

in hay fever daytime treatment with 'BANISTYL'

'BANISTYL'
the "wide awake"
antihistaminic

**One tablet three times daily effective
in most cases**

Little if any soporific effect

Well tolerated by patients of all ages

'Banistyl' is generally well tolerated at the recommended dosage levels; side-effects are usually of a mild and transient nature. Somnolence is infrequent and generally not marked; when it does occur, it frequently subsides after the first few days of treatment or may be controlled by dosage adjustment. Other side-effects which have been reported and which are usually of little significance include nausea, epigastric pain, vertigo, diarrhoea and headache.

Although there is no evidence to suggest that 'Banistyl' is embryopathic, it is a sound medical principle to avoid, wherever possible, prescribing a new drug during the first three months of pregnancy.

Certain activities, including control of vehicles or machinery, should not be undertaken by a patient starting a course of 'Banistyl' until it is evident that the drug has no soporific or other central nervous system side-effects, or until any such effects have subsided.

'Banistyl' is supplied as tablets containing the equivalent of 20 mg. dimethothiazine (as mesylate).

The brand of iron which provides a good haematinic response in iron-deficiency anaemia—a considerably reduced incidence of side effects and the least toxic form of iron

A double-blind comparison of Ferrodic with ferrous sulphate, both preparations containing 50 mg of ferrous iron + 12.5 mg ascorbic acid, in the treatment of iron-deficiency anaemia, showed that exactly equivalent haematinic effects were obtained with the two drugs. However, 'not only did Ferrodic cause side effects in a significantly smaller proportion of patients than ferrous sulphate, but the severity of such side-effects was also significantly less with Ferrodic.'

(*Practitioner*, 1967, 198, 848)

A very similar double-blind, clinical comparison of Ferrodic and ferrous sulphate has recently been published. The Author's purpose was to confirm the haematinic effectiveness and low incidence of side effects of Ferrodic, in view of its palatability and relative freedom from toxicity. The results again showed Ferrodic to have an equivalent haematinic effect to that of ferrous sulphate but 'side-effects occurred in a significantly higher proportion of subjects who received ferrous sulphate.'

(*J. Therap. and Clin. Res.*, 1967, 1, 4)

FERRODIC TABLETS each contain ferrous iron (as ferrous carbonate) 50 mg and ascorbic acid 12.5 mg and are supplied in bottles of 100 tablets.

Candida could well be the culprit!

Candida albicans is an increasingly common cause of vaginitis. Against this organism Candeptin has a rapid, specific curative effect. *In vitro* tests have shown that it inhibits *Candida albicans* more powerfully than either nystatin or amphotericin B. Local application quickly relieves symptoms, resolves infection. Over 90% success rates have been achieved—including characteristically difficult cases as in pregnancy and infections of long standing.

■ So often the only prescription needed

The little fellow is thoroughly fed up. He really wants to test drive his new stream-lined Mark II boxcart. Now he can't. His throat hurts, his eyes water, and he's got to stay in bed. And his mother's worried—she wants him well and back to school as soon as possible. You know that to cure the symptoms you have to destroy the organisms that cause them. And, especially with a child, you have to do it quickly—first time if possible.

Penbritin is the answer. Upper respiratory tract infections need fast antibiotic action to stop the spread of infection, and prevent complications. Penbritin, with its extremely broad spectrum of activity, destroys all the common bacteria that cause upper respiratory tract infections and their complications. And 'destroys' is the operative word. For Penbritin doesn't just inhibit the growth of these organisms. It *kills* them.

Penbritin has the degree of safety characteristic of all penicillins. Side effects, when they do occur, are mild and transient. And, because Penbritin Syrup has a very pleasant taste, it's highly likely, and very important that the patient will take the full prescribed course of at least 5 days—and get the maximum benefit from it.

In the treatment of upper respiratory tract infections, Penbritin is the answer. And so often the only prescription needed.

Availability: Penbritin (ampicillin B.P.). Paediatric Tablets containing 125 mg.; Capsules, 250 and 500 mg.; Syrup, 125 mg./5 ml.; Syrup Forte, 250 mg./5 ml.; Injections, 100 mg., 250 mg., 500 mg.

Dosage: Children under 2 years: 62.5—125 mg.
2—10 years: 125—250 mg.

Adults: 250 mg.

All dosages q.d.s. a.c.

In severe infections these doses may be increased or Penbritin given by injection.

Contra-indication: Penicillin allergy.

Side effects: As with other penicillins.

For potent, economical diuretic therapy

Containing 'Slow-K' sustained-release potassium supplement

"In my opinion the thiazides, which are relatively cheap, should be used first, and the newer, more powerful drugs should be kept in reserve for cases which have been proved to be resistant."

A Professor of Medicine, "G.P.", March 8th, 1968, p.4

'Navidrex' is the most powerful and economical thiazide diuretic available. 0.5mg is equivalent to 1000 times its weight of chlorothiazide

Diuretic action is efficient yet not so precipitous as to cause a serious disturbance of electrolytes

Contains 'Slow-K', the most satisfactory way of giving potassium by mouth. The potassium chloride released from the special slow-release formulation is gradually absorbed from the gut over a period of several hours, thereby reducing the risk of mucosal irritation and damage

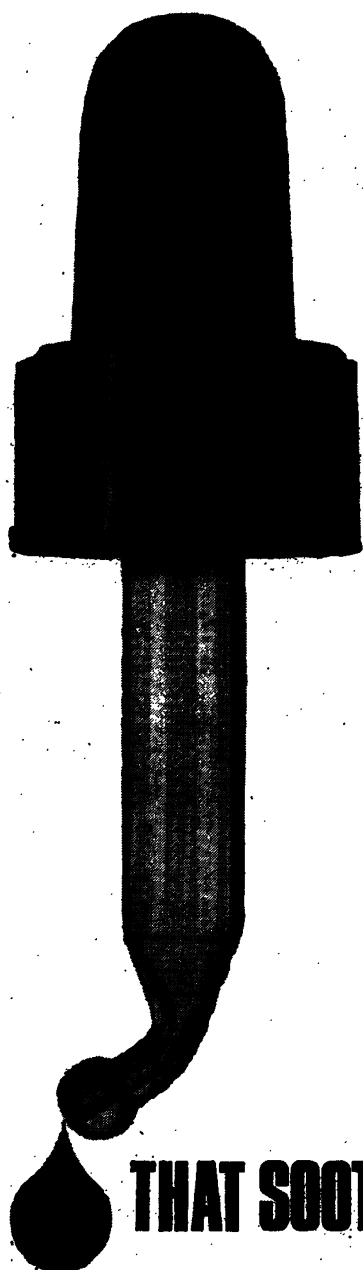

Remarkably low cost of treatment

drop Betnesol Tablets into a glass of warm water...

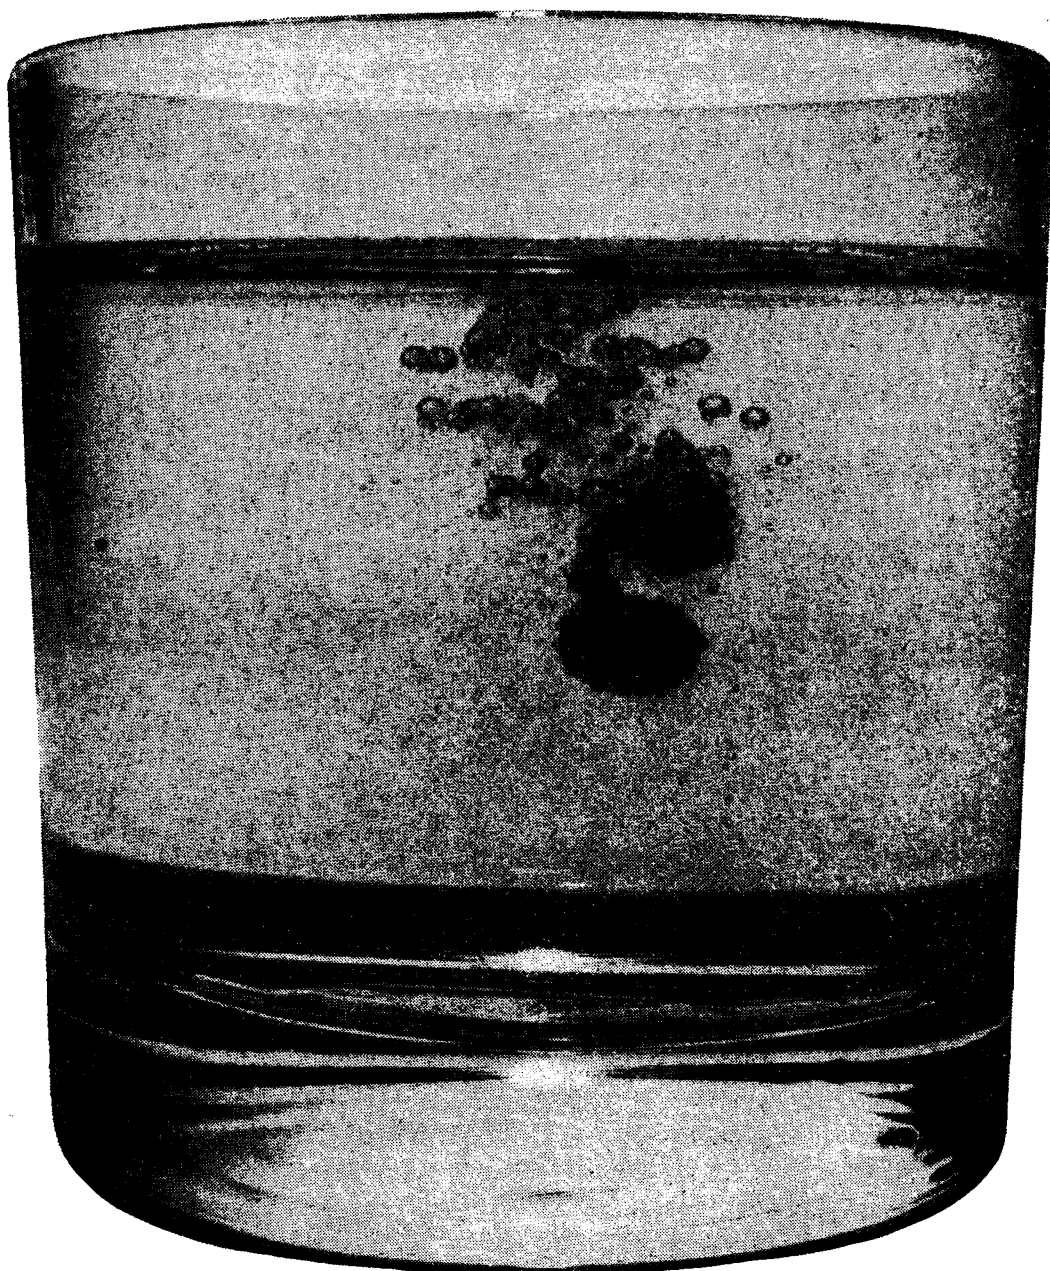

Immediately this corticosteroid begins to dissolve. In less than a minute you will have a clear, particle-free solution of steroid. Simple enough — but the implications are important. The complete solubility of Betnesol ensures that there are no solid steroid particles to irritate the stomach. It also ensures maximum absorption

and therefore the most consistent therapeutic response.

To solubility Betnesol adds all the advantages of betamethasone; potent anti-inflammatory action and a low incidence of side effects. It does not normally cause salt and water retention or significant potassium loss.

When giving steroids orally Betnesol is clearly the solution.

Mixogen

Appreciating the limited role of sedatives and tranquillizers in what is essentially a metabolic disturbance, physicians are turning increasingly to the treatment that masters the immediate symptoms of depression and irritability and acts at a fundamental level as prophylaxis against the long-term consequences of ovarian-pituitary imbalance.

'Today when the average woman can expect to reach her threescore years and ten, it would seem unrealistic to deny hormone treatment, which not only alleviates all the troublesome and antisocial symptoms of the menopausal and postmenopausal phases but is also a prophylactic measure against osteoporosis, senile vaginitis, hypertension, and coronary heart disease, to mention but a few hazards of oestrogen depletion.'

The arguments against the use of plain oestrogen therapy – endometrial bleeding and nausea – are countered when Mixogen is used.

'Perhaps the best way of avoiding oestrogenic bleeding is to use one of the oestrogen-testosterone combinations, of which the original – Mixogen – is the best.'²

ESBATAL

bethanidine sulphate

A recent 2½-year study¹ has confirmed that 'Esbatal' (bethanidine sulphate) provides a more acceptable form of therapy for the patient than other antihypertensive drugs in current use. Control of blood pressure was achieved with 'Esbatal' in about three-quarters of the hypertensive patients treated—and side-effects were rare.¹ In comparing 'Esbatal' with guanethidine and methyldopa the authors considered that 'Esbatal' was to be preferred for beginning treatment in any new hypertensive patient.¹ Better acceptance of 'Esbatal' by the patient, again compared with guanethidine and methyldopa, was also demonstrated in another trial where 'Esbatal' scored the highest rating for patient preference.²

a striking demonstration of Lincocin penetration

**Heart Tissue**Assay organism: *Streptococcus hæmolyticus***Lung tissue**Assay organism: *Staphylococcus aureus***Lung tissue**Assay organism: *Diplococcus pneumoniae*

Since antibiotic effectiveness is dependent upon concentration at the site of infection, it is obvious that antibiotic diffusion and tissue penetration are of supreme importance. The accompanying photographs of an experiment in animals demonstrate Lincocin's capacity in this respect.

A healthy dog weighing 9.5 kg. was injected intramuscularly with 25 mg./kg. of lincomycin hydrochloride (base equivalent). After 90 minutes tissue samples were excised and placed on Petri dishes in which the agar had previously been seeded with pathogenic strains of *Staphylococci*, *Streptococci* and *Pneumococci*, respectively. Following incubation these photographs were taken of the plates containing either heart or lung tissue. The clear zones show that within 90 minutes Lincocin had penetrated these tissues in concentrations sufficient to inhibit growth of the pathogenic inocula.

In the elderly, the special problems of constipation...

Constipation in the elderly can present special problems of treatment. Weakened abdominal muscles . . . the dangers inherent in straining . . . refusal to co-operate . . . the presence of pain, to which anal fissures or haemorrhoids may contribute . . . the need for enemas and suppositories . . . the risk of faecal impaction, with consequent manual removal . . .

Clinical trials have shown the distinctive value of *Dorbanex* in the treatment of the elderly patient. In a recent trial in a geriatric ward¹, *Dorbanex* achieved 23% more bowel openings than did standardised senna, and 61% more than miscellaneous laxatives. The stool formation "allowed easy defaecation without an increase in faecal incontinence". Suppositories were needed only five times during 644 patient-days of treatment, and side-effects were negligible and transient.

"*Dorbanex* was readily accepted by all patients, even those with some degree of senile dementia to whom the administration of other medicaments has proved difficult". In this trial *Dorbanex* achieved an average of more than one bowel opening every day—an increase of more than 50% over the openings achieved by standard aperients. No patient complained of griping, whereas other medicaments had caused several such complaints. No suppositories were needed, and in 360 patient-days of treatment only one manual removal was performed.

Dorbanex can simplify management of the patient posing these problems by providing comfortable, reliable and trouble-free evacuation. *Dorbanex* produces a soft but well-formed stool without griping or other unpleasant side-effects, reduces the need for enemas and suppositories, helps to prevent faecal impaction, and makes defaecation easier without increasing faecal incontinence.

...have a straightforward solution

Now available in three forms—as capsules and in two strengths of liquid—*Dorbanex* provides in one preparation a balanced treatment for constipation. By softening the stool and stimulating peristalsis, *Dorbanex* prepares the way for pain-free evacuation.

Coloured charts of the female reproductive system... free

We would like to send you a set of anatomical drawings of the female reproductive system. They include illustrations of the changes that occur during the menstrual cycle. These classic drawings in colour by R. L. Dickinson, M.D., are laminated in plastic for permanent use as an aid in explaining pelvic anatomy to patients; suitable for grease-pencil use and erasure.

And to help you in your instruction, we offer two booklets: one with answers to questions young girls may, or would like to ask, and the other for older girls, explaining menstruation and its place in a woman's life.

If you will send your name and address to Tampax Limited (address below), we will be glad to provide you, free, with a set of anatomical

charts, and sample copies of the booklets for your evaluation. You may then order as many free booklets as you need.

Tampax tampons help reduce the aversion that many girls and women feel toward menstruation. Users experience none of the irritation and chafing often caused by a perineal pad. Tampax tampons virtually abolish menstrual odour, a source of embarrassment for many women. And they are hygienic—easy to insert, to wear, and dispose of—so that your patients will feel cool, clean and fresh when they wear this menstrual protection.

Tampax tampons are available in Regular and Super absorbencies. Explicit directions for insertion are enclosed in each packet.

COMMERCIAL APPOINTMENTS

International Pharmaceutical Company

Medical Adviser

A registered medical practitioner, who must be a graduate of a British Medical School, is required for interesting, responsible and highly rewarding work as a key member of our Medical Service Department. This is an excellent opportunity for a suitably qualified man having a particular interest in, and a good understanding of, Applied Therapeutics, to embark upon a career in which his activities will embrace the entire range of pharmaceutical products manufactured by this leading international company. Essentially, he will be expected to make a major contribution towards the guidance and execution of the Company's general medical policy;

advise Management on the merit and standing of established products and, in this field, be involved in developing clinical trials. He will also be called upon to recommend procedures to be adopted to safeguard the health of employees; assist in the training of medical representatives; and handle all medical correspondence which may demand his specialist knowledge. In order that he may perform these duties with maximum efficiency and effectiveness, he will have direct access to top management.

This is an important appointment in which a doctor can find added stimulus and lasting satisfaction. The salary is attractive and fringe benefits excellent.

ARABIAN AMERICAN OIL COMPANY

invites applications for the position of

CHIEF RADIOLOGIST

in the Company's hospital in Dhahran, Saudi Arabia.

Applicants, male or female, must possess a D.M.R.D. or higher qualification. A minimum of three years' experience after qualifying is essential, one of which must have been spent in supervising a diagnostic radiology unit.

The successful applicant will be completely responsible for the operation of a service which provides a wide range of diagnostic procedures, and performs 25,000 examinations per year. A consultation service is also supplied to four affiliated health centres, each of which performs 8,000 examinations per year. No radiotherapy is involved.

Two other radiologists are employed, together with a staff of qualified radiographers. The service uses modern American x-ray units and equipment.

The Company operates a modern, fully-equipped hospital with a staff of 55 physicians representing all the major specialties.

A starting salary is offered of £6,700 per annum. Fringe benefits include a guaranteed investment plan, and return fares for the employee, wife and dependent children to the United Kingdom every two years.

Applications, in writing, should be forwarded to Mr. H. van Asbeck, ARAMCO OVERSEAS COMPANY, Laan van Meerdervoort 55, The Hague, Netherlands.

MEDICAL OFFICER

We are currently engaged in a major long term programme in the Middle East and require immediately a Medical Officer to assist the Senior Aviation Medicine Specialist. The work involves the initial selection of aircrew, indoctrination in aviation medicine subjects and use of a decompression chamber.

This vacancy will appeal to Doctors interested in teaching and flying, and especially to those with previous experience in aviation medicine. A salary around £4,000 per annum will be paid, in addition to free single accommodation and messing; holiday entitlement is 48 days each year with free air travel, and leave may be taken every seven months.

Please apply to the Senior Medical Officer, Airwork (Overseas) Limited, Burlington Arcade, Bournemouth, Hants.

(10836)

ZAMBIA FLYING DOCTOR SERVICE

Based on Ndola in the Copperbelt, this full-time Service operates to remote areas of Zambia using five professionally flown twin-engined aircraft and a ground radio network. Each airstrip clinic is visited regularly several times a week. At present six doctors and a dentist are employed seeing about 5,000 patients a month, about half of them children.

Applications are invited from doctors.

- Duties:**
1. To carry out regular clinics at bush airstrips. This is the greater portion of the work.
 2. To accompany the aircraft on emergency patient evacuation flights.
 3. To give assistance and advice over the radio network when appropriate.
 4. To encourage and assist people living around the airstrips in all aspects of nutritional and rural development.

Seriously ill patients with medical complaints are treated at the clinics where there is provision for their accommodation. Patients with serious surgical diagnoses are flown to hospital so that the doctors with the Service are not required to do major surgery.

Research: This is an essential part of the Service and funds are available for this purpose. The opportunities are great as the Service operates in areas which have not previously had any medical facilities.

Terms: **Six-month appointments** with return air fare for one person paid by the Service. Salary of £1,000 for the six months period paid in six equal monthly instalments of approximately £166. Fully furnished accommodation provided in Ndola at economic rental.

A second return fare could be loaned to applicant and deducted from salary. Fourteen days holiday.

The posts may interest doctors who have just finished their pre-registration year, or more senior people who would like the opportunity to do some work and research in Zambia, possibly on the basis of leave of absence from their existing U.K. appointments.

Anyone interested is asked to write to:

Dr. James Lawless,
Flying Doctor Service,
P.O. Box 1856, NDOLA,
Zambia.

Interviews will be arranged in Britain or Zambia.

RADIOTHERAPIST

Applications are invited for a teaching post at the Ohio State University Medical Center. The department is equipped with cobalt and cesium units, a betatron and conventional apparatus. The medical center is the largest teaching institution in Ohio, accepting 160 medical students each year.

The academic rank will depend on qualifications and experience. Remuneration will be a combination of a salary from the university, which has fringe benefits of an annuity and generous health with a supplement from private patient income.

Details can be obtained from Dr. Frank Batley, Professor and Director, Radiation Therapy, Ohio State University, 410 W. 10th Avenue, Columbus, Ohio, 43210, U.S.A.

Dr. Batley is a Mancunian, formerly of the Christie Hospital and Holt Radium Institute, and expects to visit the U.K. late in the year to interview candidates. (H.9035)

SOUTH AFRICA

REGISTRAR—
DEPARTMENT OF
RADIOTHERAPY

Salary: R3,000 to R3,360 to R3,600 by R150 to R4,500 (R1.71 equals £1 sterling).

Applications are invited from registered medical practitioners for the above post required by the Provincial Administration of the Cape of Good Hope for the teaching hospital, Groote Schuur Hospital, Observatory, Cape Town/University of Cape Town.

A postgraduate course in training in radiotherapy is offered and reciprocal arrangements exist for examinations in England. The department is equipped with two cobalt units and a hyperbaric oxygen cylinder.

In addition to the salary a vacation savings bonus is payable, subject to certain conditions. The incumbent will, however, have to meet own transport costs but persons emigrating to South Africa are eligible for a grant of £70 each towards their fares from the South African Department of Immigration.

The conditions of service are as prescribed in the Hospital Service Ordinance, No. 23 of 1958 and the regulations framed thereunder.

Application forms can be obtained from the Attache (RDR), Immigration Section, South Africa House, Trafalgar Square, London W.C.2, and should be sent to the Medical Superintendent, Groote Schuur Hospital, Observatory, Cape Town, together with details of academic achievements, professional experience and the names of three referees, to reach him not later than August 31, 1968. recreational facilities. These include a nine-
hole golf course, sports ground, tennis
courts, etc. A recreation and occupation
centre, known as Gloucester House, has been
opened recently which includes an occupa-
tional therapy department, a swimming pool,
a squash court and a library with an adjoining
reading room.

a new
fundamental
approach
to the problem
of sputum

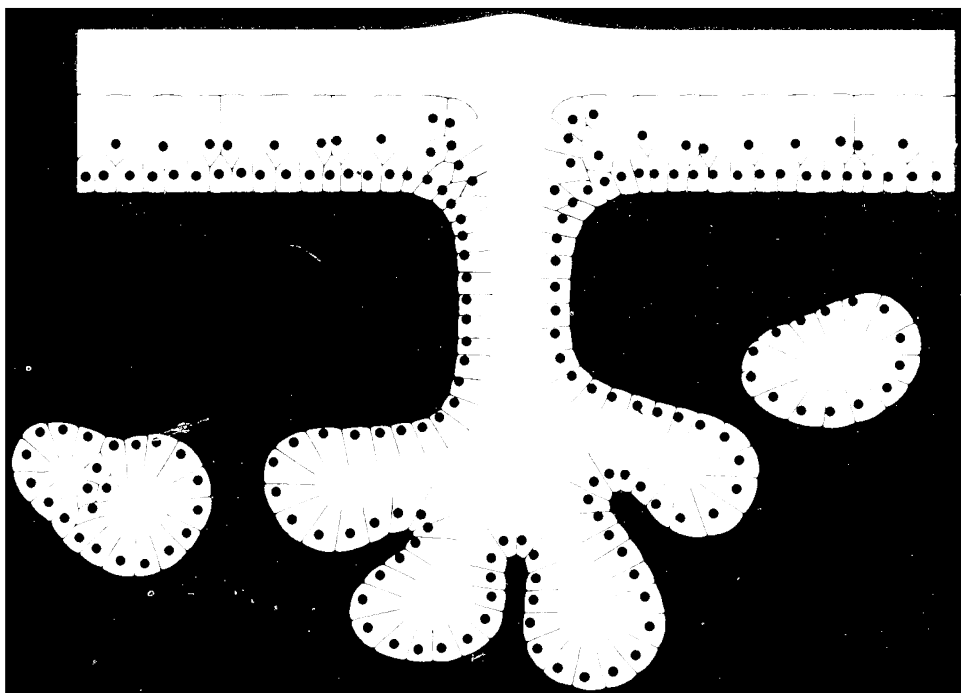

mobilises mucus
mobilises the bronchitic

tablets and elixir

A feltwork of fibres is responsible for the thick, sticky sputum characteristic of the bronchitic.¹

Bisolvon alone solves the problem for the patient with non-purulent sputum by:

- I. disrupting this feltwork of fibres
- II. reducing sputum stickiness
- III. promoting the flow of easily expectorated sputum
- IV. decreasing sputum volume after a few days' treatment

Composition Bisolvon is N-cyclohexyl-N-methyl-(2-amino-3, 5-dibrombenzyl)-amine hydrochloride

Pharmacology In animal experiments Bisolvon stimulates increased secretion of fluid by mucous glands of the respiratory tract and it also breaks down the feltwork of acid mucopolysaccharide fibres which are responsible for the viscosity of non-infected bronchitic sputum.²

Clinical Effects When given orally Bisolvon's effect becomes apparent to the patient within 2-3 days by an increased production of thin, easily expectorated sputum. As treatment progresses sputum volume decreases without an increase in viscosity, and with continued ease of expectoration.

Indications Acute and chronic bronchitis and other conditions where tenacious sputum is a problem.

Contra-indications There are no absolute contra-indications, but caution should be observed when

administering Bisolvon to patients with gastric ulceration.

Precaution When a patient under treatment for tuberculosis is receiving Bisolvon, sputum cultures for tubercle bacilli should be continued for at least three months before a negative result is assumed.

Side-effects Mild gastro-intestinal side-effects may occasionally occur. In a small number of patients a transient rise in serum transaminase levels may be seen, but these should fall again as treatment with Bisolvon continues.

Dosage Adults: 8 mg. three times daily. Children age 5 to 10: 4 mg. four times daily. Children under 5: 4 mg. twice daily.

Availability Tablets, 8 mg.; packs of 20 and 250. Elixir, 4 mg. in 5 ml. (with 17.5 mg. chloroform); packs of 200 ml. and 1-litre.
