When the anti-convulsant regimen fails

-add Benuride for better control

For firm control of grand mal or temporal lobe epilepsy few anti-convulsant drugs are as effective as Benuride (pheneturide). Yet treatment with Benuride is remarkably trouble-free. Twelve years of clinical experience, as reported in over 30 published papers, has confirmed its wide margin of safety and comparative freedom from toxic effects. A change to Benuride means better control—and a brighter, more alert life for your epileptic patient.

Benuride: tablets containing 200 mg. pheneturide. A new comprehensive product booklet, giving up-to-date details of clinical experience, is now available. We shall be pleased to send you a copy, or any other information, on request.

major metabolic activity in obesity proved by British research...

Obese patients develop a block to muscle glucose uptake causing a diversion of ingested carbohydrate to adipose tissue. Fenfluramine is the first drug to have been shown to correct this metabolic defect. By restoring metabolic equi-

librium fenfluramine re-activates muscle glucose uptake and diverts the ingested carbohydrate away from adipose tissue. Thus weight loss is encouraged. It is probable that the known very effective, non-cns hunger regulation of Ponderax is mediated

through the metabolic action. Glycoliptic agents act to restore equilibrium where an imbalance exists between the tissues in glucose and/or lipid metabolism. Ponderax is the first such agent and marks a really significant advance in treating obesity.

...PONDERAX[®] FENFLURAMINE ***is the first glycoliptic agent***

"...fenfluramine does in fact mimic the metabolic pattern seen in lean subjects who have greater muscle glucose uptake than fat persons."

Lancet, (1968) ii, 109

***Ponderax also very effectively
regulates hunger without stimulation***

all well.

■ So often the only prescription needed

The little fellow is thoroughly fed up. He really wants to test drive his new stream-lined Mark II boxcart. Now he can't. His throat hurts, his eyes water, and he's got to stay in bed. And his mother's worried—she wants him well and back to school as soon as possible. You know that to cure the symptoms you have to destroy the organisms that cause them. And, especially with a child, you have to do it quickly—first time if possible.

Penbritin is the answer. Upper respiratory tract infections need fast antibiotic action to stop the spread of infection, and prevent complications. Penbritin, with its extremely broad spectrum of activity, destroys all the common bacteria that cause upper respiratory tract infections and their complications. And 'destroys' is the operative word. For Penbritin doesn't just inhibit the growth of these organisms. It *kills* them.

Penbritin has the degree of safety characteristic of all penicillins. Side effects, when they do occur, are mild and transient. And, because Penbritin Syrup has a very pleasant taste, it's highly likely, and very important that the patient will take the full prescribed course of at least 5 days—and get the maximum benefit from it.

In the treatment of upper respiratory tract infections, Penbritin is the answer. And so often the only prescription needed.

Availability: Penbritin (ampicillin B.P.). Paediatric Tablets containing 125 mg.; Capsules, 250 and 500 mg.; Syrup, 125 mg./5 ml.; Syrup Forte, 250 mg./5 ml.; Injections, 100 mg., 250 mg., 500 mg.

Dosage: Children under 2 years: 62.5—125 mg.
2—10 years: 125—250 mg.

Adults: 250 mg.

All dosages q.d.s. a.c.

In severe infections these doses may be increased or Penbritin given by injection.

Contra-indication: Penicillin allergy.

Side effects: As with other penicillins.

Further information is available on request.

A double-blind comparison of Ferrodic with ferrous sulphate, both preparations containing 50 mg of ferrous iron and 12.5 mg ascorbic acid, in the treatment of iron-deficiency anaemia, showed that exactly equivalent haematinic effects were obtained with the two drugs. However, 'not only did Ferrodic cause side effects in a significantly smaller proportion of patients than ferrous sulphate, but the severity of such side effects was also significantly less with Ferrodic'.

(*Practitioner*, 1967, 198, 848)

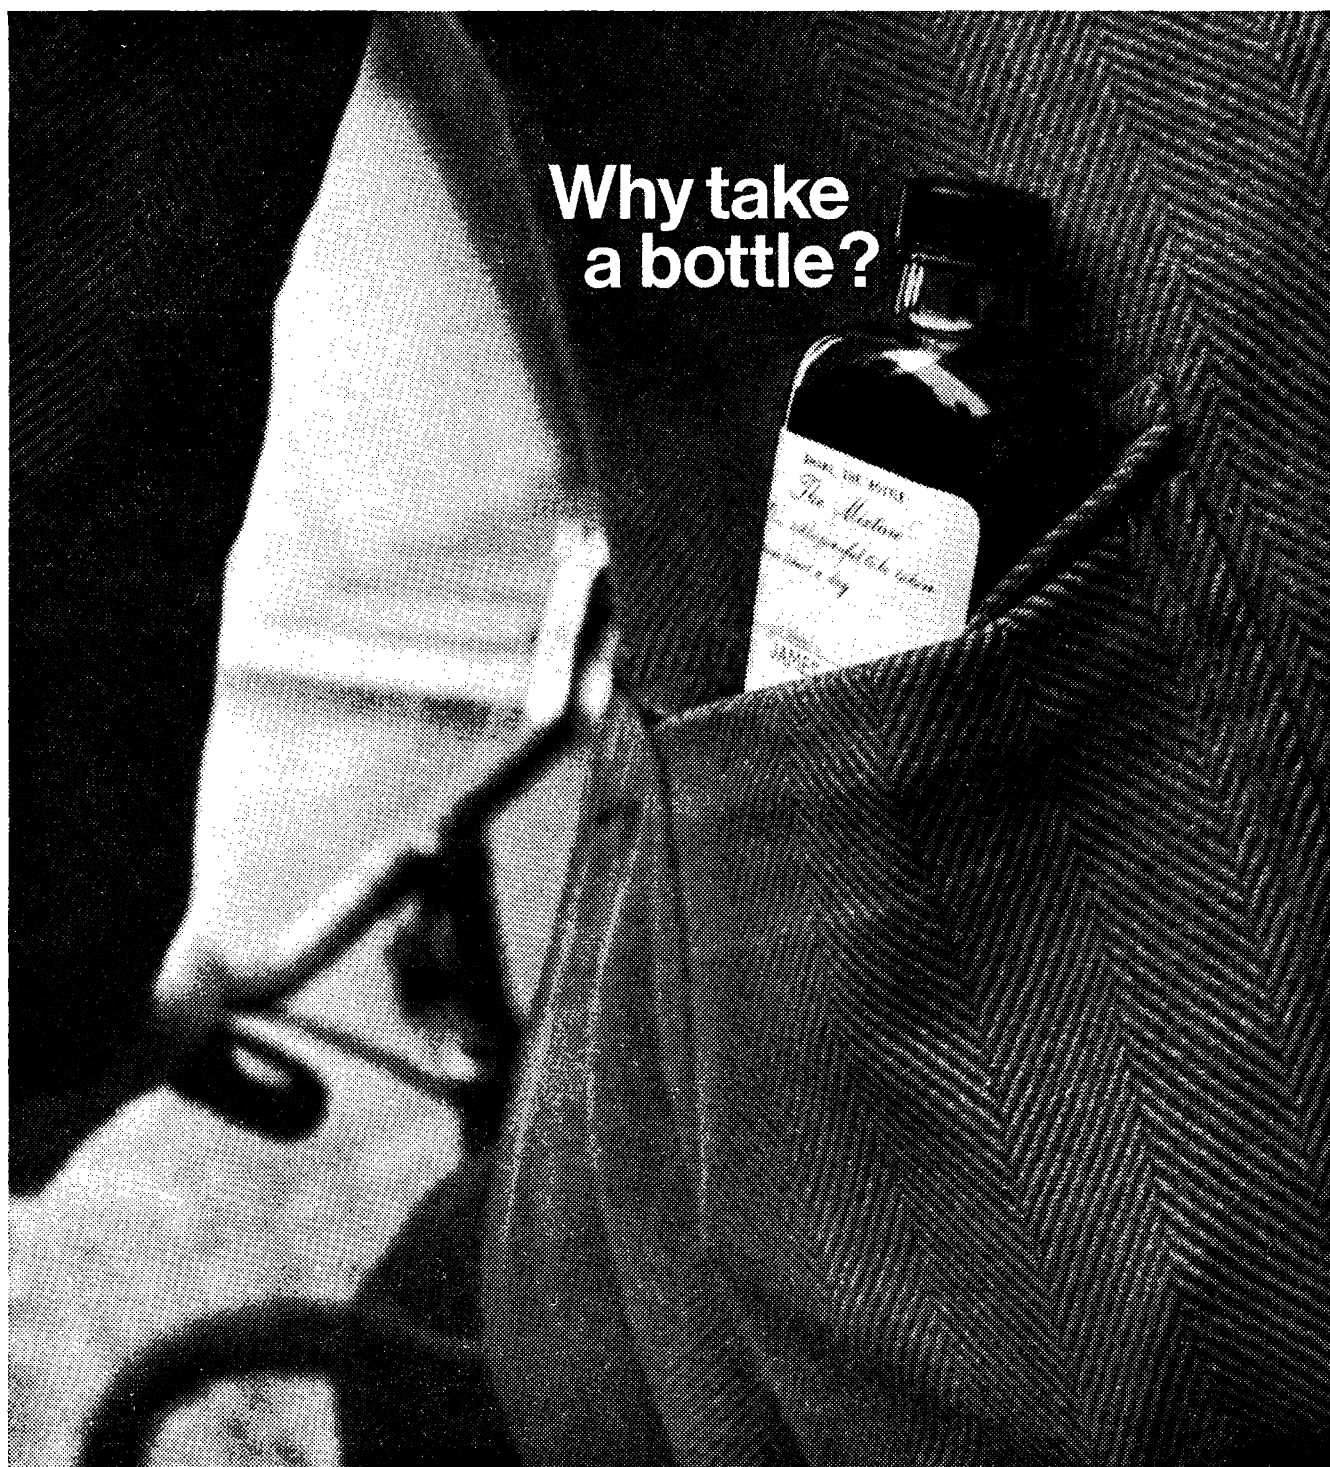

A very similar double-blind, clinical comparison of Ferrodic and ferrous sulphate has recently been published. The Author's purpose was to confirm the haematinic effectiveness and low incidence of side effects of Ferrodic, in view of its palatability and relative freedom from toxicity. The results again showed Ferrodic to have an equivalent haematinic effect to that of ferrous sulphate but 'side effects occurred in a significantly higher proportion of subjects who received ferrous sulphate'.

(*J. Therap. and Clin. Res.*, 1967, 1, 4.)

Ferrodic Tablets each contain ferrous iron (as ferrous carbonate) 50 mg and ascorbic acid 12.5 mg and are supplied in bottles of 100 tablets. Full information on request.

CONCORDIN[®]

Protriptyline hydrochloride

Patients with depression usually respond quickly to 'Concordin'. Fatigue and lethargy as well as the overall depressed mood are relieved, and the patient may very soon regain interest in everyday activities. This improvement often starts within a week and is generally not complicated by drug-induced sedation, as drowsiness is rare. The patient has full freedom in choice of food as 'Concordin' is *not* a monoamine oxidase inhibitor.

Each tablet of 'Concordin'-5 contains 5 mg protriptyline hydrochloride, each tablet of 'Concordin'-10 contains 10 mg. Detailed information is available to physicians on request.

Sustanon makes a man a man again

in body and in mind

When gonadal activity is inadequate the young or middle-aged male may demonstrate diminished genital structure, and response, to the point of impotence. Understandably the repercussions reach far beyond the purely physical – often playing havoc with the patient's psyche, marriage and career.

Every physician knows how complex is diagnosis of the condition, with the patient frequently hiding the facts not only from his doctor but *from himself*. Even when the diagnosis is established, therapy is not straightforward and many factors must be considered. Nevertheless with Sustanon a clear, early and sustained response may occur at all levels, physical, mental, and emotional.

Sustanon is preferable to testosterone propionate as of course no single testosterone ester provides both lengthy activity and rapid onset of action. This Sustanon does. Its prolonged activity is such that only an occasional injection is needed to maintain the required therapeutic level.

Sustanon '100'

2 weeks' activity – contains 100mg testosterone per ml:

Testosterone Propionate B.P. 20mg
Testosterone Phenylpropionate B.P. 40mg
Testosterone Isocaproate 40mg

Sustanon '250'

4 weeks' activity – contains 250mg testosterone per ml:

Testosterone Propionate B.P. 30mg
Testosterone Phenylpropionate B.P. 60mg
Testosterone Isocaproate 60mg
Testosterone Decanoate 100mg

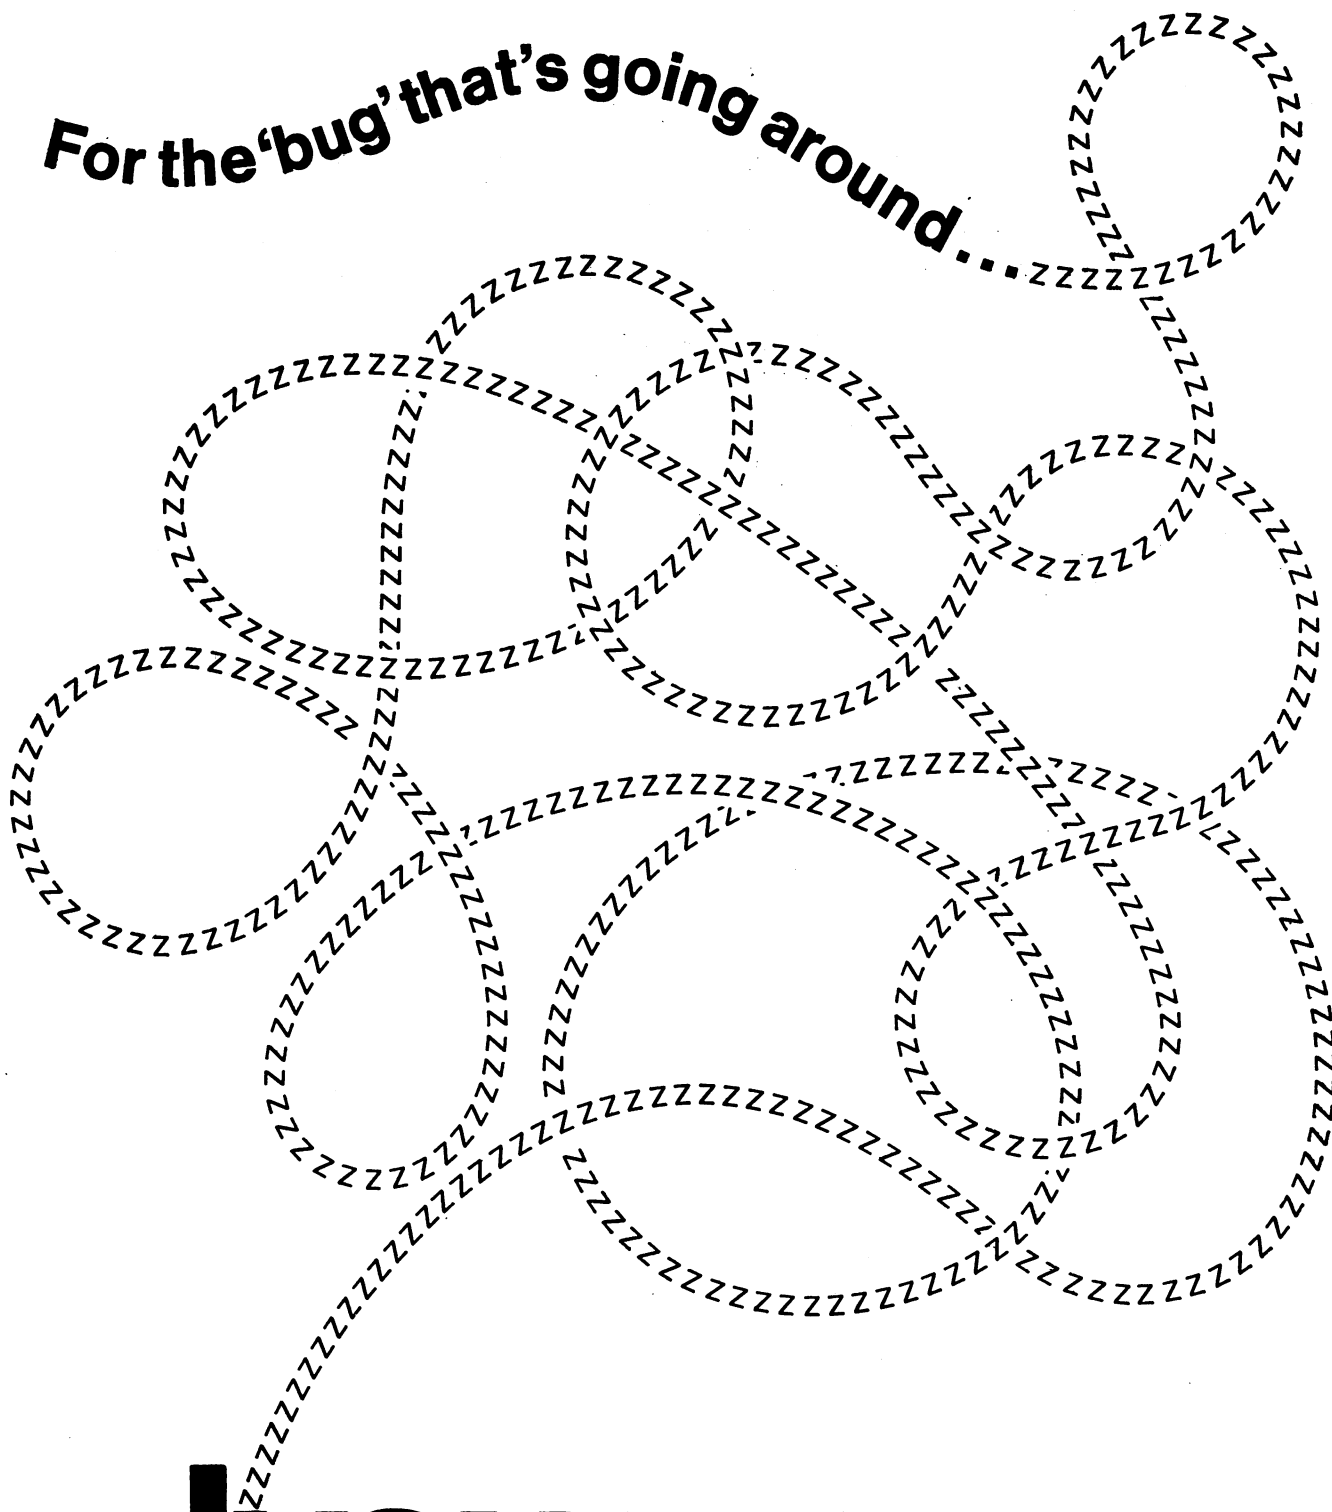

Packs: Boxes of 1 or 3 ampoules of 1 ml in either strength.
Single 1 ml Orgaject disposable syringes in either strength.
Contraindication: in males, carcinoma of the prostate.

PRONDOL
 a new anti-depressant

it's no more effective **BUT**... and it's a big BUT because, whilst PRONDOL* (iprindole, Wyeth) may not be more effective or rapid in action than older anti-depressants, it has been shown in clinical use^{1,4} to exhibit a lower incidence of the atropine-like side-effects which have often made anti-depressant therapy so unpleasant in the past. PRONDOL can thus be said to allow you greater treatment control in depression because of fewer treatment problems.

'Aldomet' + hydrochlorothiazide HYDROMET ✓

two complementary antihypertensive agents in one tablet

'Hydromet' is available as tablets containing methyl dopa BP equivalent to 250 mg anhydrous methyl dopa and 15 mg hydrochlorothiazide BP.

Detailed information is available to physicians on request. 'Hydromet' and 'Aldomet' are registered trademarks.

For many hypertensive patients, 'Hydromet' may be the most convenient treatment. 'Hydromet' contains both methyl dopa and hydrochlorothiazide, a combination already widely used in this country for the severer grades of hypertension. 'Hydromet' offers the patient these advantages:

- the convenience of a single tablet
- satisfactory control of blood pressure usually possible on a lower dosage of methyl dopa
- in some severe and resistant cases, a greater antihypertensive response than with methyl dopa alone
- the diuretic action of hydrochlorothiazide, of additional value when hypertension is complicated by heart failure and oedema

a good day's work demands a good night's sleep

Progress brings a growing complexity to everyday life; the once simple task becomes sophisticated and arduous; the day's work calls for increasing skill and concentration – and, at bedtime, people find it harder to 'unwind'... they find it difficult to get off to sleep or just don't sleep well.

Melsed is highly suitable for such people. It is a non-barbiturate hypnotic which will induce from six to eight hours of sleep – restful sleep, closely resembling the natural pattern. There is no initial phase of excitation after taking Melsed, and no residual drowsiness upon awakening. Cumulative effects are very unlikely at normal dosage, and there is a comfortably wide margin between therapeutic and toxic doses. Melsed is methaqualone, in capsules of 250 mg.

Melsed meets the demand!

AIM FOR THE BAD'UNS WITH 'ILOSONE'

With 'Ilosone', your aim is effective and selective. Killing off the pathogenic bacteria, allowing the normal gut flora to pursue their useful life.

The real 'bad 'uns', of course, are Gram positive cocci, causing most of the infections you see every day. Against these infections 'Ilosone' is much more active than, for example, the tetracyclines and it will not discolour teeth or deposit in bone. Nor is 'Ilosone' likely to cause diarrhoea or gastro-intestinal upset—disadvantages which the tetracyclines share with the broad spectrum penicillins.

Effective. Selective. Use 'Ilosone' when you go gunning for bad 'uns—in acute tonsillitis or acute bronchitis or any common bacterial infection of the upper respiratory tract. *Haemophilus influenzae*? Yes, 'Ilosone' deals with this 'bad 'un' too!

'Pulvules' of 250 mg* and 125 mg*; a pleasant tasting suspension containing 125 mg*/5 ml. *Base equivalent. Full information available on request.

Mixogen

Appreciating the limited role of sedatives and tranquillizers in what is essentially a metabolic disturbance, physicians are turning increasingly to the treatment that masters the immediate symptoms of depression and irritability and acts at a fundamental level as prophylaxis against the long-term consequences of ovarian-pituitary imbalance.

'Today when the average woman can expect to reach her threescore years and ten, it would seem unrealistic to deny hormone treatment, which not only alleviates all the troublesome and antisocial symptoms of the menopausal and postmenopausal phases but is also a prophylactic measure against osteoporosis, senile vaginitis, hypertension, and coronary heart disease, to mention but a few hazards of oestrogen depletion.'

The arguments against the use of plain oestrogen therapy – endometrial bleeding and nausea – are countered when Mixogen is used.

'Perhaps the best way of avoiding oestrogenic bleeding is to use one of the oestrogen-testosterone combinations, of which the original – Mixogen – is the best.'²

**Medical Adviser
Clinical Research**

Sandoz is a large international group of companies investing over fourteen million pounds annually in research in its interests in pharmaceuticals, chemicals and dyestuffs. It is noteworthy that during the last fifty years the Company's pharmaceutical success has rested virtually completely on the results of its own basic research work.

The Medical Research Department covers all aspects of the important and varied work of a medical department in a pharmaceutical house. The principal activity is the planning, organisation and administration of clinical investigations in an increasing number of interesting fields. Other aspects of the work include liaison with basic research divisions, negotiations with British drug authorities, the assessment of adverse reactions, the medical control of Company literature, and etc.

This is an additional appointment to the Medical Research Department's team. Applicants should be registered medical practitioners, ideally under 35 years of age, and have had several years postgraduate experience in hospitals or research. A sound knowledge of general medicine and therapeutics is essential. Some experience in clinical research or the pharmaceutical industry would be advantageous but broad clinical experience, initiative, and the capability for original thought would be equally valuable.

A salary commensurate with age, experience and qualifications will be offered. The Company operates a good contributory Pension Scheme with life assurance cover, a Company car scheme, and provides other additional benefits.

Applications, marked "In Confidence", should be addressed in writing to The Research Manager, Sandoz Products Limited, Sandoz House, 23 Great Castle Street, London, W.1.

SALARY SCALES OF HOSPITAL MEDICAL STAFF

Following the Seventh Report of the Review Body, new salary scales have been approved. These came into force on October 1, 1966. The scales are set out below:

HOUSE OFFICERS: Each post in this grade shall be tenable for six months. £1,100 per annum for the posts held during the first year; £1,200 per annum for posts held during the second year; £1,300 per annum for posts held during the third and subsequent years, subject to full registration.

Deductions of £150 per annum in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

SENIOR HOUSE OFFICERS: £1,450 per annum in the first year; £1,550 per annum in the second year; £1,650 per annum in the third or subsequent years.

Deductions of £175 per annum in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

REGISTRARS: £1,650 per annum, rising by four annual increments of £100 to £2,050.

Deductions of £175 per annum for those with remuneration at the first two points on the scale, and £200 per annum for those on the third and subsequent points will be made in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

On assimilation to the scale for Registrars, one increment and one only shall be given for any part or part of a year in excess of two spent previously in the senior house officer grade.

Allowances at rates up to £140 per annum shall be payable to house officers, senior house officers and registrars occupying posts approved for such allowances in peripheral hospitals.

SENIOR REGISTRARS: £1,950 per annum rising by one increment of £100 and four further annual increments of £25 to £2,550.

Deductions of £225 per annum in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

On assimilation to the salary scale for senior registrars, increments to a maximum of two shall be given for each year or part of a year in excess of three spent previously in the registrar grade.

MEDICAL ASSISTANTS: £1,850 per annum rising by fourteen annual increments of £100 to £3,250.

Deductions of £225 per annum in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

CONSULTANTS: £3,200 per annum rising by five annual increments of £185, and then by four further increments of £190 to £4,885.

Deductions of £350 per annum in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

Doctors with satisfactory training will not be excluded from consideration for appointment to consultant posts on the grounds that they have spent little or no time as senior registrars.

All National Health Service hospital appointments are in accordance with the Terms and Conditions of Service of Hospital Medical Staff. Memoranda on the following subjects of particular interest have been issued by the Ministry of Health: Standard of Residential Accommodation, Telephone Charges, Removal Allowances, Study Leave.

Further details may be obtained from the Hospital Secretary, or B.M.A. members may obtain summaries of the Memoranda or explanatory handouts from the Secretary, British Medical Association. (August, 1967)

Betnovate-N (Betnovate + 0.5% neomycin sulphate)

Cream: 15, 30 and 100 gram tubes

Ointment: 15, 30 and 100 gram tubes

Lotion: 20 ml bottle

Tulle*: tin of 10 pieces (4 in x 4 in)

*Now prescribable on the NHS except in Northern Ireland

Indications

All steroid-responsive dermatoses including psoriasis. Betnovate-N preparations should be used if bacterial infection is present or suspected. As an alternative or when there is fungal infection, Betnovate-C preparations may be used.

Dosage

Cream, ointment, lotion and scalp application

Apply a small quantity once or twice daily.

Tulle

Apply direct to the lesion and cover with an absorbent dressing if necessary.

Adverse reactions

Betnovate preparations are usually tolerated well but if signs of hypersensitivity appear, application should be stopped immediately. When used with occlusive dressings on extensive areas, or for prolonged periods, as with all topical steroids, there is a possibility of systemic absorption. When using Betnovate-C preparation for lesions with a dressing to protect it.
