Cunningham's Manual of Practical Anatomy

Volume 2 Thorax and Abdomen

Revised by G. J. Romanes Professor of Anatomy, University of Edinburgh

All three volumes are now in their thirteenth edition. The new edition of Volume 2 has been extensively revised to meet the needs of the new curricula being introduced in many medical schools. As well as using the new international nomenclature, the text has been considerably simplified both to clarify certain areas of difficulty and to increase its value for overseas students. Detailed descriptions of structures now considered of little practical

importance have also been omitted. The book has been re-illustrated throughout and incorporates a new series of illustrations on bones to facilitate identification when dried bones are not available. Notes on embryology and histology are given where they help in understanding structure or function.

Thirteenth edition 280 pages 233 illustrations
paper covers 30/- net cloth boards 45/- net

An Introduction to Human Physiology

J. H. Green Professor of Physiology, University of London at the
Middlesex Hospital Medical School

First published in 1963, this book provides a completely up-to-date introduction to human physiology together with a brief introduction to biochemistry. It is suitable for first-year medical students, physiotherapy students, and is also useful for dental students.

This new edition contains additional material on the control of respiration, respiration and hydrogen ion concentration, phonocardiography, alveolar ventilation, auto-immunity, DNA, hepatic

insufficiency, renal failure, thyrocalcitonin, brown adipose tissue, nerve cell potentials, and the functions of the hypothalamus.

An Introduction to Human Physiology provides a framework of clear, concise information to which the student may add by additional reading and attendance at lectures.

Second edition 190 pages 211 illustrations
paper covers 28/- net cloth boards 42/- net

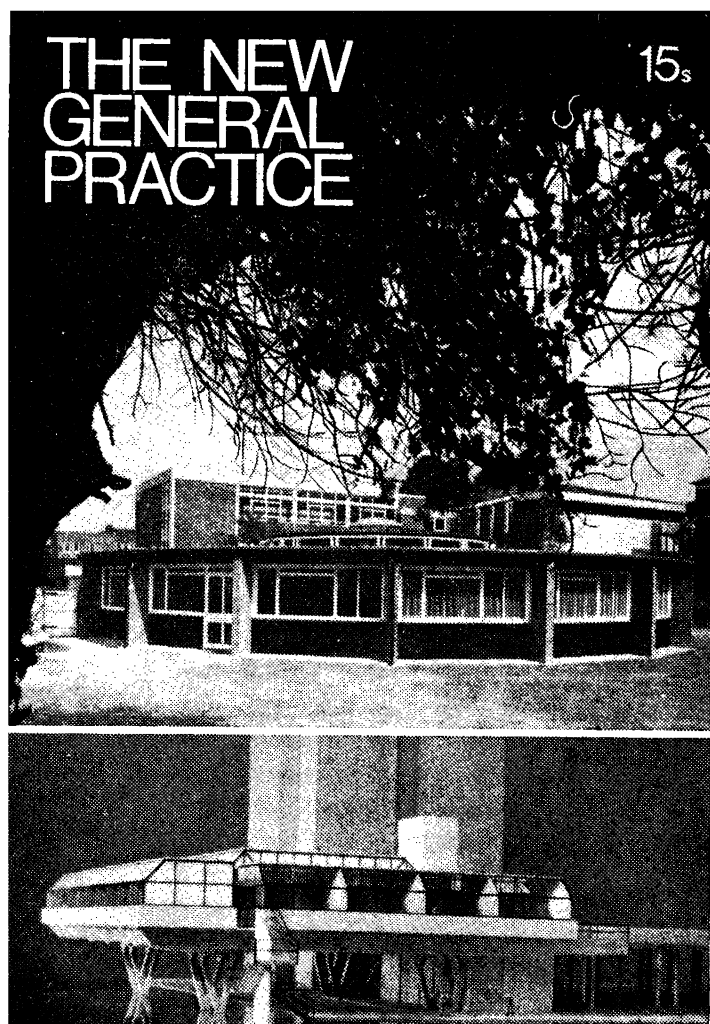

Gaddum's Pharmacology

Revised by A. S. V. Burgen Sheild Professor of Pharmacology, University of
Cambridge and J. F. Mitchell Lecturer in Pharmacology, University of
Cambridge

In this new edition Official and Approved names have been used throughout, and where these differ from those used in America the USP names have also been given. Although not attempting to give comprehensive coverage, the authors make

reference to the major therapeutic uses of drugs but not, on the whole to their dosage. A new format has enabled the reduction in size but only at a slight loss of content.

Sixth edition 242 pages 108 illustrations 35/- net

How do General Practitioners spend their time?

Do Appointment Systems Work—and How do Patients use them?

What Type of Work Can a General Practice Nurse do?

THE NEW GENERAL PRACTICE,

published on 24 June, answers these and many other questions. The book contains 22 articles published in the *B.M.J.* in the last two years, many of them describing pioneering work in the field of general practice. In his Introduction to the book Lord Platt says "Those who have already reorganized and reformed their practices will read this book with interest as they will be able to compare their own ideas with those of others, sometimes learning, sometimes having the satisfaction of knowing better."

drop Betnesol Tablets into a glass of warm water...

Immediately this corticosteroid begins to dissolve. In less than a minute you will have a clear, particle-free solution of steroid. Simple enough — but the implications are important. The complete solubility of Betnesol ensures that there are no solid steroid particles to irritate the stomach. It also ensures maximum absorption

and therefore the most consistent therapeutic response. To solubility Betnesol adds all the advantages of betamethasone; potent anti-inflammatory action and a low incidence of side effects. It does not normally cause salt and water retention or significant potassium loss.

When giving steroids orally Betnesol is clearly the solution.

on 'Concordin'**

CONCORDIN

Protriptyline hydrochloride

®

Patients with depression usually respond quickly to 'Concordin'. Fatigue and lethargy as well as the overall depressed mood are relieved, and the patient may very soon regain interest in everyday activities. This improvement often starts within a week and is generally not complicated by drug-induced sedation, as drowsiness is rare. The patient has full freedom in choice of food as 'Concordin' is *not* a monoamine oxidase inhibitor.

Each tablet of 'Concordin'-5 contains 5 mg protriptyline hydrochloride, each tablet of 'Concordin'-10 contains 10 mg. Detailed information is available to physicians on request.

effervescent tablets

Brinaldix K is a new diuretic preparation with an efficient but not precipitate diuretic action, and containing a potassium supplement.

Brinaldix K is presented as an effervescent tablet to be dissolved in water and taken as a palatable sparkling drink. Presentation of the potassium supplement in solution obviates the risk of intestinal ulceration.

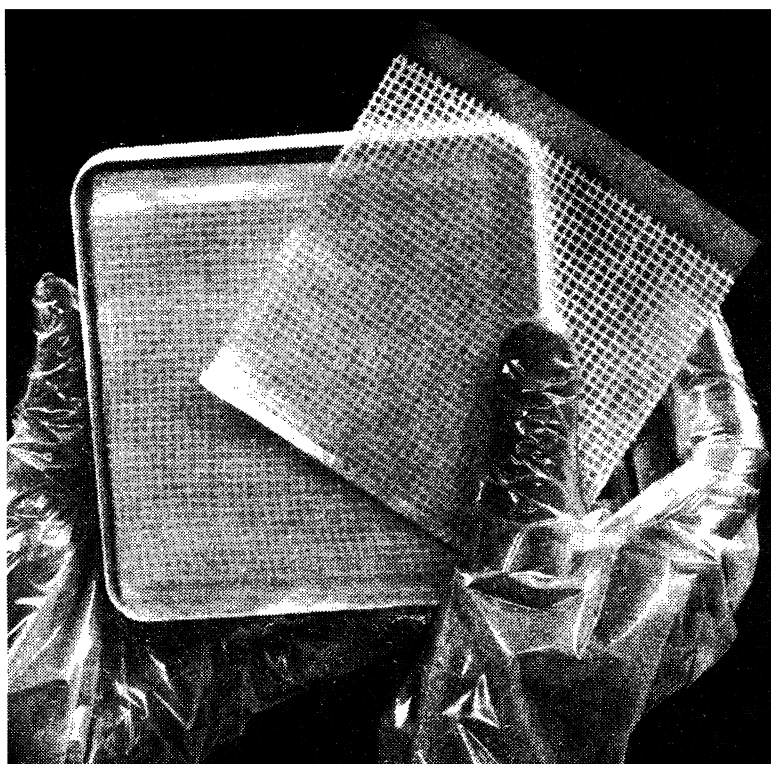

Brinaldix K has greater maximum effect than bendrofluazide or chlorothiazide. But its action is spread over several hours and the patient is not distressed by precipitate diuresis.

Brinaldix K unique diuretic/potassium effervescent tablet

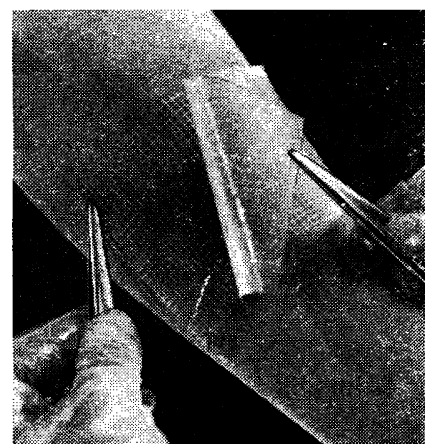

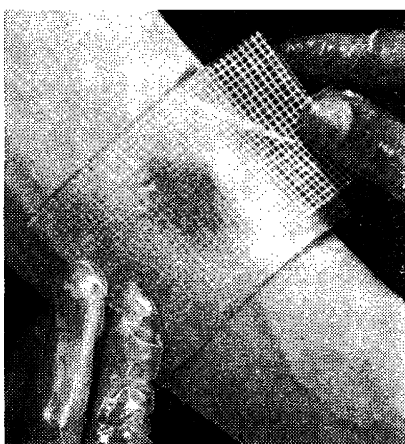

Each effervescent tablet contains Brinaldix (clopamide) 20 mg., potassium 470 mg. and chloride 119 mg. Also available: tablets containing 20 mg. Brinaldix without potassium, and Potassium-Sandoz effervescent tablets.

ESBATAL

brand

bethanidine sulphate

A recent 2½-year study¹ has confirmed that 'Esbatal' (bethanidine sulphate) provides a more acceptable form of therapy for the patient than other antihypertensive drugs in current use. Control of blood pressure was achieved with 'Esbatal' in about three-quarters of the hypertensive patients treated—and side-effects were rare.¹ In comparing 'Esbatal' with guanethidine and methyldopa the authors considered that 'Esbatal' was to be preferred for beginning treatment in any new hypertensive patient.¹ Better acceptance of 'Esbatal' by the patient, again compared with guanethidine and methyldopa, was also demonstrated in another trial where 'Esbatal' scored the highest rating for patient preference.²

In the elderly, the special problems of constipation...

Constipation in the elderly can present special problems of treatment. Weakened abdominal muscles . . . the dangers inherent in straining . . . refusal to co-operate . . . the presence of pain, to which anal fissures or haemorrhoids may contribute . . . the need for enemas and suppositories . . . the risk of faecal impaction, with consequent manual removal . . .

Clinical trials have shown the distinctive value of *Dorbanex* in the treatment of the elderly patient. In a recent trial in a geriatric ward¹, *Dorbanex* achieved 23% more bowel openings than did standardised senna, and 61% more than miscellaneous laxatives. The stool formation "allowed easy defaecation without an increase in faecal incontinence". Suppositories were needed only five times during 644 patient-days of treatment, and side-effects were negligible and transient.

"*Dorbanex* was readily accepted by all patients, even those with some degree of senile dementia to whom the administration of other medicaments has proved difficult"². In this trial *Dorbanex* achieved an average of more than one bowel opening every day—an increase of more than 50% over the openings achieved by standard aperients. No patient complained of griping, whereas other medicaments had caused several such complaints. No suppositories were needed, and in 360 patient-days of treatment only one manual removal was performed.

Dorbanex can simplify management of the patient posing these problems by providing comfortable, reliable and trouble-free evacuation. *Dorbanex* produces a soft but well-formed stool without griping or other unpleasant side-effects, reduces the need for enemas and suppositories, helps to prevent faecal impaction, and makes defaecation easier without increasing faecal incontinence.

...have a straightforward solution

Now available in three forms—as capsules and in two strengths of liquid—*Dorbanex* provides in one preparation a balanced treatment for constipation. By softening the stool and stimulating peristalsis, *Dorbanex* prepares the way for pain-free evacuation.

1. *Practitioner* (1966) 196: 702 2. *Brit. Hosp. J. & S. S. Review* (1966) 77: 727

Composition *Dorbanex* is available in three forms—as capsules and in two strengths of liquid. **DORBANEX CAPSULES**: each capsule contains 1:8-dihydroxyanthraquinone 25 mg., poloxalkol 200 mg. **DORBANEX LIQUID**: each 5 ml. teaspoonful contains 1:8-dihydroxyanthraquinone 25 mg., poloxalkol 200 mg. **DORBANEX FORTE**: each 5 ml. teaspoonful contains 1:8-dihydroxyanthraquinone 75 mg., poloxalkol 1000 mg. **Dosage** **DORBANEX CAPSULES**: Adults, one or two capsules. Children, one capsule. **DORBANEX LIQUID**: Adults, one or two teaspoonfuls. Children, half to one teaspoonful, as required. Before or after surgery: two to four teaspoonfuls or two to four capsules. **DORBANEX FORTE**: one teaspoonful, or as directed by the physician. Treatment should be taken

at bedtime. **Contra-indications** In common with other gastro-intestinal evacuants, *Dorbanex* should not be given when acute, painful conditions of the abdomen are present, or the cause of constipation is suspected to be obstruction of the small or large intestine. **Side-effects** Dihydroxyanthraquinone may cause a temporary harmless, pink or red colouring of the urine and, in prolonged use or high dosage, of the mucosa of the large intestine. Doses larger than two teaspoonfuls may cause slight gastro-intestinal discomfort in a few patients. **Basic NHS Prices** *Dorbanex* Capsules: bottles of 30 capsules 8.8; bottles of 300 capsules 78.-; *Dorbanex Liquid*: bottles of 60 ml. 4.-; bottles of 500 ml. 30.-; *Dorbanex Forte*: bottles of 60 ml. 6.-; bottles of 500 ml. 45.-. Senokot restores natural rhythm to the constipated colon

Senokot, standardized senna, has earned a reputation for effectiveness and safety. Over 150 references in medical journals and text books testify to its value. Senokot is suitable for all ages and is useful in pregnancy and in geriatric cases. It is predictable in its action and, taken in the correct dosage, is free from griping. Acting specifically in the colon, it induces controlled peristaltic action and restores the normal defaecation reflex leading to re-education of the bowel.

From dispensing packs, the basic NHS cost of a teaspoonful of granules or two tablets is about a halfpenny; thus treatment with Senokot is very economical.

In addition to granules and tablets, there is now a syrup presentation – a highly acceptable form, specially suited to the needs of children and elderly patients.

Tablets: 50, 100 and 200. Granules (chocolate flavoured): 56 and 170 grammes. Syrup: 150 millilitre bottle.

The SPENCERFLEX for Men

- ★ Co-relates back and abdominal support
- ★ Allows complete freedom of action
- ★ Protects scar following upper abdominal surgery

Individually designed, cut and made for each patient, this support provides pelvic control, abdominal uplift, freedom for muscular action. Thus, at work or play, or during convalescence, the Spencerflex favourably influences better posture and body mechanics.

Safe because it is made in non-elastic material that will not yield or slip under strain. *Comfortable* because it is individually designed according to the prescribed needs of each patient.

The extra width at back gives exceptional back support. It is light and flexible, with no pressure on prominent part of hip bones.

Designed as an adjunct to treatment following upper abdominal surgery. Especially helpful in early ambulation and where drainage has been maintained for a considerable period. Completely covers and protects the scar without "digging-in" at lower ribs. Relieves fatigue and strain—even that caused by deep breathing and coughing—on tissue and muscles of the wound area. *We know of no other abdominal support for men* which provides these benefits.

INDUSTRIAL APPOINTMENTS

Attention is drawn to the British Medical Association's statement of policy on the Remuneration of Industrial Medical Officers as approved by the Representative Body, 1966, which is available on request from the Secretary.

ROCHDALE INDUSTRIAL HEALTH SERVICE

Applications are invited for the post of ASSISTANT MEDICAL OFFICER in this group service, which covers nearly 10,000 employees in south-east Lancashire.

The post is suitable for doctors seeking a career in occupational health. A car allowance is payable and assistance will be given with car purchase if required. Superannuation scheme. Salary in accordance with B.M.A. scale, but not less than £2,200 per annum.

Applications should state age and give full details of qualifications and experience, and the names of three referees. They should be sent to the Medical Director, Rochdale Industrial Health Service, Nuffield House, Bury Road, Rochdale, Lancs. (H.9324)

BOOTS PURE DRUG COMPANY LIMITED

Applications are invited for the post of

MEDICAL OFFICER
(RETAIL)

to assist the Senior Medical Officer (Retail) in the whole field of occupational health amongst the Retail Staff of Boots Pure Drug Co. Ltd.

Applicants should be about 30-40 years of age and previous experience in general practice or occupational health will be an advantage.

Travelling in England will be necessary and the successful applicant should expect to spend 1-2 nights away from home most weeks.

Salary will be within the B.M.A. Scale for Industrial Medical Officers according to age and experience.

There is a contributory pension scheme and other benefits.

Applications containing details of previous experience and relevant personal information should be addressed to

Dr. J. G. Jeffs, Industrial Health Unit, Boots Pure Drug Co. Ltd., Station St., Nottingham, within the next two weeks.

INDUSTRIAL MEDICAL OFFICER

A full time Medical Officer is required for our Belfast Works for our established industrial medical service.

Applicants should be between the ages of 30/45 and must have held a casualty appointment. Administrative and/or Service experience would be an advantage, as would be the possession of a D.P.H. or D.I.H.

The appointment will call for the exercise of a high standard of clinical judgement and appraisal of environmental working conditions.

Commencing date for successful applicant would be mutually arranged and after a short introductory period he would be expected to assume sole charge of the medical service.

Salary will be related to qualifications and experience and will be within the B.M.A. recommended scale.

Applications giving full particulars and the names of two referees should be sent to arrive before August 30, 1968, to:—

COMMERCIAL APPOINTMENT**Medical Adviser**
LONDON

An international pharmaceutical company wishes to recruit a British male registered practitioner for an appointment in its Medical Research Department in London. A sound knowledge of general medicine and therapeutics is essential; a higher qualification or definite interest in psychiatry would be a distinct advantage. The department's work is varied and interesting and is concerned with the planning and administration of clinical trials in the British Isles, and involves close liaison with basic research units and other divisions of the Company. A salary of not less than £3,000 will be negotiated and other benefits are good.

(Ref. 4502/BM)

Replies will be forwarded direct, unopened and in confidence to the client unless addressed to our Security Manager listing companies to which they may not be sent. They should include comprehensive career details, not refer to previous correspondence with P.A. and be sent quoting the correct reference on the envelope to:

P.A. Advertising Limited,
192 Sloane Street, London S.W.1.
Telephone: 01-235 6060.

ST. ANDREW'S HOSPITAL
NORTHAMPTON

President:

Lieutenant-Colonel J. Chandos-Pole, O.B.E.
Medical Director:
James Harper, M.B., F.R.C.P.(Edin.), D.P.M.

This private hospital receives patients, both male and female, suffering from nervous and mental disorders, including alcoholism and senile illness. The fees range from twenty guineas per week. Private rooms with special nurses can be provided, either in the hospital or in one of the villas in the grounds. The hospital is situated in 130 acres of pleasant grounds which provide all recreational facilities. These include a nine-hole golf course, sports ground, tennis courts, etc. A recreation and occupation centre, known as Gloucester House, has been opened recently which includes an occupational therapy department, a swimming pool, a squash court and a library with an adjoining reading room.

WANTAGE HOUSE

This is a separate reception unit to which patients may be admitted. It is equipped for the complete investigation of nervous and mental disorders by the most modern methods. All forms of treatment are available.

Charges for treatment at St. Andrew's are allowable for benefit to British United Provident Association and Private Patients Plan subscribers.

For terms and further particulars apply to the Medical Director (Telephone No. 34354 Northampton), who can be seen in London by appointment.

SAFE SIMPLE EFFECTIVE NULACIN

EFFECTIVE, because Nulacin achieves *continuous* neutralisation of hyperacidity. As peptic ulcers arise and recur only in the presence of free acid, Nulacin not only relieves symptoms but is the ideal long-term medical treatment.

SIMPLE, because Nulacin is specially designed to dissolve slowly in the mouth and produce a continuous intragastric milk-alkali drip in the ambulant patient. One tablet provides up to 30 minutes' relief from excess acid.

SAFE, because clinical experience has shown that Nulacin produces no electrolyte disturbances and can be used in *all* patients with peptic ulcers.

NULACIN is a unique combination of whole milk protein and fats with dextrins, maltose and suitable antacids and provides *economical*, long-term medical treatment for peptic ulcer.
