and other institutions.

A summary gives details of the authorities arranging the courses, the licensing bodies, the candidates' qualification requirements, and the length of each course.

PRIZES AND SCHOLARSHIPS

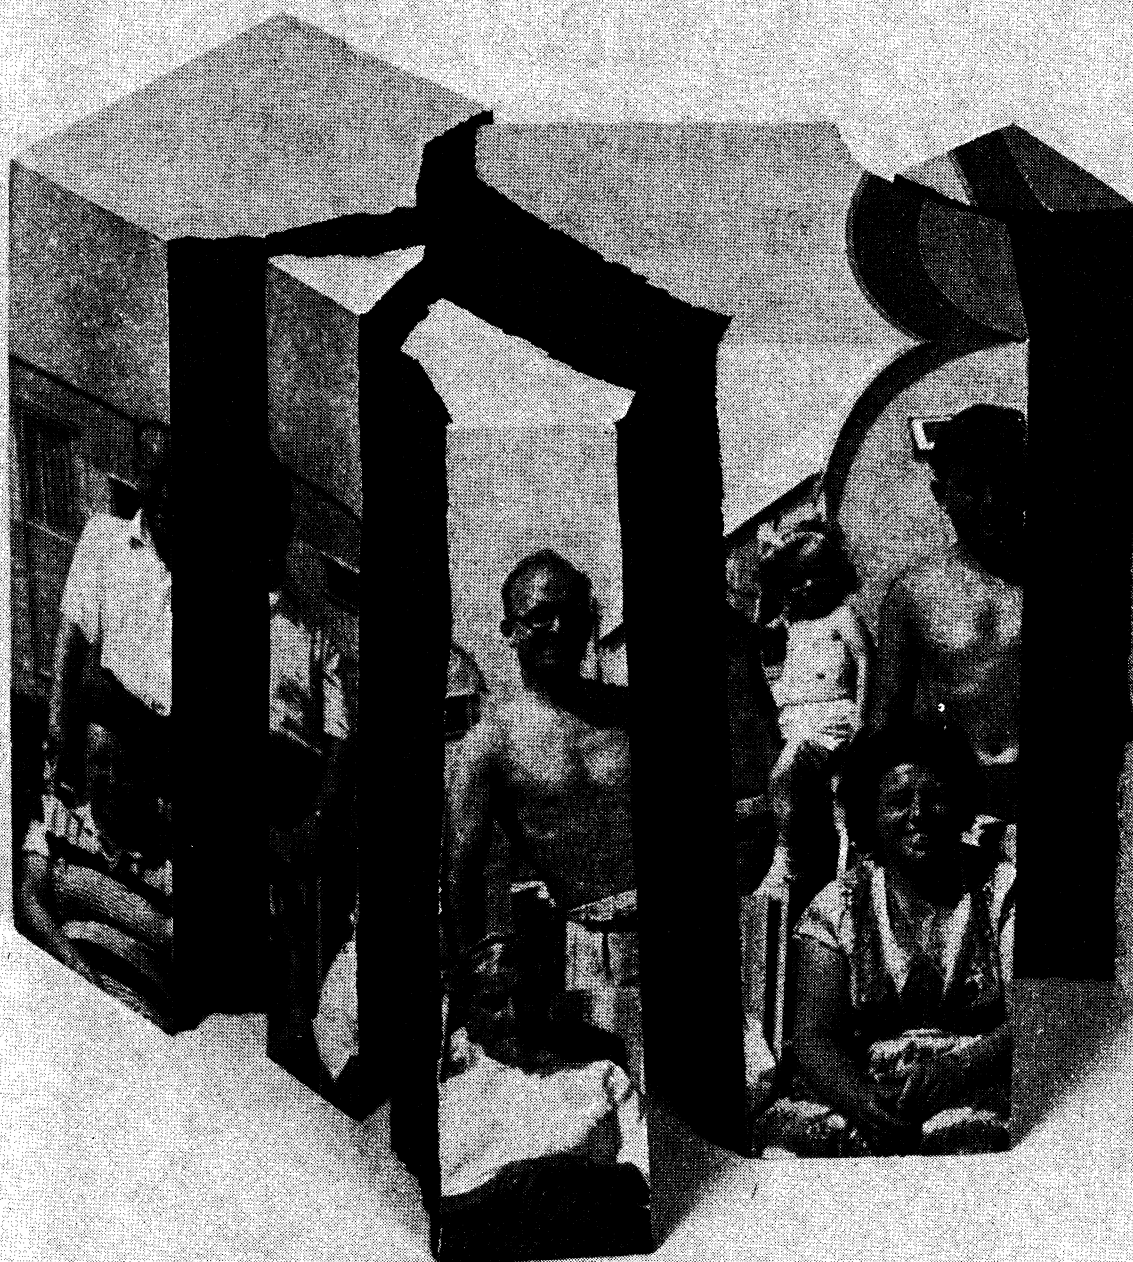

The Gazetteer includes a comprehensive list of prizes and scholarships.

Lyndiol 2.5 is only marginally better than other oral contraceptives...

The physician, trained to make rational choices, faces a problem when he comes to The Pill, for he knows that as far as the combined oral contraceptives are concerned all are virtually 100% effective.

He looks then for other significant differences. First of these is the incidence of side-effects. *(The latest data from the F.P.A. show that Lyndiol 2.5 is substantially free from side-effects).*

Price is another factor, especially as the acceptability of the oral contraceptive idea spreads down the socio-economic scale to those families who perhaps need contraception most and can afford it least. *(Lyndiol 2.5 offers the most reasonable price-to-patient).*

And he considers patient reliability—which dosage scheme will be easiest to follow? *(Lyndiol 2.5's 'fixed day' routine means simply that if a patient starts on, say, a Friday, she finishes three weeks later on a Friday and begins her new course on the following Friday).*

...you may well ask how wide is a margin?

Isn't it time
we had a truly
specific
peripheral
vasodilator?

Opilon

Such peripheral vascular disorders as Raynaud's phenomenon, chilblains, acrocyanosis or excessively cold hands and feet have always been difficult to treat decisively. Now the introduction of OPILON gives the physician specific therapy for such conditions — because OPILON blocks the vasoconstrictor effect of adrenaline in the arterioles of the skin. Unlike other vasodilators, OPILON does not alter blood flow to skeletal muscle; and because it is solely an alpha-adrenergic receptor blocking agent it cannot directly affect the heart or general circulation. When skin ischaemia is the cause of the complaint, OPILON reliably restores circulation.

OPILON is available as tablets of thymoxamine 40 mg., in bottles of 50 and 250. Basic NHS cost 18/- for 50 tablets, 84/- for 250 tablets. **Dosage:** One 40 mg. tablet four times a day, preferably at 8 a.m., 11 a.m., 2 p.m. and 5 p.m. **Side-effects:** Occasionally mild nausea, diarrhoea, vertigo, headache and facial flushing may be encountered. These are rare, however, and transient. No serious toxic effects have been reported and the development of tolerance has not been observed. **Contra-indications:** None are known. Full information and literature will gladly be sent on request.

Just anxiety... or depression as well?

'Anxiety is frequently intermingled with depression ...'

Clin. Trials J., 1965, 2, 317 (Nov)

When symptoms of anxiety and depression co-exist, the anxiety is usually easy to recognise but the depressive state is often less obvious.

'Tryptizol' usually controls the anxiety in addition to relieving the depression. The patient is calmer and mood is lifted.

It didn't mean much to him in 1950. Just a conversation overheard in his father's surgery about 'successful clinical trials'.

The invisible wedge
that helps
correct flat feet...

Do you recommend an external wedge? Those outside wedges soon wear away, and very often the child is made to feel self-conscious because his shoes look different from other children's. They also disturb the plane of forepart and heel. Surely it's more logical to have a wedge built in between the inner and outer sole where it remains invisible and completely unaffected by wear or repair of the shoe. That is how Start-rite INNERAZE shoes are made—on remedial lasts specially adapted to accommodate the internal wedge. That is why they are the only practical and thoroughly effective solution to this problem. Information from Mr. C. James, Fitting Consultant, Start-rite Shoes Ltd., Crome Road, Norwich, NOR 60A.

SUBJECT
HEALTH HAZARD

MARGARET IS TWO. She has a rare disease which means she can only eat specially prepared meals which the hospital makes up for her mother, to be heated at home.

But Margaret and her mother live in a single room with no cooking facilities at all.

When Inspector J. found out about Margaret, he asked the NSPCC's Emergency Relief and Welfare Department to help him get a cooker for Margaret's mother immediately. On the same day, a second-hand cooker was delivered to Margaret's house.

Cruelty to children?

Hardly. But only 11% of the NSPCC's cases are concerned with actual cruelty. Most of the time we just try to help families who are in trouble - any kind of trouble - to prevent children's suffering and unhappiness.

All these things take money. Not much money - for instance, Margaret's gas cooker cost only £6.

But the NSPCC is a service - unfortunately a very necessary one - on call round the clock, seven days a week. And Inspector J. and hundreds like him can only continue to help Britain's children as long as private donations and legacies support the NSPCC.

WHAT ARE YOU DOING TO HELP?

ANTIBIOTICS AND THE INTESTINAL FLORA

Treatment with broad spectrum antibiotics suppresses the normal flora, which may be replaced by abnormal resistant organisms causing diarrhoea.

This change can be prevented or reversed by the implantation of *Lactobacillus acidophilus* which has been rendered antibiotic-resistant, and is thus able to multiply freely under these abnormal conditions. The products of growth of the organism are inimical to that of many other bacteria^{1, 2} and thus contribute to its rapid preponderance over other species.

Oral treatment with antibiotic-resistant *L. acidophilus* in the form of ENPAC has been shown to eliminate *Candida* from the faeces of infants with antibiotic-induced diarrhoea, with relief of symptoms succeeded by rapid gain in weight^{3, 4} and greatly to reduce the numbers of staphylococci in the faeces of patients treated with tetracyclines.⁵

NEW PRODUCT

for pain that goes on- and on- and on- and on- and on-

Depronal SA does the same...

Now, for the first time, patients with protracted or recurrent pain can obtain relief for up to 12 hours at a time with a single dose. Depronal SA is a new analgesic preparation which releases its active constituent over an 8-12 hour period, unaffected by variations in gastro-intestinal motility, pH or temperature. Depronal SA frees the patient in pain from the routine of a four-hourly dosage regime. One capsule provides a whole day free from pain, and another ensures an undisturbed night's sleep. Capsules of 150 mg. dextropropoxyphene hydrochloride in containers of 50 and 250.

For pain that lingers, relief that lasts

thean

(PROXYPHYLLINE)

For chronic bronchitis and bronchial asthma

Thean (Proxyphylline) is a stable, soluble, and neutral Theophylline derivative and is an ideal preparation for the relief of Bronchospasm by parenteral, oral and rectal routes. Thean is extremely well tolerated and in consequence, really effective doses can be given with minimal risks of side effects.

Thean is available as ampoules, tablets and suppositories, thus providing a complete dosage range for treatment in acute and chronic conditions where Bronchospasm is present. Thean is also valuable in the prophylactic management of patients suffering from Chronic Bronchitis and Bronchial Asthma.

THEAN 300 Tablets

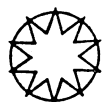

Each tablet contains 300 mg. Proxyphylline.

THEAN 400 Ampoules

Each 4 ml. ampoule contains 400 mg. Proxyphylline.

THEAN 500 Suppositories

Each suppository contains 500 mg. Proxyphylline.

The problem of the dirty mouth

Even in 1967 the dangers, and the unpleasantness, of the dirty mouth are still present in the post-operative period, as well as in many fevers; the geriatric patient being especially prone to them. Careful attention to oral hygiene will usually, of course, keep the patient comfortable and prevent complications. Such attention, however, is very time-consuming to the nurse; and it is not often realised that for most patients it can be replaced or supplemented by the use of chewing gum.

The regular use of chewing gum, by stimulating salivary flow, keeps the mouth clean in the most natural way possible. The patient is in a sense providing his own nursing care with the minimum of energy expenditure by himself.

Child patients, of course, need no encouragement to chew gum. The older patient may need encouraging—but not once he has appreciated the very obvious cleansing and refreshing effect that chewing gum has upon the mouth. Chewing gum is also of value to patients who are forbidden to smoke.

HEALTH CENTRES & GROUP PRACTICES

Lord Cohen of Birkenhead writes the introduction to a booklet on Health Centres and Group Practices based on recent articles in the *B.M.J.*

"... a series of excellent articles. . . Any practitioner who is considering how he can improve his service to his patients and his own working conditions will find this a very useful book."

Lancet (1966), 1, 380.

"... a 'must' for any group contemplating new practice premises . . . should be equally valuable to the M.O.H. planning a new health centre."

Brit. med. J. (1966), 1, 221.

"These reports . . . provide an admirable summary of the position today. . . ."

Practitioner (1966), 196, 341.

University of London Institute of Education**SENIOR RESEARCH
FELLOWSHIP**

A grant from Dr. Barnardo's has enabled the University of London Institute of Education to offer a full-time Senior Research Fellowship, tenable in the Department of Child Development of the Institute of Education. The duties of the Dr. Barnardo Fellow will be to initiate and carry out research into problems of child care and "deprivation" considered in its widest sense (i.e., including medical, psychological, educational, or social aspects). The appointment is for five years in the first instance. The person appointed will be expected to take up his duties by September, 1968, at the latest.

A considerable amount of related research is already being undertaken in the Department of Child Development of the Institute, which offers very good research facilities and opportunities. Within the terms of the Grant it will be open to the Dr. Barnardo's Fellow to pursue independent research or to collaborate in and extend existing research projects.

Salary in scale £2,575 by £105 to £3,415 plus £80 London Allowance.

Further particulars and application forms may be obtained from the Secretary, University of London Institute of Education, Malet Street, W.C.1, to whom applications should be returned by October 31, 1967. (12968)

Applications should be sent at once if no closing date is given. Canvassing disqualifies (Statutory Instrument, 1966, No. 569).

SALARY SCALES OF HOSPITAL MEDICAL STAFF

Following the Seventh Report of the Review Body, new salary scales have been approved. These came into force on October 1, 1966. The scales are set out below:

HOUSE OFFICERS: Each post in this grade shall be tenable for six months. £1,100 per annum for the posts held during the first year; £1,200 per annum for posts held during the second year; £1,300 per annum for posts held during the third and subsequent years, subject to full registration.
Deductions of £150 per annum in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

SENIOR HOUSE OFFICERS: £1,450 per annum in the first year; £1,550 per annum in the second year; £1,650 per annum in the third or subsequent years. Deductions of £175 per annum in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

REGISTRARS: £1,650 per annum, rising by four annual increments of £100 to £2,050.

Deductions of £175 per annum for those with remuneration at the first two points on the scale, and £200 per annum for those on the third and subsequent points will be made in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

On assimilation to the scale for Registrars, one increment and one only shall be given for any year or part of a year in excess of two spent previously in the senior house officer grade.

Allowances at rates up to £140 per annum shall be payable to house officers, senior house officers and registrars occupying posts approved for such allowances in peripheral hospitals.

SENIOR REGISTRARS: £1,950 per annum rising by one increment of £100 and four further annual increments of £125 to £2,550.

Deductions of £225 per annum in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

On assimilation to the salary scale for senior registrars, increments to a maximum of two shall be given for each year or part of a year in excess of three spent previously in the registrar grade.

MEDICAL ASSISTANTS: £1,850 per annum rising by fourteen annual increments of £100 to £3,250.

Deductions of £225 per annum in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

CONSULTANTS: £3,200 per annum rising by five annual increments of £185, and then by four further increments of £190 to £4,885.
Deductions of £350 per annum in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

Doctors with satisfactory training will not be excluded from consideration for appointment to consultant posts on the grounds that they have spent little or no time as senior registrars.

All National Health Service hospital appointments are in accordance with the Terms and Conditions of Service of Hospital Medical Staff. Memoranda on the following subjects of particular interest have been issued by the Ministry of Health: Standard of Residential Accommodation, Telephone Charges, Removal Allowances, Study Leave.

Nulacin and only Nulacin provides intragastric milk-alkali drip therapy for the ambulant patient

“In view of the ineffectiveness of most of the tableted antacids, the milk-alkali tablet (Nulacin) would appear to be the antacid of choice for ambulatory therapy.”

Safe, Simple, Effective

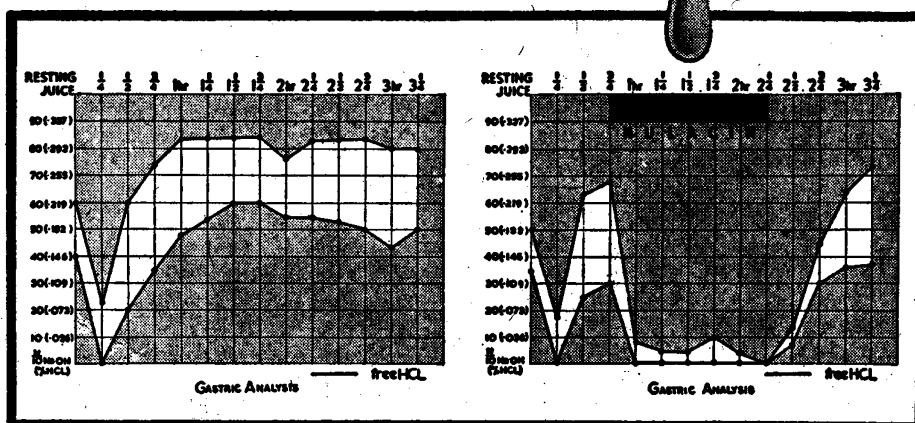

NULACIN TABLETS provide a safe, simple and effective treatment of peptic ulcer.

In treating peptic ulcer a Ryle's tube may be passed through the nose and into the oesophagus and a mixture of milk and antacid allowed to flow continuously over the affected area. This form of therapy can only be employed in those patients who are in bed and for the ambulant patient Nulacin tablets are preferable. Nulacin tablets are prepared from whole milk combined with dextrans and maltose, together with the trisilicate, oxide and carbonate of magnesium and calcium carbonate. Nulacin tablets when allowed to dissolve slowly in the mouth provide milk-alkali drip therapy. In fact, Nulacin tablets have revolutionized the treatment of peptic ulcer.
