**'BANISTYL'**  
the "wide awake"  
antihistaminic

**One tablet three times daily effective  
in most cases**

**Little if any soporific effect**

**Well tolerated by patients of all ages**

'Banistyl' is generally well tolerated at the recommended dosage levels; side-effects are usually of a mild and transient nature. Somnolence is infrequent and generally not marked; when it does occur, it frequently subsides after the first few days of treatment or may be controlled by dosage adjustment. Other side-effects which have been reported and which are usually of little significance include nausea, epigastric pain, vertigo, diarrhoea and headache.

Although there is no evidence to suggest that 'Banistyl' is embryopathic, it is a sound medical principle to avoid, wherever possible, prescribing a new drug during the first three months of pregnancy.

Certain activities, including control of vehicles or machinery, should not be undertaken by a patient starting a course of 'Banistyl' until it is evident that the drug has no soporific or other central nervous system side-effects, or until any such effects have subsided.

'Banistyl' is supplied as tablets containing the equivalent of 20 mg. dimethothiazine (as mesylate).

# a striking demonstration of Lincocin penetration

**Heart tissue**Assay organism: *Streptococcus haemolyticus***Lung tissue**Assay organism: *Staphylococcus aureus***Lung tissue**Assay organism: *Diplococcus pneumoniae*

Since antibiotic effectiveness is dependent upon concentration at the site of infection, it is obvious that antibiotic diffusion and tissue penetration are of supreme importance. The accompanying photographs of an experiment in animals demonstrate Lincocin's capacity in this respect.

A healthy dog weighing 9.5 kg. was injected intramuscularly with 25 mg./kg. of lincomycin hydrochloride (base equivalent). After 90 minutes tissue samples were excised and placed on Petri dishes in which the agar had previously been seeded with pathogenic strains of *Staphylococci*, *Streptococci* and *Pneumococci*, respectively. Following incubation these photographs were taken of the plates containing either heart or lung tissue. The clear zones show that within 90 minutes Lincocin had penetrated these tissues in concentrations sufficient to inhibit growth of the pathogenic inocula.

**Lincocin Capsules:** Each capsule contains lincomycin hydrochloride monohydrate equivalent to 500 mg. lincomycin base, in bottles of 12 and 100.

**Lincocin Sterile Solution:** In 2 ml. ampoules. Each 2 ml. contains lincomycin hydrochloride monohydrate equivalent to 600 mg. lincomycin base.

**Lincocin Syrup 250:** Each 5 cc. contains 250 mg. lincomycin (as lincomycin hydrochloride monohydrate), in bottles of 60 cc.

# AIM FOR THE BAD'UNS WITH 'ILOSONE'

With 'Ilosone', your aim is effective and selective. Killing off the pathogenic bacteria, allowing the normal gut flora to pursue their useful life.

The real 'bad 'uns', of course, are Gram positive cocci, causing most of the infections you see every day. Against these infections 'Ilosone' is much more active than, for example, the tetracyclines and it will not discolour teeth or deposit in bone. Nor is 'Ilosone' likely to cause diarrhoea or gastro-intestinal upset—disadvantages which the tetracyclines share with the broad spectrum penicillins.

Effective. Selective. Use 'Ilosone' when you go gunning for bad 'uns—in acute tonsillitis or acute bronchitis or any common bacterial infection of the upper respiratory tract. *Haemophilus influenzae*? Yes, 'Ilosone' deals with this 'bad 'un' too!

## SYRUP IS EASIER

How many patients refuse or fail to take tablets or capsules? Difficulty in swallowing or the taste of "the medicine" are often the reasons given. Either objection is easily overcome by a palatable syrup presentation.

Pleasantly fruit-flavoured Broxil Syrup is readily accepted by young and old alike. In addition it rapidly attains higher blood levels than tablets or capsules. Such infections as Tonsillitis, Pharyngitis and Strep. Throat, which increase the difficulty of swallowing, respond more quickly to Broxil Syrup.

Broxil Syrup's acceptability also encourages patients to "take their medicine" as often and for as long as it is prescribed.

# OWING

**INDICATIONS** Tonsillitis, Pharyngitis, Otitis Media, Strep. Throats, Acute Bronchitis, and infections due to sensitive organisms where a syrup preparation is more acceptable than tablets or capsules.

**AVAILABILITY** Syrup (125 mg./5 ml.) in 60 ml. bottles. Tablets (125 and 250 mg.) and capsules (250 mg.) are also available.

**DOSAGE** Children: 62.5–125 mg. ( $\frac{1}{2}$ –1 teaspoonful) four times daily,  $\frac{1}{2}$  hour before meals. Adults: 125–250 mg. (1–2 teaspoonsful) four times daily,  $\frac{1}{2}$  hour before meals.

In severe infections the dosage may be safely increased.

### RELIEVES SYMPTOMS, PROMOTES A SENSE OF WELL-BEING

It has been found that practically every ptotic patient experienced relief of symptoms, increased energy and sense of well-being following application of proper support.

The doctor can rely upon Spencer for *proper support* because each Spencer is individually designed, cut, and made for each patient from detailed measurements and a complete description of that patient's body and posture.

With a Spencer, the co-relation of abdominal and back support induces correct posture, modifies an unfavourable tilt. Ptosed organs are lifted to normal position to improve circulation. Better digestion, elimination, respiration often result.

## Now. A natural aid to menstrual regulation.

Cycle control – naturally! Whether the problem is irregularity, amenorrhoea or dysmenorrhoea, most menstrual disorders can be regulated by balanced hormonal medication. Treatment with Femetra is successful because it imitates the body's normal production of hormones. A normal hormonal pattern is imposed and the cycle is regulated.

Femetra provides oestrogen alone for the first sixteen days, with the addition of a progestogen for the last five days to establish a normal, secretory endometrium. Thus the total hormone dosage is kept to the minimum necessary for efficient cycle control and therapeutic effectiveness.

The new cosmetic-type pack is designed for ease and convenience. Each monthly course consists of 16 pink tablets (mestranol 0.1 mg); 5 white tablets (mestranol 0.1 mg norethynodrel 2.5 mg). Femetra is available in 3 and 1 month packs.

## drop Betnesol Tablets into a glass of warm water...

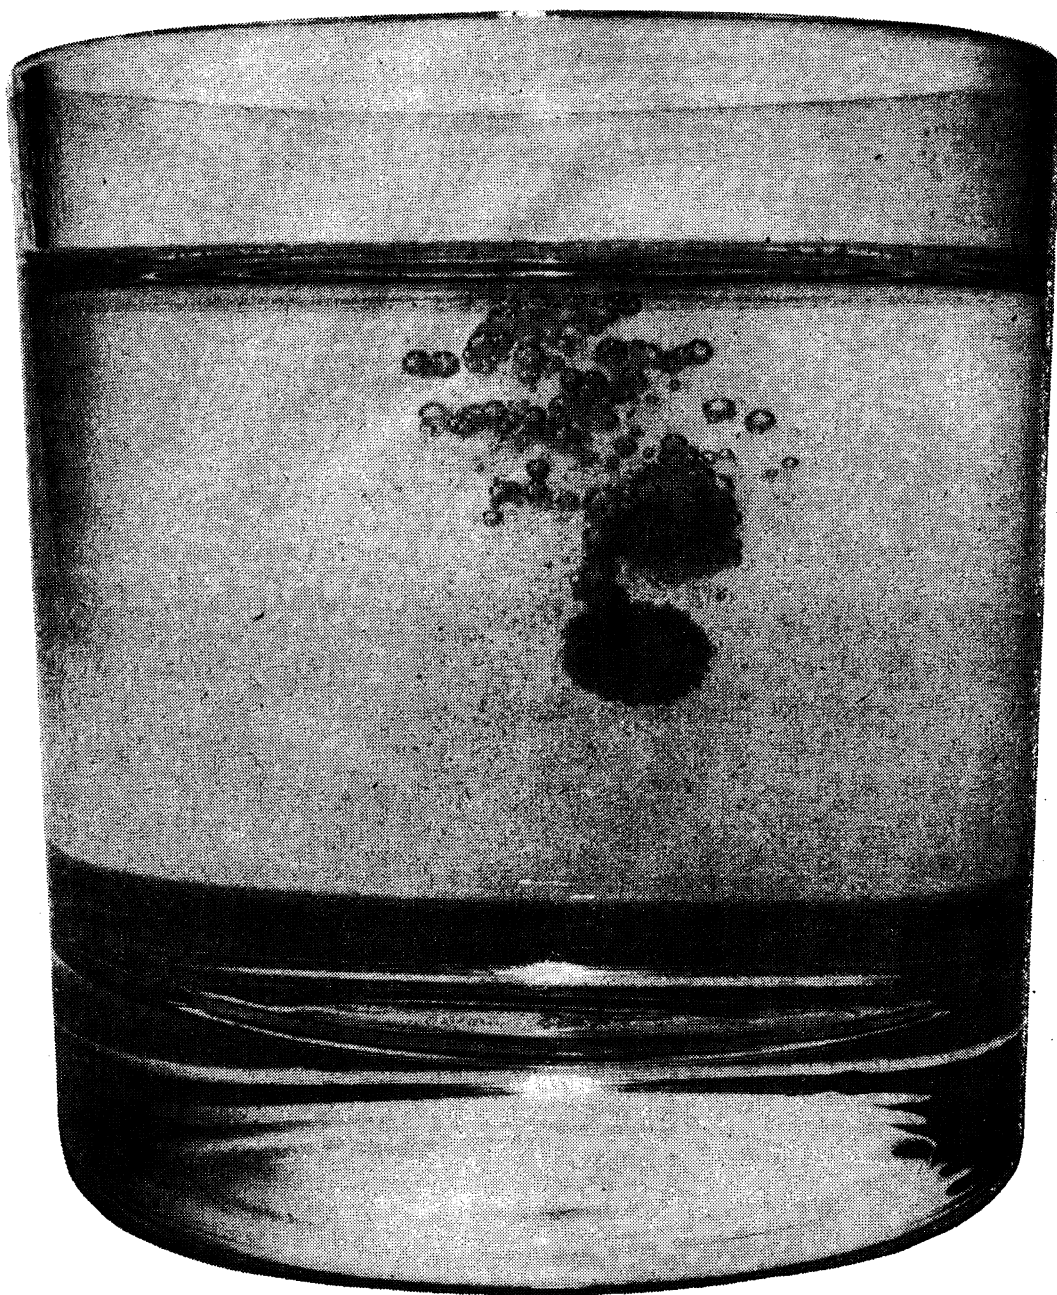

Immediately this corticosteroid begins to dissolve. In less than a minute you will have a clear, particle-free solution of steroid. Simple enough — but the implications are important. The complete solubility of Betnesol ensures that there are no solid steroid particles to irritate the stomach. It also ensures maximum absorption

and therefore the most consistent therapeutic response.

To solubility Betnesol adds all the advantages of betamethasone; potent anti-inflammatory action and a low incidence of side effects. It does not normally cause salt and water retention or significant potassium loss.

bethanidine sulphate

A recent 2½-year study<sup>1</sup> has confirmed that 'Esbatal' (bethanidine sulphate) provides a more acceptable form of therapy for the patient than other antihypertensive drugs in current use. Control of blood pressure was achieved with 'Esbatal' in about three-quarters of the hypertensive patients treated—and side-effects were rare.<sup>1</sup> In comparing 'Esbatal' with guanethidine and methyldopa the authors considered that 'Esbatal' was to be preferred for beginning treatment in any new hypertensive patient.<sup>1</sup> Better acceptance of 'Esbatal' by the patient, again compared with guanethidine and methyldopa, was also demonstrated in another trial where 'Esbatal' scored the highest rating for patient preference.<sup>2</sup>

## *In the elderly, the special problems of constipation...*

Constipation in the elderly can present special problems of treatment. Weakened abdominal muscles . . . the dangers inherent in straining . . . refusal to co-operate . . . the presence of pain, to which anal fissures or haemorrhoids may contribute . . . the need for enemas and suppositories . . . the risk of faecal impaction, with consequent manual removal . . .

Clinical trials have shown the distinctive value of *Dorbanex* in the treatment of the elderly patient. In a recent trial in a geriatric ward<sup>1</sup>, *Dorbanex* achieved 23% more bowel openings than did standardised senna, and 61% more than miscellaneous laxatives. The stool formation "allowed easy defaecation without an increase in faecal incontinence". Suppositories were needed only five times during 644 patient-days of treatment, and side-effects were negligible and transient.

"*Dorbanex* was readily accepted by all patients, even those with some degree of senile dementia to whom the administration of other medicaments has proved difficult". In this trial *Dorbanex* achieved an average of more than one bowel opening every day—an increase of more than 50% over the openings achieved by standard aperients. No patient complained of griping, whereas other medicaments had caused several such complaints. No suppositories were needed, and in 360 patient-days of treatment only one manual removal was performed.

*Dorbanex* can simplify management of the patient posing these problems by providing comfortable, reliable and trouble-free evacuation. *Dorbanex* produces a soft but well-formed stool without griping or other unpleasant side-effects, reduces the need for enemas and suppositories, helps to prevent faecal impaction, and makes defaecation easier without increasing faecal incontinence.

## *...have a straightforward solution*

## Mixogen

Appreciating the limited role of sedatives and tranquillizers in what is essentially a metabolic disturbance, physicians are turning increasingly to the treatment that masters the immediate symptoms of depression and irritability and acts at a fundamental level as prophylaxis against the long-term consequences of ovarian-pituitary imbalance.

'Today when the average woman can expect to reach her threescore years and ten, it would seem unrealistic to deny hormone treatment, which not only alleviates all the troublesome and antisocial symptoms of the menopausal and postmenopausal phases but is also a prophylactic measure against osteoporosis, senile vaginitis, hypertension, and coronary heart disease, to mention but a few hazards of oestrogen depletion.'

The arguments against the use of plain oestrogen therapy – endometrial bleeding and nausea – are countered when Mixogen is used.

'Perhaps the best way of avoiding oestrogenic bleeding is to use one of the oestrogen-testosterone combinations, of which the original – Mixogen – is the best.'

# Why a doctor needs a special sort of help when he's sick.

Some people can get by on National Insurance Benefit when they're sick.

As a doctor you haven't a chance. Commitments, such as your surgery, would cripple your income. And you know better than anyone that the worries of keeping your family on a watered-down budget would retard your recovery.

That's why it's so wise to insure against sickness. Wiser still to insure with the company run exclusively for doctors and dentists: the Medical Sickness Society.

You know that one day you may need this insurance. Write to us today. Together we'll find the policy that will work hardest for you.

Do it now. Turning the page could mean turning your back on a worry-free future.

## ANTIBIOTICS AND THE INTESTINAL FLORA

Treatment with broad spectrum antibiotics suppresses the normal flora, which may be replaced by abnormal resistant organisms causing diarrhoea.

This change can be prevented or reversed by the implantation of *Lactobacillus acidophilus* which has been rendered antibiotic-resistant, and is thus able to multiply freely under these abnormal conditions. The products of growth of the organism are inimical to that of many other bacteria<sup>1,2</sup> and thus contribute to its rapid preponderance over other species.

Oral treatment with antibiotic-resistant *L. acidophilus* in the form of ENPAC has been shown to eliminate *Candida* from the faeces of infants with antibiotic-induced diarrhoea, with relief of symptoms succeeded by rapid gain in weight<sup>3,4</sup> and greatly to reduce the numbers of staphylococci in the faeces of patients treated with tetracyclines.<sup>5</sup>

# MEDICAL OFFICER

## - Dunstable

We require a full-time industrial Medical Officer to be based at our Dunstable Plant. He will be primarily responsible for the direct supervision of occupational health services at the truck manufacturing plants at Luton and Dunstable. He will also visit regularly the Company's plastics and die castings factories in Birmingham and Coventry and some of the servicing facilities and offices in the London area.

He will be administratively and professionally responsible to the Medical Director, Rootes Motors, who will play an active part in the development of the occupational health services to this group of employees. There are a number of industrial nursing sisters employed at these locations.

Agreement has been reached, in principle, that the successful candidate will be granted an Honorary Clinical Assistantship in the Accident Service of the Luton and Dunstable Hospital.

This appointment offers an opportunity to a man with suitable experience in hospital or general practice to enter industrial medicine or for someone with some industrial experience to widen his knowledge.

Starting salary will be in accordance with the British Medical Association Scale for Medical Officer but allowance will be made for previous relevant experience in selecting the starting point in the scale.

The successful applicant will be eligible for participation in the Company Management Roll Car Plan. Generous pension arrangements are in force and assistance will be given with removal expenses, where necessary.

Please write to: **Dr. W. M. Dixon, M.B., M.R.C.P., D.I.H., Medical Director, Rootes Motors Limited,

**SALARY SCALES OF HOSPITAL MEDICAL STAFF**

Following the Seventh Report of the Review Body, new salary scales have been approved. These came into force on October 1, 1966. The scales are set out below:

**HOUSE OFFICERS:** Each post in this grade shall be tenable for six months. £1,100 per annum for the posts held during the first year; £1,200 per annum for posts held during the second year; £1,300 per annum for posts held during the third and subsequent years, subject to full registration.

Deductions of £150 per annum in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

**SENIOR HOUSE OFFICERS:** £1,450 per annum in the first year; £1,550 per annum in the second year; £1,650 per annum in the third or subsequent years. (No deductions for lodging will be made for compulsory residence.)

**REGISTRARS:** £1,650 per annum, rising by four annual increments of £100 to £2,050.

Deductions of £175 per annum for those with remuneration at the first two points on the scale, and £200 per annum for those on the third and subsequent points will be made in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

On assimilation to the scale for Registrars, one increment and one only shall be given for any year or part of a year in excess of two spent previously in the senior house officer grade.

Allowances at rates up to £140 per annum shall be payable to house officers, senior house officers and registrars occupying posts approved for such allowances in peripheral hospitals.

**SENIOR REGISTRARS:** £1,950 per annum rising by one increment of £100 and four further annual increments of £125 to £2,550.

Deductions of £225 per annum in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

On assimilation to the salary scale for senior registrars, increments to a maximum of two shall be given for each year or part of a year in excess of three spent previously in the registrar grade.

**MEDICAL ASSISTANTS:** £1,850 per annum rising by fourteen annual increments of £100 to £3,250.

Deductions of £225 per annum in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

**CONSULTANTS:** £3,200 per annum rising by five annual increments of £185, and then by four further increments of £190 to £4,885.

Deductions of £350 per annum in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

Doctors with satisfactory training will not be excluded from consideration for appointment to consultant posts on the grounds that they have spent little or no time as senior registrars.

All National Health Service hospital appointments are in accordance with the Terms and Conditions of Service of Hospital Medical Staff. Memoranda on the following subjects of particular interest have been issued by the Ministry of Health: Standard of Residential Accommodation, Telephone Charges, Removal Allowances, Study Leave.

**COUNTY COUNCIL OF THE WEST  
RIDING OF YORKSHIRE**

Applications are invited from registered medical practitioners holding the D.P.H. or for completion of D.P.H. training for appointment to fill a joint divisional health and county district post in the senior departmental medical officer grade. Salary scale £2,265 to £2,805. Qualifications and previous experience will be taken into account when determining the commencing salary.

The duties are mainly in the school health and infant welfare services and in addition the person appointed will be required to act for the Divisional Medical Officer and School Medical Officer of Health in his absence and will be appointed Deputy Medical Officer of Health to the Boroughs of Batley and Spenshaw and the Urban Districts of Heckmondwike and Mirfield.

The county council's scales of motor car and subsistence allowances are applicable. Regular conferences of medical staff are held and there are opportunities for in-service training, attendance at refresher courses and specialization. The post gives considerable opportunities for experience of the administration of both local health and local authority. The appointment is superannuable and the successful candidate must satisfy the county council's requirements for medical fitness.

Further details and forms of application from the undersigned.—Ronald W. E. Rott, County Medical Officer, Health Department, Wood Street, Wakefield. (10451)

● Little publicity, much less than it deserves, has been given to the potential of the method (oral contraception) for the production of highly desirable and pleasant side-effects. These would include personal happiness of the patient, presumably from confidence in the future that the method affords; and it is noticeable how this sense of happiness appears to extend to other members of the family. This often results in an altogether better adjusted and more integrated family unit than previously. ●

## Ovulen 1 mg., the most widely prescribed oral contraceptive in Britain today.

**Doctor experience** Since Ovulen 1 mg. was introduced in 1963 physicians have found it to be not only effective, but extremely well tolerated. More prescriptions are written for Ovulen 1 mg. than any other oral contraceptive in Britain.

**Clinical experience** Clinical research on Ovulen 1 mg. has been continuous. It was subjected to clinical trials in over 2,500 women before it was made commercially available; to date more than 16,000 women have been involved in trials totalling more than 190,000 cycles of experience.

**Patient experience** Millions of women in Britain and overseas are using this low-dose oral contraceptive. One reason is the trouble-free protection it affords—acceptability rates in clinical trials have been as high as 95.4 patients in every 100, over a period of more than four years.

**Company experience** In the fifteen years since Searle developed the first oral contraceptive the company's products in this field have been accepted by many millions of women.

five patients. 10 ml. of blood was taken for serum-iron determination from the fasting patient who then took three tablets of 'Ferromyn S' (ferrous-succinate/succinic-acid mixture). Serum-iron levels were repeated 3 hours later. An increase of 100  $\mu$ g. per 100 ml. or more in the serum-iron indicates normal iron absorption. The iron tablets used in the test can be the preparation selected for treatment of the patient; but lately we have given all patients ferromyn S, since in our experience this has been the most effective oral iron tablet. We feel that iron malabsorption is certainly present if it occurs when ferromyn S is used. It is also better for comparison with other patients and for comparison with later tests in the same patients if a standard test is evolved. The test can be repeated with 800 mg. ascorbic acid taken orally at the same time and in addition to the iron. This test was repeated

Lancet 1967, 1,1297

# Why Ferromyn-S is more effective than other oral iron treatments.

The double radio isotope technique for measuring absorption of substances in the body\* eliminates the wide range of variables present in the normal clinical trial. Applications of this technique in experiments to determine the efficacy of common iron salts led to the discovery that Free Succinic Acid actively promotes the absorption of iron. When added in its optimum ratio an increase of 30% or more can be expected.

## What is the value of 30% greater absorption?

It is now widely accepted that the incidence of side effects associated with oral iron therapy is in direct ratio to the dosage of elemental iron. Ferromyn-S (Ferrous Succinate & Free Succinic Acid) contains less elemental iron than the conventional iron tablet but, because of the higher absorption, gives a better Haemoglobin response. At the same time, this combination of low iron

dosage and greater absorption significantly reduces the incidence of side effects encountered with the common iron salts. Ferromyn-S, therefore provides a high efficiency therapy at a cost of less than 2d. per day.

Full information is available on request.

## ST. ANDREW'S HOSPITAL NORTHAMPTON

President:  
Lieutenant-Colonel J. Chandos-Pole, O.B.E.  
Medical Director:  
James Harper, M.B., F.R.C.P. (Edin.), D.P.M.

This private hospital receives patients, both male and female, suffering from nervous and mental disorders, including alcoholism and senile illness. The fees range from twenty guineas per week. Private rooms with special nurses can be provided, either in the hospital or in one of the villas in the grounds. The hospital is situated in 130 acres of pleasant grounds which provide all recreational facilities. These include a nine-hole golf course, sports ground, tennis courts, etc. A recreation and occupation centre, known as Gloucester House, has been opened recently which includes an occupational therapy department, a swimming pool, a squash court and a library with an adjoining reading room.

### WANTAGE HOUSE

This is a separate reception unit to which patients may be admitted. It is equipped for the complete investigation of nervous and mental disorders by the most modern methods. All forms of treatment are available.

Charges for treatment at St. Andrew's are allowance for benefit to British United Provident Association and Private Patients Plan subscribers.

For terms and further particulars apply to the Medical Director (Telephone No. 34354 Northampton), who can be seen in London by appointment.

# INDOCID<sup>®</sup>

Indomethacin

## a sign of improvement

### *a more active life for many arthritic patients...*

*patients, for example, in whom the ability to perform simple, everyday tasks is limited by disorders such as rheumatoid arthritis, osteoarthritis, ankylosing spondylitis, and bursitis. In such cases, 'Indocid' can reduce pain, inflammation and stiffness, and bring a progressive improvement in mobility.*

"It is clear from reported clinical experience that indomethacin is a powerful compound, capable of giving relief of symptoms and reduction of inflammatory signs in several rheumatic disorders."

*Brit.med.J.*, 1966, 1, 80 (8 Jan).

"There is general agreement that indomethacin is an effective non-corticosteroid drug with anti-inflammatory, antipyretic and pain-relieving properties."
