URINARY TRACT INFECTION

Treatment

PENBRITIN

She has a history of urinary tract infection in pregnancy and was distressed rather than concerned when the symptoms recurred this time. The concern is yours, for you know that the renal tissue may already be infected—or could become so if this infection ascends. And that a chronic and serious condition may result. You need an antimicrobial agent which will minimise these risks.

Penbritin is the answer—*first time*

Highly active against the common domiciliary causes of urinary tract infection (*E. coli*, *Proteus mirabilis* and *Strep. faecalis*). Not only active, but bactericidal—killing rather than just inhibiting. And bactericidal not only in urine, where very high levels are achieved, but also in the bloodstream and renal tissue.

This combination of extensive bactericidal activity with effective concentration at the possible sites of urinary infection means the elimination of sensitive organisms from the renal tract, and the minimum risk of relapse—well proven in clinical trials.

Penbritin also brings the safety of a penicillin to the treatment of urinary tract infections, particularly important in your pregnant patients. And in severe cases, for instance acute pyelonephritis, treatment may be commenced by injection.

In the treatment of urinary tract infections, Penbritin is the answer—first time. And so often the only prescription needed.

Availability: Penbritin (ampicillin B.P.)

Capsules, 250 and 500 mg.
Injections, 100 mg, 250 mg, 500 mg.
Syrup, 125 mg/5 ml.

In most instances gastric ulcers are healed after only 4-6 weeks treatment with BIOGASTRONE. Disappearance of symptoms within 3-4 days of starting treatment is also commonly found. The need for antacid medication is eliminated after a few days.

This remarkably rapid improvement — both objective and subjective — is achieved with BIOGASTRONE because it actually heals gastric ulcers.

Henderson and Gillespie's Textbook of Psychiatry

Revised by IVOR R. C. BATCHELOR

This textbook takes its place between elementary introductions to the subject and texts which attempt to be comprehensive in their reference and in the ventilation of contending points of view. It is eclectic in orientation and in describing the psychological, physical, and social aspects of mental illness it provides a critical and balanced standpoint for students and practitioners. For this edition new chapters have been added on psy-

chiatric emergencies and forensic psychiatry; the currently important medico-social problems of alcoholism, drug addiction, suicide, and abortion have received fuller attention, and the delin-
eation of the affective paranoid and organic psychoses has been clarified.

Brain's Clinical Neurology

Revised by ROGER BANNISTER, C.B.E.

In preparing this new edition Dr. Bannister's aim has been to preserve the late Lord Brain's original intention of writing a book mainly for practitioners and students which emphasized the diagnosis and management of common neurological disorders. New sections have been added on isotope encephalography and echoencephalography; the chapter on vascular disease has been enlarged with new sections on temporal arteritis,

the subclavian steal syndrome, the management of transient ischaemic attacks, and vascular surgery. The classification of neuropathies and myopathies has been amended to include recent advances in knowledge. All sections dealing with treatment have been enlarged and brought fully up to date.

Acrodystrophic Neuropathy

J. D. SPILLANE *and* C. E. C. WELLS

For many years a triad of clinical signs—indolent and perforating plantar ulcers, blunted sense of temperature, and pain in toes and instep deepening to total loss as the analgesic boundary retreated upwards, melting away of the pedal long bones transforming the leg into a numb stump—was without pathological backing. The authors of this monograph recall the events which led to the

definition of this syndrome and established its diagnostic criteria. Sixteen cases, thirteen of them being under the direct care of the authors, occurring in South Wales are described. Familial cases are compared with those of uncertain genetic influence in which environmental and extrinsic factors are seen to predominate.

Basic Clinical Physiology

J. H. GREEN

This book has been written as an introductory text for students who wish to relate the basic concepts of human physiology to clinical medicine, but who do not wish to be overwhelmed by complex theoretical considerations. It will enable students of medicine, and those of professions supplementary

to medicine, to relate their physiological knowledge to the clinical cases seen on the ward. It will also be useful to anyone interested in bridging the gap between the pre-clinical and clinical subjects.

Brain's Diseases of the Nervous System

Revised by the late LORD BRAIN and J. N. WALTON

Professor Walton has carried out a complete revision of this book and has added a considerable amount of new matter. The chapter on disorders of muscle has been rewritten and a new section has been added dealing with general considerations of the ways in which disorders of nervous func-

tion may be brought about. All sections dealing with diagnosis and treatment have been brought up to date and references to recent literature added to most sections.

Marriage and Fertility of Women Suffering from Schizophrenia or Affective Disorders

BARBARA C. STEVENS

This book describes the first survey in England to establish the probability of marriage and fertility of psychiatric patients since the development of community-orientated psychiatry, and is an example of the application of modern demographic analysis to psychiatric problems. Over a thousand women suffering from schizophrenia and affective disorders were selected from admissions to a

London psychiatric hospital during the years 1955-63, and followed up after discharge to the end of 1966. Probability of marriage of these patients was compared with that of normal women of corresponding age observed during identical calendar periods.

Break the threadworm life-cycle with single-dose Pripsen

Threadworms often infect families, one child can infect the others.

A single dose of Pripsen, taken by each member of the family, can eradicate threadworm infection. Pripsen treats the affected child and protects others against infection. As a precaution against possible re-infection a second dose of Pripsen should be given after two weeks.

Pripsen (piperazine phosphate and standardized senna) is also effective against roundworms.

Tube of 10G (one full dose). Tins of 80G (dose measure enclosed).
Pripsen can be mixed with milk or water.

by a comfortable margin. In a recent report of a comparative trial* involving three antihypertensive agents satisfactory control of blood pressure was obtained with each drug.

With 'Esbatal' for instance, a standing diastolic pressure of 100 mm. Hg or less was achieved in 75% of cases. The authors pointed out that

'Esbatal', guanethidine and methyldopa are probably similar in their ability to control blood pressure. *It was found, however, that 'Esbatal' produced fewer uncomfortable side-effects and was preferred by more patients than were the other agents. introducing medihaler duo

**for prolonged action
rapid relief
insignificant cardiovascular effect...**

With *Medihaler-duo*, Riker makes a further notable contribution to bronchodilator therapy. *Medihaler-duo* enables the physician to make a more positive approach to reversal of airway obstruction in bronchial asthma and chronic bronchitis.

Medihaler-duo takes advantage of the finding that the bronchodilator effect of isoprenaline can be significantly enhanced by the action of phenylephrine. As a result, it is possible to obtain a greater response to treatment than would be experienced from comparable doses of isoprenaline administered alone. Moreover, this enhanced bronchodilator effect is achieved without significant change in pulse rate or blood pressure at recommended dosage. These results have been confirmed in clinical trials^{1,2,3,4,5,6,7}. With *Medihaler-duo*, relief is immediate in onset and often prolonged for three or more hours. Effect on the cardiovascular system has been found to be insignificant even in patients with uncomplicated hypertension.

...in bronchial asthma and chronic bronchitis

Composition *Medihaler-duo* contains a suspension of isoprenaline hydrochloride 8 mg./ml., phenylephrine bitartrate 12 mg./ml. and delivers to the patient a measured dose containing 0.16 mg. isoprenaline hydrochloride and 0.24 mg. phenylephrine bitartrate.

Contra-indications There are no absolute contra-indications, but *Medihaler-duo* should be used with caution in the presence of cardiac disease, hypertension or hyperthyroidism.

Side-effects Overdosage may cause dry mouth, palpitations, or nervousness.

Dosage Each puff from *Medihaler-duo* delivers a measured dose. One to three puffs should be sufficient to provide relief in most cases. It should not be necessary for the patient to take further treatment for at least thirty minutes, or more than eight treatments a day.

Children *Medihaler-duo* should be administered to children only under the supervision of a responsible adult.

What's the difference?

It is sometimes said that all BP standard brands of Tetracycline are as identical as the vertical lines of the two figures on the left.

They may look different but actually they're the same . . . right?

Wrong. In the case of **Co-Caps Tetracycline** anyway.

Firstly, Co-Caps Tetracycline cost less – 24/- per 100 capsules.

There's another very important difference. Quality.

When you prescribe generically the word "Co-Cap" is your guarantee of quality.

You know the high quality of the Tetracycline your patients are getting.

Yes, there is a difference with Co-Caps Tetracycline.

Are doctors immortal?

Some patients seem to think that doctors never die. Or become ill. Or have accidents.

But as a doctor you know that your chances of falling sick, or breaking a leg tomorrow are the same as everyone else's. And the effect on your life and family is much graver.

Your practice, for instance, must be kept going. So your income plunges overnight. And your life becomes stifled by financial worries: how to keep your family, meet school fees, pay the mortgage. To a sick man worry is a poisonous enemy.

That's why it's so wise to insure against sickness or early death. Wiser still to insure with the company run exclusively for doctors and dentists: the Medical Sick-ness Society.

You know that one day you may need this insurance. So write today. Together we'll find the policy which will work hardest for you.

Do it now.

ANTIBIOTICS AND THE INTESTINAL FLORA

Treatment with broad spectrum antibiotics suppresses the normal flora, which may be replaced by abnormal resistant organisms causing diarrhoea.

This change can be prevented or reversed by the implantation of *Lactobacillus acidophilus* which has been rendered antibiotic-resistant, and is thus able to multiply freely under these abnormal conditions. The products of growth of the organism are inimical to that of many other bacteria^{1, 2} and thus contribute to its rapid preponderance over other species.

Oral treatment with antibiotic-resistant *L. acidophilus* in the form of ENPAC has been shown to eliminate *Candida* from the faeces of infants with antibiotic-induced diarrhoea, with relief of symptoms succeeded by rapid gain in weight^{3, 4} and greatly to reduce the numbers of staphylococci in the faeces of patients treated with tetracyclines.⁵

BRITISH MEDICAL ASSOCIATION

REGIONAL MEDICAL SECRETARY BASED ON BIRMINGHAM

The Council of the British Medical Association invites applications from registered medical practitioners for the post of Regional Secretary. The post is a new one, based on the Council's policy of decentralization. The Regional Medical Secretary will be in charge of the Association's Birmingham office and his duties will consist generally in supervising and promoting the Association's activities in the Midlands and surrounding area.

The successful candidate will be based on the Association's Birmingham office and will be required to reside in the area. He will be expected to travel widely throughout the whole of his region, to attend Branch and Division meetings whenever practicable, and generally to advise and assist the profession locally.

The salary scale for this appointment is £3,800 by £200-£4,600 per annum but in fixing the starting salary regard may be had to the successful candidate's age and experience. Although the appointment is a whole-time one, the Council would be prepared to consider applications from candidates with other commitments which would not prevent them from devoting the major part of their time to the duties of the post.

The appointment will be for a probationary period of six months in the first instance, and thereafter may be terminated by six months' notice on either side. The post, which is superannuable, offers opportunities for promotion within the Association's medical secretariat.

Applications, giving details of qualifications and experience, and accompanied by the names of three persons to whom reference may be made, should be addressed to the Secretary of the Association, B.M.A. House, Tavistock Square, London W.C.1, and must be received not later than August 11, 1969.

BIRMINGHAM—WOLEY MUNICIPAL
(NORTHFIELD) PARLIAMENTARY
DIVISION

Applications are invited for a vacancy in medical practice due to resignation on September 30, 1969. List approximately 3,000. Surgery premises will not be available. Woley is a pleasant residential area on the south-western perimeter of the city bordering on Worcestershire. It was classified "designated" by the Medical Practices Committee on March 14, 1966, and the successful applicant will be entitled to the additional allowance of £400 per annum. Application forms (E.C.16A) and further details may be obtained from the undersigned. The closing date for the receipt of completed applications is July 26, 1969.—K. F. G. Day, Clerk, Birmingham Executive Council, Sutton New Road, Edgbaston, Birmingham 23 (Telephone 021-573 265). (H.8918)

COUNTY PALATINE OF CHESTER
NORTH SECTORS
EXECUTIVE COUNCIL FOR CHESHIRE
WINSFORD, CHESHIRE

A vacancy exists for a suitably qualified general medical practitioner to found a new group of doctors, to practise from a health centre serving the Mount Pleasant district of Winsford.

Winsford is a town of 20,000 population in a pleasant part of mid-Cheshire. It is being expanded under the Town Development Act, 1952, and the population is planned to increase to 30,000 by 1971, 40,000 by 1976, and ultimately to about 70,000. Considerable development has already taken place, including the provision of a large industrial estate serving modern industries, manufacturing products such as computers and pharmaceuticals.

It is planned to provide the Health Service for the town wholly from health centres, two of which should be operational in 1971, others following later. A new district general hospital is under construction seven miles away by the Manchester Regional Hospital Board, whose policy is to make general practitioner sessions appointments available in the new hospital. Appointments will also be available with the health department of the Cheshire County Council for general practitioners who wish to develop a particular interest in such specialties as paediatrics, geriatrics or psychological medicine.

The Mount Pleasant area of Winsford has a population of about 3,000 at present, building up to 8,000 by 1971, with further expansion following. Until the health centre opens, good, though temporary accommodation of a similar standard will be available for up to three doctors, together with their secretarial and attached nursing staff. The district is classified "designated" and will attract a special type "D" initial practice allowance, which guarantees that the doctor's net annual professional income for the first three years, or earlier if a partnership develops, will not be less than his previous net professional income, up to a maximum of £4,000 per annum. The experience expected will normally be about ten years as a qualified doctor, two of which should have been spent in hospital, and five in a busy general practice in this country. The personal qualities looked for are the ability to form and develop a sizeable integrated health team in the area.

Application forms and further information may be obtained from the undersigned, to whom completed forms should be sent by Monday, July 28, 1969. Enquiries from doctors not in a position to apply for the vacancy now advertised but interested in Winsford at a later stage of its development will also be welcome.—F. Hayter, Clerk of the Council, Cheshire Executive Council, 18 Nicholas Street, Chester. (H.9026)

(Recognized F.R.C.S.)
Applications are invited for a **SENIOR HOUSE OFFICER** in the accident and emergency department vacant on August 1. The department is in the charge of a full-time Consultant Surgeon, has five S.H.O.s and all emergency cases are admitted through the department, which is responsible for initial resuscitation. The department is equipped with apparatus for cardiac monitoring, positive pressure ventilation as well as x-ray image intensifiers and a Berman F.B. locator.
The hospital is the base hospital for the group and, therefore, has a large volume of acute cases in all specialties. It is being extensively redeveloped by a major capital building programme. A new intensive care unit has just been opened.
There is a close connexion with the teaching hospital at Cardiff, 10 miles to the west, and there is an extensive postgraduate education programme with a very good library. A new postgraduate centre has just been opened. The appointment gives ample opportunity to the holder to avail himself of these facilities.
The successful candidate will be expected to be resident on the nights on which he is on first call, which will on average be one night in five. If non-resident every assistance. There is a certain amount of married accommodation available in the control of the Hospital Management Committee.

Applications are invited from registered medical practitioners, with appropriate post-graduate qualifications, for posts of Specialist in Psychiatry at the above-mentioned hospitals.

Patients of repatriation hospitals are veterans of the two world wars, or more recent campaigns, and their eligible dependants. At each hospital there are a number of full-time Specialists, and Visiting Specialists attend on a regular sessional basis.

The hospital in Perth has 500 beds, and the psychiatric unit accommodates 29 male and 5 females. A new restoration centre, four miles from the city, caters for 18 in-patients and up to 20 day patients. The department also has patients at a State psychiatric hospital. Most out-patients attend a clinic located near the city proper.

The hospital in Adelaide has 400 beds and the psychiatric unit accommodates 39 male in-patients and a limited number of females. Attached to the unit is a modern out-patients' clinic, which is planned to also include a day hospital. At "Birralee" Hospital, in the Adelaide Hills, a number of beds are available for convalescent psychiatric patients. For long-term cases, the department has two wards at a State mental health service hospital.

Salary will be within the range \$8,638-\$10,828, and the commencing rate will be determined on qualifications and experience. Subject to medical fitness, the successful applicants will be permanently appointed to the Commonwealth Service and will be eligible to contribute to a superannuation scheme. Appointees will also receive generous recreation, sick and long service leave entitlements. On completion of a bond of service for three years, the appointees' and dependants' first-class fares to Australia will be paid by the Commonwealth and some assistance may also be given towards the removal of effects. The department will arrange initial accommodation and in the case of married appointees, a reasonable "settling-in" allowance may be paid for a limited period.

BIOCHEMISTS

SOUTH-EASTERN REGIONAL HOSPITAL BOARD, Scotland

Applications are invited for the post of **SENIOR GRADE BIOCHEMIST** in the department of clinical chemistry at the Western General Hospital, Edinburgh, a recently re-equipped department which occupies new laboratories. The department provides a service commitment for an 1,100-bedded group, including the Nuffield organ transplant unit, and offers excellent opportunities for further training leading to a higher qualification, in particular, the M.C.B. The successful candidate will be expected to collaborate in research in addition to the service commitment.

Whitley Council conditions of service apply. Further particulars may be obtained from the Secretary, South-Eastern Regional Hospital Board, Scotland, 11 Drumsheugh Gardens, Edinburgh EH3 7QQ, with whom applications, giving the names of two referees, should be lodged within four weeks from the date of this advertisement. (H.8994)

UNITED MANCHESTER HOSPITALS

SENIOR GRADE BIOCHEMIST required for group biochemistry service. Successful candidate will have special responsibility for paediatric biochemistry originating from the new Saint Mary's Maternity Hospital which will include an intensive-care unit for neonates. Facilities available for research in this field and for general training for the M.C.B. Previous paediatric experience desirable but not essential. Salary in accordance with Whitley Council scales. Detailed applications, naming two referees, to Dr. A. H. Gowenlock, Director of Biochemistry, Manchester Royal Infirmary, Manchester M13 9WL. (19619)

ST. ANDREW'S HOSPITAL
NORTHAMPTON

Medical Director: James Harper, M.B., F.R.C.P. (Edin.), D.P.M.

St. Andrew's Hospital is a private psychiatric hospital situated in 130 acres of parkland in the county town of Northampton. In general, patients are admitted to Wantage House, a reception unit in the grounds, which is equipped for the investigation and treatment of all forms of mental and nervous illness. In addition, there is accommodation mainly in private rooms, both in the main hospital and in various villas, for longer stay patients and geriatric patients.

The hospital's amenities include Gloucester House, which comprises an occupational therapy department, swimming-pool, a squash court and library, while in the grounds there are tennis courts, a nine-hole golf course, etc.

Fees range from 25 guineas per week and charges for treatment at St. Andrew's Hospital are allowable for benefit to British United Provident Association and Private Patients Plan subscribers.

Further particulars can be obtained from the Medical Director, St. Andrew's Hospital, Northampton (Tel.: Northampton 34354), who can be seen in consultation by appointment either at the hospital or at 55 Harley Street, London W.1.

Suppositories in arthritis?

"... even the most cynical patients will quite often ask for a repeat prescription, to have in reserve for future use."*

Of course, the capsules are the more widely used form of 'Indocid'—nevertheless, "... those taking their ['Indocid'] capsules religiously every day will sometimes complain that they still have their 'early morning' stiffness in the affected joints. It is here that I think the Indocid suppository inserted at night will usually be of great value ..."

*GP, 4 Apr 1969, p 7

Yes—'Indocid' Indomethacin[®] Suppositories

to treat rheumatoid arthritis
and osteoarthritis
at night

'Indocid' Suppositories provide for most patients:

- rapid relief of pain—the patient can move more easily in bed
- long-lasting relief of pain—from bedtime, quite often till the following afternoon
- a better night's sleep—hypnotics are frequently unnecessary
- less stiffness in the morning—the patient can usually start his routine with greater mobility

Supplied as 100 mg suppositories, 25 mg capsules and a suspension (25 mg/5 ml).

Detailed information is available to physicians on request.
