Baby Bunter?

A lot of babies are well-covered rather than well-fed.

Between meal 'treats' spring immediately to mind. But you would probably agree, that there is often too much emphasis on starchy foods at mealtimes—particularly at breakfast and tea.

Yet the 77 varieties of Heinz Strained and Junior Foods make it easy for any mother to give her baby a balanced diet of meats,

vegetables, fruits, eggs, fish and cheese.

Last year special breakfast varieties were introduced. And, of course, any Heinz fruit variety is ideal for tea.

Heinz will gladly provide more information to help you to advise mothers. If you have any questions, write to the Baby Foods Information Service, H. J. Heinz Co. Ltd., Hayes Park, Hayes, Middx.

Heinz Baby Foods are in both cans and jars, but cans cost less and offer more varieties.

Professor Polson and Dr. Tattersall have revised their standard work and have taken the opportunity to rewrite several sections and introduce new material to bring the text up to date. Coverage has also been extended to include a number of poisons omitted from the first edition. In considering domestic poisoning, the book attempts to answer three main questions: in what ways can such poisoning occur, what are its ill effects, and what is the appropriate treatment? Also provided are background such as lethal doses, post-mortem findings and so forth.

With ORLEST
the new combined 28-day oral contraceptive
she won't have to remember

Until now a woman taking a combined oral contraceptive has had to play something of a memory game. Three weeks on the pill, then stop. One week off, then start.

Now Orlest* 28 1 mg. is presented as a simple 'no interruption' course—and not a sequential treatment. The 28-day course consists of 21 yellow tablets containing both norethisterone acetate 1 mg. (a low progestogen formula) and ethinyloestradiol 0.05 mg. (an established oestrogen) and 7 white tablets containing a placebo which are taken during the normal menstruation period. Extensive tests have shown that Orlest has an appreciably low incidence of side effects.

With Orlest there are no more starting day problems. Virtually eliminates patient error. No more forgetting.

Break the threadworm life-cycle with single-dose Pripsen

Threadworms often infect families, one child can infect the others.

A single dose of Pripsen, taken by each member of the family, can eradicate threadworm infection. Pripsen treats the affected child and protects others against infection. As a precaution against possible re-infection a second dose of Pripsen should be given after two weeks.

Pripsen (piperazine phosphate and standardized senna) is also effective against roundworms.

Tube of 10G (one full dose). Tins of 80G (dose measure enclosed).
Pripsen can be mixed with milk or water.

To all prescribers of the Anusol range...

there is now ANUGESIC-HC for patients with painful piles

The Anusol range began with Anusol suppositories and ointment – still among the most widely prescribed ano-rectal preparations. Then came Anusol-HC, adding the powerful anti-inflammatory effect of hydrocortisone acetate.

Now there is Anugesic-HC which contains, in addition, a highly effective local analgesic, pramoxine. Anugesic-HC is for the patient with considerable ano-rectal discomfort. Its analgesic constituent is unrelated to the 'caine' derivatives and has little or no sensitization potential. At the same time Anugesic-HC contains hydrocortisone acetate to reduce inflammation, with emollient and astringent agents.

ANUGESIC-HC

Suppositories, and water-miscible cream that does not stain clothing. Contains hydrocortisone acetate and pramoxine hydrochloride, with astringent and emollient agents.

ANUSOL-HC

Senokot restores natural rhythm to the constipated colon

Senokot, standardized senna, has earned a reputation for effectiveness and safety. Over 150 references in medical journals and text books testify to its value. Senokot is suitable for all ages and is useful in pregnancy and in geriatric cases. It is predictable in its action and, taken in the correct dosage, is free from griping. Acting specifically in the colon, it induces controlled peristaltic action and restores the normal defaecation reflex leading to re-education of the bowel.

From dispensing packs, the basic NHS cost of a teaspoonful of granules or two tablets is about a halfpenny; thus treatment with Senokot is very economical.

In addition to granules and tablets, there is now a syrup presentation – a highly acceptable form, specially suited to the needs of children and elderly patients.

Tablets: 50, 100 and 200. Granules (chocolate flavoured): 56 and 170 grammes. Syrup: 150 millilitre bottle.

Cetiprin[®]

is altering established habits
of rising at night to pass water

The results of a recent double-blind crossover trial of Cetiprin suggest that "the drug may alter the established habit of rising at night to pass urine."¹

"This trial showed that emeprium bromide (Cetiprin) given in dosage of 150 mgs. on going to bed, effectively diminished nocturnal frequency of micturition in aged women. On the basis of a double-blind crossover trial an important difference emerged between those participants given the placebo before the drug, and those given the drug first. In the first case, there is little effect with the placebo but a moderate effect with the drug. In the latter case, there is a more marked effect with the drug - and this is carried over into the placebo period."²

"Nocturnal frequency of micturition is one of the trials of old age. In a previous paper we have shown it to be present in 64% of the total elderly population (70% of males and 61% of females of 65 years and over)."³

No lactation problem for this mother – thanks to the outstanding new single-tablet lactation inhibitor, Estrovis. Just one tablet of Estrovis, a few hours after delivery, prevented

lactation, once and for all. So that's one thing less for this busy mother to worry about. Estrovis (quinestrol[†]) is a new, orally-administered oestrogen for

inhibition and suppression of lactation. Clinical work indicates that a single tablet of Estrovis will successfully and completely inhibit lactation in over 80% of women. Estrovis is equally valuable for suppression of established lactation. Estrovis* is supplied as tablets of 4 mg. quinestrol[†]. Full information is available on request.

(Trimethoprim and Sulphamethoxazole)

- 'Septrin' acts quickly and decisively.
- eradicates common pathogens – including
H. influenzae, *Pneumococci*, *Proteus* sp., *E. coli*, *Klebsiella* sp.
- effective against penicillinase-producing organisms.
- new mode of bactericidal action overcomes problems of bacterial resistance.

clearly superior in URINARY INFECTION

'Septrin' was compared with ampicillin and sulphadimidine in the treatment of 106 hospitalised patients with urinary infections. Cure rates one week after finishing treatment were: 'Septrin' 85 per cent, ampicillin 70 per cent, and sulphadimidine 40 per cent; and after four or five weeks 67, 52 and 15 per cent respectively. (Cure=eradication of original organism from urine).¹

'Septrin' was "... clearly superior to either of the other treatments, and this superior effect was even more appreciable in the re-treatment of patients who had failed on another drug."²

dramatically effective in BRONCHITIS

"We ourselves have repeatedly observed rapid relief with diminished volume and purulence of the sputum and disappearance of pathogens, from treatment with trimethoprim and sulphamethoxazole."¹

"... a combination of trimethoprim and sulphamethoxazole provided effective prophylaxis in chronic bronchitis. It dramatically diminished sputum volume, rendered it mucoid and abolished pathogens."²

BRITISH MEDICAL ASSOCIATION REGIONAL MEDICAL SECRETARY BASED ON BIRMINGHAM

The Council of the British Medical Association invites applications from registered medical practitioners for the post of Regional Secretary. The post is a new one, based on the Council's policy of decentralization. The Regional Medical Secretary will be in charge of the Association's Birmingham office and his duties will consist generally in supervising and promoting the Association's activities in the Midlands and surrounding area.

The successful candidate will be based on the Association's Birmingham office and will be required to reside in the area. He will be expected to travel widely throughout the whole of his region, to attend Branch and Division meetings whenever practicable, and generally to advise and assist the profession locally.

The salary scale for this appointment is £3,800 by £200-£4,600 per annum but in fixing the starting salary regard may be had to the successful candidate's age and experience. Although the appointment is a whole-time one, the Council would be prepared to consider applications from candidates with other commitments which would not prevent them from devoting the major part of their time to the duties of the post.

The appointment will be for a probationary period of six months in the first instance, and thereafter may be terminated by six months' notice on either side. The post, which is superannuable, offers opportunities for promotion within the Association's medical secretariat.

Applications, giving details of qualifications and experience, and accompanied by the names of three persons to whom reference may be made, should be addressed to the Secretary of the Association, B.M.A. House, Tavistock Square, London W.C.1, and must be received not later than August 11, 1969.

When you prescribe elastic stockings

Scholl make sure the patient wears them

Scholl know as well as you do just how much women hate the idea of elastic hosiery. And that though they'll often take the prescription, they don't always wear the stockings.

So Scholl make their elastic hosiery attractive by making the stockings as un-detectable as possible. They conform to all the specifications of the Drug Tariff and they give the patient all the support and comfort you want her to have. But they look nicer than ordinary elastic stockings. Feel lighter. So that your patient doesn't feel embarrassed by them. And instead of leaving them in the drawer, she wears them.

Scholl 'Soft Grip' for conditions requiring 'Elastic Yarn Standard Weight'.

Worn *under* normal sheer nylons, Soft Grip are almost invisible. They are made in double-expansion mesh with two-way elasticity to provide firm, even support *around* the leg with plenty of comfortable 'give' lengthwise.

Scholl 'Nylastik' for cases needing 'Lightweight Elastic Yarn Stockings'.

Nylastik are worn instead of nylons, and, on the leg, appear almost indistinguishable from an ordinary 30 denier stretch stocking.

Vacancy for a Medical Officer IN COMMONWEALTH WEST AFRICA

This vacancy offers an opportunity to a medical practitioner who wishes to work for a short or for a long period overseas. Service can be for a single period of 18 months or if so desired can continue for any number of tours of 18 months with paid home leave between tours.

The minimum professional requirement is 2-5 years' post-qualification experience and registration with the G.M.C.

The vacancy is on the Medical Staff of The United Africa Company Limited, a member of the Unilever Group. The Company employs a number of Doctors in Nigeria, Ghana and The Cameroons. While general medicine is the main feature of the work some knowledge and experience of emergency surgery and obstetrics will be necessary.

It is not possible to quote the level of salary which will be offered because this will be dependent upon the experience of the individual candidate appointed. In any case overseas rates of pay need to be fully explained before the applicant can evaluate them. This will be done at interviews in London.

Passages are paid by the Company to and from Africa at the beginning and end of each tour and passages are also provided for wife and children. The Company provides fully furnished accommodation. If children are at school in the U.K., Education Allowances are paid and free holiday passages are arranged. There is a contributory Pension Fund and Cash Benefits.

Applications should be made to:

MEDICAL OFFICERS

Good short term
contracts
with Anglo American
in Zambia

The Anglo American Corporation Group is the largest mining finance organisation in the world. In Zambia the Group mines copper and lead-zinc; as the world's fourth largest producer of copper, Zambia has an output that represents 90% of the country's exports. Well over half the copper is mined by Anglo American. To give you an outline picture of the well-equipped medical facilities provided at four centres by the Group, take Nchanga mine at Chingola: there are two hospitals, one contributory and fee-paying, the other non-fee-paying. Both have diagnostic, radiological and laboratory services. There are nine medical officers including a Chief Medical Officer, a Specialist Surgeon and Physician, and a visiting Radiologist. Zambia Broken Hill Development Company at Kabwe operates three clinics for employees and their dependants, and has facilities at the Government hospital for the hospitalisation of mine patients under the care of the Mine Medical Officers who number three, including the Chief Medical Officer. Duties are of a general nature, including hospital care of patients and domiciliary visiting; obstetrics, anaesthetics and surgery.

VACANCIES

From time to time vacancies arise for Medical Officers on a contract period

of three years. Typical minimum salaries would not be less than K6,400 per annum (equivalent to £3,733 sterling). Other benefits include Christmas Bonus, terminal gratuity, educational allowances, partly furnished accommodation at moderate rentals, and free return passages to and from Zambia. There are generous leave conditions. A car allowance is paid and an initial interest free loan is also available for the purchase of a car.

Short-term locums

There are occasional locum appointments for minimum periods of 2 months. Terms and conditions differ from the more permanent positions but they are no less attractive.

The sunny climate of Zambia, the full social life, and the many sports and cultural activities one can take up make for a most enjoyable time. Swimming, tennis, sailing; amateur dramatics; these are just a few ways in which you can live a really satisfying off-duty life. Posts are usually filled for an initial contract period of three years.

two infective organisms

one effective treatment

Intense irritation and an unpleasant discharge are the uncomfortable presenting symptoms of vaginitis and may be caused by monilia, trichomonas or a mixture of both.

Pimafucin relieves irritation and stops the discharge in these cases of vaginitis, because it is effective against both candida and trichomonas whether these present singly or in combination.

Indications: Vaginitis, whether due to monilial, trichomonal or a mixed infection. A differential diagnosis between these three states need not be made.

Dosage: On retiring, one Pimafucin vaginal tablet is inserted high into the vagina using the plastic applicator. A course of Pimafucin lasts for 21 days, to give complete eradication of the underlying pathogen, and prevent recurrence of the original symptoms.

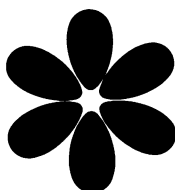

Side-Effects: Occasional local irritation has been reported.

Special Precautions: No special precautions or contra-indications have been indicated by clinical trials and investigations.

Presentation: Each tablet contains 25mg. natamycin. One pack contains 21 tablets and a plastic applicator.

Basic N.H.S. cost: One course of Pimafucin, including applicator, 25/-.

What are *Nacton forte* ^{regd.} conditions

The symptoms suggest a peptic ulcer—your patient has chronic epigastric pain associated with food. He worries—and he smokes too much. You'll refer him for radiological examination, meanwhile you'll want to control that persistent pain.

Sometimes radiological examination fails to confirm the ulcer—but your patient still has all the symptoms: dyspepsia associated with food, interrupted sleep. The pain continues and antacids only give temporary relief.

Then there are the relapsed cases. The patient who thought his ulcer was healed, now he's back with all the old symptoms—he leads a miserably restricted life and he's beginning to think the pain is a life sentence.

These are *Nacton forte* conditions

Nacton forte—a new presentation from Bencard—provides the most convenient, effective dose of poldine methylsulphate B.P. (4 mg.) in a single tablet.

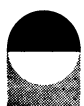

Nacton forte:

* Controls pain at source by continuously reducing gastric acid secretion.

* Eliminates routine need for antacids.

* Leaves the electrolyte balance of the body undisturbed—so supplementary therapy is not required.

* Will not induce side-effects in the majority of patients
