## Lincocin penetrates

an experimental demonstration of  
Lincocin penetration

Forty minutes prior to undergoing tonsillectomy, a child weighing 29.1 kg. received a single i.m. injection of 10 mg./kg. lincomycin hydrochloride (base equivalent). A sample of the patient's tonsil tissue was placed on a Petri dish in which the agar had previously been seeded with a pathogenic strain of *Streptococcus haemolyticus*. After incubation, a photograph was taken. The clear zone demonstrates that Lincocin penetrated the human tonsillar tissue in a concentration sufficient to inhibit the growth of the pathogenic inoculum. (The small white dots appearing at one end of the tissue sample were identified in subsequent studies as colonies of non-pathogenic Gram-negative *Neisseria catarrhalis*.)

# VARICOSITY?

## She'll willingly take your advice if it means wearing fashionable Burson Lightweights

A woman's psychological need for fashion often makes her reluctant to accept your advice to wear elastic stockings. Burson Lightweights have been specially created to provide the answer.

Undetectable in wear, they are truly acceptable to the most fashion-conscious woman—yet are completely effective in relieving the pain and discomfort of a mild varicose condition and are approved by the N.H.S.

• Made of alternating strands of strong, supple elastic with strands of sheer nylon, Burson Lightweights combine strength and resilience with stretch in both directions. Horizontal stretch eases the pressure of distended veins; vertical stretch aids the natural flow of blood

back to the heart. Available under N.H.S. (on the EC 10 form) in six normal stocking sizes scientifically adjusted to fit all leg shapes, they come in a pleasing shade.

Thus, in specifying Burson Lightweights when prescribing for mild varicose, you will ensure your patient's relief from discomfort—whilst preserving her confidence and femininity.

## A UNIQUE ORAL GEL WITH STRIKING ANALGESIC AND ANTISEPTIC PROPERTIES

Bonjela has been shown in formal American trials to bring rapid relief from pain in 90% of all cases of oral ulceration, herpes labialis, gingivitis and denture sores. By rapid relief is meant marked alleviation of pain within 2-3 minutes.

Bonjela also promotes healing whenever the aetiology is partly or wholly

bacterial. Some ulceration originates from endocrinal, viral or fungal causes which may require other forms of treatment.

Even in these cases where a bacterial element is superimposed on the original infection Bonjela will reduce the severity of the infection and rapid relief from pain will be obtained.

**FORMULA:** Choline Salicylate 8.7%, Cetalkonium Chloride 0.01%, Alc. (95%) 39.0%, Menthol 0.057%, Glycer. 4.6%.

**INDICATIONS:** Herpes labialis, gingivitis, oral ulcerations, cheilosis, denture sores, infant teething disorders.

**PRESENTATION:** Bonjela is available in 10 g. tubes at a basic N.H.S. cost of 2/8½d. per tube.

## effectiveness matters most -but Haelan offers more

**Haelan certainly is effective**—it contains flurandrenolone, one of the most powerful steroids for topical use. Haelan has the right concentration of flurandrenolone (0.0125%) to resolve most steroid-responsive skin conditions without undue risk of systemic side effects. But there's more to Haelan than that.

Because flurandrenolone is so active, Haelan provides an ample quantity of base for easy application, and the big 60G (2 oz) tube is large enough to treat the average patient without the need for repeat prescriptions. Last, but by no means least, Haelan, at less than 2½d per gramme is clearly economical.

Haelan cream and ointment contain 0.0125% flurandrenolone in 60G (2 oz) tubes. For the most severe or resistant conditions, Haelan X containing 0.05% flurandrenolone is available as cream or ointment in 15G tubes.

# AIM FOR THE BAD'UNS WITH 'ILOSONE'

With 'Ilosone' your aim is effective and selective. Killing off the pathogenic bacteria, allowing the normal gut flora to pursue their useful life.

The real 'bad 'uns', of course, are Gram positive cocci, causing most of the infections you see every day. Against these infections 'Ilosone' is much more active than, for example, the tetracyclines and it will not discolour teeth or deposit in bone. Nor is 'Ilosone' likely to cause diarrhoea or gastro-intestinal upset—disadvantages which the tetracyclines share with the broad spectrum penicillins.

Effective. Selective. Use 'Ilosone' when you go gunning for bad 'uns—in acute tonsillitis or acute bronchitis or any common bacterial infection of the upper respiratory tract. *Haemophilus influenzae*? Yes, 'Ilosone' deals with this 'bad 'un' too!

# An aid to oral hygiene

Maintenance of oral hygiene during the post-operative period, especially among geriatric patients, is obviously essential. But at the same time this can prove to be somewhat time-consuming for the nursing staff.

However, recent experience in a London hospital has shown that the patient can help to provide his own nursing care, with the minimum of effort.

This experience covers patients who are fed intravenously and post-operative cases who find normal eating and drinking difficult. These patients often exhibit signs of mouth infection very quickly, and treatment for this can often cause considerable discomfort.

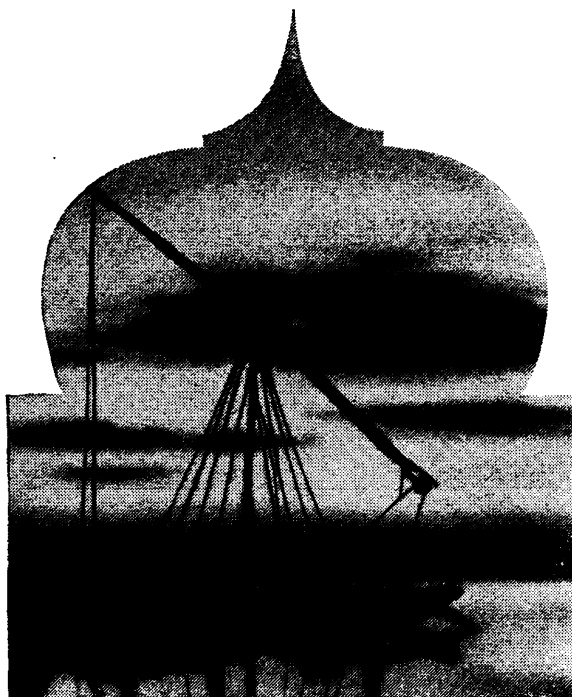

A more pleasant treatment is possible in many cases, for it has been found that giving the patient chewing gum promotes salivary gland activity. Patients are encouraged to chew gum at two-hourly periods, and this treatment frequently allays the symptoms and produces a considerable improvement in the condition of the tongue and mucosa. Quite striking results have been noted after carrying out this treatment for a 24-hour period.

## The simplest, safest and most effective treatment for intestinal amoebiasis...

# FURAMIDE

Furamide relieves the symptoms of amoebic dysentery and other forms of intestinal amoebiasis within a few days, effecting a complete cure in ten days.

Furamide is particularly useful in the treatment of cyst-passers and is without doubt the drug of choice for mass treatment because of the absence of side-effects.

Furamide offers several distinct advantages over other forms of treatment:

- A cure rate of 80% or more in the acute condition and 90% to 100% in the chronic condition may be expected.
- The specific amoebicidal effect does not upset normal bacterial flora of the gut.
- Bed-rest is unnecessary unless the clinical condition of the patient warrants it.
- Hospitalisation is not normally necessary.
- No special dietary restrictions or enemas are necessary.
- The only side-effects which may occur are occasionally flatulence, which may normally be disregarded, and less frequently an urticarial rash may be observed.

# Sustanon makes a man a man again

in body and in mind

When gonadal activity is inadequate the young or middle-aged male may demonstrate diminished genital structure, and response, to the point of impotence. Understandably the repercussions reach far beyond the purely physical – often playing havoc with the patient's psyche, marriage and career.

Every physician knows how complex is diagnosis of the condition, with the patient frequently hiding the facts not only from his doctor but *from himself*. Even when the diagnosis is established, therapy is not straightforward and many factors must be considered. Nevertheless with Sustanon a clear, early and sustained response may occur at all levels, physical, mental, and emotional.

Sustanon is preferable to testosterone propionate as of course no single testosterone ester provides both lengthy activity and rapid onset of action. This Sustanon does. Its prolonged activity is such that only an occasional injection is needed to maintain the required therapeutic level.

PRONDOL can thus be said to allow you greater treatment control in depression because of fewer treatment problems.

# OPILON

## selectively improves blood flow in the skin

Strain-gauge plethysmography is one of several techniques for evaluating blood flow in limbs. These tracings were produced using this technique: the steepness of the slopes of the tracing is representative of blood volume. In this instance the patient suffered

from Raynaud's phenomenon in both hands. The tracing above shows blood flow in the finger before treatment, and that below after treatment with OPILON (thymoxamine). The dramatic increase in blood flow is as much as fifteen times.

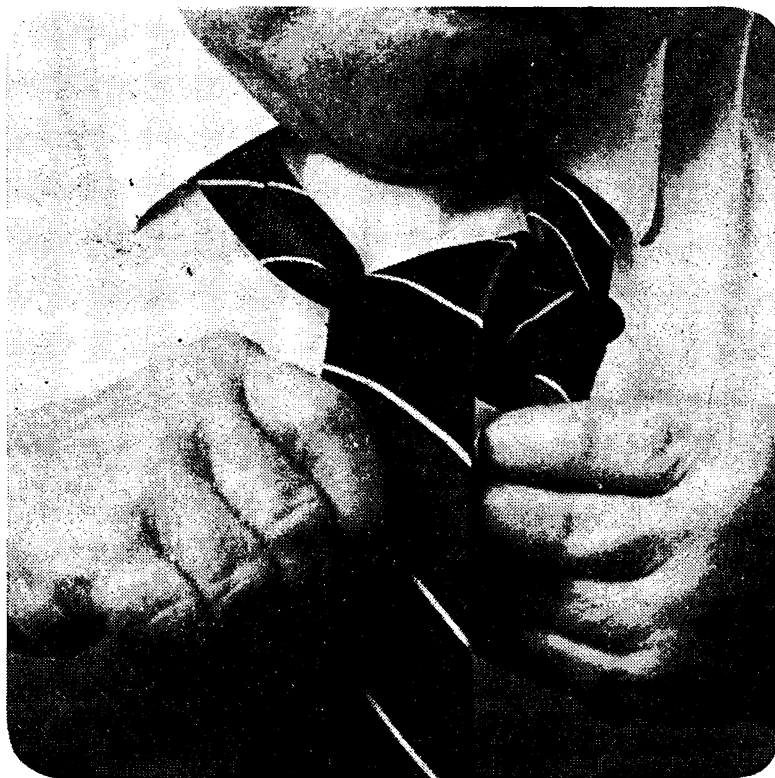

Opilon is a specific alpha adrenergic blocking agent and its action is confined almost entirely to the periphery. Clinical evidence such as that described above, shows its beneficial influence on blood flow in the skin and superficial tissues. Opilon is not related to the nicotinic acid derivatives and unlike the beta adrenergic drugs, such as isoxuprine, does not affect cardiac rhythm.

Opilon is indicated where peripheral ischaemia is evident, such as Raynaud's phenomenon, chilblains, Ménière's syndrome, acrocyanosis and excessively cold hands and feet. Opilon may also be used to maintain nutrition of the skin, important in many occlusive peripheral disorders.

Tablets of 40 mg thymoxamine in bottles of 50 and 250.

# Senokot restores natural rhythm to the constipated colon

Senokot, standardized senna, has earned a reputation for effectiveness and safety. Over 150 references in medical journals and text books testify to its value. Senokot is suitable for all ages and is useful in pregnancy and in geriatric cases. It is predictable in its action and, taken in the correct dosage, is free from griping. Acting specifically in the colon, it induces controlled peristaltic action and restores the normal defaecation reflex leading to re-education of the bowel.

From dispensing packs, the basic NHS cost of a teaspoonful of granules or two tablets is about a halfpenny; thus treatment with Senokot is very economical.

**In addition to granules and tablets, there is now a syrup presentation – a highly acceptable form, specially suited to the needs of children and elderly patients.**

Tablets: 50, 100 and 200. Granules (chocolate flavoured): 56 and 170 grammes. Syrup: 150 millilitre bottle.

## *In the elderly, the special problems of constipation...*

Constipation in the elderly can present special problems of treatment. Weakened abdominal muscles . . . the dangers inherent in straining . . . refusal to co-operate . . . the presence of pain, to which anal fissures or haemorrhoids may contribute . . . the need for enemas and suppositories . . . the risk of faecal impaction, with consequent manual removal . . .

Clinical trials have shown the distinctive value of *Dorbanex* in the treatment of the elderly patient. In a recent trial in a geriatric ward<sup>1</sup>, *Dorbanex* achieved 23% more bowel openings than did standardised senna, and 61% more than miscellaneous laxatives. The stool formation "allowed easy defaecation without an increase in faecal incontinence". Suppositories were needed only five times during 644 patient-days of treatment, and side-effects were negligible and transient.

"*Dorbanex* was readily accepted by all patients, even those with some degree of senile dementia to whom the administration of other medicaments has proved difficult". In this trial *Dorbanex* achieved an average of more than one bowel opening every day—an increase of more than 50% over the openings achieved by standard aperients. No patient complained of griping, whereas other medicaments had caused several such complaints. No suppositories were needed, and in 360 patient-days of treatment only one manual removal was performed.

*Dorbanex* can simplify management of the patient posing these problems by providing comfortable, reliable and trouble-free evacuation. *Dorbanex* produces a soft but well-formed stool without griping or other unpleasant side-effects, reduces the need for enemas and suppositories, helps to prevent faecal impaction, and makes defaecation easier without increasing faecal incontinence.

## *...have a straightforward solution*

Now available in three forms—as capsules and in two strengths of liquid—*Dorbanex* provides in one preparation a balanced treatment for constipation. By softening the stool and stimulating peristalsis, *Dorbanex* prepares the way for pain-free evacuation.

# ESBATAL

brand

bethanidine sulphate

A recent 2½-year study<sup>1</sup> has confirmed that 'Esbatal' (bethanidine sulphate) provides a more acceptable form of therapy for the patient than other antihypertensive drugs in current use. Control of blood pressure was achieved with 'Esbatal' in about three-quarters of the hypertensive patients treated—and side-effects were rare.<sup>1</sup> In comparing 'Esbatal' with guanethidine and methyldopa the authors considered that 'Esbatal' was to be preferred for beginning treatment in any new hypertensive patient.<sup>1</sup> Better acceptance of 'Esbatal' by the patient, again compared with guanethidine and methyldopa, was also demonstrated in another trial where 'Esbatal' scored the highest rating for patient preference.<sup>2</sup>

# Why a doctor needs a special sort of help when he's sick.

Some people can get by on National Insurance Benefit when they're sick.

As a doctor you haven't a chance. Commitments, such as your surgery, would cripple your income. And you know better than anyone that the worries of keeping your family on a watered-down budget would retard your recovery.

That's why it's so wise to insure against sickness. Wiser still to insure with the company run exclusively for doctors and dentists: the Medical Sickness Society.

You know that one day you may need this insurance. Write to us today. Together we'll find the policy that will work hardest for you.

Do it now. Turning the page could mean turning your back on a worry-free future.

the treatment of thyrotoxicosis

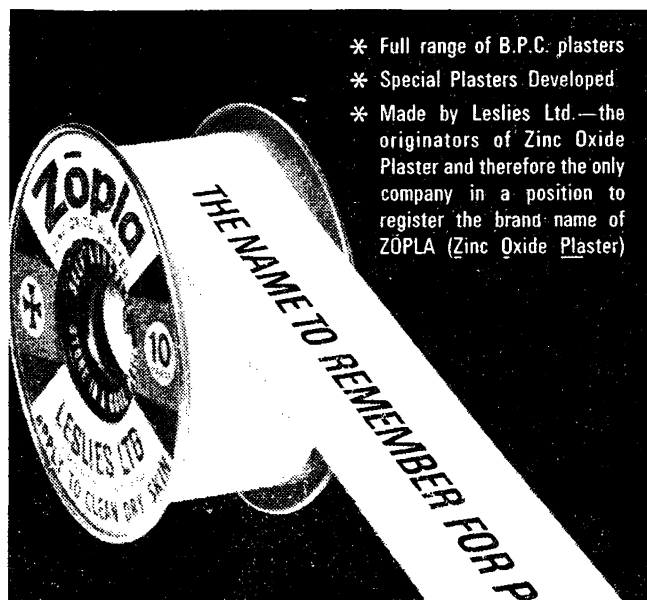

"We suggest that all patients with Grave's disease, irrespective of age or sex, should be treated with antithyroid drugs for six months." (In a few, surgery or  $^{131}\text{I}$  may be necessary before six months has elapsed) ... the decision for or against continuing drug therapy can then be made on the basis of thyroidal suppressibility by triiodothyronine."<sup>1</sup>

# FREE, FOR YOU

and your young patients as they learn about menstruation

A set of anatomical drawings and two booklets, designed to explain fully the process of menstruation, are available, free, from Tampax Limited. We offer this service to help you create a healthy attitude toward menstruation in young patients who seek your advice.

This informational material includes a set of the classic anatomical drawings of the female reproductive system by R. L. Dickinson, M.D., and two

booklets: "Let's talk about you", for very young girls, which answers questions that have actually been asked of our Educational Staff, and "Accent on You", which explains menstruation and its part in womanhood for the older girl.

Simply write to the address below for your free set of drawings and sample booklets. These booklets may then be reordered in any quantity you need for your patients' personal use.

'Anxiety is frequently intermingled with depression ...'

*Clin. Trials J.*, 1965, 2, 317 (Nov)

When symptoms of anxiety and depression co-exist, the anxiety is usually easy to recognise, but the depressive state is often less obvious.

In anxiety-depressive conditions, 'Tryptizol', a well-established antidepressant with an intrinsic tranquillising action, has proved of considerable value. In many cases, the patient becomes calmer, mood is lifted, and sleep and appetite improve.

## for Sacro-iliac strain *a narrow belt alone is not enough...*

That is why Spencer Designers incorporate an easily adjustable pelvic binder (see inset below) inside each Spencer created for Sacro-iliac strain.

A narrow belt alone will not provide adequate continuous immobilization of the sacro-iliac joints, because such a belt will *not* stay in place. With ordinary body movements, any narrow belt alone will ride up and dig in at the back, thus causing faulty posture that increases the disability. That is why every Spencer Sacro-iliac Support is a "belt within a support" designed to the necessary heights and lengths to bridge the lumbar curve and correlate abdominal and back support. Thus improvement in posture—essential to relief in sacro-iliac strain—is attained and maintained.

Every Spencer—for abdomen, back, breasts—is individually designed, cut and made for each patient.

## A COMPANION TO MEDICAL STUDIES

*Edited by R. PASSMORE M.A., D.M., and J. S. ROBSON M.D., F.R.C.P.E.  
University of Edinburgh*

**Volume 1** Anatomy, Biochemistry, Physiology and Related Subjects. September 1968. 1152 pages, 1075 illustrations. Cloth £6 6s., Limp 95s.

This is a comprehensive work in three volumes written for undergraduate medical students. It aims to give them an interesting, intelligent and exciting account of modern medicine and the medical sciences. The student will find in it more than sufficient information to enable him to pass his examinations and thereafter to begin to discharge clinical responsibility under supervision. Its aim is to set out concisely the scientific achievements on which modern practice is based; it also indicates important growing points and prepares its readers for medical practice in the twenty-first century when they will be at the height of their professional careers. Throughout the book unnecessary departmental barriers are broken down; in consequence there has been a great reduction in the repetition which appears inescapable in a series of departmentally-orientated books. The subjects of this volume have been integrated into a series of chapters in five main sections: Food and Energy; The Structure and Function of Cells; The Structure and Function of Tissues; The Structure and Function of the Systems; and Man in his Environment. The volume covers fully four subjects, not often taught in the preclinical period, to which the Royal Commission on Medical Education recommends special attention: statistics, human genetics, behavioural sciences and sex education.

It should be stressed that Volume 1 stands entirely on its own and does not depend on the two subsequent volumes for its value. In one comprehensive text it covers the whole subject matter of the preclinical course, and provides the student with a carefully planned foundation for his clinical studies, which are fully covered in the second and third volumes.

**Volume 2** General Pathology and Pharmacology. August 1969. 800 pages, 300 illustrations. Cloth, about £6 6s., Limp, about 95s.

**Volume 3** Medicine, Surgery, Obstetrics, Therapeutics and Social Medicine. April 1970. 1500 pages, 760 illustrations. Cloth, about £7 15s., Limp, about £5 15s.

## THE NEW GENERAL PRACTICE,

published on 24 June, answers these and many other questions. The book contains 22 articles published in the *B.M.J.* in the last two years, many of them describing pioneering work in the field of general practice. In his Introduction to the book Lord Platt says "Those who have already reorganized and reformed their practices will read this book with interest as they will be able to compare their own ideas with those of others, sometimes learning, sometimes having the satisfaction of knowing better."

### *The Curability of Cancer in Various Sites*

Edited by E. C. Easson and the late M. H. Russell. 1st Edition. 35s. net

There are numerous papers published annually giving figures for the incidence and treatment of cancer in various sites. This report, from one of the leading cancer treatment centres in the world, is unique in that it collates information of the incidence, treatment and follow-up results of cancer in nearly all the sites in a large number of patients over many years. The information to be gained from this publication is therefore far more comprehensive and far more accurately indicative of the current position.

### *Renal Failure*

Edited by A. N. Brest, MD and J. H. Moyer, MD. £9 net

This book covers thoroughly all of the important clinical aspects of acute and chronic renal failure including pathophysiology, diagnosis, clinical manifestations and treatment. It begins with a review of the anatomy and physiology of the normal kidney and goes on to consider the pathophysiology of renal failure. This is followed by a survey of chronic renal failure—first, findings pertaining to diagnosis and clinical manifestations, and then the modern concepts of the treatment. Diagnosis and therapy of acute renal failure make up the final section of the book. Among the many important current topics are those on peritoneal dialysis, haemodialysis, artificial kidneys and renal transplantation.

### *Pharmacology and Drug Therapy in Nursing*

M. J. Rodman, BS, PhD and D. W. Smith, RN, MA, EdD. £5 10s. net

This book is divided into seven sections which give a complete guide to pharmacology from a basic level.

### *Tropical Medicine Conference, 1967*

Edited by J. H. Walters, MD, FRCP. £2 net

This symposium, which was held under the auspices of the Royal College of Physicians of London on the 2nd and 3rd of June, 1967, contains articles dealing with aspects of a number of tropical diseases. Among those subjects dealt with are Malaria, Leishmaniasis, Tropical Sprue, Leprosy, together with miscellaneous short papers.

# Have you considered a Medical Career in Clinical Research and Development?

There exists in Organon Laboratories Ltd. an opportunity for a young physician to join the Medical Development Department. He should be between 30 and 35 and have previous medical experience in either the hospital service or in general practice. After a period of training we should like him to assume control of our clinical evaluation programme in the United Kingdom. This will involve the initiation and follow-up of clinical trials in many different units, using the organisation that already exists within the Medical Development Department. Initial remuneration will be negotiable upwards from £2,800. A Company car is provided and general conditions of employment are excellent.

In a vigorous and expanding ethical company where there are excellent prospects of advancement we are providing the opportunity for a satisfying Medical Career.

Applications will be regarded as strictly confidential and should be addressed to,

Dr. A. F. Taylor, Director of  
Medical Development,  
Organon Laboratories Ltd.,  
Crown House, Morden, Surrey.

## BRITISH POSTGRADUATE MEDICAL FEDERATION

(UNIVERSITY OF LONDON)

## THE INSTITUTE OF LARYNGOLOGY AND OTOTOLOGY

330/332, Gray's Inn Road, London, W.C.1

IN ASSOCIATION WITH THE ROYAL NATIONAL THROAT, NOSE AND EAR HOSPITAL

The Institute is organized to provide instruction in this Specialty for the whole period of training necessary to reach full consultant standard. There are ample clinical and research facilities and teaching is carried on continuously daily throughout the year.

There are full-time courses of lectures and demonstrations suitable for those intending to take the D.L.O.(R.C.P.&S.Eng.), and the Final F.R.C.S. examinations in Otolaryngology. There are also short courses for senior students in aural surgery, pathology, and in the treatment of the deaf child. In addition, there are lectures, demonstrations, and refresher courses suitable for general practitioners and advanced specialty training (post-Fellowship) for Consultants and Senior Registrars.

A number of paid appointments, which are open to postgraduate students in the different stages of training, give opportunities of clinical experience and research.

*Further information may be obtained from the Dean.*

## THE UNIVERSITY OF SHEFFIELD

### FACULTY OF MEDICINE

*Dean*—Professor C. H. STUART-HARRIS, C.B.E., M.D., F.R.C.P.

*Administrative Dean*—Dr. G. HUDSON, D.Sc., M.D.

The University grants Degrees in Medicine and Surgery (M.B., Ch.B., M.D., Ch.M., Ph.D.), in Medical Science (B.Med.Sci.), and in Dental Surgery (B.D.S., M.D.S.). It also grants a Diploma in Dental Surgery (L.D.S.). These are all open to both men and women.

The Session 1968-69 begins on October 2.

Entries to the Medical and Dental Schools are strictly limited in order to ensure adequate lecture and laboratory accommodation for all students. Lectures and laboratory courses are given in the University, whilst clinical instruction is provided in the general and special Hospitals in the City. The relatively ample number of hospital beds available renders the facilities for clinical instruction unusually large.

**HALLS OF RESIDENCE**—FOR MEN: Crewe Hall, Clarkehouse Road, Sheffield S10 2LL; Stephenson Hall, Oakholme Road, Sheffield S10 3DG; Sorby Hall, Endcliffe Vale Road, Sheffield S10 3ES; Earnshaw Hall, Endcliffe Crescent, Sheffield S10 3EG; Ranmoor House, Shore Lane, Sheffield S10 3AV. FOR WOMEN: Halifax Hall, Endcliffe Vale Road, Sheffield 10, and annexes.

*Particulars of the Halls may be obtained from the Registrar.*

Prospectuses containing details of the Medical and Dental Schools may be obtained, respectively, from the Administrative Dean of the Faculty of Medicine and the Director of Dental Studies.

A number of junior hospital appointments are open to qualified students of the Schools, both male and female.

A. M. CURRIE, Registrar.

## THE INSTITUTE OF PSYCHIATRY

IN ASSOCIATION WITH  
THE BETHLEM ROYAL HOSPITAL AND THE MAUDSLEY HOSPITAL

The Institute provides advanced training in psychiatry covering all branches of the subject including research methods and leading to higher degrees including the Master of Philosophy Degree.

Research appointments and research and higher degree facilities for work on clinical problems, various aspects of the pathology of mental disease, and in psychology, biochemistry, and physiology are also available.

Paid appointments on the Joint Hospital staff are open to postgraduate students and give opportunities of clinical experience and research.

For further particulars apply to the Dean, Institute of Psychiatry, De Crespigny Park, Denmark Hill, London S.E.5. Telephone: 01-703 5411.

THE TAVISTOCK CLINIC IN CONJUNCTION WITH  
THE TAVISTOCK INSTITUTE OF HUMAN RELATIONSFull-time and part-time courses of training are provided in  
FAMILY PSYCHIATRY AND COMMUNITY MENTAL HEALTH

Full-time courses are offered to Psychiatrists (specializing in Child, Adolescent, or Adult areas of work) to Clinical and Educational Psychologists, to Child Psychotherapists (non-medical), to Social Caseworkers at postgraduate and more advanced levels, to Caseworkers specializing in Marital Work.

Part-time courses are provided in Psychotherapy, in Marital Casework, in the Psychological aspects of General Practice, and of other professional work, and in the treatment of Reading Disability, in Projective Techniques, including Rorschach Method; and in aspects of counselling in schools.

A Prospectus containing information about the content and method of these courses, and conditions of admission to them, may be obtained from the Director of Training, School of Family Psychiatry and Community Mental Health, Tavistock Centre, Belsize Lane, London N.W.3.

CHARING CROSS HOSPITAL  
MEDICAL SCHOOL  
(University of London)WINTER SESSION BEGINS  
OCTOBER 14, 1968

The School and its parent Hospital at present occupy adjoining sites in the centre of London. A new and fully integrated Hospital and Medical School of unique design and three times the present size is, however, under construction at Fulham, the move to which is due to take place in 1972-73.

Full clinical instruction is provided for students proceeding to the degrees of the Universities of Oxford, Cambridge and London, and the total number of beds is sufficient to provide nearly every student with a pre-registration house post upon qualification.

**Senior Entrance Scholarships.** A number of scholarships are open to members of Oxford and Cambridge Universities wishing to proceed to their clinical studies. These scholarships are awarded on the results of examinations held annually in late June or early July, embracing subjects (1) Anatomy and Physiology or (2) Biochemistry or Pathology. Their annual value is £100 for each of the three years of the clinical period. Many other scholarships, exhibitions and prizes are open to students pursuing their clinical course.

The Pathological Museum, which is subject to continual revision, is designed so as to display exhibits to the greatest advantage. It includes the well-known Lockyer Collection of Gynaecological and Obstetric Pathology specimens.

The Library, which includes a branch at Fulham, is extensive and contains not only a wide range of books for undergraduate and specialist use but also an exceptionally comprehensive section allocated to periodicals.

The Students' Union provides facilities for almost every form of athletic activity at its Sports Ground of 24 acres at Cobham, Surrey, and also includes a large number of societies, both social and cultural.

The annual composition fee is £100. Any further information may be obtained from the Dean or the Secretary, both of whom are available for interview by appointment at:

The Adelphi, 1-11 John Adam Street,  
London W.C.2  
Telephone: 01-836 7788  
Dean: S. J. R. Reynolds, M.A., M.B.,  
B.Ch., D.M.R.E.  
Secretary: Brian S. Drewe, E.R.D., T.D.,  
LL.B., M.A., F.T.C.L.

THE ROTUNDA HOSPITAL  
Dublin

The Rotunda Hospital contains 134 maternity beds, 23 gynaecological beds and 51 paediatric beds. Over 5,000 patients are delivered annually in the hospital, and the External Maternity Service attends many patients in their own homes.

Undergraduate teaching includes the conduct of normal labour, attendance at gynaecological operations and abnormal labour cases, and opportunities for gynaecological examinations. Comprehensive lecture courses are arranged in four ten-week terms each year, and cover clinical obstetrics and gynaecology, pathology, and paediatrics. The large antenatal clinic, which offers comprehensive care, affords excellent opportunities for the study of all aspects of antenatal obstetrical practice.

There are extensive facilities for postgraduate tuition consisting of lecture programmes as listed above, together with opportunities for limited participation in clinical work under supervision. Postgraduate courses enter especially for the D.G.O., M.A.O., and L.M. (Rotunda).

Full particulars of all courses are available from the Master, Rotunda Hospital, Dublin.

THE ROYAL INSTITUTE OF  
PUBLIC HEALTH & HYGIENE  
DIPLOMA IN PUBLIC HEALTH  
& DIPLOMA IN INDUSTRIAL  
HEALTH

28 PORTLAND PLACE, LONDON W.1

Courses, each of an academic year's duration when taken full-time, commence in March and September annually and lead to the above examinations of the Conjoint Board of the Royal College of Physicians of London and the Royal College of Surgeons of England.

After carrying out either the D.P.H. or the D.I.H. course, a student need attend for the last five months only (full-time) of the other course.

For the D.I.H. examination of the Society of Apothecaries of London, those with medical qualifications and experience acceptable to the Society of Apothecaries of London need attend for the last five months only (full-time) of the full D.I.H. course.

All courses may be taken on a full-time or part-time basis and part-time courses may be commenced at any time. Scholarships are available.

Next course, September 13, 1968.

UNIVERSITY OF OXFORD  
MEDICAL SCHOOL

The University grants the degrees of Bachelor of Medicine and Bachelor of Surgery (B.M., B.Ch.), Master of Surgery (M.Ch.), and Doctor of Medicine (D.M.).

A candidate who wishes to read for the degrees of B.M., B.Ch. must be accepted as a member of a college and must subsequently be matriculated as a member of the University. A candidate for these degrees must also take the B.A. degree in some subject (usually the Final Honour School of Animal Physiology). Applications for admission should be made to the Oxford Colleges Admissions Office, 58 Banbury Road, Oxford.

**Pre-clinical Course.** The pre-clinical course lasts nine terms. The first five terms are spent preparing for the First B.M. examination in Anatomy and Physiology. After the First B.M. four further terms are spent in the study for a Final Honour School, which two qualifies for the B.A. degree, and then two terms are spent doing courses in pharmacology and general pathology and bacteriology. These courses are usually taken at Oxford. Then follows the clinical course. For further information apply to the Secretary of the Medical School.

**Clinical Course.** This course lasts for 33 months. The clinical school is based on the Radcliffe Infirmary, the Charing Cross Hospital and the General Hospital in Oxford. There are eight University Chairs in clinical subjects in the teaching hospital group and several important Research Units.

The United Oxford Hospitals (1,457 beds) serves both as the Hospital and also as a Regional Centre. The range of clinical material is exceptional for a teaching hospital and clinical firms are small. The tutorial system continues throughout the clinical course.

Students who are admitted from other universities may read for the medical degree of their own university or may apply to transfer to the Oxford examinations.

Osler House and its garden adjoin the Radcliffe Infirmary and provide attractive premises for the clinical students' club.

A Prospectus may be obtained on application to the Secretary of the Medical School, Osler House, 43 Woodstock Road, Oxford.

**Higher Degrees.** The degrees of D.M. and M.Ch. are open to those who have taken the degrees of B.M., B.Ch. at Oxford. Further information may be obtained from the Director of Postgraduate Medical Studies.

**Research and Specialist Training.** Enquiries may be addressed to the head of the relevant clinical or laboratory department in one of the teaching hospitals or to the Director of Postgraduate Medical Studies, Osler House, 43 Woodstock Road, Oxford.

UNIVERSITY OF WALES  
THE WELSH NATIONAL SCHOOL OF  
MEDICINE  
Cardiff

**COURSES OF INSTRUCTION FOR MEDICAL AND DENTAL DEGREES AND DIPLOMAS**

Courses of instruction are conducted for the medical degrees (M.B., B.Ch.) of the University of Wales, and may be attended by students preparing for degrees of other examining bodies. Courses are also provided for the dental degree (B.D.S.) of the University of Wales.

**Fees.** The composition fee for each year of study is £75. The approximate total cost of the six years' medical course is £580, and for the five years of the dental course is £465, including laboratory fees, students' societies fees, and the matriculation examination and graduation fees of the University of Wales. (In accordance with Government policy, the annual fee for overseas students for each course will be £250—exclusive of students' Societies fees.) Certain scholarships, etc. are available.

**Postgraduate Study.** Facilities are provided for approved research. Postgraduate scholarships are available, ranging in value from £200 to £400 per annum.

**Complete Postgraduate Courses of Instruction** are conducted for the Diploma in Public Health (D.P.H.) and the Diploma in Tuberculosis and Chest Diseases (D.T.C.D.) of the University of Wales. Postgraduate courses for practitioners are arranged.

Further particulars may be obtained from the Provost, The Welsh National School of Medicine, 34 Newport Road, Cardiff CF2 1E.

**N.B.—Application for admission to undergraduate courses of instruction must be made to the Universities Central Council on Admissions, G.P.O. Box 28, Cheltenham, Gloucestershire, GL50 1B, in the year immediately preceding that in which admission is sought.**

UNIVERSITY OF DUNDEE  
Faculty of Medicine

Applications are now invited for courses for Diplomas in Public and Industrial Health and for the Certificate in Industrial Health, details of which appear below, which will be held during the Session 1969-70. Applications may still be made for the Diploma in Industrial Health (Shortened) Course and the Certificate in Industrial Health Course which will be held during the Session 1968-69.

(a) **DIPLOMA IN PUBLIC HEALTH** This is a full-time course. Instruction being given during one whole academic year. Fee, £75 (£250 for overseas students).

(b) **DIPLOMA IN INDUSTRIAL HEALTH** This is a full-time course. Instruction being given during one whole academic year. The first two terms are similar in content to the Diploma in Public Health course. Fee, £75 (£250 for overseas students).

(c) **DIPLOMA IN INDUSTRIAL HEALTH** (Shortened course).

This course is held during the Summer Term (April-June) only. Application is open to doctors already possessing a recognized Diploma in Public Health. Fee, £25.

# UNIVERSITY OF EDINBURGH FACULTY OF MEDICINE

The University grants the Degrees of Bachelor of Medicine and Bachelor of Surgery (M.B., Ch.B.), Doctor of Medicine (M.D.), and Master of Surgery (Ch. M.).

The curriculum for the degrees of M.B., Ch.B. normally extends over six years. For consideration for admission, applicants must apply through the Universities Central Council on Admissions, G.P.O. Box No. 28 Cheltenham, Glos., on the Council's own special form, either via the established Agency, or directly. The appropriate form is obtainable from Head of School, the Agency or from the Central Council's Office direct, together with a booklet explaining the full scheme. The closing date for receipt of applications by the Council, both from United Kingdom and Overseas Applicants, is December 15 of the year prior to that in which admission is desired. Applications for admission should not be submitted to the U.C.C.A. Office earlier than September 1 of the year prior to that in which admission is desired. The definition of an Overseas Applicant as given by the Universities Central Council is that his or her permanent (home) address is outside the United Kingdom, whether or not he or she is living in the United Kingdom at the time of applying. Applicants who normally live in the United Kingdom but are living abroad because of their parent's occupation and are attending a British Forces or similar school abroad are regarded as United Kingdom Applicants.

The University conducts full courses of instruction and grants Diplomas in Radio-diagnosis, Radiotherapy, Tropical Medicine and Hygiene, Social Medicine and Psychological Medicine.

In the various Departments of the Faculty of Medicine provision is made for research by students of graduate standing.

A copy of the Prospectus and Faculty Programme may be obtained from the Dean of the Faculty of Medicine. Programmes regarding Degrees in other Faculties may be obtained from the Matriculation Office, University South Bridge, Edinburgh, 8.

School of Dental Surgery  
Two Degrees in Dental Surgery are conferred by the University of Edinburgh, viz., Bachelor of Dental Surgery (B.D.S.), and Doctor of Dental Surgery (D.D.S.).

The curriculum for the B.D.S. Degree normally extends over a period of five years. The procedure for the submission of applications for admission to the Dental School is similar to that for the medical school except that enquiries should be addressed to the Director of Dental Studies, School of Dental Surgery, 31 Chambers Street, Edinburgh, 1. Applicants may be required to attend for interview by a Selection Committee.

Information regarding exemption from or direct admission to the First Professional Examination in Physics, Chemistry and Biology is contained in the Prospectus obtainable on application to the Dean of the Faculty of Medicine or to the Director of Dental Studies.

CHARLES H. STEWART,  
August, 1968. Secretary to the University.

MARSHFIELD CLINIC  
MARSHFIELD, WISCONSIN, U.S.A.

The Marshfield Clinic is a multi-specialty clinic with a staff of 80 physicians, located in the central Wisconsin dairyland. All medical and surgical specialties and subspecialties are represented. Our need for additional physicians with specialty training is becoming more acute. At this time we are particularly interested in orthopaedic surgeons, as well as specialists in internal medicine, pulmonary diseases, infectious diseases, cardiology, endocrinology, and gastroenterology. We are also interested in specialists in psychiatry, urology, ophthalmology and otolaryngology.

Our practice is a combination of referred cases from a wide geographic area, plus responsibility for family health care to the immediate community. All facilities are provided. Consultative services are immediately available within the group. When it is necessary for you to hospitalize your patients, you care for them in a modern, well equipped 400 bed hospital. A research foundation associated with the clinic encourages clinical and basic scientific research.

We are organized as a corporation for the private practice of medicine. We provide many attractive fringe benefits such as life insurance, malpractice insurance, health and accident insurance, disability insurance and retirement plan. All necessary equipment provided. Salary is liberal and is commensurate with training, experience and specialty.

Interested physicians should contact Procurement Chairman, Marshfield Clinic, Marshfield, Wisconsin, U.S.A.

## The Need

### GENERAL DUTY MEDICAL OFFICERS

For duty both in large new hospitals and in the outlying districts of the Developing Countries overseas, for contract appointments of 2 to 3 years.

**The Opportunity** Overseas service offers a unique chance for world travel, an opportunity to widen professional experience, and to acquire a broader understanding of the world and its people.

**The Advantages** Doctors' skill and knowledge will be used to the full on people who have a crying need for their service. Salaries reflect the local cost of living and are normally higher than one would expect to receive in the United Kingdom. There are generous gratuities on satisfactory completion of contract, education allowances for children, free family passages. Accommodation provided usually at a low rent. In most cases superannuation rights can be preserved or maintained.

**Salaries** Vary widely from country to country with the local cost of living. However, with certain exceptions they range from approximately £1650 to £2900 per annum.

#### Training Scheme for Recently Qualified Doctors

In return for an undertaking to serve for at least two years in the developing countries overseas the Ministry offers a course of training to recently qualified doctors which is designed to fit them for service overseas and which will be attractive professionally and financially. During the period of training of 12 to 15 months the doctor will receive a retaining fee of £200 per annum in addition to his hospital salary. Write now for full details of the scheme.

Certificate, obtain detailed account of entire medical course from university from which graduated, show written evidence of at least one year as intern, house physician, or similar resident hospital appointment subsequent to graduation and prior to start of training in radiology or radiotherapy, and obtain permanent visa (immigrant visa). These are required by Pennsylvania State Board for admission to licensure examinations, which must be passed before appointment can actively begin. Arrangements are possible for employment as intern at nominal stipend of \$600 per month (£250 per month) until next State Board examination, which is in December 1968. Examination is not rated difficult and is limited to pathology, medicine, surgery, and obstetrics and gynaecology. First year salary for Radiologist and Radiotherapist is \$35,000 (about £14,500) followed by December 1968. Increased income on percentage basis in second year if mutually agreeable. As early as practicable appointees will be expected to obtain Certification of American Board of Radiology or Royal College of Physicians and Surgeons of Canada. Radiologist should have reasonable experience in special techniques. Department already has 1,000,000 fluoroscopic room with image amplification—T.V. monitors, etc.—other fairly sophisticated equipment, plus conventional fluoroscopic rooms for which early conversion to image amplification is planned. Radiotherapist preferably will be qualified also in isotope diagnosis and therapy and should be interested in the planning and management of anticipated new therapy department to have linear accelerator as well as orthovoltage therapy. Short-listed applicants will be interviewed in the United Kingdom and selected appointees may have advance of pay to cover travelling expenses if desired. Welcome to Western Pennsylvania, and for further information write to Oliver T. Steen, M.D. (Toronto, 1934) or Colin Ibbotson, M.B. Ch.B. (Liverpool, 1940), Department of Radiology. (H.9558)

**SIR CHARLES GAIRDNER HOSPITAL**  
Western Australia

**MEDICAL REGISTRAR**  
Applications are called for the post of Medical Registrar (five) at the above hospital for 1969. The appointees to these posts will spend six months in general medicine and six months in chest medicine. Appointments may be renewed annually for up to three years.

Preference will be given to applicants who either hold, or who are working towards, a higher qualification in medicine. The hospital has an active postgraduate programme for those intending to sit for a higher qualification and Registrars are encouraged to attend postgraduate lectures and teaching sessions at other metropolitan hospitals.

Sir Charles Gairdner Hospital is a general hospital containing 280 beds, associated with the medical school of the University of Western Australia, and is in close proximity to the university. A further 110 beds will be opened in September, 1969, as part of a planned expansion of the hospital to become a major medical centre. Branches of the university departments of medicine, psychological medicine and psychiatry, are based at the hospital. The hospital also supports a coronary care unit. Duties will include the teaching of undergraduate medical students.

Salary within the range \$5,262 to \$5,693 to \$6,400 to \$6,964 to \$7,261 according to qualifications and experience. The successful applicant may live out, but if desired, quarters are available for which a charge at the rate of \$656 per annum is made. Sea or air passage may be arranged. Applications, addressed to the Physician Superintendent, enclosing a recent photograph of the applicant, the names of three referees, full personal details, and particulars of qualifications and experience, close on September 30, 1968.—A. F. T. Thomson, Administrator. (H.9588)

**THE GREATER BALTIMORE MEDICAL CENTER**

The G.B.M.C. is a new 400-bed general hospital offering rotating and straight medical internships beginning January 1, 1969, and July 1, 1969; and board-certified residency programmes in medicine, ob-gyn., surgery, ophthalmology, otolaryngology, and paediatrics. Association with the Johns Hopkins Hospital and faculty is on a departmental basis. Baltimore offers unique opportunities for your future in medicine. Intern salaries begin at \$6,500 with yearly increases during residency, along with other financial benefits. E.C.F.M.G. essential (Canada and Puerto Rico are exceptions). Transportation can be negotiated with contract. Send E.C.F.M.G., letters of recommendation, evidence of graduation and photograph to Director of Medical Education, Greater Baltimore Medical Center, 6701 N. Charles Street, Baltimore, Maryland 21204, U.S.A. (H.9148)

**SIX MEDICAL OFFICERS FOR MOBILE WELFARE SERVICES IN KENYA**  
(Male or Female)

The International Planned Parenthood Federation has agreed to assist the development of Kenya's family planning programme by providing mobile teams for rural areas. Each team will be based in a town and will cover the surrounding rural area and will be led by a doctor who will be assisted by a nurse and a health worker. The team will carry out maternal and child health work, with special emphasis on family planning, nutrition, child health and immunization.

Previous experience of maternal and child health work is less important than the enthusiasm necessary to develop a new service in a country of great need, and an interest in health education and the training of personnel.

There will be opportunity for the doctor to do original work especially in the obstetric and paediatric fields.

Salary according to experience, but minimum £2,750 per annum.

Applications with c.v. to Executive Secretary, I.P.P.F., 18-20 Lower Regent Street, W.1. (H.9598)

# DECLINAX\*

Declinax is different in its mode of action from other antihypertensive drugs. It interferes with the release of noradrenaline but does *not* deplete the noradrenaline stores. This means that: ● its onset of action is prompt ● its duration of action is relatively short ● there is a great deal of flexibility of control. Declinax also has the important advantage of high patient acceptability because of fewer side-effects.
