# Synalar gives fast relief in a wide range of inflammatory dermatoses

**Speed of action.** Low concentrations of Synalar achieve optimal skin penetration, frequently with therapeutic response in 24-48 hours. This rapid action greatly reduces the incidence of scratching. The speedy restoration of the epidermal barrier lessens the risk of secondary bacterial infection.

**Efficacy.** Synalar has a 95% success rate in inflammatory dermatoses and in pruritic and allergic conditions of

the skin. It has often been successful in difficult skin conditions which, previously, had been unresponsive to other steroid preparations.

**Range.** The complete flexibility of the Synalar range makes the selection of treatment, according to the type and severity of the condition, a simple one. Synalar is available in cream, ointment, lotion and aerosol form, for the initial treatment of severe

cases; for maintenance therapy and less severe dermatoses, Synandone is available as cream, ointment and lotion.

# Five pm and she still hasn't started

She still hasn't started because of depression. 'Aventyl' helps the emotionally disturbed patient with symptoms of depression to regain control. For the treatment of such depressive symptoms as loss of hope, irritability, and inability to cope, 'Aventyl' is particularly valuable providing antidepressant action with few troublesome side-effects. Patients are soon able to lead a normal, happy existence free from the overwhelming depressive mood spoiling their life.

## Baby Bunter?

A lot of babies are well-covered rather than well-fed.

Between meal 'treats' spring immediately to mind. But you would probably agree, that there is often too much emphasis on starchy foods at mealtimes—particularly at breakfast and tea.

Yet the 77 varieties of Heinz Strained and Junior Foods make it easy for any mother to give her baby a balanced diet of meats,

vegetables, fruits, eggs, fish and cheese.

Last year special breakfast varieties were introduced. And, of course, any Heinz fruit variety is ideal for tea.

Heinz will gladly provide more information to help you to advise mothers. If you have any questions, write to the Baby Foods Information Service, H. J. Heinz Co. Ltd., Hayes Park, Hayes, Middx.

*Heinz Baby Foods are in both cans and jars, but cans cost less and offer more varieties.*

**Heinz Baby Foods for a balanced diet**

a new  
fundamental  
approach  
to the problem  
of sputum

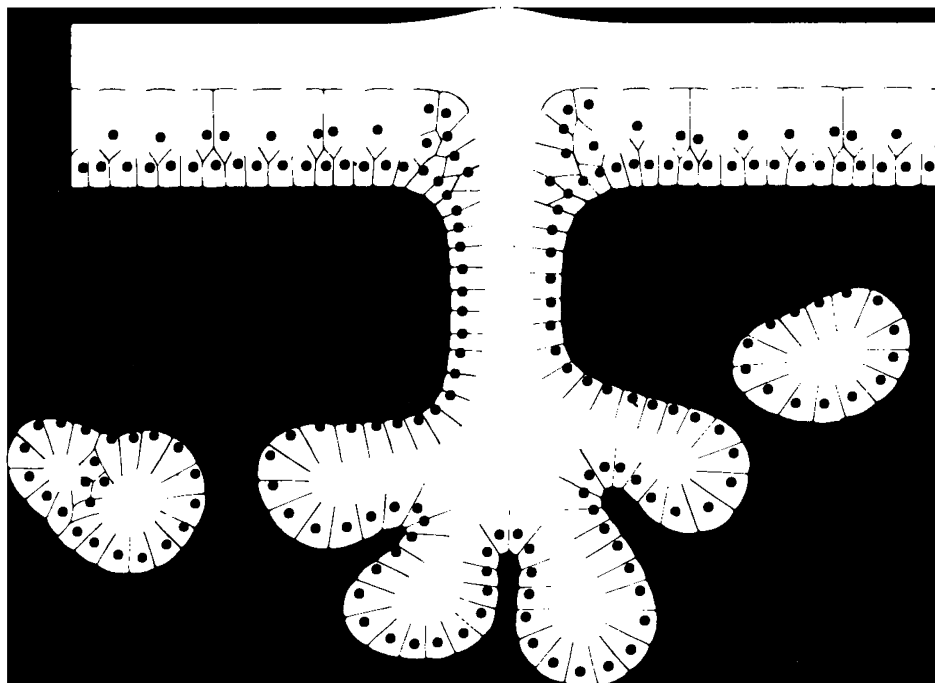

tablets and elixir

**mobilises mucus**  
**mobilises the bronchitic**

A feltwork of fibres is responsible for the thick, sticky sputum characteristic of the bronchitic.<sup>1</sup>

Bisolvon alone solves the problem for the patient with non-purulent sputum by:

- I. disrupting this feltwork of fibres
- II. reducing sputum stickiness
- III. promoting the flow of easily expectorated sputum
- IV. decreasing sputum volume after a few days' treatment

**Composition** Bisolvon is N-cyclohexyl-N-methyl-(2-amino-3, 5-dibrombenzyl)-amine hydrochloride

**Pharmacology** In animal experiments Bisolvon stimulates increased secretion of fluid by mucous glands of the respiratory tract and it also breaks down the feltwork of acid mucopolysaccharide fibres which are responsible for the viscosity of non-infected bronchitic sputum.<sup>2</sup>

**Clinical Effects** When given orally Bisolvon's effect becomes apparent to the patient within 2-3 days by an increased production of thin, easily expectorated sputum. As treatment progresses sputum volume decreases without an increase in viscosity, and with continued ease of expectoration.

**Indications** Acute and chronic bronchitis and other conditions where tenacious sputum is a problem.

**Contra-indications** There are no absolute contra-indications, but caution should be observed when

administering Bisolvon to patients with gastric ulceration.

**Precaution** When a patient under treatment for tuberculosis is receiving Bisolvon, sputum cultures for tubercle bacilli should be continued for at least three months before a negative result is assumed.

**Side-effects** Mild gastro-intestinal side-effects may occasionally occur. In a small number of patients a transient rise in serum transaminase levels may be seen, but these should fall again as treatment with Bisolvon continues.

**Dosage** Adults: 8 mg. three times daily. Children age 5 to 10: 4 mg. four times daily. Children under 5: 4 mg. twice daily.

**Availability** Tablets, 8 mg.; packs of 20 and 250. Elixir, 4 mg. in 5 ml. (with 17.5 mg. chloroform); packs of 200 ml. and 1-litre.

Tests show that 2-Diethylaminoethyl- $\alpha$ -phenylbutyrate Citrate has a more pronounced bronchodilatory effect than ephedrine. Three parts of 2 - Diethylaminoethyl -  $\alpha$  - phenyl - butyrate Citrate producing the same effect as 5 parts of ephedrine. It acts more rapidly than ephedrine, reaches maximum effect somewhat later and falls away at a slightly slower rate. With a mixture of the substances the curve of bronchial dilatation showed that the effect produced was considerably greater than when double the quantity of each substance was administered separately. 4 mg OF THE MIXED SUBSTANCES (CONTAINING 2 mg OF EPHEDRINE) has the BRONCHODILATORY EFFECT OF 8 mg. ## Private treatment today

In this space BUPA reports from time to time on matters which may be of interest to those concerned with private treatment in this country. BUPA's own interest is clear and declared; we believe a strong private sector in medicine to be an essential corollary to a successful public sector. Alone among the provident associations, we are sponsoring (through Nuffield Nursing Homes Trust) the creation of new and expanded facilities for private treatment.

### BUPA's Twenty-First Anniversary

It is now twenty-one years since, in April 1947, a number of small provident associations amalgamated to form a company limited by guarantee called The British United Provident Association.

During its first years BUPA's membership totalled only 38,000 and even the most optimistic of the Association's founder members could hardly have foreseen the dramatic growth in membership that was to take place over the next two decades.

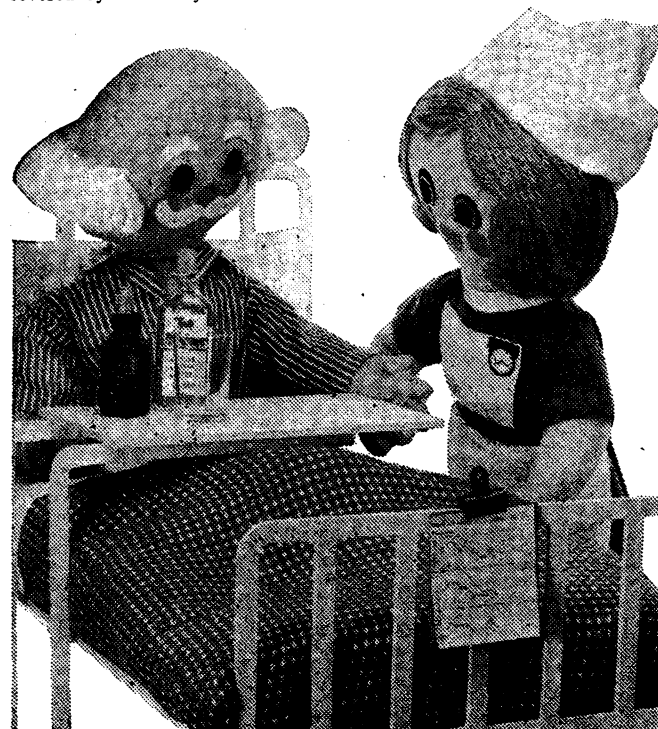

In 1956 membership exceeded 250,000—ten times that of five years before. Today, there are 638,000 subscribers to BUPA and, including dependants, the total number of people protected by the Association has reached almost 1½ million—a rate that shows quite clearly the value that so many people place on private treatment.

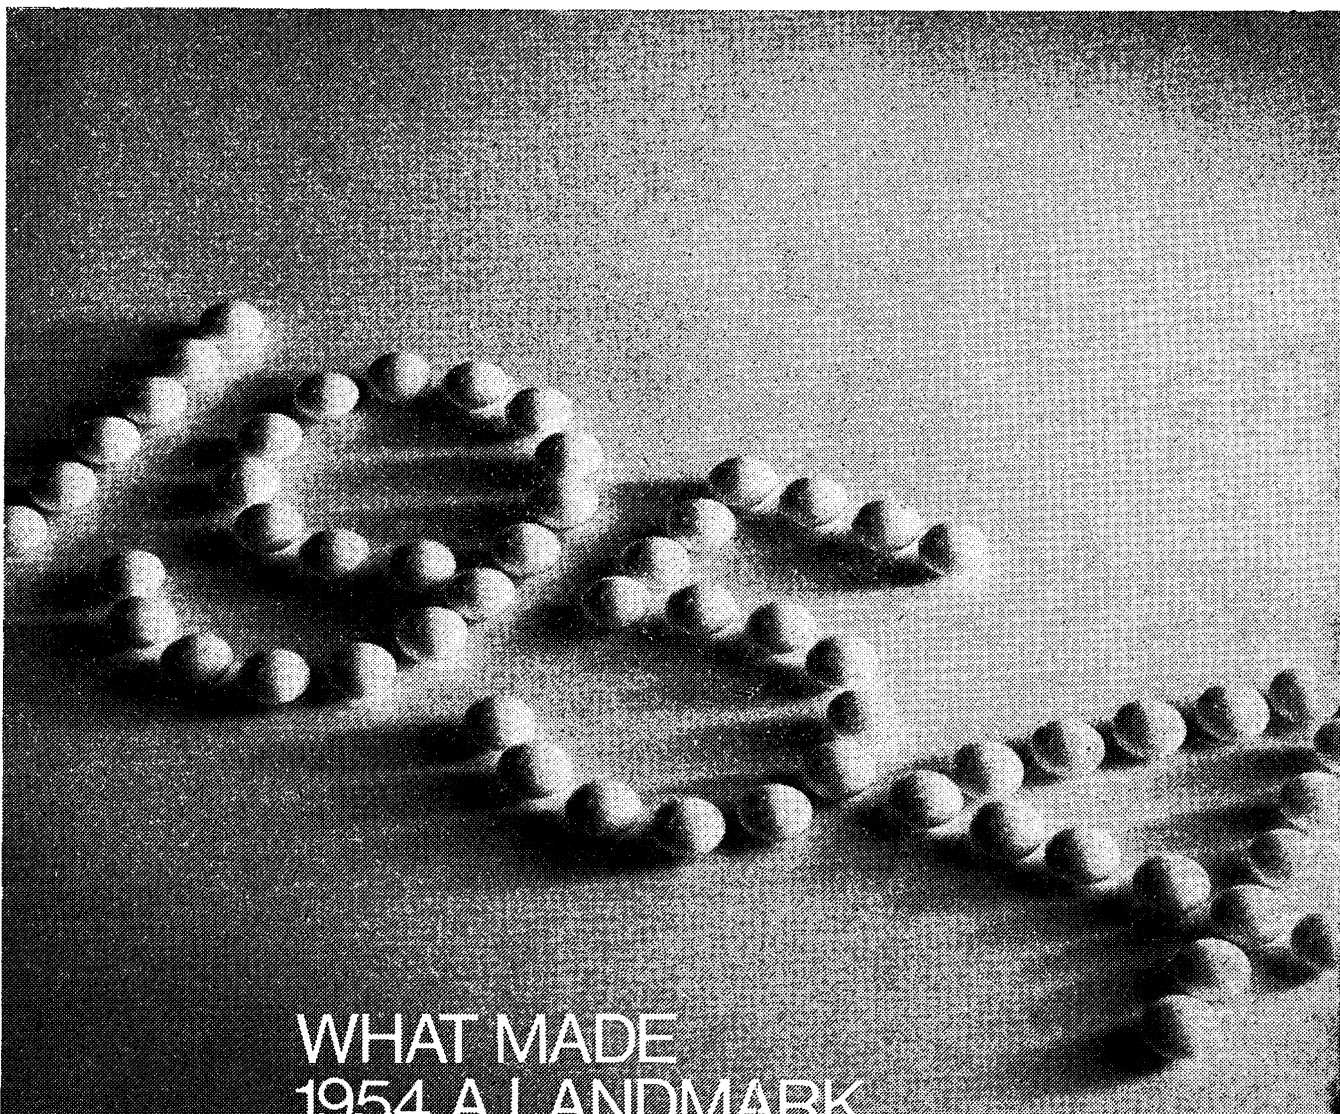

### BUPA Forms New Company

BUPA has formed a Company—BUPA Nursing Services Ltd.—to operate a nursing agency. BUPA, alone of provident associations, has already taken action—through its associate organisation Nuffield Nursing Homes Trust—to provide accommodation for private patients, and this latest venture is designed to ensure an adequate supply of fully-trained nursing staff both for private hospitals and nursing homes and for nursing private patients at home. In order to fulfil this function BUPA Nursing Services Ltd. has acquired the old-established Home, Colonial and Overseas Nurses' Association which is one of the largest nursing agencies in London and places staff in hospitals and nursing homes throughout Britain and overseas. Mrs. B. M. Moor, S.R.N., C.M.B.I., O.N.D., who has owned the Home, Colonial and Overseas Nurses' Association since 1958 and is responsible for its rapid growth in recent years, will continue in charge of BUPA Nursing Services Ltd. as Director of Nurses. The new Company will work in close liaison with BUPA branch offices throughout the country and with Nuffield Nursing Homes Trust.

### International Conference on Voluntary Health Insurance

E. D. Roberts, General Manager of BUPA, left London in April for Sydney, where he attended the 2nd International Conference on Voluntary Health Insurance which took place from 29th April to 4th May. The first International Conference, which was held in Dublin in 1966, attracted more than one hundred delegates from thirteen countries, and was a valuable forum at which many items of common interest to non-profit medical schemes were discussed. Mr. Roberts was a member of the five-man committee which met in London last year to prepare a draft constitution for an International Federation of Voluntary Health Insurance Organisations. This constitution was submitted to the Sydney conference. At present about two hundred million people throughout the world are covered by Voluntary Health Insurance.

# Sustanon makes a man a man again

in body and in mind

When gonadal activity is inadequate the young or middle-aged male may demonstrate diminished genital structure, and response, to the point of impotence. Understandably the repercussions reach far beyond the purely physical – often playing havoc with the patient's psyche, marriage and career.

Every physician knows how complex is diagnosis of the condition, with the patient frequently hiding the facts not only from his doctor but *from himself*. Even when the diagnosis is established, therapy is not straightforward and many factors must be considered. Nevertheless with Sustanon a clear, early and sustained response may occur at all levels, physical, mental, and emotional.

➤ Sustanon is preferable to testosterone propionate as of course no single testosterone ester provides both lengthy activity and rapid onset of action. This Sustanon does. Its prolonged activity is such that only an occasional injection is needed to maintain the required therapeutic level.

# 2 weeks

In the treatment of psoriasis, triacetoxanthracene has been shown to exhibit the healing properties of dithranol while displaying none of the side effects of burning or staining the skin.

It therefore may be used by the patient in his own home without the fear that any harm will result if it accidentally comes in contact with normal skin.

"Dithranol (trihydroxyanthracene) is one of the most effective drugs in the treatment of psoriasis. Unfortunately it has two disadvantages — it may irritate the skin and even cause blistering and it stains both the skin and the patient's under-clothes and bed linen. Within the last few months a modification of dithranol — 1,8,9-triacetoxanthracene — has been developed which neither burns the skin nor stains clothes. It is now being marketed as Exolan paste"

*Pharmaceutical Journal* (1966) 2, 175

"Exolan is a recently developed synthetic derivation of dithranol. The active ingredient is preferentially liberated by hydrolysis on the surface of the psoriatic plaques. The molecule is so adapted that the staining and much of the irritant properties of dithranol are avoided with loss of only some of its potency . . . It may also be tolerated in cases where the psoriasis is too inflamed or acute for dithranol, or where staining makes it cosmetically unacceptable."

*British Medical Journal* (1966) 2, 993

"Patients known to be sensitive to dithranol were not treated with the new drug, but in one case such a patient was given triacetoxanthracene without any adverse reaction occurring"

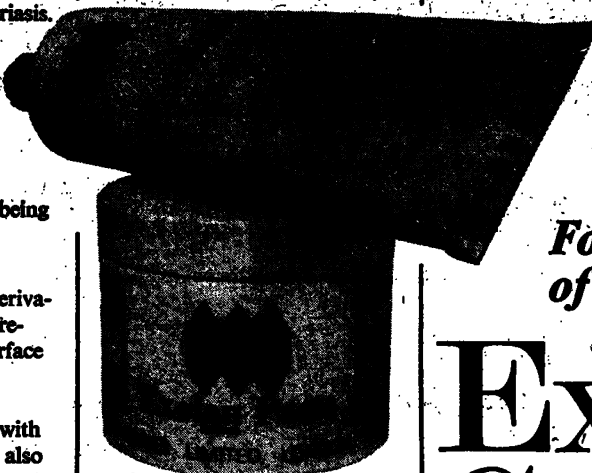

*British Medical Journal* (1967) 1, 682

"After three weeks treatment with triacetoxanthracene paste there was an amazing clearance and he was able to roll up his sleeves for the first time for 25 years. After a further 3 weeks he was practically clear and better than he had been for 30 years."

*British Journal of Dermatology* (1967) 79, 491

**Psoriasis case history.** Male patient aged 72 years with widespread chronic psoriasis admitted to hospital 18th October, 1966.

## Iron Sulphate and Glycine in a chelated link for the treatment of IRON deficiency

"In view of its minimal toxicity and relatively low cost,  
it is suggested that this iron chelate (Plesmet) . . .  
is a most effective preparation for the treatment of  
iron-deficiency anaemia by the oral route."

# Vasogen Silicone

—for skin protection in cases of  
bedsores, napkin rash  
cracked skin, itching  
and other skin disorders

Vasogen Silicone has high water repellent properties and protects the skin from irritants induced or aggravated by contact with aqueous liquids, body fluids and exudations. It is effective also in the treatment of sore buttocks, excoriation, plaster sores, maceration, some conditions of eczema and can be used after colostomy. Vasogen Silicone is easy to apply and is almost invisible on the skin. It provides an acceptable protective barrier that is maintained effectively for lengthy periods.

## ANTIBIOTICS AND THE INTESTINAL FLORA

Treatment with broad spectrum antibiotics suppresses the normal flora, which may be replaced by abnormal resistant organisms causing diarrhoea.

This change can be prevented or reversed by the implantation of *Lactobacillus acidophilus* which has been rendered antibiotic-resistant, and is thus able to multiply freely under these abnormal conditions. The products of growth of the organism are inimical to that of many other bacteria<sup>1,2</sup> and thus contribute to its rapid preponderance over other species.

Oral treatment with antibiotic-resistant *L. acidophilus* in the form of ENPAC has been shown to eliminate *Candida* from the faeces of infants with antibiotic-induced diarrhoea, with relief of symptoms succeeded by rapid gain in weight<sup>3,4</sup> and greatly to reduce the numbers of staphylococci in the faeces of patients treated with tetracyclines.<sup>5</sup>

## Diagnostic Methods

Edited by J. W. Mills

Practically every method and aspect of diagnosis is mentioned in this book, which has been produced as a handbook for use as a ward or bedside manual. Many of the specialist techniques now available are complex and expensive and it is becoming increasingly important to ensure that the indications, limitations, possible hazards and information obtained from the tests should be clearly appreciated not only by those who perform them, but also by those who prepare the patient or specimen for the test. Postponement or an unsatisfactory result of a test is often the direct consequence of inadequate or incorrect preparation—the authors have, therefore, emphasized this aspect in the book.

1968 184 pages Illustrated 25s.

## Exfoliative Cytology of the Stomach

By D. D. Gibbs

This well-illustrated book has three aims: first to help those who have occasion to interpret cytological preparations from gastric material; secondly to view the techniques and practice of gastric cytodiagnosis in historical perspective; and thirdly, to consider the relevance of cytology in the context of the natural history of gastric cancer.

**COMMERCIAL APPOINTMENTS****Sandoz Limited, London**

require a

**Medical Adviser  
Clinical Research**

Sandoz is a large international group of companies investing over fourteen million pounds annually in research in its interests in pharmaceuticals, chemicals and dyestuffs. It is noteworthy that during the last fifty years the Company's pharmaceutical success has rested virtually completely on the results of its own basic research work.

The Medical Research Department covers all aspects of the important and varied work of a medical department in a pharmaceutical house. The principal activity is the planning, organisation and administration of clinical investigations in an increasing number of interesting fields. Other aspects of the work include liaison with basic research divisions, negotiations with British drug authorities, the assessment of adverse reactions, the medical control of Company literature, and etc.

This is an additional appointment to the Medical Research Department's team. Applicants should be registered medical practitioners, ideally under 35 years of age, and have had several years postgraduate experience in hospitals or research. A sound knowledge of general medicine and therapeutics is essential. Some experience in clinical research or the pharmaceutical industry would be advantageous but broad clinical experience, initiative, and the capability for original thought would be equally valuable.

A salary commensurate with age, experience and qualifications will be offered. The Company operates a good contributory Pension Scheme with life assurance cover, a Company car scheme, and provides other additional benefits.

Applications, marked "In Confidence", should be addressed in writing to The Research Manager, Sandoz Products Limited, Sandoz House, 23 Great Castle Street, London, W.1.

**INDUSTRIAL  
APPOINTMENTS**

Attention is drawn to the British Medical Association's statement of policy on the Remuneration of Industrial Medical Officers as approved by the Representative Body, 1966, which is available on request from the Secretary.

**AMENDED ADVERTISEMENT  
ROCHDALE INDUSTRIAL HEALTH  
SERVICE**

Applications are invited for the post of ASSISTANT MEDICAL OFFICER in this group service, which covers nearly 10,000 employees in south-east Lancashire. The post is suitable for doctors seeking a career in occupational health. A car allowance is payable and assistance will be given with car purchase if required. Superannuation scheme. Salary in accordance with B.M.A. scale, but not less than £2,200 per annum. Applications will also be considered from practitioners willing to undertake substantial part-time work. Applications should state age, and give full details of qualifications and experience, and the names of three referees. They should be sent to the Medical Director, Rochdale Industrial Health Service, Nuffield House, Bury Road, Rochdale, Lancs. (H.9670)

# Medical Officer

Ford Motor Company Limited requires a full-time Medical Officer to join the medical staff at its Dagenham plant. The post offers exceptional experience in Occupational Health at a location where over 30,000 personnel are employed in a wide variety of manufacturing activities.

The Company has a medical staff of over 130 including ten full-time Medical Officers. Opportunities for advancement are excellent. The Medical Department includes an Industrial Hygiene service in the charge of a graduate specialist in Industrial Hygiene.

It is the Company's policy to assist suitable medical officers to undertake further studies. A real interest in occupational health problems, with the intention to follow a career in this field, is desirable.

Applicants should be under 40, and we are particularly interested in those around 30. The starting salary will be at an appropriate point on the B.M.A. recommended scale for a Medical Officer. A good contributory pension scheme is in operation and other benefits are available.

Applications giving full details of qualifications and experience together with the names of two persons to whom references may be made, should be addressed to:

MEDICAL OFFICERS**

At least five posts for registered medical practitioners (men or  
women) aged at least 28. The posts are in London.

**DUTIES:** The medical staff is concerned with all medical aspects  
of the planning and organization of the National Health Service and  
the health services of local authorities, and with liaison with the  
relevant professional activities outside the department. It is organized  
in special sections which give full scope for the application and  
acquisition of specialized knowledge and experience, but the indi-  
vidual Medical Officer is not necessarily restricted to one field, and  
movement between sections is common. Opportunities for special  
studies, including study leave or secondment, may be available.

**QUALIFICATIONS:** Good postgraduate clinical experience ex-  
pected; and experience in administration of a branch of N.H.S. or  
local authority services, or some distinction in another branch of  
medicine, normally required. For some of the posts experience in  
electronic data processing or in other statistical, scientific, or tech-  
nical fields related to medicine an advantage.

(Occupational Health)**

This Establishment (within the Ministry of Technology) is the  
largest research and development establishment in the U.K.  
Its headquarters are at Farnborough (Hants) with out-stations  
at Bedford and elsewhere. The post of Senior Medical Officer  
involves the supervision of the occupational health services  
particularly at the headquarters and Bedford. Material of  
considerable medical interest and importance is provided by  
the technologically advanced nature of the many projects  
carried out.

Candidates (men and women), aged at least 35, must be  
registered medical practitioners with considerable experience  
in industrial medicine and preferably aviation medicine. A  
diploma in industrial health is desirable.

## MINISTRY OF OVERSEAS DEVELOPMENT

### MEDICAL STAFF UGANDA

Uganda is set in the heart of Africa and is a land of rich fertile valleys, magnificent lakes and waterfalls, dense forest and vast plains teeming with wild game, and with an equable climate where the temperature seldom rises above 85° F. or falls below 60° F.

This emerging country is in urgent need of medical staff, and it offers an opportunity to go-ahead doctors to develop their knowledge and experience of medicine rapidly.

There are immediate vacancies for:

#### Senior Registrars

Are required for E.N.T., Anaesthetics, Orthopaedics and Neurosurgery for clinical duties in their specialty at Mulago Hospital. There are excellent opportunities for research and duties will include teaching. Candidates must possess qualifications and experience in their specialty. Salaries for Pathologist and Senior Registrars: basic, 26,640 to 39,780 East African shillings (£1,554 to £2,320) per annum, subject to Uganda income tax, plus an inducement allowance of £867 to £984 per annum free of Uganda income tax.

#### Pathologist

To work in the Medical Laboratory, Kampala, under the Specialist in Clinical Pathology. Candidates must be experienced in pathological work, and must be prepared to teach clinical pathology, forensic medicine and haematology to students or trainees.

#### Senior Pathologist

To administer and supervise up-country laboratory services, and to carry out normal pathological work under the Consultant Clinical Pathologist. Candidates must be prepared to teach clinical pathology, forensic medicine and haematology to students or trainees. Candidates must possess a Diploma in Clinical Pathology, experience in pathological work, and preferably be under 45 years of age. Salary: basic, 36,780 to 39,780 East African shillings (£2,145 to £2,320) per annum, subject to Uganda income tax, plus an inducement allowance of £960 to £984 per annum free of Uganda income tax.

#### Consultants

Are required in Medicine, Obstetrics and Gynaecology, Paediatrics, Anaesthetics, Neurosurgery, Psychiatry and Venereology for clinical duties in the appropriate specialty. Successful candidates will be expected to assist in an honorary capacity and teaching of medical students at Makerere College Medical School, and to take part, when required, in the teaching of hospital junior staff. Candidates must possess proven experience in the appropriate specialty. Salaries: now increased to basic 50,000 to 63,000 East African shillings (£2,916 to £3,675) per annum, subject to Uganda income tax, plus an inducement allowance of £1,030 to £1,116 per annum free for Uganda income tax.

All appointments are offered on contract of one or two tours of 21 to 27 months.

Candidates for all posts must be nationals of and permanently resident in the United Kingdom or Republic of Ireland. They must possess qualifications registrable in the United Kingdom, and be able to meet all other requirements for full registration.

For application forms, full details of salaries and allowances and further information, please write, stating full name, to the

Appointments Officer (Medical),  
Ministry of Overseas Development, Room 444A,  
Eland House, Stag Place, London S.W.1.

● Little publicity, much less than it deserves, has been given to the potential of the method (oral contraception) for the production of highly desirable and pleasant side-effects. These would include personal happiness of the patient, presumably from confidence in the future that the method affords; and it is noticeable how this sense of happiness appears to extend to other members of the family. This often results in an altogether better adjusted and more integrated family unit than previously. ●

## Ovulen 1mg., the most widely prescribed oral contraceptive in Britain today.

**Doctor experience** Since Ovulen 1mg. was introduced in 1963 physicians have found it to be not only effective, but extremely well tolerated. More prescriptions are written for Ovulen 1mg. than any other oral contraceptive in Britain.

**Clinical experience** Clinical research on Ovulen 1mg. has been continuous. It was subjected to clinical trials in over 2,500 women before it was made commercially available; to date more than 16,000 women have been involved in trials totalling more than 190,000 cycles of experience.

**Patient experience** Millions of women in Britain and overseas are using this low-dose oral contraceptive. One reason is the trouble-free protection it affords—acceptability rates in clinical trials have been as high as 95.4 patients in every 100, over a period of more than four years.

**Company experience** In the fifteen years since Searle developed the first oral contraceptive the company's products in this field have been accepted by many millions of women.

*Ovulen contains 1mg. ethynodiol diacetate and 0.1mg. mestranol. Ovulen is a Trade Mark.*

**OCTOBER 4—THE PROBLEM.** A large weeping ulcer infected with staph. pyogenes and with a dirty central slough. Previous treatment with paraffin gauze and a local steroid antibiotic merely enlarged the ulcer four times.

**TWO WEEKS LATER—DESLOUGHING.** After treatment with Aserbine Cream to the ulcer and Aqueous Ichthyol to the surrounding skin, complete desloughing has taken place.

**NOVEMBER 14—HEALING.** The ulcer is completely healed. After desloughing with Aserbine Cream, the ulcer was treated with a closed dressing.

# When the presence of slough delays healing...

... in varicose ulcers, burns, pressure sores, trophic ulcers, etc.

... experience has shown that **ASERBINE** is a true desloughing agent which does not affect living tissue

**Presentation:** Aserbine is available as a cream (100 G. jars) and as a solution (500 ml. bottles).

**Method of Application:** Aserbine Cream should be applied once or twice daily. Aserbine Solution should be applied as a wet dressing and it is important to keep the dressing moist.

Active Ingredients	In 100 G. cream	In 500 ml. solution

Indomethacin

## a sign of improvement

### *a more active life for many arthritic patients...*

*patients, for example, in whom the ability to perform simple, everyday tasks is limited by disorders such as rheumatoid arthritis, osteoarthritis, ankylosing spondylitis, and bursitis. In such cases, 'Indocid' can reduce pain, inflammation and stiffness, and bring a progressive improvement in mobility.*

"It is clear from reported clinical experience that indomethacin is a powerful compound, capable of giving relief of symptoms and reduction of inflammatory signs in several rheumatic disorders."

*Brit.med.J.*, 1966, 1, 80 (8 Jan).

"There is general agreement that indomethacin is an effective non-corticosteroid drug with anti-inflammatory, antipyretic and pain-relieving properties."
