SCOTTISH POSTGRADUATE MEDICAL ASSOCIATION

Chairman:

Sir Hector MacLennan

The Scottish Postgraduate Medical Association is constituted by the Universities of St. Andrews, Glasgow, Aberdeen, Edinburgh, and Dundee, and by the Royal College of Physicians of Edinburgh, the Royal College of Surgeons of Edinburgh and the Royal College of Physicians and Surgeons of Glasgow.

The object of the Association is to develop post-graduate medical education in Scotland by means of co-operative endeavour and co-ordinated planning.

All the requirements of postgraduate medical education are available in Scotland and the Postgraduate Deans and Directors in Edinburgh, Glasgow, Dundee and Aberdeen are prepared to organize integrated courses of training for postgraduate students.

When the anti-convulsant regimen fails

-add Benuride for better control

For firm control of grand mal or temporal lobe epilepsy few anti-convulsant drugs are as effective as Benuride (pheneturide). Yet treatment with Benuride is remarkably trouble-free. Twelve years of clinical experience, as reported in over 30 published papers, has confirmed its wide margin of safety and comparative freedom from toxic effects. A change to Benuride means better control—and a brighter, more alert life for your epileptic patient.

Benuride: tablets containing 200 mg. pheneturide. A new comprehensive product booklet, giving up-to-date details of clinical experience, is now available. We shall be pleased to send you a copy, or any other information, on request.

A simple case for low-cost Betnovate

For your detailed reading

Betnovate, Betnovate-C and Betnovate-N skin preparations

Betamethasone 17-valerate with or without chinoform or neomycin for dermatological use

Presentation

Retnovate (0·1% betamethasone as 17-valerate)
Cream: 15, 30 and 100 gram tubes
Ointment: 15, 30 and 100 gram tubes Lotion: 20 ml bottle Scalp Application: 30 gram plastic squeeze bottle

Betnovate-C (Betnovate + 3% chinoform) Cream: 15, 30 and 100 gram tubes Ointment: 15, 30 and 100 gram tubes

Betnovate-N (Betnovate + 0.5% neomycin sulphate) Cream: 15, 30 and 100 gram tubes Ointment: 15, 30 and 100 gram tubes Lotion: 20 ml bottle Tulle*: tin of 10 pieces (4 in x 4 in)

Advantages

In the skin-blanching test¹ Betnovate (betametha-sone 17-valerate) was shown to be the most potent of a long series of corticosteroids put to test.² The validity of this screening test has been confirmed by clinical experience indicating that Betnovate is therapeutically more effective than the other topical corticosteroids in the majority

Indications

Betnovate produces a remarkably rapid and profound response in inflammatory dermatoses which normally respond to topical corticosteroid therapy. It also makes possible effective topical therapy of more difficult conditions such as sistant psoriasis, hypertrophic lichen planus lichen simplex chronicus and eczema of the hands. Clinical indications for use of Betnovate dermatological preparations include:

Infected seborrhoeic eczema on forehead

Bottom Eczema and infection cleared after six days' treatment with Betnovate-N Cream applied twice daily

psoriasis: eczema - including atopic eczema. infantile eczema, Besnier's (flexural) prurigo, nummular (discoid) eczema, stasis eczema, otitis externa; neurodermatoses – including lichen simplex; anal and vulval pruritus; seborrhoeic dermatics; intertrigo; contact sensitivity reactions and allergies – including insect bites; sunburn; 'prickly heat'; lichen planus; discoid lupus erythematosus; generalised erythrodermia. The preparations with neomycin should be used when bacterial infection is present or suspected. Similarly, the preparations containing chinoform can be used when bacterial or fungal infection is present or suspected.

Side effects

Corticosteroids should never be used in the presence of infection except in conjunction with effective chemotherapy. Usually the preparations are well tolerated. However, sensitisation phenomena have on very rare occasions been reported with the use of corticosteroid-containing prepara tions for local application. From existing reports it is difficult to determine whether or not the corticosteroid or other components were responsible Neomycin, largely confined in its use to local application, has been reported to give rise to skin sensitisation. These occurrences, however, are rather uncommon and this antibiotic is probably one of the best tolerated when used for local application. It can be said to have a very low sensitising potential. If, by remote chance, any indication of sensitisation occurs, application should be stopped immediately. When occlusive dressings are used on extensive areas, or for prolonged periods, it is desirable that, as with all topical corticosteroids, the possibility of systemic absorption should be considered.

Application

Cream, Ointment, Lotion and Scalp Application A small quantity should be applied gently to the affected area once or twice daily until improvement occurs. It may then be possible to

maintain progressive improvement using one application a day or less.

Apply direct to the lesion and cover with an absorbent dressing if necessary.

Legal restriction

To be supplied on prescription only (Therapeutic Substances Act: Part II).

Glaxo Laboratories Ltd. Greenford, Middlesex

You'll never know malabsorption exists if you prescribe Ferrograd C for all iron deficiency anaemias

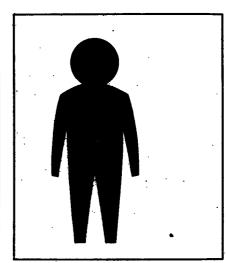

and you'll automatically ensure depleted body stores are replenished simply by continuing treatment and your patients will very rarely complain of side effects after the once-daily, before-food dosage.

As the haemoglobin level approaches normal during treatment with iron salts alone, absorption will tend to decrease

even though iron stores remain depleted. With high dose vitamin Cas in Ferrograd C-absorption of iron

continues at a higher rate after haemoglobin levels are normal so that body stores are replenished.

Each Ferrograd C tablet contains the exsiccated equivalent of 525 mg ferrous sulphate BP (= 105 mg Fe) in a Gradumet ® and 500 mg vitamin C as sodium ascorbate

Ferrograd[®]C

Once-daily ferrous sulphate with high dose vitamin C for maximum absorption and replacement of iron stores

3 widely-used ingredients Heinz leave out

Artificial colouring. Artificial flavouring. Artificial preservatives.

Heinz will have none of them in their Baby Foods!

Every Heinz Baby Food begins with a well-balanced recipe and the finest ingredients. Next, meticulous checking and inspection—right down to each individual grain of rice or split pea.

Finally, cooking. Years of experience in preparing baby foods enable Heinz to preserve the natural colour, the natural flavour and the

natural food values.

So you can be sure that Heinz Baby Foods are at least as nutritious as the very best a mother can prepare in her own kitchen. But the effort is far less and the choice far greater. New breakfast varieties introduced last year bring the total number of Heinz Strained and Junior varieties up to 77.

Heinz will gladly provide more detailed information to help you to advise mothers. So if you have any questions, please write to the Baby Foods Information Service, H. J. Heinz Co. Ltd., Hayes Park, Hayes, Middlesex.

'AVOMINE' the most widely prescribed anti-emetic

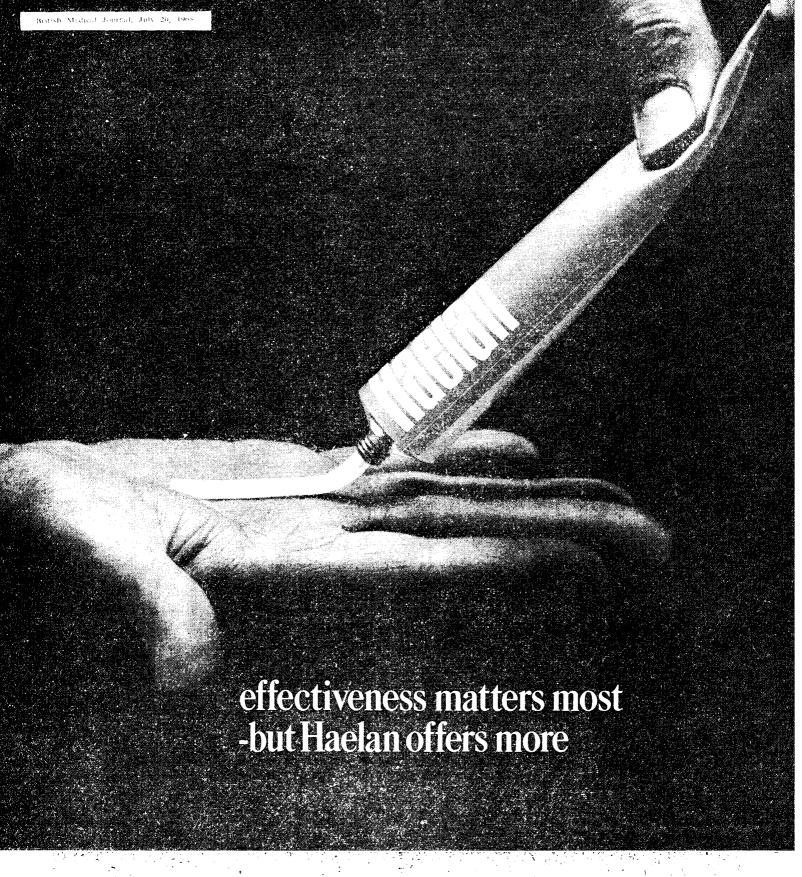

whenever treatment is essential.

'Avomine'* is prescribed more than half a million times in a year.

Presented as Promethazine Theoclate Tablets B.P. 25 mg.

Full information available on request.

Haelan certainly is effective—it contains flurandrenolone, one of the most powerful steroids for topical use. Haelan has the right concentration of flurandrenolone (0.0125%) to resolve most steroidresponsive skin conditions without undue risk of systemic side effects. But there's more to Haelan than that.

Because flurandrenolone is so active, Haelan provides an ample quantity of base for easy application, and the big 60G (2 oz) tube is large enough to treat the average patient without the need for repeat prescriptions. Last, but by no means least, Haelan, at less than 2½d per gramme is clearly economical.

Haelan cream and ointment contain 0.0125% flurandrenolone in 60G (2 oz) tubes. For the most severe or resistant conditions, Haelan X containing 0.05% flurandrenolone is available as cream or ointment in 15G tubes.

Burroughs Wellcome & Co. (The Wellcome Foundation Ltd.) London

In the treatment of psoriasis, triacetoxyanthracene has been shown to exhibit the healing properties of dithranol while displaying none of the side effects of burning or staining the skin.

It therefore may be used by the patient in his own home without the fear that any harm will result if it accidentally comes in contact with normal skin.

"Dithranol (trihydroxyanthracene) is one of the most effective drugs in the treatment of psoriasis. Unfortunately it has two disadvantages—it may irritate the skin and even cause blistering and it stains both the skin and the patient's under-clothes and bed linen. Within the last few months a modification of dithranol—1,8,9-triacetoxyanthracene—has been developed which neither burns the skin nor stains clothes. It is now being marketed as Exolan paste"

Pharmaceutical Journal (1966) 2, 175

"Exolan is a recently developed synthetic derivation of dithranol. The active ingredient is preferentially liberated by hydrolysis on the surface of the psoriatic plaques. The molecule is so adapted that the staining and much of the irritant properties of dithranol are avoided with loss of only some of its potency . . . It may also be tolerated in cases where the psoriasis is too inflamed or acute for dithranol, or where staining makes it cosmetically unacceptable." British Medical Journal (1966) 2, 993

"Patients known to be sensitive to dithranol were not treated with the new drug, but in one case such a patient was given triacetoxyanthracene without any adverse reaction occurring" British Medical Journal (1967) 1, 682

"After three weeks treatment with triacetoxyanthracene paste there was an amazing clearance and he was able to roll up his sleeves for the first time for 25 years. After a further 3 weeks he was practically clear and better than he had been for 30 years."

British Journal of Dermatology (1967) 79, 491

Psoriasis case history. Male patient aged 72 years with widespread chronic psoriasis admitted to hospital 18th October, 1966.

Exolan Cream prescribed for application twice daily. Psoriasis practically clear; patient discharged 1st November, 1966.

Exolan is the only specific treatment for Psoriasis which has been given an A.2. classification by the Standing Joint Committee on the Classification of Proprietary Preparations. (A.2.: "A preparation of a single therapeutically active drug which has been shown to the Committee's satisfaction to have an acceptable degree of efficacy in relation to its toxicity and therapeutic indications and which in the light of alternative available preparations can be recommended for use.") Exolan is entirely a product of British research.

Coronary Heart Disease—but you can now help him with 'Atromid'-S 500

Yes, there is a positive treatment in cases of coronary heart disease— Atromid-S 500

In the United Kingdom, one in three men over 35 die from coronary heart disease. Patients at particularly high risk are younger men with angina pectoris, or who have had a myocardial infarction.

But 'Atromid'-S 500 represents a positive treatment for these and other coronary cases. And today, in the United Kingdom alone, over 10,000 patients with coronary heart disease are being treated with 'Atromid'-S.

Observation of these cases, and extensive long-term trials, have demonstrated a marked reduction in serum lipids and correction of thrombogenic abnormalities. The ultimate beneficial effects of this revolutionary drug can hardly even be guessed at. Treatment with 'Atromid'-S 500 is extremely safe. Side effects are minimal and infrequent, and the treatment is easy to take indefinitely. The new 500 mg. capsule adds considerably to the ease of administration.

We shall be pleased to send you full information on request.

If the holiday is disrupted by diarrhoea

Penbritin KS gives fast effective relief

Penbritin KS works fast

In just 24 hours Penbritin KS gives both symptomatic and antibacterial treatment of diarrhoea and enteritis.

Penbritin KS is effective

Penbritin KS eliminates infection from the wall of the intestine, kills organisms in the lumen, consolidates stools, adsorbs toxins and soothes inflamed mucosa.

Penbritin **KS** is virtually non-toxic

Penbritin KS contains ampicillin and sulphadimidine, two of the safest and most widely used antibacterials.

Penbritin **KS** formulation

Penbritin—provides wide antibacterial cover.

Sulphadimidine—widens the spectrum of activity still further, ensuring complete removal of infecting organisms.

Light Kaolin—consolidates stools, adsorbs toxins and soothes inflamed mucosa.

Full information is available on request.

Penbritin KS (regd.) is a product of

Beecham Research Laboratories,

Brentford, England.

Whatever the diagnosis, in the face of ill health there is anxiety.

And where there is anxiety, either as a complicating factor or as a cause of illness itself, there is a place for

LIBRIUM*

Best for British women

New Feminor 21—Specially formulated for efficient conception control

The dose of oestrogen required for consistent inhibition of ovulation shows individual and racial differences. For British women the best results have been obtained with 0.1 mg.* Feminor 21 is thus the ideal formulation for them. To inhibit ovulation it employs 0.1 mg of an oestrogen (mestranol) alone for the first sixteen days—with the addition of a progestogen

(norethynodrel) for the last five days to establish a normal, secretory endometrium. Because the total amount of hormone taken is limited to that necessary for effective inhibition of ovulation there is minimum physiological disturbance. The sequential dosage establishes a very regular menstrual cycle with a marked reduction in side effects such as breakthrough bleeding, breast discomfort and weight gain. The 21-tablet regimen is simple to follow, and the new cosmetic-type pack is designed for ease and convenience.

Feminor 21 is presented in packs con-

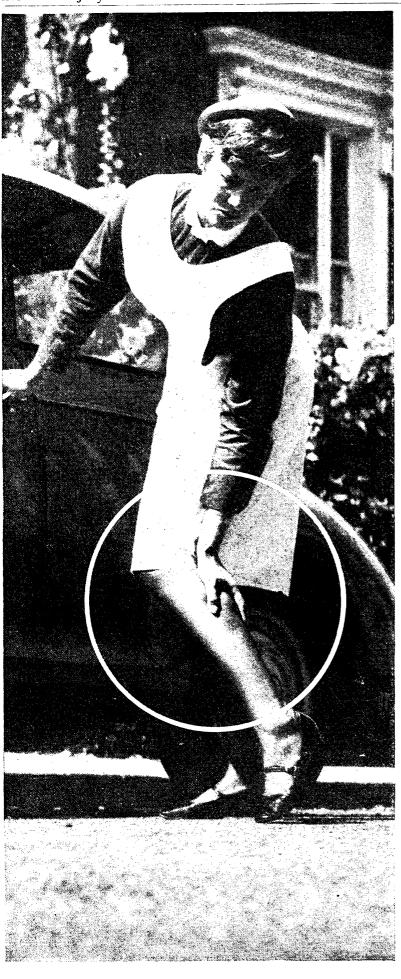

taining three months supply. A pack containing one month's supply is also available. Each monthly course consists of 21 tablets: 16 pink tablets containing mestranol 0.1 mg, 5 white tablets containing mestranol 0.1 mg, norethynodrel 2.5 mg.

Basic NHS Cost: 15/- three month pack, (5/10d one month pack).

*Brit med J 1967, 3, 627

BAD LEGS? Tired heavy aching legs

Before 'bad legs' become an ugly problem— PAROVEN®

All the early symptoms of venous insufficiency -tired, heavy, aching legs, skin disorders, and night cramps—respond to PAROVEN therapy.

PAROVEN, containing trihydroxyethylrutoside, reduces the increased capillary permeability which "is at the bottom of the majority of the complications of varicose disorders" [4]

Indications

Conditions associated with lower limb venous insufficiency.

Tired, heavy, aching legs. Night cramps. Skin disorders.

Superficial thrombophlebitis.

Varicose states.

Dosage

1 tablet 3 or 4 times a day.

Maintenance dosage [as little as one tablet a day] may be adjusted to patients' needs.

Tablets of 250 mg. hydroxyethylrutosides [not less than 45% troxerutin]. Tins of 20-100 tablets.

so many hypertensive patients do well on Aldonet

Methyldopa BP

- 'Aldomet' offers smooth and even control of blood pressure when the dosage has been established.
- 'Aldomet' usually reduces lying as well as standing blood pressure.
- 'Aldomet' causes much less postural hypotension than other powerful antihypertensive agents.
- 'Aldomet' rarely causes exertional hypotension.
- The dosage of 'Aldomet' is simple, flexible and easily established.

Supplied as tablets containing methyldopa BP equivalent to 250 mg anhydrous methyldopa and, for emergency use, as an injection. Detailed information is available to physicians on request.

In a trial comparing three antihypertensive agents, it was shown that, '... in the patients who could take adequate doses methyldopa provided the best control of blood pressure, with the lowest levels of blood pressure when the patient was supine.'

Beat the taxman and move abroad. Legally.

With the help of Ford you can avoid paying purchase tax on your new car and move abroad feeling completely free to enjoy it.

What's more, you can drive your Ford in Britain for 6 months before you leave. Free of purchase tax. Sharp practice?

Not at all. Just one of the many tax free privileges you are entitled to if you are taking up an

appointment overseas.

On the other hand if you are visiting this country you may qualify for up to 12 months tax free driving in Britain.

If you're leaving immediately, Ford will arrange to ship your car for you direct.

So, feel free to move.

Tax free.

Embarrassment is short-lived with Synalar

Inflammatory dermatoses frequently respond to <u>Synalar</u> in 24-48 hours

Low concentration, optimal skin penetration, prolonged action.

Speed of action. Low concentrations of Synalar achieve optimal skin penetration, frequently with therapeutic response in 24-48 hours. This rapid action greatly reduces the incidence of scratching. The speedy restoration of the epidermal barrier lessens the risk of secondary bacterial infection.

Efficacy. Synalar has a 95% success rate in inflammatory dermatoses and in pruritic and allergic conditions of

the skin. It has often been successful in difficult skin conditions which, previously, had been unresponsive to other steroid preparations.

Range. The complete flexibility of the Synalar range makes the selection of treatment, according to the type and severity of the condition, a simple one. Synalar is available in cream, ointment, lotion and aerosol form, for the initial treatment of severe cases; for maintenance therapy and less severe dermatoses, Synandone is available as cream, ointment and lotion.

Imperial Chemical Industries Limited, Pharmaceuticals Division, Alderley Park, Macclesfield, Cheshire

for the treatment of Athlete's Foot

Penotrane (hydrargaphen) in the form of a powder, jelly or tincture provides a rapid, effective and long-lasting control of tinea pedis. Penotrane's range of antifungal activity is such that all the fungi responsible for athlete's foot are destroyed thus minimising the likelihood of recurrence of the condition.

How do General Practitioners spend their time?

Do Appointment Systems Work—and How do Patients use them?

What Type of Work Can a General Practice Nurse do?

THE NEW GENERAL PRACTICE.

published on 24 June, answers these and many other questions. The book contains 22 articles published in the B.M.J. in the last two years, many of them describing pioneering work in the field of general practice. In his Introduction to the book Lord Platt says "Those who have already reorganized and reformed their practices will read this book with interest as they will be able to compare their own ideas with those of others, sometimes learning, sometimes having the satisfaction of knowing better."

On Skin

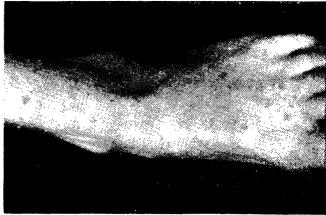

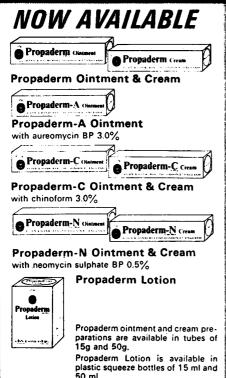

PROPADERM

The top two pictures are of a hand and foot belonging to a boy, aged 7 years, as they appeared on a Saturday morning. The diagnosis was 'Atopic Eczema with Secondary Impetiginization' and Propaderm-A Ointment was prescribed. The lower two pictures are of the same hand and foot on the following Monday—after just two days' treatment.

Propaderm is indicated in all conditions which respond to topical application of an anti-inflammatory steroid.

All Propaderm preparations contain 0.025% beclomethasone dipropionate.

CLINICAL TEACHING WARD ROUNDS IN MEDICINE

RADIOLOGY FOR HIGHER EXAMINATIONS

WARD ROUND COURSE

A course of clinical instruction in Medicine for postgraduate students will be held in the teaching hospitals in Glasgow in the forthcoming session. The course comprises one ward round weekly for 10 weeks and additional tutorial supervision and advice. The course will be held on Thursday afternoons from 4.30 p.m. to 6 p.m.

The course commences on Thursday, October 3, 1968. The fee for the course is £8 8s.

RADIOLOGY FOR HIGHER EXAMINATIONS

A course of instruction in radiological interpretation for clinicians will be run in conjunction with the above ward round course. This may be taken as an optional extra course or without participation in the ward round course. The lecture demonstrations will be held once weekly in the teaching hospitals in Glasgow on Monday afternoons from 4.30 p.m. to 5.30 p.m. during the 10 week period of the course.

Monday atternoons from 4.30 p.m. to 5.30 p.m. during the 10 week period of the course.

The course commences on Monday, October 7, 1968.

The fee for the course is £5 5s.

Applications for both courses commence on August 15, 1968.

Applications for both courses close on September 5, 1968.

Forms of application may be obtained from the Director of Postgraduate Medical Education, The University, Glasgow, W.2, or from the Honorary Secretary, Royal College of Physicians and Surgeons, 242 St. Vincent Street, Glasgow, C.2.

INDUSTRIAL APPOINTMENTS—see also p. xxix

Attention is drawn to the British Medical Association's statement of policy on the Remuneration of Industrial Medical Officers as approved by the Representative Body, which is available on request from the Secretary.

Applications are invited from registered medical practitioners preferably under 35 years of age to join on a whole- or part-time basis the staff of the health service of the Merseyside group of Unilever Companies.

In conjunction with two colleagues, one of whom is the Senior Medical Officer, the successful candidate(s) will be required to assist in the health supervision of a large group of factory and office workers (approximately 11,000). The scope of the work will include, among other things:

- (a) Pre-employment and other forms of medical examination.
- (b) Assessment of, and advice on environmental working
- (c) Advice to management concerning the physical and mental well-being of the working community.

Candidates should have a good standard of clinical medicine combined with an interest in all aspects of preventive and industrial medicine. Experience in general practice would be an advantage. Salary will be in accordance wih experience, qualifications and age, and will not be less than that set out in the B.M.A. scale.

The list of those invited to attend for interview will be made out from the letters of application. Candidates therefore are asked to give full details of their training and experience including their reasons for wishing to practise industrial medicine. The names of three persons to whom reference may be made should also be included.

Applications should be submitted not later than August 2, 1968, to the Principal Medical Adviser, Unilever House, Blackfriars, London E.C.4.

the date of this advertisement. (H.8932)

MEDICAL OFFICERS IN THE PRISON AND BORSTAL SERVICE HOME OFFICE, PRISON DEPARTMENT

Applications are invited from male or female registered medical practitioners with good all-round experience of medical and surgical practice. Experience in psychological medicine desirable. D.P.M. an advantage.

Vacancies are in London (Wandsworth), Liverpool, Isle of Wight (Parkhurst), Wakefield, Chelmsford, Norwich, Ashford, Middlesex, and Durham.

Facilities for taking, or completing, the Diploma in Psychological Medicine can be arranged for suitable entrants.

Duties are mainly clinical, with responsibility for the mental and physical health of persons in custody, including opportunities for social and forensic psychiatry, the exercise of rehabilitation influences, and the provision of general medical and psychiatric reports to the Prison Department and to the courts.

Candidates must be aged at least 28. National starting salary £2,260 (at age 28) to £3,434 (at age 40 or over). Scale maximum £3,895, somewhat higher in London.

The posts are unestablished with prospects of appointment to the pensionable staff through Civil Service Commission Open Competitions.

Application form and particulars from Manager (PE/A/115) (Professional and Executive Register), Atlantic House, Farringdon Street, London E.C.4, returnable by August 2.

D.mfries

(a) REGSTRAR

(b) SENIOR HOUSE OFFICERS (Two)
Crienton Royal has an admission rate of
1.300 per annum, to both local and amenity
beds. There are separate units for geriatric
psycalatry and enild psycalatry; an industrial
therapy unit; an E.F.G. department; and a
network of out-patient clinics. Departments
of clinical research and of psychological research are established under appropriate
Directors. Regular teaching is carried out by
members of the senior staff, both formally
and informally, which has proved sufficiently
comprehensive for the D.P.M. examination;
the usual study facilities are also provided.
Applications for these vacancies, with the
names of two referees, to the Physician Superintendent, within 14 days. Single accommodation, or housing for married applicants,
can be provided.

OXFORD REGIONAL HOSPITAL BOARD OXFORD MEDICAL COMPUTER CENTRE

Principal Assistant Senior Medical Officer Computer Services

The Oxford Regional Hospital Board require a Principal Assistant Senior Medical Officer with a particular interest in developing the medical application of computers and applying medical information to planning and increased operational efficiency within the Health Services. The person appointed will be a member of the staff of the Senior Administrative Medical Officer of the Board and will also be closely associated with the development of the Oxford Medical Computer Centre and with the work of the Oxford Record Linkage Study, which is part of the Nuffield Department of Medicine of Oxford University (salary range £2,825-£3,590).

Preliminary studies in connection with the establishment of a Medical Computer Centre, jointly with the Ministry of Health, at the Regional Board's Headquarters in Oxford have now commenced. It is hoped that the experience gained in these studies will be of value in the development of a number of projects including an advanced computer system for the hospital and health services of the new town of Milton Keynes which is to be built in the Region. The plans which are being developed for these services are based on the concept of a fully integrated health service.

A considerable body of practical operational experience of medical systems work and medical data processing has been built up over the last ten years as a result of the work of the Board's Operational Research Unit and the Oxford Record Linkage Study.

Experience in medical administration, or in statistical and epidemiological methods, or in computers, while advantageous is not essential

Further particulars of the appointment can be obtained from The Secretary, Oxford Regional Hospital Board, Old Road, Headington, Oxford, to whom applications should be sent not later than 13th September, 1968.

GOVERNMENTAL-see also p. xlii

Ministry of Health
SENIOR MEDICAL OFFICER (Research and Special Studies)

This is a new post in the Ministry's London-based Research and Special Studies Section. It will be concerned with the development of the Ministry's interests in research activities in the fields of medical care and new clinical advances. The work entails identifying questions relating to health service needs, reviewing proposals for centrally organized research, and close liaison with research units and other workers in the same field. There will be considerable scope for initiating and organizing new projects, with prospects of further future

development of these interests.

Candidates must be registered medical practitioners with some knowledge of epidemiological and statistical methods. Academic or

knowledge of epidemiological and statistical includes research experience would be an asset.

Salary £4,625; non-contributory pension.

Fuller details of this appointment may be obtained, without obligation, by writing to the Civil Service Commission, 23 Savile Row, London W.1, quoting 6932/68/1. Closing date August 12, 1968. (10677)

MEDICAL OFFICER (Research) (PHARMACOLOGIST)

Ministry of Defence (Army Department)

Posts for registered medical practitioner (man or woman) aged at least 28 at the Chemical Defence Experimental Establishment, Porton, Salisbury, Wilts.

DUTIES: to undertake investigations into clinical and general pharmacology, and to take charge of a section of medical and pharmacological research.

QUALIFICATIONS: Knowledge of pharmacology, physiology, and biochemistry essential. Experience of clinical responsibility in pharmacological trials, particularly with drugs which affect behaviour, and research experience with the use of standard mammalian experimental techniques desirable.

STARTING SALARY: £2,260 at age 28 to £3,434 at 40 or over (possibly higher at 41 or over). Scale maximum £3,895. Non-contributory pension.

WRITE to Civil Service Commission, Savile Row, London W.1, for application form, quoting 6957/68. Closing date, August 14, 1968.

(10678)

Army Personnel Research Establishment

DIRECTOR £4,175 to £4,625

This establishment within the Ministry of Defence (Army Department) is broadly divided into physiological and psychological wings. The researches are related to the operational needs of the Army and are concerned with specific and clearly defined problems or, as may arise, with larger areas of study. A limited amount of basic research is encouraged and a special group conducts field trials of clothing and general stores for operational acceptability.

The Director will supervise a very wide range of projects in the life sciences and will be accountable for the management and professional quality of work at the establishment. A background of physiology, psychology or applied experimental medicine, and extensive experience of the application of the life sciences to practical problems are essential. Personal experience of the Services and of leading research teams are of particular importance.

Candidates, men or women probably aged not less than 40, should normally have at least a first- or second-class honours degree in a related science. Starting salary could be above the minimum of the above scale. Noncontributory pension.

Fuller details of this appointment may be obtained by writing to the Civil Service Commission, 23 Savile Row, London W1X 2AA, quoting S/6962/AM. Closing date August 9, 1968.

(10620)

ZAMBIA FLYING DOCTOR SERVICE

Based on Ndola in the Copperbelt, this full-time Service operates to remote areas of Zambia using five professionally flown twin-engined aircraft and a ground radio network. Each airstrip clinic is visited regularly several times a week. At present six doctors and a dentist are employed seeing about 5,000 patients a month, about half of them children.

Applications are invited from doctors, Duties:

1. To carry out regular clinics at bush airstrips. This is the greater portion of the work.

To accompany the aircraft on emergency patient evacuation flights.
 To give assistance and advice over the radio network

when appropriate.
To encourage and assist people living around the air-

strips in all aspects of nutritional and rural development.

Seriously ill patients with medical complaints are treated at the clinics where there is provision for their accommodation. Patients with serious surgical diagnoses are flown to hospital so that the

with serious surgical diagnoses are flown to hospital so that the doctors with the Service are not required to do major surgery.

Research: This is an essential part of the Service and funds are available for this purpose. The opportunities are great as the Service operates in areas which have not previously had any medical facilities.

Terms: Six-month appointments with return air fare for one person paid by the Service.

Salary of £1,000 for the six months period paid in six equal monthly instalments of approximately £166.

Fully furnished accommodation provided in Ndola at economic rental.

A second return fare could be loaned to applicant and deducted from salary. Fourteen days holiday.

The posts may interest doctors who have just finished their pre-registration year, or more senior people who would like the oppor-tunity to do some work and research in Zambia, possibly on the basis of leave of absence from their existing U.K. appointments.

Anyone interested is asked to write to: Dr. James Lawless,

Flying Doctor Service, P.O. Box 1856, NDOLA, Zambia.

Interviews will be arranged in Britain or Zambia.

(H.8997)

MINISTRY OF OVERSEAS DEVELOPMENT

The Need

GENERAL DUTY MEDICAL OFFICERS

For duty both in large new hospitals and in the outlying districts of the Developing Countries overseas, for contract appointments of 2 to 3 years. The Opportunity Overseas service offers a unique chance for world travel, an opportunity to widen professional experience, and to acquire a broader understanding of the world and its people.

The Advantages Doctors' skill and knowledge will be used to the full on people who have a crying need for their service. Salaries reflect the local cost of living and are normally higher than one would expect to receive in the United Kingdom. There are generous gratuities on satisfactory completion of contract, education allowances for children, free family passages. Accommodation provided usually at a low rent. In most cases superannuation rights can be preserved or maintained. Salaries Vary widely from country to country with the local cost of living. However, with certain exceptions they range from approximately £1650 to £2900 per annum.

Training Scheme for Recently Qualified Doctors
In return for an undertaking to serve for at least two years in the developing countries overseas the Ministry offers a course of training to recently qualified doctors which is designed to fit them for service overseas and which will be attractive professionally and financially. During the period of training of 12 to 15 months the doctor will receive a retaining fee of £200 per annum in addition to his hospital salary. Write now for full details of the scheme.

Where required

ANGUILLA, FALKLAND ISLANDS, KENYA, LESOTHO AND SWAZILAND.

SPECIALISTS

MALAWI

Have a vacancy for an Obstetrician/Gynaecologist to take charge of the Department of Obstetrics in a hospital. Candidates must possess the M.R.C.O.G. or its equivalent. Appointment for a minimum tour of two years. Salary £3,350 per annum plus £200 per annum in lieu of private practice.

SIERRA LEONE

Require a Consultant Radiologist for the establishment and maintenance of the Ministry of Health radiological services. Candidates must be under 55 years of age and possess the D.M.R.D. or F.F.R. Appointments for 15 to 18 menths. Salary, basic, £2,555 per annum, plus a supplementary allowance payable by the British Government, generally tax free of £1,000 per annum. This supplement, however, will not be gratuity earning. Some private practice allowed.

BOTSWANA

Require two Senior Medical Officers to take charge of the administration of major district hospitals and for the supervision of subsidiary hospitals and dispensaries as well as clinical duties. Candidates should possess at least 10 years' experience since qualifying and not less than five years' experience of administering a hospital of over 100 beds. Appointments for a minimum tour of two years. Salary, basic, 4,980 Rands (£2,904) per annum plus an inducement allowance for those eligible for designation under O.S.A.S., £345 per annum.

FIJI

Urgently require the services of a Consultant Radiologist to take charge of the Radiology department at the Colonial War Memorial Hospital at Suva and to undertake the teaching of Medical Students. Candidates preferably below the age of 50 years, must possess the D.M.R.D. or equivalent and must have at least 2 years' experience in diagnostic radiology. Appointment 2½–3 years. Salary, basic, £(Fiji)2,709–3,009 (£2,592–£2,879) per annum plus an inducement allowance (free of income tax) £834–£856 per annum paid direct to an officer's bank account outside Fiji.

Require the services of a Senior Medical Officer to act as Medical Superintendent of the Colonial War Memorial Hospital in Suva. Candidates must possess some experience in hospital administration. Possession of the D.P.H. or equivalent would be an advantage. Appointment for $2\frac{1}{2}$ to 3 years. Salary basic, £(Fiji)2,709 to 2,859 (£2,592 to £2,735) plus a non-taxable inducement allowance of £842 to £856 per annum.

ST. LUCIA

Urgently require an Anaesthetist Specialist at Victoria Hospital (208 beds). Candidates should possess the Diploma in Anaesthetics. Appointment minimum period 2 years. Salary, basic \$(B.W.I.)8,400 (£Stg.1,750) p.a. plus an inducement allowance of \$(B.W.I.)3,360 (£Stg.700) p.a. Anaesthetic fees are payable averaging \$(B.W.I.)1,280 p.a. \$(B.W.I.)4.80 = £1 Sterling.

Candidates should normally be nationals of the United Kingdom or the Republic of Ireland. They must possess medical qualifications and be able to meet all other requirements for full registration in the United Kingdom.

For application forms, full details of salaries and allowances and turther information, please write, stating full name, to the

Appointments Officer, Room 444A, Ministry of Overseas Development, Eland House, Stag Place, London SW1

Kingdom of Libya

ARABIAN AMERICAN OIL COMPANY

invites applications for the position of

OBSTETRICIAN & GYNAECOLOGIST

in the Company's hospital in Dhahran, Saudi Arabia.

Applicants, male or female, must possess an F.R.C.S. qualification, and either M.R.C.O.G. or F.R.C.O.G. A minimum of three years' Registrarship in this field is essential. Candidates with additional training, experience or qualifications will be given preference in consideration.

The successful applicant will be expected to provide obstetrical and gynaecological care on a specialist level to in-patients and out-patients. Consultation is also provided to four affiliated health centres. The obstetrical staff consists of two full-time obstetricians and one part-time general practitioner. The Company operates a modern, fully-equipped hospital, with a staff of 55 physicians representing all the major specialties.

A starting salary is offered of £5,500 sterling per annum. Fringe benefits include a guaranteed investment plan, and return fares for the employee, wife and dependent children to the United Kingdom every two years.

Applications, in writing, should be forwarded to Mr. H. van Asbeck, ARAMCO OVERSEAS COMPANY, Laan van Meerdervoort 55, The Hague, Netherlands.

Ovulen 1mg., the most widely prescribed oral contraceptive in Britain today.

Doctor experience Since Ovulen 1mg. was introduced in 1963 physicians have found it to be not only effective, but extremely well tolerated. More prescriptions are written for Ovulen 1mg. than any other oral contraceptive in Britain.

Clinical experience Clinical research on Ovulen 1mg. has been continuous. It was subjected to clinical trials in over 2,500 women before it was made commercially available; to date more than 16,000 women have been involved in trials totalling more than 190,000 cycles of experience.

Patient experience Millions of women in Britain and overseas are using this low-dose oral contraceptive. One reason is the trouble-free protection it affords—acceptability rates in clinical trials have been as high as 95.4 patients in every 100, over a period of more than four years.

Company experience In the fifteen years since Searle developed the first oral contraceptive the company's products in this field have been accepted by many millions of women.

Ovulen contains 1mg. ethynodiol diacetate and 0.1mg. mestranol.

Ovulen is a Trade Mark.

The Institute of Medical and Veterinary Science — Adelaide, South Australia.

Vacancy for

HAEMATOLOGIST

A medically qualified Haematologist is required for clinical and laboratory duties under Dr. R. Kimber in the Haematology Division of the Institute. Some 150,000 examinations are performed annually in the whole field of haematology for the Royal Adelaide Hospital and for many other hospitals and practitioners in South Australia. There is consultative supervision of patients in the clinical departments. There will be opportunities for taking higher qualifications; and for research, especially in coagulation, megaloblastic anaemia, iron metabolism and platelet kinetics, when the Division moves into new laboratories now being built.

Commencing salary from \$5,850 to \$8,750 per annum according to experience and qualifications.

Applications, stating full name, place, date and year of birth, nationality, marital status, past and present employment; details of qualifications, experience, and published work, together with names of three referees, should be sent to the Director, Box 14, Rundle Street Post Office, Adelaide, South Australia 5000, before August 15, 1968.

help him to sleep with 'TUINAL'

Whatever the worries and cares that are keeping him awake, 'Tuinal' will ensure a good night's rest because it acts promptly to bring sleep that lasts the whole night through. Whenever your patients need help with their sleep problems you can prescribe 'Tuinal' with confidence – extensive clinical experience has confirmed its safety at the recommended dosage level.

'Tuinal' 200 mg: each capsule contains quinalbarbitone sodium 100 mg, amylobarbitone sodium 100 mg. Full information available on request.

Eli Lilly and Company Limited, Basingstoke, England.

in staphylococcal septicaemia

powerful · bactericidal · antistaphylococcal

The potential severity of staphylococcal septicaemia demands prompt antibacterial therapy—often well before sensitivity reports become available. FUCIDIN is rapidly and easily absorbed, and gives serum levels which are bactericidal against almost all pathogenic staphylococcal strains; FUCIDIN exhibits remarkable ability to reach the nidus of infection despite poverty of blood supply or presence of pus. For early control of these dangerous infections FUCIDIN has proved a reliable and

economical choice—in over five years of clinical use. For full literature and prescribing information please write to the Medical Information Department.

fucidin

Capsules, 250 mg. sodium fusidate B.P., in bottles of 36 and 250; also as Paediatric Suspension equivalent to 35 mg. sodium fusidate per ml., in bottles of 60 ml.
